PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, FIRST SESSION

SENATE—Wednesday, October 23, 1985

(Legislative day of Monday, October 21, 1985)

The Senate met at 8:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, we remember Lisa Gisvold today, and we ask that You be with this lovely little page. We thank You for successful surgery. We commend her now to Your loving care.

And ye shall know the truth and the truth shall set you free.—John 8:32.

God of truth and justice, help the Senators find their way through the glut of information to the truth. Immersed as they are in a cacophony of words—inundated with an overkill of messages—blasted again and again by a barrage of competing, conflicting, confusing claims—help them and their staffs think their way to light. We thank Thee, Lord, that truth is a fortress—error a house of cards. There is nothing more secure than truth—nothing more vulnerable than error. Under pressure of hundreds of decisions, Lord, guide the Senate to what is right and give them grace to do it. In the name of Him who is truth. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished acting majority leader is recognized.

SCHEDULE

Mr. ANDREWS. Mr. President, the two leaders will be recognized under the standing order for 10 minutes each. We will then move into routine morning business not to extend beyond the hour of 9 a.m., with Senators permitted to speak therein for not more than 5 minutes each. Following morning business, Mr. President, at 9 a.m. the Senate will begin consideration of H.R. 3244, the Transportation appropriations bill. Votes can be expected prior to the hour of 12 noon in relation to the Transportation appropriations bill.

Also, in the afternoon it will be the intention of the majority leader to resume consideration of S. 1730, the reconciliation bill. Votes can be expected throughout the day and possibly into the evening in the hope of completing action on the reconciliation bill.

Mr. President, I reserve the remainder of the majority leader's time.

(Mr. WARNER assumed the chair.)

Mr. SIMPSON. Mr. President, I want to thank my good friend Senator ANDREWS for a very good effort at pinch-hitting for me. I was trapped in a rather fascinating array of traffic. I thank the Senator from North Dakota, and also the occupant of the chair, Senator WARNER, for their assistance.

I just want to take a very few minutes of the majority leader's time to share with you, I guess it would be best called, a truth, without calling it a frustration. In my 7 years here in this remarkable arena, I have seen us do a remarkable ritual. In my home State we have a rather fascinating bird called a sage chicken. Every spring it has a fascinating ritual that it goes through. It plumps itself and struts and goes through—I guess what would be best called—a type of primitive mating dance or something of that nature. It is rather fascinating to watch, however. It is annual. It comes without question.

We are doing that now. I can see this in my seventh year here. We are about to embark on "the Christmas crunch" and that is something we say will never happen again. We say that we are going to get out on October 1, then we say October 15, then we say November 1, then we say November 15, then we say Thanksgiving, then we say "maybe" December 1. But I can see this session headed right down to those early days before Christmas. I say that as one who now has the duty of assistant majority leader or whip. Sometimes I think that whip is about as rigid as an elongated noodle. I know that my good friend and fellow whip from California, Senator CRANSTON, shares that frustration.

I remember a famous bandleader who retired after many years. Someone said to him, "What is the most frequent request that you had over the years? He said it was, "Where is the restroom?"

The most frequent request I have ever had as whip, and I know Senator CRANSTON agrees with me, is "When do we get out of here?" Or "Do we get Friday off?" Or "Do we get Monday off?"

The answer to this now oft phrased inquiry is "Just before Christmas," as I see it.

Our patient and delightful leader yesterday had our fine Senate pages sing to our conference a few lyrics of "Jingle Bells." That was not for effect; it was for real.

I know the minority leader shares my view and the majority leader's view that we do have our business to do. I guess the most fascinating thing to me is we have only recently returned from a 5-week recess in August and upon the immediate return our colleagues said, "Are we going to be here Monday? Are we going to be here Friday?"

That seems to be all I have heard since the August recess.

We are not getting a great deal of our work done in these last days. The majority and minority leaders urge us on but to little avail.

I think it was Aldous Huxley who referred once in an essay to a certain person being "addicted to sloth." I think we tend to do that. I do, too. I do not leave myself out. I have a long way to travel when I go back to my native ground. I like to do that, too.

It seems that the more time off we get the more we crave. We are addicted to it.

Eight o'clock sessions do not seem to do it. The staff members out there in

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

the range of the box seem to remain quite creative and often creatively detached, I think. And I am sure they like Christmas, too. I have heard that.

I have heard of the most fascinating array of holds, halts, and stop orders, with cries of anguish and of pain, which are quite convincing and vexatious to both sides of the aisle.

We have work to do. It is both leaders' agenda and it is an agreed-upon one. I think we have to share with our colleagues that we can no longer protect you—or me—on Mondays and Fridays. Those things that you have already scheduled, on those weekdays in early December, may have to be revisited by your scheduler.

That is the way I see it. I have not visited with the majority leader, but that comes from my own 7-year assessment, one similar perhaps to the occupant of the chair. For my dear friend Senator WARNER and I came here in the same year, in 1978. I think we have heard and seen this ritual before.

We are going to be right in it again. So I urge upon my colleagues, do come over and do your business if you can feel stirred to do that on both sides of the aisle, because indeed, we only have 36 working days, not counting Saturdays, until December 20. Thirty-six working days. And I need not review the agenda with my colleagues, as they have seen it from the majority and minority leaders.

So, Mr. President, I would say in paraphrase of that fascinating ad, the future really is in your hands. We have business to do and we must perform it. That is what the American public expects of us.

I thank you for your indulgence in that little bit of railing, Mr. President. I do also know that if we continue this 8 o'clock schedule, or 8:30, that at least there will be one remarkable ally here with me. That is the fine Senator from Wisconsin, my fine friend Senator PROXMIRE. It is always a pleasure to see him here at his post this early hour each day.

Mr. President, I yield back whatever remaining time there may be.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. The Chair recognizes the Senator from Wisconsin for not to exceed 15 minutes.

Mr. PROXMIRE. Mr. President, I am going to use a small part of the minority leader's time and then ask unanimous consent that it be reserved for his later use today.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENT REAGAN REAFFIRMS HIS SUPPORT FOR RATIFICATION OF THE GENOCIDE CONVENTION THIS YEAR

Mr. PROXMIRE. Mr. President, 13 months ago, President Reagan first called upon the Senate to ratify the Genocide Convention. Last Wednesday, in a letter to the majority leader, Mr. DOLE, President Reagan reaffirmed his support for the Genocide Convention and urged the Senate to complete final action this year.

I am delighted that the President has taken this opportunity to reaffirm his position on the Genocide Convention—a convention that has been pending in this body since 1949.

In calling upon the Senate for ratification, President Reagan has joined a long line of Presidents—both Democratic and Republican, liberal and conservative—in supporting the Genocide Convention. Seven in all. Presidents Truman, Kennedy, Johnson, Nixon, Ford, Carter, and now President Reagan.

All of these Presidents have reached the same conclusion: The Genocide Convention is clearly in the national interest of the United States.

And as the President pointed out in his letter to the majority leader, "ratification of the convention would serve as an important statement in opposing the gross human rights abuses that the convention addresses." The President goes on to note that "we can also use this convention effectively in our efforts to expand human freedoms and fight human rights abuses across the world."

I couldn't agree more. While President Reagan and I differ on the value of two reservations—the so-called Helms-Lugar provisos—that were recommended by a slim majority of the Committee on Foreign Relations, I cannot help but echo his sentiments on the value of this human rights treaty.

Last September, when President Reagan first endorsed the Genocide Convention, we were faced with the imminent adjournment of the Senate, which permitted a threat of filibuster to frustrate the chances for action. But the Senate at that time made an overwhelming commitment, by a vote of 87 to 2, for a resolution committing this body to take prompt action on the Genocide Convention this year.

While we have not quite met that timetable—for prompt action—we can still meet the goal of completing final action on the Genocide Convention this year and I welcome President Reagan's efforts to further this goal.

I urge my colleagues to join me in supporting the President's request for action in the next few weeks.

I might note, Mr. President, that both the majority leader [Mr. DOLE], and the assistant majority leader [Mr. SIMPSON], are strong supporters of the Genocide Convention. Since it has been reported once again, for the sixth time, to the Senate floor for action, I think it is about time we acted on it and I hope and pray we do.

I ask unanimous consent that the President's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, DC, October 16, 1985.

Hon. ROBERT J. DOLE,
U.S. Senate,
Washington, DC.

DEAR SENATOR DOLE: We now have an important opportunity to reaffirm to the international community the fundamental and unswerving American commitment to human rights.

Last September, following an extensive review by the Executive Branch, I announced the Administration's vigorous support for ratification of the Genocide Convention. The Senate Foreign Relations Committee, after careful consideration, subsequently recommended that the Senate give its advice and consent to ratification of the Convention subject to eight provisions. I am convinced that ratification of the Convention with these eight provisions would further the national interest and fully protect the United States.

Ratification of the Convention would serve as an important statement in opposing the gross human rights abuses the Convention addresses. I believe that we can also use this Convention effectively in our efforts to expand human freedoms and fight human rights abuses around the world. Ratification of the Convention after thirty-seven years would serve to counter the criticisms the U.S. had received over the years for its failure to ratify.

I urge the Senate this year to give its advice and consent to ratification of the Genocide Convention with the eight provisions adopted by the Committee on Foreign Relations.

Sincerely,

RONALD REAGAN.

TIME TO FACE UP TO THE NATION'S $7 TRILLION MOUNTAIN OF DEBT

Mr. PROXMIRE. Mr. President, this country is racing into serious debt trouble. I do not mean just the Federal Government. I mean the country, all of the country. All of us know our Federal deficit in the fiscal year that ended last September 30 rose to well over $200 billion—an all-time record. We know that the total national debt is now crowding an appalling $2 trillion. But that is just the beginning. How about the other two principal sectors of the economy? How about corporate debt and consumer debt?

The debt news gets worse. Both corporate and consumer debt already exceed the Federal debt. Both are zipping along far ahead of growth in the gross national product. Corporate debt now exceeds $3 trillion—far and away the highest ever. A large proportion of American corporate business has bor-

rowed so heavily that in the next recession, business failure and bankruptcies will become epidemic.

The wave of corporate takeovers has aggravated this tendency in two ways. The most common takeover technique relies on borrowed money to buy the stock of the takeover object. When the takeover is accomplished, the new owners transfer the debt they accumulated to buy the stock in the acquired corporation to the corporation itself. In effect, the firm itself pays for the transfer of ownership. In the process, the corporation becomes more vulnerable, in many cases far more vulnerable, when a recession hits the industry.

Second, corporate debt has massively increased as corporations, fearing the prospect of being gobbled up by the new breed of takeover artists, adopt the most obvious and effective defense. They deliberately go into debt, heavily in debt. How does this work? The corporation that would avoid a takeover borrows money heavily to expand or simply to buy up its own stock. How does a large corporation with a 25 percent debt, 75 percent equity position avoid a takeover? That favorable debt-equity ratio makes it almost invulnerable to even the most prolonged and deep recession. The low debt also makes such a corporation a tempting takeover target to outsiders who see the opportunity to pay for their takeover by using the firm's unused borrowing capacity to repay them for the takeover cost. So to avoid a takeover, the corporation converts to a 75 percent debt, 25 percent equity posture. What is the result? The takeover boys lose interest. But in a cyclical industry, the new debt burden may mean insolvency for the corporation if business declines for a year or two.

The spectacular rise of consumer debt—and that debt now exceeds $2 trillion—may represent the most serious problem of all for our economy. Here is why: the recovery the economy has enjoyed since the fall of 1982 was triggered and then driven by a nearly 3-year consumer spending party, a real binge. Nothing in economics or economic behavior is predictable, but there are many reasons to believe that this particular party is almost over. Consider: consumer installment debt has now risen to the astonishing record level of 19 percent of disposal income. The old credit cards have really been working overtime. Meanwhile, the savings rate has fallen to an all time low. In September, it dropped for the fifth consecutive month. It is now down to less than 2 percent of disposal income. Both the Conference Board and the University of Michigan survey of consumer sentiment shows a declining confidence by consumers since midsummer. The Wall Street Journal reported on October 22 that consumers are now so burdened with this all-time record debt that they are able to save little and have few prospects of increased income. One top business economist declares that "monthly payments have reached a pain threshold." Another says, "Consumers are just stretched beyond their limits."

So why is this big rise in consumer debt and big fall in consumer sayings a problem for the economy? Answer: the driving force—consumer spending—that has swept the economy along for nearly 3 years seems to be fading. Consumers whose savings have dwindled and whose debt is already a painfully heavy burden will certainly tend to curtail their buying. As consumer demand fades, it will make it more difficult for both corporations with their $3 trillion debt and for the Federal Government with its $2 trillion debt. The corporations will suffer as consumer buying begins to fall. The Federal Government will find itself in a truly insoluble dilemma.

For many months now, we in Congress have been moaning and groaning about the mammoth Federal deficits. A sluggish economy means a bigger deficit. In fiscal 1984, which happened to be the best economic year since 33 long years before in 1951—in spite of rising revenues and falling welfare and unemployment costs—this Federal Government ran an obscenely irresponsible Federal deficit of $175 billion. During the 1985 fiscal year the economy moseyed along at a somewhat slower rate. It was no recession, but economic growth was a little below the historic 3-percent average growth for the American economy. So what happened to the deficit? The deficit soared to well over $200 billion. Now in the current 1986 fiscal year which we have just started, the level of the deficit will be as much determined by the performance of the economy as the performance of the Congress.

As usual the crystal ball is cloudy. But the coincidence right now of the alltime increase in both consumer debt and corporate debt and the all time fall in consumer savings is bad economic news. This could be a very mediocre year for the economy. That will mean a real struggle by us in the Congress to hold the deficit down even to the $191 billion level required for fiscal 1986 in Gramm-Rudman measure that passed the Senate.

Mr. President, Congress, the corporations and the people of this country have now built a $7 trillion high mountain of debt. This is a very serious debt problem. It is going to take a whale of a lot of luck, skill, sacrifice and blunt honesty to bring this monster under control. The next few years are going to be very challenging and exciting. And let us face it. They are also going to be very painful.

Mr. President, I ask unanimous consent that the article to which I referred from the October 22 Wall Street Journal headlined "After Three-Year Spending Binge, Consumers Seem To Be Exhausted," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AFTER THREE-YEAR SPENDING BINGE, CONSUMERS SEEM TO BE EXHAUSTED

(By Steve Weiner and Hank Gilman)

At a Washington counseling center that helps people with debt problems, the normal wait for an appointment is a week to 10 days. Now, the swamped office requires clients to arrange visits five weeks in advance.

"We charged and charged and charged and finally it became a nightmare," says one client, who asked not to be identified. His credit-card debts total $20,000. "Everything we lived for was to pay off the cards," he says.

After a spending binge of nearly three years, many signals indicate that consumers may be approaching exhaustion. Surveys show that their confidence is falling while personal bankruptcies and delinquency rates on loan payments and credit cards are rising. For most of this year, consumers have relied on savings and credit to pay for deficit spending. But now, burdened with record debt, they are able to save little—if any—money and have few prospects for significantly increased income.

"Monthly payments have reached a pain threshold," says Michael J. Drury, senior economist at A. Gary Shilling & Co. in New York. Adds Susan M. Sterne, chief economist for Economic Analysis Associates Inc. in Stowe, Vt.: "Consumers are just stretched out beyond their limits."

DECLINING CONFIDENCE

The evidence is certainly not conclusive. But the Conference Board, a business research group, says consumer confidence dropped for a second consecutive month in September, and a parallel University of Michigan survey has shown declining confidence since midsummer. Leo J. Shapiro, a Chicago market researcher, says his September consumer survey showed "mixed signals, but a lot of bad ones." Among them: Christmas buying plans are falling sharply, day-to-day spending has been reduced, and economic concerns are rising.

Meanwhile, companies like Sears, Roebuck & Co., J.C. Penney Co. and the lending business of Household International Inc. report that delinquency rates are rising. Debt-conscious Sears customers have paid back about $1.2 billion more credit card debt so far this year than during the same period in 1984. "Our customers continue to retrench and liquidate debt," says Peter R. Fisher, vice president and general credit manager.

That retrenchment may prove to be a disaster for retailers. Many economists now expect consumer spending to grow only one or two percentage points in the fourth quarter or only about half of what they had forecast just a few months ago. Some project flat spending. Although few observers expect consumer spending to slacken so much as to bring on a recession, pessimistic economists say six months to a year may pass before consumers resume their aggressive spending habits. And that threatens to taint Christmas for a second successive year.

"At this point, there's no pent-up demand for consumer goods," says Mr. Drury. "The outlook is for a rotten Christmas, and if spending drops as we expect, it takes the only engine out of the economy." Indeed, despite tighter inventory controls than last year, retailers may again be forced to cut prices sharply this holiday season.

HANDLING MORE DEBT?

Some economists and retailers argue that consumers can handle more debt. Longer loan payback periods and the growth in overall household assets, they say, mean monthly bills are less burdensome now than in 1979, the previous debt peak. More people use credit as a convenience, and more families are in the high-spending 25-to-44 age bracket, thus generally raising debt levels but not the ill effects of debt. The low savings rate, they add, may only be a statistical glitch.

"Middle-class and more affluent consumers are in good shape," declares Philip B. Miller, chairman and chief executive officer of Marshall Field's, the Chicago-based department store unit of B.A.T. Industries PLC. He is expecting an 8% sales gain this Christmas.

But a growing number of economists are becoming convinced that such gains are unlikely because of the squeeze on consumers' finances. "It's getting to the point where there's considerably more thought involved before someone goes out and makes a major purchase," says Walter Dolde, senior economist and vice president at Townsend-Greenspan & Co., in New York. He expects fourth-quarter consumer spending to grow less than 2%, down from 5% in the third quarter.

Ironically, robust spending on a single commodity—automobiles—has sapped much of consumers' remaining financial strength. Powered by rebates and low-interest financing, auto sales soared in the third quarter to an estimated annual rate of 12.3 million autos, up from the recent trend of 10.9 million, says Roy E. Moor, economist for First National Bank of Chicago.

Some retailers blame the strong auto sales for reducing consumer spending in other areas.

REALIGNED BUDGETS

"For us, it started the first of September," says Greenfield Pitts, a vice president at Harvey's department stores, based in Nashville, Tenn. "It looked like customers all met in Central Park at the end of August and said: 'Let's not buy in September.'

"Historically, it seems like when the auto business is good, ours isn't," Mr. Pitts adds. "People skimp for the downpayment and realign their budget and kind of leave us out until they get it in line."

In addition, economists note, an increasing number of consumers have lost control of their budgets; in the 12 months ended June 30, personal bankruptcies in the U.S. were up 6%. "What's going to happen when more and more credit is extended and things go bad again?" asks Ralph Spurgin, general credit manager at J.C. Penney. "The credit problem is going to be worse than ever."

Julie Lee, a Temple Hill, Md., teacher, has destroyed her credit cards after accumulating $4,000 in bills in two years. Like others, she used the cards as a convenient way to pay her bills. Eventually, she noticed she was doubling her normal spending by splurging on clothing, sporting goods and a vacation to England. Now, she says, she is "just buying the necessities and paying the bills."

As more people just pay the bills, says Mr. Drury of A. Gary Shilling, the immediate retail outlook will dim. He expects general-merchandise sales to be flat in the fourth quarter unless retailers, in a repeat of 1984, go on a wild spree of price cutting to induce spending.

"The consumer can hold out longer than the retailer," Mr. Drury says. Given the likely slowdown in auto sales, now that the size and number of incentive plans have been reduced, "you have a bleak picture for second-half retail sales," he adds.

THE NEGLECTED NUCLEAR THREAT

Mr. PROXMIRE. Mr President, consider the possibilities of nuclear war. That dreaded vision foresees a preemptive Russian strike taking out American cities and utterly devastating our country. American retaliation would then destroy Russian cities and the Soviet Union. This is the stuff for television spectaculars. Will it happen? The odds against it happening are at least 100 to 1, maybe 1,000 to 1. But the terrible prospect of an all-out superpower nuclear war so dwarfs any other scenario in the terror of its consequences that it has banished from the public mind other nuclear war possibilities that might be rated 1 to 10, and one or two nuclear war scenarios that are probable.

I am convinced this old world will suffer a limited—if we act decisively a very limited—nuclear war sometime in the next 10 years. After all, this country has adopted as settled conventional war doctrine that we will resort to first use of nuclear weapons in the event NATO would otherwise be in danger of losing a conventional war in Europe. To be sure, our initial use of nuclear weapons would be confined to the battlefield and to small tactical nuclear devices to be used as artillery shells and land mines designed to stop a Soviet tank breakthrough. But such a resort to small tactical nuclear weapons could swiftly escalate into a full fledged nuclear exchange, with the advantage going to whichever side struck with an all-out nuclear attack first.

A more likely—in fact, a probable—military eventuality will come from the use of nuclear weapons by a country that today lacks a significant nuclear capability. Once wars, including nuclear wars, begin, they are extremely difficult to end unless one of the adversaries can bring decisive military power to bear on the enemy. To a country desperately engaged in a struggle for survival, or a holy war to vindicate its special belief in God, the possession of even a very few nuclear weapons would come on like a gift from on high. Little Israel, with its highly concentrated population and the fanatical everlasting opposition of its enemies, could be a logical victim of state-directed terrorism with 8 or 10 nuclear bombs as the preeminent finisher. Of course, Israel could strike first with its own nuclear arsenal if its superb intelligence disclosed the threat before Israeli foes launched their nuclear war of extermination.

It seems almost inevitable that both India and Pakistan will be armed with sufficient nuclear capability to reduce most of Pakistan and much of India to radioactive rubble within 10 years or so. With a decisive advantage on the side of whoever strikes first, an eventual nuclear war between these embittered rivals seems highly possible. But for a scenario that makes nuclear war more than a strong possibility, consider Iran and Iraq.

Here are countries engaged in a bitter, terribly bloody war, driven by a religious fanaticism that is difficult for outsiders to understand. A few well-placed nuclear bombs in the hands of either power could mean a decisive and triumphant end to this double holy war. Both countries certainly have the economic power to buy the necessary nuclear weapons. They probably have the scientific expertise and the access to processed plutonium or highly enriched uranium to build the few weapons they would need. If this Iran-Iraq war and the speedy progress of technology in building ever cheaper and more devastating nuclear weapons goes on, we now know that war will end, with terrible nuclear devastation.

In discussing this situation, Tom Wicker, in the July 5 New York Times, argues that the recognition of the ultimate suicidal consequences that prevents a deliberate superpower nuclear war through deterrence does not apply to any of these situations involving the nonsuperpowers. He is absolutely right. This Nation pours tens of billions of dollars every year into building an ever more complex offensive and defensive nuclear weapons arsenal. We divert a massive proportion of our Nation's scientific genius into research designed to achieve temporary, fleeting advantage in a war which will almost certainly never be fought. Meanwhile, we have done far too little to arrest the nuclear proliferation that represents a far greater probability of triggering the beginning of a nuclear war. We have devoted even less to develop the means to contain a nuclear war once it starts. What policies have we adopted to discourage a nuclear attack by one of the growing number of nuclear armed nonsuperpowers?

Answer: Virtually nothing. Once a nuclear war begins anywhere, even if it involves only relatively small military powers, it could swiftly shoot out of control. It could easily and swiftly lead to the terrible Armageddon of the final war.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, yesterday I talked about the myth that a United States-Soviet arms race would place unbearable strains on the Soviet economy. I entered into the RECORD a Foreign Policy article by John W. Kiser that showed that an arms race would have more positive effects for the Soviets than we realize.

Today, I wish to talk about another myth that has been circulating around lately. This one is about star wars.

The myth is that the Soviets fear the technological superiority of the United States and therefore are terrified of President Reagan's Strategic Defense Initiative.

In fact, we have seen Mr. Reagan and other administration officials ride this myth by saying that SDI must be good because it has the Soviets so worried.

Well, Mr. President, John Kiser's article in the fall 1985 issue of Foreign Policy lays out a few facts that tell a different story.

Yes, the Soviets will pay a heavy economic price if they get into an SDI race with the United States. But that race might well produce two consequences that would not be advantageous for the United States.

First, while there is considerable debate whether the Soviets are ahead or behind us in many areas of SDI technology, everyone agrees that the Soviets are weaker than we in one major area critical to SDI—computer technology and integrated computer systems.

A star wars race would force the Soviets to improve their computer technology industry. And that improvement may result in "a variety of positive organizational changes" for the Soviet Government and its economy. In other words, star wars might just be the stimulus to propel the Soviets into the computer world, a stimulus they might never be able to generate from within.

Second, we may be repeating the tortoise and the hare story here. It appears obvious that the congressional honeymoon with SDI will not last. Congressional and executive branch support for SDI may well be inconsistent over the next two decades. The Pentagon procurement process is famous for its stops and starts.

On the other hand, as Kiser points out, "The Soviet system may be slow to crank up, but it is noted for a plodding, persistent pursuit of objectives once important decisions are made."

If the Soviets decide to build a comprehensive strategic defense system, we could well find them march toward a deployment, no matter what the United States does. If a future administration in the 1990's—when a deployment decision is supposed to be made—decides that star wars is not feasible and should not be pursued by either side, that may not matter to the Soviets.

They may be at the point of no return, and like the tortoise, may just plod along until they reach the end of the race.

The genie may be out of the bottle for good.

And our myth may end up costing us dearly.

THE STEEL CRISIS: ONE YEAR LATER

Mr. BYRD. Mr. President, 1 year after the President announced his decision to reject the recommendations of the International Trade Commission and implement his own plan to help American steel producers, the steel industry continues to suffer from unfair competition. In August alone, 25 percent of the American steel market was occupied by foreign-produced steel. This is down from the 30 percent that foreign steel held in June, but it is far from the 18.5-percent maximum that the President promised American steelworkers.

American producers have engaged in the vigorous program of modernization and improvement that was required under the democratic legislation that was passed as the Steel Stabilization Act of 1985. But the administration promised American steelmakers market certainty during this adjustment period. Where is that certainty when one quarter of our steel needs still are being supplied by foreign sources?

The Congressional Research Service has described the current state of affairs in a new report, entitled, "The President's Steel Import Program: One Year Later." I urge my colleagues to examine this report, and consider its conclusions. The report points out that as presently constituted, the President's program cannot succeed in reducing imports to the President's goal of 18.5 percent, or even to the higher ceiling of 20.2 percent described in the Steel Stabilization Act.

I ask unanimous consent that the report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

THE PRESIDENT'S STEEL IMPORT PROGRAM: ONE YEAR LATER

ABSTRACT

The President's steel import restraint program has as its goal limiting imports of steel to 18.5 percent of the U.S. market for finished steel products and 20.2 percent for all steel products. One year after the announcement of the program, it appears that the goal for all steel products will only partially be achieved for the 1986-89 period. The import market share for all steel products could be reduced, but only to about 22.6 percent of the U.S. market. The ultimate success of the program hinges on the results of negotiations of voluntary export restraint agreements with countries or regions not presently subject to them.

INTRODUCTION AND SUMMARY OF MAJOR CONCLUSIONS

On September 18, 1984, President Reagan announced his policy of limiting steel imports into the United States. Rejecting global quotas, the President directed the United States Trade Representative (USTR) to enter into negotiations with foreign suppliers of steel to the United States to conclude voluntary export restraint agreements (VERs) for five years through 1989. The President established a target of 18.5 percent market share for imports of finished steel products.[1]

Congress subsequently passed the Steel Import Stabilization Act as Title VIII of the Trade and Tariff Act of 1984 (P.L. 98-573). This Act authorized the President to enforce any VERs negotiated under the President's program. Section 803 of the Act established an import market share target for all steel products of 20.2 percent for the five years of the President's program.

By the end of September 1985, the USTR had concluded VERs with 14 countries. These VERs allocated somewhat more than 12 percent of the U.S. steel market to the 14 countries, down from about 15 percent in all of 1984.[2] In addition, negotiations were either in progress or about to begin with others, notably the European Community (EC). Imports from all sources as a share of the U.S. steel market were falling from their 1984 levels: in August 1984, steel imports captured 29.8 percent of the U.S. market; in August 1985, the import market share was down to 25.0 percent, owing to a drop in imports.[3] Clearly, there is evidence to suggest that the President's steel program was achieving at least some degree of success.

While there is no question that steel imports have fallen as a share of the U.S. steel market since the President's program took effect, serious doubts have been voiced that the import market share targets of both the President and Congress can be achieved.[4] The EC share of the U.S. steel market through August 1985 was nearly 7.0 percent, a considerably larger share than was envisaged under its steel agreement with the United States in 1982.[5] Canada, which has not been subject to any import limitations with the exception of certain specialty steel products, has a U.S. steel market share of 3.1 percent, or just short of its historically high 3.2-percent market in 1984.[6] Other non-VER countries, which account for about 8 percent of total U.S. steel imports, supply about 1.7 percent of the U.S. market.[7] If these countries not now covered by VERs were to maintain their current shares, then total import penetration of U.S. steel markets would likely be in the range of 24 percent. To achieve the import share targets of the President and the Congress will very likely require a dramatic reduction in steel imports from the non-VER countries on the order of about 32 percent. Given that the 14 VER countries accepted a reduction in U.S. steel market share of about 18 or 19 percent, it would be reasonable to at least raise doubts that the import shares of non-VER countries could be reduced by so much more.

This report examines the progress made in reducing steel import shares during the first year of the President's steel program,

---

Footnotes at end of article.

and the prospects for achieving the import share target established by Congress. The first section provides an estimate of the market shares allocated to the 14 VER countries. The second section examines the problems that are likely to emerge in compressing the import shares of the non-VER countries to meet the congressional import share target.

I. STEEL MARKET SHARES ALLOCATED UNDER VOLUNTARY EXPORT RESTRAINT AGREEMENTS

In the first year of the President's steel program, 14 VERs were negotiated. The countries covered are: Australia, Brazil, Czechoslovakia, East Germany, Finland, Hungary, Japan, Mexico, Poland, Romania, South Africa, South Korea, Spain, and Venezuela.[8] In 1984, these countries accounted for more than 56 percent of total steel imports into the United States and had a combined market share of about 15 percent of the U.S. steel market.[9]

Under the VERS, the 14 countries would be permitted to supply between 12.1 and 12.3 percent of the U.S. steel market from 1986 to 1989. These shares cover both finished and semifinished steel products. A more precise estimate cannot be provided, because 6 of the 14 VER countries have agreements that specify only a maximum import tonnage limitation that includes semifinished steel. Also, 8 of the 14 countries negotiated as part of their VERs separate additional allocations of semifinished steel, expressed only in terms of tonnage rather than market shares.[10] To calculate total steel import market shares for each country, the tonnage data, where relevant, are expressed as a percentage of estimated U.S. steel demand as projected by Data Resources, Incorporated.[11] Table 1 presents data summarizing the market shares and tonnage allocations under the 14 VERs concluded by the end of September 1985.

Under these VERs, the 14 VER countries would have a smaller shares of the U.S. steel market under the President's steel import program than in 1984. Together, they captured about 15 percent of the U.S. steel market in 1984. Under the President's program, they would be able to supply from about 12.2 percent to 12.3 percent of U.S. steel demand. Thus, their combined share of the U.S. market would be reduced by about 18 or 19 percent.

TABLE 1.—ESTIMATED U.S. MARKET SHARES OF STEEL IMPORTS FROM 14 VOLUNTARY EXPORT RESTRAINT COUNTRIES, 1986–89

While their U.S. steel market shares would be reduced under the steel import restraint program, the 14 VER countries would, nevertheless, be entitled to a larger percentage of U.S. total steel imports under the program than they had in 1984. In 1984, the 14 countries supplied about 57 percent of total U.S. steel imports.[12] If the import restraint program is successful in limiting U.S. imports to 20.2 percent of U.S. steel demand, then the 14 countries would be able to supply more than 60 percent of total U.S. steel imports. The allocations of U.S. steel market shares have at least one significant implication for the success of the import restraint program, therefore: giving the 14 VER countries a larger share of total U.S. steel imports means that non-VER countries—mainly, the EC and Canada—would have to reduce their share to meet the target limits for steel imports.

II. CAN THE U.S. STEEL IMPORT TARGETS BE ACHIEVED?

Achieving the targets for overall U.S. steel imports will be very difficult to accomplish in all likelihood. The VER countries have a higher share of the target for total U.S. imports under their agreements, implying that the rest of the world would have to compress their exports substantially. Indeed, the rest of the world—including two major suppliers, the EC and Canada—would have to reduce their market share from about 11.8 percent through July 1985 to about 8.0 percent, or by approximately 32 percent, if the congressional steel import share target of 20.2 percent is to be met.[13] As it stands, the combined import shares of the 14 VER countries and the rest of the world total approximately 24.0 percent, or nearly 20 percent higher than the congressional target.

The level of steel imports from the EC and Canada are particularly important in evaluating the prospects for achieving congressional import share targets. In 1984, the EC and Canada captured 9.7 percent of the U.S. steel market; through August of 1985, they had a 10.0-percent share of the U.S. steel market.[14]

Canada is under no agreement to restrain steel exports, with the exception of certain specialty steel items. Through August 1985, Canada had a 3.1-percent share of the U.S. steel market, down from its historic high share of 3.2 percent in 1984. While there is some pressure to bring Canada under the President's program by negotiating a VER with it government, there is no indication that the Administration intends to do so.[15] Furthermore, the Canadian steel industry maintains that it is exercising self-restraint on steel exports to the United States, and has no intention of increasing its share of the U.S. steel market.[16] Thus, for purposes of this analysis, the assumption is made that Canada will maintain its 3.1-percent market share through 1989.

Although the EC share of the U.S. market was 6.97 percent through August 1985, the assumption is made herein that the EC market share would be 5.56 percent for all products. Such a market share would be about 1.4 percentage points lower than the actual share of the EC in the first eight months of 1985. This assumption is based on terms of the 1982 agreements between the EC and the United States limiting EC steel exports to the United States, and subsequent agreement related to pipe and tube and to so-called "consultation products".[17] Essentially, it is assumed that the existing agreement would be carried forward through 1989.

The assumed 5.56-percent EC share of U.S. steel markets is a weighted average of the product import shares under existing agreements. The ten product categories that were put under quotas in the 1982 agreement were assigned a U.S. market share of 5.46 percent. Finished "consultation products" were given effectively a 3.5-percent market share in a recent 1985 amendment to the 1982 agreement.[18] EC steel pipe and tube were allocated 7.6 percent of the U.S. market early in 1985. Semifinished steel, one of the original consultation products, are assumed to be allowed their 1981 market share of 4.01 percent, as intended in the 1982 agreement. Specialty steel imports from the EC are assumed to have a 5.71-percent share of the market, their share in the first five months of 1985; these products, it should be noted accounted for less than 1 percent of the quantity of total imports in the first five months of 1985, and, therefore, would not significantly affect the overall average.[19] These shares were weighted by the U.S. demand for the five product groups in the period from January to May 1985.

A lower than actual import market share is assumed for EC steel exports, because negotiations are underway to achieve a VER with the EC. One report indicates that the United States has asked that current steel quota limits be reduced, while the EC has asked that their market share be increased to 6 percent.[20] While no predictions can be made as to the eventual outcome of these negotiations, it is not unreasonable, at least, to assume that the terms and intents of cur-

rent agreements would be embodied in the VER.

Approximately 50 other countries also supply various amounts of steel to the United States. From January to July 1985, these countries supplied about 1.7 percent of the U.S. steel market, and about 8 percent of total U.S. steel imports.[21] For purposes of this analysis, it is assumed that these countries would continue to maintain their present 1.7-percent share of the U.S. steel market through 1989.

If the assumptions regarding the U.S. steel market shares of Canada, the EC, and other non-VER countries are proven to be correct, then the share of foreign steel in the U.S. steel market could amount to about 22.6 percent for the duration of the steel import restraint program. The 14 VER countries can claim 12.2 percent of the U.S. steel market; Canada and the EC are assumed to have about 8.7 percent of the market, and the rest of the world, 1.7 percent. Table 2 summarizes the hypothetical allocation of U.S. steel market shares based on the assumptions made for the non-VER countries.

TABLE 2.—HYPOTHETICAL U.S. STEEL IMPORT MARKET SHARES UNDER THE PRESIDENT'S STEEL IMPORT RESTRAINT PROGRAM, 1986–89

[In percent]

	Import market shares			
	1986	1987	1988	1989
Source of imports:				
14 VER countries	12.27	12.19	12.18	12.16
European Community [1]	5.56	5.56	5.56	5.56
Canada [2]	3.10	3.10	3.10	3.10
All others [3]	1.73	1.71	1.66	1.66
Total	22.66	22.56	22.50	22.48

[1] Weighted average of market shares under 1982 United States-European Community steel arrangement as amended.
[2] Year-to-date market share, January through August 1985.
[3] Assumes all other countries account for 8 percent of total U.S. steel imports, their year-to-date share from January through August 1985.

Sources: American Metal Market, Sept. 11, 1985. American Iron & Steel Institute. Imports of Steel Mill Products By Country of Origin. July 1985. Washington, 1985. American Iron & Steel Institute. Steel Imports Surge Again in August. Steel Import News. Washington, Sept. 27, 1985. Data Resources, Inc. Steel Industry Review. 3d Quarter 1985. Lexington, 1985. p. iii.

Based on the assumptions made regarding steel market shares, therefore, U.S. steel imports from all sources could exceed the congressional market share target by about 2.4 percentage points, or by about 11.9 percent. To reach the congressional target, the market share for the non-VER countries would have to be reduced by another 19.2 percent.[22]

III. CONCLUSIONS AND OTHER CONSIDERATIONS

Available data suggest that the President's steel import restraint program is not likely to achieve all of its goals. Unless non-VER countries are willing to accept drastic reductions in their current U.S. steel market shares, steel imports could capture well over 22 percent of the U.S. market. Such an import share of the U.S. steel market would exceed congressional goals for steel imports by more than 10 percent.

But the goals of the President and Congress with respect to the overall import share is only a target, something to be aimed at and hopefully achieved. Even if the 20.2-percent import market share is not achieved, the overall import share is estimated in this report to come down by about 4-percentage points, or by 15 percent from the surge level of 1984, when imports captured 26.4 percent of the U.S. steel market. Thus, those who support the President's approach to restraining steel imports can point to some degree of success.

The analysis presented in this report deals only with the years 1986 through 1989, and not the five year period beginning in 1984. Since all of the VERs permitted the signatory countries to fill all orders booked as of the effective date of the VER, the expectation was that, in the first year of the program, steel exports from the several VER countries would probably exceed the market shares negotiated. By focusing only on the last three years of the import restraint program, it is hoped that this problem would be minimal. Indeed, the estimates for the last three years of the program might be overstated for the VER countries, because any exports in excess of the negotiated market shares would have to be offset later in the program.

Finally, this analysis has focused only on the congressional steel import market share target of 20.2 percent, rather than the President's target of 18.5 percent of only finished steel products. Publicly available data are not sufficiently detailed to distinguish between finished and semifinished steel imports. Furthermore, as indicated in the body of this report, the fact that many of the agreements were negotiated in terms of total tonnage (that could include semifinished steel) rather than market share creates difficulty in reconciling essentially two different measures of import limitations. Thus, it is not possible to evaluate the prospects for achieving the specific goals of the President alone.

[22] The 19/2-percent reduction in market share for the non-VER countries is not inconsistent with the 32-percent reduction stated earlier in this report. That change in market share was predicated on the actual market shares of the non-VER countries. The 19.2-percent change assumes a lower market share for the EF than actually obtains.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 9 a.m., with statements therein limited to 5 minutes each.

A TRIBUTE TO TISH SOMMERS: ADVOCATE FOR OLDER WOMEN

Mr. GLENN. Mr. President, I should like to take a few minutes from our important deliberations today to honor a great American who died this past Friday after a long battle with cancer. Many of you may not know of Tish Sommers but you should, as she devoted her life to making this a more compassionate and just society for all of us. In particular, however, Tish Sommers' accomplishments on behalf of older women are unparalleled.

Tish Sommers' accomplishments were many and will stand the test of time as tribute to her energy, her commitment and her creativity. She founded the Older Women's League [OWL] which in 5 years has grown to include 90 chapters across the country and some 13,000 members. Tish Sommers initiated the "displaced homemakers" movement to address the many and complex problems that confront the homemaker if she is widowed or divorced. As a result of her tireless advocacy, many States have enacted displaced homemaker laws

and some 500 programs nationally now address the problems of the displaced homemaker.

More recently, and so appropriate to her devotion to humane treatment for all, she had championed the cause of dying with dignity. This past July, I had the pleasure—indeed, the honor—of appearing with Tish Sommers at a forum sponsored by the Older Women's League that dealt with this sensitive and timely issue. In fact, the keynote speakers at this forum were Tish Sommers and our former colleague in the Senate, Jacob Javits, both of whom spoke forthrightly about their own terminal illnesses. Tish Sommers lived productively and bravely with her cancer for 6 years. During this period, Ms. Sommers lectured, wrote, and taught extensively about many major issues affecting women and the elderly. As the ranking member of the Special Committee on Aging, I can tell you that her accomplishments will impact public policy for the elderly for years to come.

Tish Sommers advocated for each of us to take control of our own death, just as Senator Javits continues to do. Ms. Sommers continuously spoke out on behalf of, and when they became necessary, participated in, services to make our dying more comfortable and compassionate, something that all of us want for ourselves and our loved ones. She belonged to a cancer support group and as the end was imminent, she took part in hospice, a service that I strongly support. At the OWL forum where Tish Sommers spoke in favor of ways for us to have control of decisions about our dying, she said:

Fortunately, my cancer is slow growing, so I've had lots of time to think about death and to plan for it.

She also said:

Staying in control of your own death takes planning and strong conviction. It is easier said than done. Yet there are dangers. Already public policy tends toward the cheapest way to keep an old person alive.

Mr. President, Tish Sommers embodied that strong conviction about which she spoke. She thought about her own death and planned for it, and when it came, it occurred in the way she chose. She leaves many legacies and one of the most important will be her contribution to opening up discussion in our society about death and dying. Her thought and planning should enable all of us to plan better, to take those steps that give us a measure of control over our own life until it is ended. An example of these steps is executing a durable power of attorney that allows someone of our choosing to make our health care decisions, in case we become so incapacitated that we can no longer make them ourselves. Tish Sommers took this step and other measures.

Tish Sommers was, and is, a role model for all of us, women and men alike. Her approach to life and to death should be an inspiration for everyone. I would like to quote her one more time:

Life is sweet and I've been amazed to learn how much you can put up with and still savor life.

Mr. President, I ask unanimous consent that the article about Ms. Sommers by Cynthia Gorney, from the October 12 edition of the Washington Post, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FAREWELL TO AN AGITATOR

(By Cynthia Gorney)

OAKLAND.—I am gazing at a pile of typewritten speeches and snapshots and political notes and trying to think how to explain the life and death of Tish Sommers, who died of cancer here yesterday and left women across the country working to believe they would finally have to let her go.

She was 71, as graceful a woman as I have ever known, tall and slender and given to the controlled movements of a dancer. She had danced in her youth, as part of modern troupes that performed internationally, but that was not how Tish emerged in the lives of all these women, women who were old enough and young enough to be one another's grandchildren and greataunts. She was an organizer, an agitator, a women of such passionate purpose and drive that in her last weeks, as she lay in her upstairs bedroom and felt her systems failing one by one, she talked seriously about the need for improved national organization within the hospice movement.

The term "displaced homemakers," an initially unsettling concept that swiftly became popular currency among politicians discovering new constituencies, was invented by Tish Sommers; it was her imagination, her political instincts and her precisely channeled outrage that gave national voice to a vast assortment of American women who found themselves aging in a society that appeared to have almost wholly lost interest in them.

When corps of older women besieged Capitol Hill last Mother's Day, bearing cards invoking the congressmen's own mothers along with reminders about legislative matters like Social Security cost-of-living adjustments and low-cost senior housing, that was Tish. When Displaced Homemaker bills were approved in 23 states, each vote following an onslaught of publicity about the emotional and financial distress of the homemaker set aflounder by widowhood or divorce, that was Tish.

It was Tish who would appear on television programs, smiling pleasantly at the host and holding always to her thoughtful low voice, and lay out the kind of plain information that made women sit down at their kitchen tables and write long angry letters about what happened to them. She would talk about pensions, and job discrimination, and the statistics she had culled that week. Four million women between age 45 and 65 have no insurance at all, Tish would say. White women are twice as likely as white men to be living in old-age poverty, she would say; the figure doubles for black women. Less than 20 percent of women are eligible for non-Social Security pensions, and there is no Social Security for a homemaker's work, making most mid-life widowhood or divorce a sudden thrust into a job market that will not be bothered with 52-year-old women who lack "experience."

A Displaced Homemaker Network grew from the groundwork Tish laid, so that 500 programs around the country now offer counseling and job training to the women she wanted to reach. She had founded a group called OWL, Older Women's League—Tish always liked the venerable image of owls—and by the time she died, OWL had grown in five years to a 13,000-member organization with 90 chapters across the country. There are OWL chapters in places like Jeffersonville, Ind., and Eastontown, N.J., and there is a national headquarters in Washington, and there are senators and congressmen and Social Security critics who keep hearing from OWL members, and there are women who write still to Oakland or to Washington to lay out afresh the stories Tish had heard so many times before.

Economy, Ind.: "I need to get out in the world again. After 33 years we're getting a divorce. I need to know how to get a job and meet people." Saratoga, Calif.: "I found myself, at age 53, working for an employment agency. At the end of three months, I left feeling old, inadequate and worthless."

Those letters were sustenance for Tish; she worked them into speeches, invoked them in public hearings, sat friends down at her kitchen table to argue out the next plans for setting those women into motion. Helplessness drove her wild. There is a transcription here of a conversation at Tish's bedside a month before she died; she is explaining, probably by way of slightly sheepish apology to the friends asking her to please slow down and pay attention to herself for a minute, why even her own cancer was driving her to organize among the dying and those who cared for them.

"I can't help it," Tish is saying. "It's part of my nature, that since I'm going through this experience to turn it into energy for positive change. Of course that energizes me. I have the feeling in terms of pain control. I go on daytime on adrenalin and at night on sleeping pills. Now I find it's hard to meditate—when I relax and go blank, I'm so aware of physical discomfort. It doesn't work for me. Action does."

I met Tish 12 years ago, when I was a Berkeley undergraduate and she was stirring up trouble in a local advocacy group she had named Jobs for Older Women. I was dazzled from the beginning; she was so lovely, so driven, so removed from the sickly passiveness I had once thought America forces on its elderly, that she gave me a new vision of what it might be like to celebrate my 70th birthday. We flew to Washington together before I graduated, each of us at work on questions of Social Security for homemakers.

Tish told me a little about her early days: the years in Germany as a visiting American dancer, the gathering rage about what Hitler was doing to the Jewish family that had taken her in, the middle years as a professor's wife and civil rights organizer in Alabama, the early feminist work. When she divorced, she was a 57-year-old woman with no pension and no Social Security entitlement of her own. She was denied credit, turned down as a PhD candidate, rejected for health insurance because of her earlier cancer.

"I wrote a book," Tish said last spring, when some oral historians asked her to talk about life, "called 'The Not So Helpless Female.' "(I can see her smiling as she says this; she was usually charmed by her own pithy titles, and particularly liked the busi-

ness cards she designed, in which a jovial witch rides across the logo. "Free-lance agitator," the cards read.)

"Kind of how to make things happen," Tish said, remembering her book. "To shake things up. Sort of a wave-making manual. After all, I had quite a bit of experience at making waves.

She had cancer for six years. It was massive, pervasive cancer, spread through her bones, and she carried it the way she had carried her divorce and her earlier mastectomy and everything else that another kind of person might have imagined the most private of personal hurdles. She wrote position papers on health care, flew East for hearings and board meetings, made outlines for a book about women as caregivers. Once a year, with friends from her organizing partner Laurie Shields arranged rafting trips, and then Tish would lie back in places like Idaho or Jackson Hole, Wyo., and dangle her ankles in the water, and talk about how the cancer was changing her tactics. When she got back, she worked white-water rafting images into her speeches.

It was almost as though Tish had no private self, as though introspection and fear seemed to her the most self-indulgent of luxuries. You never talked to Tish about restaurants or couch upholstery or whatever it is friends talk about when they're feeling evasive and silly. She wanted the central questions raised immediately, and then she wanted to figure out how to make things better.

We were all afraid of her cancer, especially the younger women around her. It was awful to imagine illness destroying Tish, and she would look us in the eye and talk about that, just as she had grinned at us 10 years ago and said that when America began thinking right, the cosmetics industry would begin marketing pour-on wrinkles and age spots for women eager to display their own maturity.

And she never did let the cancer destroy her, at least not so we could see it. She slowed for it, and eased her traveling, and spent more time in the upstairs room with the sun pouring in, gritting her way through the worst parts and refusing until the last week the painkillers that kept her from thinking clearly and making plans.

When she knew she would die before the year ended, she told us, one by one.

She was lying in bed when I saw her two weeks ago, her thin arms folded up behind her head, and she let me know almost immediately that she was saying goodbye. I asked her if she was frightened, and she said she was not, that an awful lot of people had begun trying to convert her to their particular God, but that she didn't feel the need. Her work was going to survive her, and that would do.

Then Tish smiled at me, and God bless her, she gave me my assignment for her memorial. She had typed it out. The OWL convention was being planned; she thought a memorial might help fire people up. There would be some singing, and some reminiscences, and a brief summary or her life, with slides. I was to write the narration. Maybe Ronnie Gilbert, the big-voiced folk singer from the Weavers, could read it. "Not Maudlin," the paper said, right near the top.

Mr. CRANSTON. Mr. President, I join with the Senator from Ohio [Mr. GLENN] in his remarks regarding the death of Tish Sommers, one of my constituents and a national leader on behalf of older women.

I worked closely with Tish in the successful effort to win passage in 1979 of the Federal displaced homemaker's legislation, enacted as part of Public Law 95-524. Her leadership will be sorely missed, but her legacy in the form of the organization she founded, the Older Women's League, and the new awareness she helped create on the plight of countless numbers of older women will endure.

In addition to the article from the Washington Post which the Senator from Ohio has placed in the RECORD, I ask unanimous consent that another article that appeared in this morning's Washington Post, paying tribute to this remarkable woman, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 23, 1985]

THE LEGACY OF AN OLDER WOMAN

(By Judy Mann)

She was not as well known as, say, Betty Friedan, Gloria Steinem or Bella Abzug, but within the women's movement Tish Sommers had a very special place: she, along with longtime associate Laurie Shields, put the problems of older women—women who were often left helpless and destitute by widowhood and divorce—into the conscience of a nation.

It was Sommers who coined the term "displaced homemaker," and drove the point home to state legislators and finally to members of Congress that the women she spoke for could very well be the lawmakers' own mothers. Recognition of the plight of older women was one of the women's movement success stories in the '70s. California, Sommers' home state, was the first to pass legislation to provide job training for these women. Within two years 23 other states had passed similar legislation, setting up more than 400 training programs and counseling centers across the country. In 1975, Sommers founded the Alliance for Displaced Homemakers, which was instrumental in securing federal funding for such programs in 1979.

Sommers, 71, who died last week after a long battle with cancer, had the remarkable discipline to be able to translate personal adversity into effective political organizing. When her marriage of more than 20 years ended in divorce in 1971, she experienced firsthand many of the problems that confront a divorced or widowed homemaker. She lost her health insurance and could not get a new carrier because she had a history of cancer for example.

"I was 57," she told Ms. magazine in a 1982 interview, "and I had already had my first feminist 'clicks,' but despite the fact that I thought my consciousness was raised, I was totally naive about what happens to a divorced woman without health care or Social Security benefits.

"I didn't set out to create a movement, but I'm not surprised it became one. We knew from the first time I went on national television that we had touched a nerve. Thousands of letters came in saying, 'I thought I was alone.'"

One of those who came to an early organizing meeting for displaced homemakers was Laurie Shields, then 55 and a widow after 15 years of marriage. She became the executive director of the alliance. In 1980, shortly after a conference in Des Moines to prepare for the 1981 White House Conference on Aging, the two women founded the Older Women's League (OWL). As a result of their efforts, the 1981 conference was the first one ever to single out problems peculiar to older women on its agenda.

"She's one of my heroines," said Rep. Mary Rose Oakar (D-Ohio), a member of the Select Committee on Aging who knew and worked with Sommers for many years. "She did more than anyone I know of to call attention to the plight of elderly women who had been somewhat ignored in the whole feminist concept." Two-thirds of the elderly in the United States are women, and the country's poorest are women over 65, Oakar said.

She recalled Sommers coming into her office several years ago and meeting with her and Rep. Patricia Schroeder (D-Colo.), cochair of the Congressional Caucus for Women's Issues. "She was the one who first embraced [as an issue] . . . the inequities towards women in the Social Security plan. OWL now has as its number one priority correcting the inequities. She just came in and said, 'By heaven, I want to know more about this because I don't understand it.' As soon as I explained it, she said, 'That makes sense, we're going to do something about this.' Now, when I go around and talk about it, people know about it. She's raised the consciousness about older women's issues nationally and certainly in the Congress."

Oakar recalled the lobbying campaign OWL conducted last Mother's Day, when older women brought cards to members of Congress who were considering taking away Social Security cost of living adjustments. "It did not hurt . . . . At that time people weren't as frightened about what Reagan would do as they should have been. There was a momentum here to take away the cost-of-living adjustment even though the trust fund was burgeoning. They were the ones who gave us the figure that 400,000 more people would be below the poverty level.

"She came across as nonconfrontational but firm and very warm so that you didn't feel threatened when she talked to you. She had a very keen mind and she was a marvelous person at hearings. When I want to push some of my legislation I can say the OWL endorses it and I will not get any negative reaction. It's like motherhood, apple pie and fatherhood.

"She was a national treasure. She will be sorely missed."

Indeed she will be. But what a legacy she left.

DR. YURI MEDVEDKOV

Mr. GLENN. Mr. President, anyone who even occasionally reads a newspaper or watches the television news knows that the Soviet Union can often be intransigent and inflexible. But today I want to talk about an instance of Soviet intransigence that has extremely ugly overtones. And if I am correct in my suspicions, then this particular instance of Soviet intransigence is not just unfortunate—but also deplorable and completely unacceptable. The issue I am talking about concerns a 1-year teaching appointment that Ohio State University has offered to an eminent Soviet scholar, Dr. Yuri

Medvedkov. Dr. Medvedkov has been invited to join the OSU faculty for 1 year as a distinguished visiting professor, but the Soviet Government has denied him permission to temporarily leave the Soviet Union to accept this honor.

Dr. Medvedkov is a highly respected figure in the field of urban planning and development, and his work has received international acclaim. He is a member of the Institute of Geography of the U.S.S.R. Academy of Sciences and is responsible for numerous publications on geography, economic geography, and urban planning. Among his peers, Dr. Medvedkov is known as a man of exceptional creativity and originality in research and in the classroom.

I strongly endorse OSU's invitation to Dr. Medvedkov—and I do so for two reasons. First, it would offer this world renowned scholar an opportunity to further his own research. Second, and even more important, Dr. Medvedkov's appointment would make his expertise available to the faculty and students at Ohio State. Based on his outstanding academic reputation, I am confident—and his peers at Ohio State are confident—that Dr. Medvedkov would make a considerable contribution to the academic program at OSU.

In April of last year, I wrote to Soviet Ambassador Dobrynin expressing my personal interest in this matter, and requesting that the Soviet Government reconsider its repeated denials of Dr. Medvedkov's temporary visa. As of today, I still have not received even an acknowledgment from the Ambassador.

I believe there can be one—and only one—explanation for the behavior of the Soviet Government. Dr. Medvedkov, you see, is Jewish—and the Soviet refusal to allow him out of his country is apparently just the latest example of their continuing policy of anti-Semitism. Now I am sure that the Soviets will deny the truth of what I am saying. But the Soviets have a long history of denying the truth—and I have always believed that their actions speak a lot louder than their words. If there is another reason for denying Dr. Medvedkov his visa, then let them tell us what it is. If there is no other reason, then let us tell them what we think about this blatant abuse of human rights.

Like most Members of this body, I have always believed in the value of academic exchanges and that our Government should encourage these mutually beneficial programs. Unfortunately, the Soviet Union appears to agree only when the professor in question happens to hold what they regard as acceptable religious beliefs. To discriminate against someone merely because he or she is Jewish is as wrong for the Soviets as it was for the Nazis. And I believe that we have a continuing moral responsibility to say so —regardless of whether or not it irritates the Soviet Government.

Mr. President, I wholeheartedly and enthusiastically support Ohio State's initiative in making this offer of Dr. Medvedkov. I believe that both the students and faculty at Ohio State would benefit from his acknowledged expertise. And I continue to hope that the Soviets will reconsider their indefensible position and allow Dr. Medvedkov to come to Ohio State University.

ADDRESS BY MR. JOHN HUME, CHAIRMAN OF THE SOCIAL DEMOCRATIC LABOR PARTY OF NORTHERN IRELAND GIVEN TO THE NATIONAL DEMOCRATIC FOUNDATION

Mr. MOYNIHAN. Mr. President, recently, in the Lyndon B. Johnson Room of the U.S. Capitol, a number of Senators, and others, had the privilege to hear from Mr. John Hume, leader of the Social Democratic and Labor Party of Northern Ireland, and a member of both the Parliament at Westminster and the European Parliament.

Mr. Hume, along with a distinguished delegation of senior SDLP officials, is in Washington for meetings with the National Democratic Institute for International Relations, an organization created by the Democratic Party for the purpose of encouraging democratic political development in the world, in concert with a similar political development institute created by the Republican Party, and others created by the AFL-CIO and the U.S. Chamber of Commerce. The SDLP and the National Democratic Institute have undertaken to cooperate with one another in the strengthening of democratic political institutions in our two countries.

Mr. Hume, one of Ireland's most distinguished statesman and a tireless advocate of reconciliation among the people of Northern Ireland through constitutional politics, delivered an address of remarkable eloquence and enduring meaning for all those who take an interest in the fate of democracy in Ireland. In particular, Mr. Hume spoke of the hope and encouragement offered to the people of his society by the United States, a nation in which peoples of diverse origins and cultural traditions have learned, to a degree that is remarkable in the world, to live together.

Mr. President with great respect I ask unanimous consent that Mr. Hume's remarks, delivered in this Capitol in great hope and expectation for the troubled part of the world whence he comes, be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

AN ADDRESS BY THE HONORABLE JOHN HUME, MP, MEP

Our two parties operate in very different circumstances. We are not in a political system where we are either in office or in opposition. we have a very different legislative and executive set up in our political system so we cannot exercise or aspire to the level of influence which you can exercise. You participate in the democracy of a vast country—a superpower. We seek to improve democracy in a small state and on a small island.

Yours is a state where there is consensus fashioned from rich and broad difference. From many you have one. We however do not yet know such consensus. We have not yet devised structures which accommodate difference and ensure stability. Do not take for granted what your democracy has achieved. Perhaps because "E Pluribus Unum" is on the back of a cent you undervalue the truth of that motto. Real unity is built on the acceptance of diversity.

We know that the emergence of that consensus in the U.S. was not easy. That it is only in more recent times that minorities really feel they have approached the equality that is theirs by right. Your party leaders played a noble role in that achievement. it was not simple. There were times of panic and times of indifference. There were times of hope and times of despair. There was social progress and there was social pain. But you saw it through, and you will continue to see it through.

For ourselves we know the scale of our task but we are not daunted by it. We have been tested by discrimination, bigotry and state violence but we have not been tempted by revenge. We have been hurt, misrepresented and handicapped by the violence of others but we have kept faith with our own non-violence. We have been troubled in a political vacuum but we have held true to our political values.

A great citizen of your country, Martin Luther King has inspired our understanding and our methods. He taught us that an eye for an eye leaves everybody blind. He taught us that consensus is more powerful than dominance, that accommodation rather than victory secures the future.

Our challenge is not easy, but the choice is. There is no other way. We cannot solve problems of difference by creating divisions. We cannot create peace by using violence. We cannot protect civil rights by attacking human rights. We cannot secure justice by abandoning the rule of law. We cannot achieve freedom by inflicting injustice.

We have no illusions that a solution lies somewhere over the rainbow. We know the path of progress is long and stoney. We do not seek to mislead people by promises of instant solutions. We do not hide from our responsibility by hiding behind unrealistic and uncompromising demands. We seek to help people, not to use them. We seek to allay fears not play to them. We seek to ease tensions, not exacerbate them. We try only to solve problems, not exploit them.

In the political life of Northern Ireland this has involved great difficulties and pressures. But in the words of our friend Senator Edward Kennedy "we have neither bent with the wind nor broken with the waves."

We want to thank you for the assistance, encouragement and example that many in your party have given us.

We know the courage of Senator Moynihan, Senator Kennedy, Senator Eagleton. We know the integrity of the Speaker, Representative Tom Foley and our many other friends. We know the sacrifices made by people like Jim Shannon. Friends of Ireland, you help us more than you can; standing by us has not been easy for you. You too have to pay the price of abuse, misrepresentation or even rejection. Clearly the only reward you seek is to see a new Ireland. We owe it to you, as well as to ourselves and our children, that we should fashion that new Ireland.

Obviously we in Europe, in a small nation and you in America, a preeminent world power have some different views of the world. Or perhaps they are different points of focus in a broadly similar view of the world. There are deep concerns which we share. We are not so obsessed with our own problems, and you are not so overawed with your Nation's power that we both cannot see the appalling crimes against human rights in many parts of the world. Whether it is the poor of Chile, the students of Guatemala, the oppressed of South Africa, the Jewry of the U.S.S.R. or the priests of the Philippines. We must strive to uphold the basic rights that humanity confers on them.

Your Representatives and Senators have perhaps more facilities and resources to act effectively in these areas than we have. In particular I wish to pay tribute to the achievements on human rights of the Carter-Mondale administration. But I want to assure you that our own problems will not distract us from doing what we can in the fight for human rights in the modern world. Know that when you seek to find those who have disappeared, when you seek to allow families to bury their executed dead, when you seek to free the dissent, when you seek to secure justice for those crushed under cruel apartheid, we are at one with you. Together we are at one with the feeble, the deprived and the true.

Our country knew famine in the last century, it is for that reason that our country has been so moved by the present suffering of Africa, We know that our famines were not simply natural disasters. History shows that Irish people were starved or forced to leave their native land because of unjust distribution of land, poverty and extortion which forced the production of cash-crops for the wealthy abroad instead of food for the hungry at home, trade structures which knew no morality and unequal power relationships between countries. These are the same injustices and absurdities which crucify Africa today. They demand change, not just charity.

Our famine brought the starving to America. May the present famine bring America to the starving.

It is, of course, all too true that many in your own society know poverty, illiteracy and unemployment. Your party has shown a sensitivity to those deprivations as evidenced by such outstanding work as the report "Going Hungry in America," the efforts to secure adequate and equitable health insurance and the attempts to protect jobs, wage levels and family income. (I look forward to Senator Moynihan's forthcoming book on family policy and trust that our party will have a chance to read some of the earliest copies.)

Our society too carries the burden of economic difficulty and social inequality. We have high levels of unemployment, in many families now in the second or third generation. Poverty and deprivation in our society have deepened under the scourge of violence and the cuts of monetarism. The British Government are now introducing measures which will undermine the efficacy and the principle of our welfare state.

They are not attacking poverty, they are attacking the poor. Their strategy is the redistribution of poverty. They claim to be rationalizing social security when they are in fact rationing social security.

I know that similar issues loom on your political horizon. Also you have opposed the erosion of minimum wage standards. Likewise we stand against the British Government's low-wage strategy. Their thesis seems to be that poverty is the answer to unemployment.

You are fighting against the undermining of Medicare and Medicaid, struggling for health insurance. We meanwhile are fighting devastating cutbacks in our health service. Like you we believe that the primary concern in health provison is care not cash; compassion, not commercial competition. The price is right might be a suitable title for a TV game show. It is hardly a suitable motto for the running of a hospital service.

44 percent of Northern Ireland's population is under 25. Our young people are faced with unemployment similar to your own dispute over the Subminimum wage and the Youth Opportunity Act we have just seen wages protection in many sectors removed from the under 25s. While the Government will fund youth training programs it won't create job programs. It is treating youth unemployment as a problem of youth rather than a problem of unemployment.

In other areas the young homeless are being victimized, forced to move out of town every four weeks to secure benefits. Student support has been cut and benefit levels for under 25s are to be cut. This is all happening in international youth year. It makes me frightened what will happen next year, the International Year of Peace.

Our policies, perhaps like yours, are aimed at addressing the need for progressive change. That they are often imaginative makes them no less realistic. That they often fail to conform with prevalent notions makes them no less appropriate to present needs.

We are a party of principle, pragmatism and progress. We are not prisoners of yesterday's ideologies but we learn from yesterday's lessons. We are alert to today's problems and its resources. We strive for tomorrow's remedies and developments.

For our part, we seek economic prosperity not for the wealth it can create for some but for the welfare it can secure for all. We pursue social progress because we respect the dignity of every person, appreciate people's difficulties and value people's talents. We work for structures which will not just acknowledge our common humanity but which will enhance it with the dignity of care and the decency of equity.

Call this idealism. Call it the pursuit of justice, the search for progress or the struggle for equality. But call it politics. That word is not to be feared. Politics which has often been neglected by lethargy, undermined by gimmickery, or corrupted by deceit is for us still a noble vocation. Politics is the alternative to war, it applies reason in a spirit of responsibility and it allows change in the context of stability. Never apologize for being involved in politics. All politics is basically about the allocation of values. If we know our values and if we are dedicated to our principles we need have no fear of politics.

When we seek power or influence at any level, it is not for the patronage or prestige it may bring, but for the progress it can sponsor. We reject the fatalistic claim that power corrupts. Instead we accept Shaw's diagnosis that "fools corrupt power." God knows there is enough evidence for that.

Fools are those who know only about the cost of public services but not about the value. Fools are those who use power not to strengthen the weak but to fatten the strong. Fools are those who exercise power for the benefit of the few but to the detriment of all. Fools are those who would spend millions stockpiling nuclear weapons but who will not ensure that food will reach the starving in Africa. Fools who insist on devising more ways of destroying the world and ignore the need to improve the world.

As we say in Ireland, with the modesty and understatement for which we are renowned, we are no fools. And even if your party symbol is a donkey we do not think that you are such fools either.

I have stressed so far the importance of having clear and worthwhile ends in politics. It is of course vitally important that we use effective means to further those ends. That is why this relationship with the NDI is so important to us. We will learn more about efficient methods of communicating our message and organizing our efforts. Armed with the assistance the NDI will give us we hope to make further progress on the many problems that face us. We are grateful for the interest and help of the NDI and we will repay it with honest and dedicated effort.

We hope that our work following the NDI's assistance will justify the confidence of all who helped so that they can truly see the enhancement of democracy in Ireland. I ask all of you to support the institute in this and the many other projects it has undertaken.

CHILD ALERT

Mr. STEVENS. Mr. President, I was pleased that the U.S. Postal Service, in cooperation and full participation with the National Association of Letter Carriers, has begun a voluntary coordinated effort to locate missing children. As a result, a Child Alert Program has been launched nationwide.

The Postal Service employs some 220,000 city letter carriers throughout the Nation who come into contact with millions of our country's children on a daily basis. And, as Postmaster General Paul N. Carlin stated, "We have every reason to hope that they can play a significant role in locating missing children." Vincent Sombrotto, president of the National Association of Letter Carriers, added his support by stating, "We pledge to do the utmost to make the 'Child Alert' Program a success."

Six photographs of missing children will be published each month in Postal Service and union publications. Pictures published in the Postal Service's Postal Bulletin will be posted in post office lobbies nationwide for viewing by the public. The photographs printed in the union's publications will remind carriers to be on the lookout

for missing children as they make deliveries to over 72 million addresses every business day. In addition, the Postal Service has recently issued its latest edition of Postal Life, a publication reaching all postal employees, which carries an article and photographs of 60 missing children supplied by the National Center for Missing and Exploited Children.

I commend the Postal Service and the National Association of Letter Carriers for this great expression of community spirit and for taking this active step to help locate the many children who are missing nationwide.

ESOP,S PERFORMING BETTER THAN OTHER BENEFIT PLANS

Mr. LONG. Mr. President, the National Center for Employee Ownership just released a new study titled, "Employee Benefits in Employee Stock Ownership Plans: How Does the Average Worker Fare?—September 1985."

In the past, it has been my pleasure to sponsor legislation promoting employee stock ownership plans [ESOP's], and I intend to offer additional legislation during my remaining time in office. ESOP's serve a variety of social and economic purposes in helping us to share with working people the best that our free enterprise system has to offer.

I am happy to note that although ESOP's have only been widely known since 1973, we are finding that where companies have tried them, they have generally been very successful. The National Center for Employee Ownership has been a pioneer in providing thorough research on ESOP's. Their latest research effort provides additional proof that ESOP's are continuing to fulfill their intended purposes.

I urge my colleagues to study the following highlights from this latest survey of over 100 representative ESOP companies:

Workers at the 1983 median wage level of $18,058 would receive over $31,000 in stock after 10 years and more than $120,000 after 20 years.

Workers in the first 25 percent income level (earning $11,792 in 1983) would receive about $20,000 after 10 years and about $80,000 after 20 years.

Workers at the 75th percentile income level ($27,277 in 1983) would get about $45,000 after 10 years and about $185,000 after 20 years.

Relatively few ESOP's replace existing pension plans (7 percent according to an earlier study) or are established by companies that would have otherwise set up a defined benefit pension plan. On the other hand, ESOP's do appear more commonly as a substitute for profit sharing plans. On the whole, however, it appears that employees normally do not give up much, if anything, for their ESOP's, although further research on this point is needed.

If this is true, then how can ESOP companies afford this extra benefit? The answer appears to be that part of the benefit is supported by the taxpayer and that part (a larger part) is supported by the greater corporate growth associated with employee ownership.

CONCLUSION

Just from their ESOP, millions of employees can thus expect to accumulate financial assets greater than the net financial assets of most American families. ESOP beneficiaries do not appear to give up wages to receive these benefits, although the picture is not quite as clear with respect to whether they forego other benefits. Even if they do, however, the comparative data presented here suggest that, overall ESOP's perform better than other benefit plans, and are more likely to provide at least some benefits to the typically mobile American worker.

Given this performance, it does then appear that ESOP's have been successful in accomplishing the central purpose for which they were established, to create a more equitable distribution of wealth.

REMEMBERING BEIRUT

Mr. BYRD. Mr. President, 2 years ago today, the United States suffered a terrible tragedy when a terrorist exploded a bomb at our marine barracks at Beirut International Airport and killed 241 American military personnel. Over one hundred other U.S. servicemen were wounded in this heinous attack.

That tragedy at our marine barracks in Beirut was the worst assault on our Armed Forces during our Nation's long involvement in efforts to bring peace to the troubled Middle East region.

Our entire Nation should remember the sacrifices of those marines, sailors, and soldiers protecting the interests of America and her allies. All Americans should honor those young men and always remember their tragic loss, just as they should honor and remember the other U.S. servicemen who have died in Middle East peace efforts.

Among the 241 servicemen who died as a result of the bombing in Beirut were four marines from my own State of West Virginia. Two other West Virginians, also marines, were wounded in the attack. I would like to honor these men by listing their names in the CONGRESSIONAL RECORD today, and I know I am joined by all the citizens of my State in praising their courage and devotion to duty. The four who died were Cpl. Mecot E. Camara of Hinton, Cpl. Russell M. Cyzick of Star City, Lance Cpl. David L. Cosner of Elkins, and Lance Cpl. Joseph Timothy Dunnigan of Princeton. Wounded were S. Sgt. Orval Hunt of South Charleston and Sgt. John Selbe of Marmet.

As we pay tribute to these brave individuals and all those others who were killed and wounded that day, Mr. President, it also would be appropriate to reflect upon the continuing relevance that that terrorist attack 2 years ago has for today on this second anniversary.

First, this tragedy demonstrates the urgency with which efforts to bring about peace in the Middle East must be pursued. The region's problems and complexities, of which Lebanon remains a prime example, still are unresolved and need to be addressed as a matter of the highest priority.

Thus, the legitimate security interests of all the countries in the region, as contemplated under U.N. Security Council Resolutions 242 and 338, should be recognized by all parties to the disputes. The Palestinian situation should be resolved within the context of the Camp David peace accords, and direct negotiations between Israel and a Jordanian/Palestinian delegation should begin. The likelihood that these events will soon occur is uncertain, at best, but that uncertainty should not deter nations truly committed to peace from doing everything possible to make them a reality.

Second, Mr. President, the bombing of the marine barracks in Beirut underscored the need for increased international efforts to combat the scourge of terrorism. The events of the past 2 years, including those of the last few weeks, demonstrate that the civilized nations of the world still have failed to counter effectively this threat.

In the wake of the bombing 2 years ago our Government accelerated its efforts against terrorism. Subsequent terrorist attacks, especially the hijacking and hostage taking on TWA flight 847, prompted me to suggest that the President initiate multilateral negotiations with the aim of reaching more effective antiterrorist agreements or treaties.

The United States has consulted with its major allies about further antiterrorism initiatives, but it is clear that much more concerted international efforts must be made. I recommend that the President again consider initiating the broader negotiations which I previously suggested.

I also would make two other observations at this time about international terrorism—one regarding the terrorist activities of the Palestine Liberation Organization [PLO] and the other about the role of Iran in sponsoring terrorist actions.

There has been much discussion recently about the role of PLO representatives in the Middle East peace process as part of a joint Jordanian/Palestinian delegation to negotiate with Israel. We have been assured that the PLO is genuine about cooperating with Jordan's King Hussein to advance the prospects for peace. Those assurances would be more credible if the PLO were to renounce its terrorist activities, and until that occurs, the organization's acceptability as part of the peace process remains much in doubt.

There also has been some talk about attempts by Iran to reintegrate itself into the community of civilized nations. The rulers of that nation should

understand that their country will not be accepted in that manner until it, too, renounces its sponsorship of terrorist activities, including support for the group thought responsible for the attack on the marine barracks.

Finally, Mr. President, the bombing of the marine barracks raised questions about the adequacy of our military command structures and the organization of our activities to fight terrorism and to provide timely, sufficient medical care to wounded personnel. Since then, there have been efforts to make improvements in both these areas, although much remains to be done.

Most significantly, the Armed Services Committee has become involved in both these areas. It has undertaken a major project to study the current command structures and organizations of the Defense Department and the military services. The committee also has held hearings into the provision of medical care to our Armed Forces. I hope the ccmmittee's activities will result in real improvements in both these areas.

Mr. President, as the leader of the free world, the United States always will be the target of those forces which seek to attack democracy and to challenge the basic principles of human freedom which our Nation represents.

We must recognize this and resolve to redouble our efforts to eliminate the conditions which contributed to the terrorist bombing 2 years ago. Only in that way will we honor the memory of the 241 Americans who gave their lives in service of their country, and over 100 other servicemen who were wounded in that tragic event.

GARCIA DECISION COMPROMISE

Mr. CRANSTON. Mr. President, today I would like to express my support for the compromise solution reached by the Labor and Human Resources Committee which resolves the problems faced by both State and local government employees and employers as a result of the recent Supreme Court decision in Garcia versus the San Antonio Metropolitan Transit Authority.

The Labor and Human Resources Committee began with S. 1570, a bill introduced by Senator NICKLES which would have overturned the Garcia decision and removed employees of both State and local governments from the protections of the Fair Labor Standards Act, by providing a blanket exemption for States and local governments.

I could not support that bill.

I believe that public service employees, like all other workers, should be compensated fairly for their extra work, and that the public agencies that employ them should be required to meet at least minimal labor standards.

State and local governments were concerned they would not be able to meet the unanticipated fiscal demands on their budgets for overtime work resulting from the unexpected court decision, which both included them under the Fair Labor Standards Act and required that they pay time-and-a-half, rather than compensatory time off for overtime work.

At the same time workers—especially police and firefighters—were also concerned that they would lose the option of compensatory time.

As a result of these concerns, I introduced S. 1719 which would provide a more flexible interpretation of fair labor standards which would meet the needs of both State and local governments and their workers by providing the option of compensatory time off in lieu of overtime payment, when provided for by a preexisting collective bargaining agreement or employment contract.

The committee compromise also addresses the inflexibility of Garcia and allows for compensatory time off in lieu of overtime payment.

I commend my colleagues, Senators METZENBAUM and NICKLES and other members of the committee for their hard work which resulted in this compromise legislation, which I believe we can all live with.

I support its adoption.

TIME FOR REMEMBRANCE FOR TERRORISM VICTIMS

Mr. D'AMATO. Mr. President, I rise today in honor and respect for all those who have suffered at the hands of terrorists, for today has been formally designated as a "Time for Remembrance For Terrorism Victims." Without provocation, these innocent people have been used as pawns in a game for which there are no rules. Victimized by ruthless terrorists for political purposes which can never be attained through violence, these innocent people are physically abused—sometimes even murdered—and psychologically scarred for life, a scarring they share with their families and loved ones. The time has come for the plague of international terrorism to end.

The roots of terrorism are deep. In the 1930's, Adolf Hitler and Joseph Stalin used terror to discourage opposition to their governments. Since then, the Soviet Union, Cuba, and Nicaragua have expanded their financing and training of revolutionary Marxist-Leninist groups throughout the Western Hemisphere, which has produced a growing terrorist network. And many of the Arab nations support the efforts of Palestinian terrorists in the Middle East, which has become the world's primary battleground for this new type of warfare.

Although terrorist groups have failed, and will continue to fail, to achieve their political aims through threat or use of violence and destruction, they have succeeded in leaving in their wake a host of victims who must carry their ugly memories with them for the rest of their lives. Try as they may, former hostages are unable to put these memories where they belong—behind them.

Stopping this needless pain and suffering will only be achieved when we make terrorists understand that their violence and destruction will never bear fruit. We can do this by following the lead of President Reagan, as laid out in the most recent incident of international terror. We will not forgive, we will pursue justice, and we will have the resolve and courage to take the necessary action.

We must make certain that history does not repeat itself so that our future is clean of the blood of terrorism that has reddened our history books. Innocent people need not be victims any longer.

Thank you, Mr. President.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1986

Mr. ANDREWS. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of the Department of Transportation and related agencies appropriation, H.R. 3244, Calendar Order No. 340.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3244) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1986, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Commit-

tee on Appropriations, with amendments, as follows:

(The parts of the bill intended to be striken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

H.R. 3244

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of Transportation and related agencies for the fiscal year ending September 30, 1986, and for other purposes, namely:

TITLE I—DEPARTMENT OF TRANSPORTATION

OFFICE OF THE SECRETARY

SALARIES AND EXPENSES

[(INCLUDING TRANSFER OF FUNDS)]

For necessary expenses of the Office of the Secretary of Transportation, including not to exceed $30,000 for allocation within the Department of official reception and representation expenses as the Secretary may determine[; $965,000 for the immediate Office of the Secretary, $460,000 for the immediate Office of the Deputy Secretary, $5,500,000 for the Office of the General Counsel, $7,500,000 for the Office of the Assistant Secretary for Policy and International Affairs, $2,180,000 for the Office of the Assistant Secretary for Budget and Programs, $2,570,000 for the Office of the Assistant Secretary for Governmental Affairs, $20,750,000 for the Office of the Assistant Secretary for Administration, $1,470,000 for the Office of the Assistant Secretary for Public Affairs, $780,000 for the Executive Secretariat, $400,000 for the Contract Appeals Board, $1,300,000 for the Office of Civil Rights, $500,000 for the Office of Commercial Space Transportation, $970,000 together with $330,000 to be derived from unobligated balances of "Payments to air carriers" for the Office of Essential Air Service, $580,000 for Regional Representatives, and $4,575,000 for the Office of Small and Disadvantaged Business Utilization,] *$51,300,000, together with $500,000 unobligated balances available under this head at the beginning of fiscal year 1986, and* of which $3,500,000 shall remain available until expended and shall be available for the purposes of the Minority Business Resource Center as authorized by 49 U.S.C. 332: *Provided,* That, notwithstanding any other provision of law, funds available for the purposes of the Minority Business Resource Center in this or any other Act may be used for business opportunities related to any mode of transportation.

TRANSPORTATION PLANNING, RESEARCH, AND DEVELOPMENT

For necessary expenses for conducting transportation planning, research, and development activities, including the collection of national transportation statistics, and university research and internships, to remain available until expended, [$3,000,000] *$4,000,000.*

WORKING CAPITAL FUND

Necessary expenses for operating costs and capital outlays of the Department of Transportation Working Capital Fund not to exceed $64,500,000 shall be paid, in accordance with law, from appropriations made available by this Act and prior appropriation Acts to the Department of Transportation, together with advances and reimbursements received by the Department of Transportation.

PAYMENTS TO AIR CARRIERS

For payments to air carriers of so much of the compensation fixed and determined under section 419 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1389), as is payable by the Department of Transportation, [$36,000,000] *$28,000,000,* to remain available until expended.

COAST GUARD

OPERATING EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase of not to exceed eight passenger motor vehicles for replacement only; and recreation and welfare, [$1,785,200,000] *$1,585,101,000* of which [$8,000,000] *$10,000,000* shall be derived from unobligated balances of "Pollution fund" and of which $15,000,000 shall be [derived] *expended* from the Boat Safety Account: *Provided,* That, notwithstanding any other provision of law, of the funds available under this head [$786,800,000] *$792,800,000* shall be available for compensation and benefits of military personnel: *Provided further, That funds available in this Act shall be available to fund 38,900 full-time equivalent military personnel and 39,150 military positions: Provided further,* That, of the funds available under this head, not less than [$325,000,000] *$328,000,000* shall be available for drug enforcement activities: *Provided further,* That the number of aircraft on hand at any one time shall not exceed two hundred and ten, exclusive of planes and parts stored to meet future attrition: *Provided further,* That none of the funds appropriated in this or any other Act shall be available for pay or administrative expenses in connection with shipping commissioners in the United States: *Provided further,* That none of the funds provided in this Act shall be available for expenses incurred for yacht documentation under 46 U.S.C. 103 except to the extent fees are collected from yacht owners and credited to this appropriation.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

For necessary expenses of acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; to remain available until September 30, 1990, [$267,300,000] *$276,300,000: Provided,* That the Secretary of Transportation shall issue regulations requiring that written warranties shall be included in all contracts with prime contractors for major systems acquisitions of the Coast Guard: *Provided further,* That any such written warranty shall not apply in the case of any system or component thereof that has been furnished by the Government to a contractor: *Provided further,* That the Secretary of Transportation may provide for a waiver of the requirements for a warranty where: (1) the waiver is necessary in the interest of the national defense or the warranty would not be cost effective; and (2) the Committees on Appropriations of the Senate and the House of Representatives are notified in writing of the Secretary's intention to waive and reasons for waiving such requirements: *Provided further,* That the requirements for such written warranties shall not cover combat damage.

ALTERATION OF BRIDGES

For necessary expenses for alteration or removal of obstructive bridges, [$7,195,000] *$5,200,000,* to remain available until expended.

RETIRED PAY

For retired pay, including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, and for payments for medical care of retired personnel and their dependents under the Dependents Medical Care Act (10 U.S.C., ch. 55), $351,800,000.

RESERVE TRAINING

For all necessary expenses for the Coast Guard Reserve, as authorized by law; maintenance and operation of facilities; and supplies, equipment, and services, $61,502,000.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

For necessary expenses, not otherwise provided for, for basic and applied scientific research, development, test, and evaluation; maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law, [$23,000,000] *$21,000,000,* to remain available until expended: *Provided,* That there may be credited to this appropriation funds received from State and local governments, other public authorities, private sources and foreign countries, for expenses incurred for research, development, testing, and evaluation.

OFFSHORE OIL COMPENSATION FUND

For necessary expenses to carry out the provisions of title III of the Outer Continental Shelf Lands Act Amendments of 1978 (Public Law 95-372), $1,000,000, to be derived from the Offshore Oil Pollution Compensation Fund and to remain available until expended. In addition, to the extent that available appropriations are not adequate to meet the obligations of the Fund, the Secretary of Transportation is authorized to issue to the Secretary of the Treasury notes or other obligations in such amounts and at such times as may be necessary: *Provided,* That none of the funds in this Act shall be available for the implementation or execution of programs the obligations for which are in excess of $60,000,000 in fiscal year 1986 for the "Offshore Oil Pollution Compensation Fund".

DEEPWATER PORT LIABILITY FUND

For necessary expenses to carry out the provisions of section 18 of the Deepwater Port Act of 1974 (Public Law 93-627), $1,000,000, to be derived from the Deepwater Port Liability Fund and to remain available until expended. In addition, to the extent that available appropriations are not adequate to meet the obligations of the Fund, the Secretary of Transportation is authorized to issue, and the Secretary of the Treasury is authorized to purchase, without fiscal year limitation, notes or other obligations in such amounts and at such times as may be necessary: *Provided,* That none of the funds in this Act shall be available for the implementation or execution of programs the obligations for which are in excess of $50,000,000 in fiscal year 1986 for the "Deepwater Port Liability Fund".

BOAT SAFETY

(LIQUIDATION OF CONTRACT AUTHORIZATION)

[For necessary expenses for recreational boating safety assistance under Public Law 92-75, as amended, and Public Law 98-369,

$13,625,000, to be derived from the Boat Safety Account and to remain available until expended] *For payment of obligations incurred for recreational boating safety assistance under Public Law 92-75, as amended, $30,000,000, to be derived from the Boat Safety Account and to remain available until expended: Provided, That none of the funds in this Act shall be available for the planning or execution of programs, the obligations for which are in excess of $30,000,000 in fiscal year 1986 for recreational boating safety assistance: Provided further,* That no obligations may be incurred for the improvement of recreational boating facilities.

[With regard to section 2901(a)(1) of the Deficit Reduction Act of 1984 (98 Stat. 1207), the Coast Guard will conform to the standards adopted by the Department of Defense.]

FEDERAL AVIATION ADMINISTRATION

Headquarters Administration

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses, not otherwise provided for, of providing administrative services at the headquarters location of the Federal Aviation Administration, including but not limited to accounting, budgeting, personnel, legal, public affairs, and executive direction for the Federal Aviation Administration, $64,400,000*: Provided, That the Secretary of Transportation is authorized to transfer appropriated funds between this appropriation and the Federal Aviation Administration appropriation for operations: Provided further, That this appropriation shall be neither increased nor decreased by more than 2 per centum by any such transfers: Provided further, That any such transfers shall be reported to the Committees on Appropriations.*

Operations

For necessary expenses of the Federal Aviation Administration, not otherwise provided for, including administrative expenses for research and development, and for establishment of air navigation facilities, and carrying out the provisions of the Airport and Airway Development Act, as amended, or other provisions of law authorizing obligation of funds for similar programs of airport and airway development or improvement; purchase of four passenger motor vehicles for replacement only; [$2,694,600,000] *$2,414,400,000,* of which not to exceed [$548,000,000] *$446,000,000* shall be derived from the Airport and Airway Trust Fund: *Provided,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the maintenance and operation of air navigation facilities: *Provided further,* That none of these funds shall be available for new applicants for the second career training program.

Facilities and Equipment (Airport and Airway Trust Fund)

For necessary expenses, not otherwise provided for, for acquisition, establishment, and improvement by contract or purchase, and hire of air navigation and experimental facilities, including initial acquisition of necessary sites by lease or grant; engineering and service testing including construction of test facilities and acquisition of necessary sites by lease or grant; and construction and furnishing of quarters and related accommodations of officers and employees of the Federal Aviation Administration stationed at remote localities where such accommodations are not available; to be derived from the Airport and Airway Trust Fund and to remain available until September 30, 1990, [$1,044,000,000] *$993,000,000*: *Provided,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the establishment and modernization of air navigation facilities: *Provided further,* That of the funds available under this head, [$5,000,000] *$10,000,000* shall be available for the Secretary of Transportation to enter into grant agreements with universities or colleges to conduct demonstration projects in the development, advancement, or expansion of airway science curriculum programs, and such money, which shall remain available until expended, shall be made available under such terms and conditions as the Secretary of Transportation may prescribe, to such universities or colleges for the purchase or lease of buildings and associated facilities, instructional materials, or equipment to be used in conjunction with airway science curriculum programs.

Research, Engineering and Development (Airport and Airway Trust Fund)

For necessary expenses, not otherwise provided for, for research, engineering and development, in accordance with the provisions of the Federal Aviation Act (49 U.S.C. 1301-1542), including construction of experimental facilities and acquisition of necessary sites by lease or grant, to be derived from the Airport and Airway Trust Fund and to remain available until expended, [$190,000,000] *$192,000,000 together with $15,000,000 to be transferred from unobligated balances of "Facilities and equipment"*[*, of which $4,000,000 shall be available to construct an experimental computer-based Airway and Aviation Management Program in accordance with the provisions of the Federal Aviation Act (49 U.S.C. 1301-1542) at the Center for Research and Training in Information-based Aviation and Transportation Management at Barry University:*] *Provided,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred for research, engineering and development.

Grants-in-Aid for Airports (Liquidation of Contract Authorization) (Airport and Airway Trust Fund)

For liquidation of obligations incurred for airport planning and development under section 14 of Public Law 91-258, as amended, and under other law authorizing such obligations, and obligations for noise compatibility planning and programs, $693,000,000, to be derived from the Airport and Airway Trust Fund and to remain available until expended: *Provided,* That none of the funds in this Act shall be available for the planning or execution of programs the commitments for which are in excess of $925,000,000 in fiscal year 1986 for grants-in-aid for airport planning and development, and noise compatibility planning and programs, notwithstanding section 506(e)(4) of the Airport and Airway Improvement Act of 1982.

Operation and Maintenance, Metropolitan Washington Airports

For expenses incident to the care, operation, maintenance, improvement, and protection of the federally owned civil airports in the vicinity of the District of Columbia, including purchase of eight passenger motor vehicles for police use, for replacement only; purchase, cleaning, and repair of uniforms; and arms and ammunition, [$35,400,000] *$34,100,000*: *Provided,* That there may be credited to this appropriation funds received from air carriers, concessionaires, and non-Federal tenants sufficient to cover utility and fuel costs which are in excess of $6,682,000: *Provided further,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, or private sources, for expenses incurred in the maintenance and operation of the federally owned civil airports.

Construction, Metropolitan Washington Airports

For necessary expenses for construction at the federally owned civil airports in the vicinity of the District of Columbia, [$12,000,000] *$7,000,000,* to remain available until September 30, 1988.

Aviation Insurance Revolving Fund

The Secretary of Transportation is hereby authorized to make such expenditures and investments, within the limits of funds available pursuant to section 1306 of the Act of August 23, 1958, as amended (49 U.S.C. 1536), and in accordance with section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 9104), as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for aviation insurance activities under said Act.

Aircraft Purchase Loan Guarantee Program

The Secretary of Transportation may hereafter issue notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such obligations may be issued to pay any necessary expenses required pursuant to any guarantee issued under the Act of September 7, 1957, Public Law 85-307, as amended (49 U.S.C. 1324 note). The aggregate amount of such obligations during fiscal year 1986 shall not exceed [$10,000,000] *$125,000,000.* Such obligations shall be redeemed by the Secretary from appropriations authorized by this section. The Secretary of the Treasury shall purchase any such obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under the subsection. The Secretary of the Treasury may sell any such obligations at such times and price and upon such terms and conditions as he shall determine in his discretion. All purchase, redemptions, and sales of such obligations by such Secretary shall be treated as public debt transactions of the United States.

FEDERAL HIGHWAY ADMINISTRATION

Limitation on General Operating Expenses

Necessary expenses for administration, operation, and research of the Federal Highway Administration, not to exceed [$204,500,000] *$203,761,000,* shall be paid, in accordance with law, from appropriations made available by this Act to the Federal Highway Administration together with advances and reimbursements received by the

Federal Highway Administration: *Provided,* That not to exceed [$48,589,000] *$48,415,000* of the amount provided herein shall remain available until expended: *Provided further,* [*That, of the funds available under this limitation, $5,000,000 shall be made available only for a Demonstration Bonding Program for economically and socially disadvantaged businesses: Provided further,*] That, notwithstanding any other provision of law, there may be credited to this account funds received from States, counties, municipalities, other public authorities and private sources, for training expenses incurred for non-Federal employees[: *Provided further,* That none of the funds provided in this Act shall be used for the approval of, or to pay the salary of any person who approves, projects to construct a landfill in the Hudson River as part of an Interstate System highway in New York City.]

HIGHWAY SAFETY RESEARCH AND DEVELOPMENT

(HIGHWAY TRUST FUND)

For necessary expenses in carrying out provisions of sections 307(a) and 403 of title 23, United States Code, to be derived from the Highway Trust Fund and to remain available until expended, $8,500,000.

HIGHWAY-RELATED SAFETY GRANTS (LIQUIDATION OF CONTRACT AUTHORIZATION) (HIGHWAY TRUST FUND)

For payment of obligations incurred in carrying out the provisions of title 23, United States Code, section 402, administered by the Federal Highway Administration, to remain available until expended, $9,000,000 to be derived from the Highway Trust Fund: *Provided,* That not to exceed $100,000 of the amount appropriated herein shall be available for "Limitation on general operating expenses": *Provided further,* That none of the funds in this Act shall be available for the planning or execution of programs the obligations for which are in excess of $10,000,000 in fiscal year 1986 for "Highway-related safety grants".

HIGHWAY BEAUTIFICATION

Funds appropriated and obligated to carry out sections 131 and 136 of title 23, United States Code, which have been deobligated subsequent to enactment of this Act shall remain available until expended.

RAILROAD-HIGHWAY CROSSINGS DEMONSTRATION PROJECTS

[For necessary expenses of certain railroad-highway crossings demonstration projects as authorized by section 163 of the Federal-Aid Highway Act of 1973, as amended, to remain available until expended, $38,700,000, of which $25,800,000 shall be derived from the Highway Trust Fund: *Provided,* That the] *The* unobligated balance of funds appropriated in Public Law 93-98 for Wheeling, West Virginia, is hereby made available for allocation to carry out highway projects on the Federal-aid system in Wheeling, West Virginia *at full Federal expense.*

FEDERAL-AID HIGHWAYS (LIQUIDATION OF CONTRACT AUTHORIZATION) (HIGHWAY TRUST FUND)

For carrying out the provisions of title 23, United States Code, which are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 148, not otherwise provided, including reimbursements for sums expended pursuant to the provisions of 23 U.S.C. 308, $13,836,000,000 or so much thereof as may be available in and derived from the Highway Trust Fund: *Provided,* That none of the funds in this Act shall be available for the implementation or execution of programs the obligations for which are in excess of $13,250,000,000 for Federal-aid highways and highway safety construction programs for fiscal year 1986, except that this limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, obligations under section 157 of title 23, United States Code, projects covered under section 147 of the Surface Transportation Assistance Act of 1978, section 9 of the Federal-Aid Highway Act of 1981, subsections 131 (b) and (j) of Public Law 97-424, section 118 of the National Visitors Center Facilities Act of 1968, or section 320 of title 23, United States Code.

RIGHT-OF-WAY REVOLVING FUND (LIMITATION ON DIRECT LOANS) (HIGHWAY TRUST FUND)

During fiscal year 1986 and with the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed $50,000,000.

MOTOR CARRIER SAFETY

For necessary expenses to carry out the motor carrier safety functions of the Secretary as authorized by the Department of Transportation Act (80 Stat. 939-940), [$13,900,000] *$13,902,000,* of which $953,000 shall remain available until expended, and not to exceed $1,601,000 shall be available for "Limitation on general operating expenses".

MOTOR CARRIER SAFETY GRANTS

(HIGHWAY TRUST FUND)

For necessary expenses to carry out provisions of section 402 of Public Law 97-424, [$14,000,000] *$20,000,000,* to be derived from the Highway Trust Fund and to remain available until September 30, 1989.

ACCESS HIGHWAYS TO PUBLIC RECREATION AREAS ON CERTAIN LAKES

For necessary expenses of certain Access Highway Projects, as authorized by section 155, title 23, United States Code, $10,000,000.

BALTIMORE-WASHINGTON PARKWAY

[For necessary expenses, not otherwise provided, to carry out the provisions of the Federal-Aid Highway Act of 1970, for the Baltimore-Washington Parkway, to remain available until expended, $6,500,000 to be derived from the Highway Trust Fund and to be withdrawn therefrom at such times and in such amounts as may be necessary: *Provided,* That, notwithstanding] *Notwithstanding* subsection (b) of section 146 of the Federal-Aid Highway Act of 1970 and any agreement entered into under such subsection, the Secretary of the Interior shall not be required to convey to the State of Maryland any portion of the Baltimore-Washington Parkway located in the State of Maryland, and the State of Maryland shall not be required to accept conveyance of any such portion: *Provided* [*further*], That funds authorized by such section may be expended without regard to any requirement of such an agreement that such portion of the Baltimore-Washington Parkway be conveyed to the State of Maryland.

[RAIL LINE CONSOLIDATION PROJECT

[(TRANSFER OF FUNDS)

[For necessary expenses to carry out a project to consolidate two rail lines on a common alignment in the vicinity of Orange, Texas, that demonstrates methods by which a rail line consolidation project will reduce motor vehicle traffic congestion and increase employment, to remain available until expended, $5,000,000 to be derived from unobligated balances of "Research, training, and human resources".

[AIRPORT-HIGHWAY DEMONSTRATION PROJECT

[(TRANSFER OF FUNDS)

[For necessary expenses to carry out a highway project to depress a highway in Shawnee, Oklahoma, that demonstrates methods of improving air service to a small community by extension of a runway over a depressed road, to remain available until expended, $2,700,000 to be derived from unobligated balances of "Research, training, and human resources".]

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

OPERATIONS AND RESEARCH

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary to discharge the functions of the Secretary with respect to traffic and highway safety and functions under the Motor Vehicle Information and Cost Savings Act (Public Law 92-513, as amended), [$89,365,000] *$78,851,000,* of which [$25,120,000] *$25,455,000* shall be derived from the Highway Trust Fund: *Provided,* That not to exceed [$42,174,000] *$36,624,000* shall remain available until expended, of which [$10,180,000] *$13,729,000* shall be derived from the Highway Trust Fund: *Provided further,* [*That, of the funds available under this head, $10,000,000 shall be available to implement the recommendations of the 1985 National Academy of Sciences report on trauma research.*] *That for the purpose of carrying out a national program to encourage the use of automobile safety belts and passive restraints as authorized by 23 U.S.C 403, an additional $500,000 is available to be derived from unobligated balances of "Carpool and Vanpool projects".*

HIGHWAY TRAFFIC SAFETY GRANTS

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(HIGHWAY TRUST FUND)

For payment of obligations incurred in carrying out the provisions of 23 U.S.C. 402, 406 and 408, and section 209 of Public Law 95-599, as amended, to remain available until expended, $149,000,000, to be derived from the Highway Trust Fund: *Provided,* That none of the funds in this Act shall be available for the planning or execution of programs, the total obligations for which are in excess of $126,500,000 in fiscal year 1986 for "State and community highway safety" authorized under 23 U.S.C. 402: *Provided further,* That none of these funds shall be used for construction, rehabilitation or remodeling costs or for office furnishings and fixtures for State, local, or private buildings or structures: *Provided further,* That none of the funds in this Act shall be available for the planning or execution of programs, the total obligations for which are in excess of $28,800,000 for "Alcohol safety incentive grants" authorized under 23 U.S.C. 408: *Provided further,* That none of the funds in this Act shall be available for the planning or execution of programs authorized by section 209 of Public Law 95-599, as amended, the total obligations for which are in excess of $5,000,000 in fiscal years 1983, 1984, 1985, and 1986: *Provided further,* That not to exceed $5,000,000 shall be available for administering the provisions of 23 U.S.C. 402.

FEDERAL RAILROAD ADMINISTRATION

OFFICE OF THE ADMINISTRATOR

For necessary expenses of the Federal Railroad Administration, not otherwise provided for, $10,120,000.

RAILROAD SAFETY

For necessary expenses in connection with railroad safety, not otherwise provided for, [$28,000,000] *$27,764,000,* of which [$1,300,000] *$1,500,000* shall remain available until expended.

RAILROAD RESEARCH AND DEVELOPMENT

For necessary expenses for railroad research and development, [$11,200,000] *$10,384,000,* to remain available until expended.

RAIL SERVICE ASSISTANCE

For necessary expenses for rail service assistance authorized by section 5 of the Department of Transportation Act, as amended, for Washington Union Station, as authorized by Public Law 97-125, and for necessary administrative expenses in connection with Federal rail assistance programs not otherwise provided for, [$20,200,000] *$20,220,000,* to remain available until expended: *Provided,* That none of the funds provided under this Act shall be available for the planning or execution of a program making commitments to guarantee new loans under the Emergency Rail Services Act of 1970, as amended, and that no new commitments to guarantee loans under section 211(a) or 211(h) of the Regional Rail Reorganization Act of 1973, as amended, shall be made: *Provided further,* That none of the funds in this Act shall be available for the acquisition, sale or transference of Washington Union Station without the prior approval of the House and Senate Committees on Appropriations: *Provided further,* That, of the funds available under this head, $15,000,000 shall be available for allocation to the States under section 5(h)(2) of the Department of Transportation Act, as amended: *Provided further,* That, notwithstanding any other provision of law, a State may not apply for fiscal year 1986 funds available under section 5(h)(2) until such State has expended all funds granted to it in the fiscal years prior to the beginning of fiscal year 1981, other than funds not expended due to pending litigation: *Provided further,* That a State denied funding by reason of the immediately preceding proviso may still apply for and receive funds for planning purposes: *Provided further,* That, notwithstanding any other provision of law, of the funds available under section 5(h)(2), $10,000,000 shall be made available for use under sections 5(h)(3)(B)(ii) and 5(h)(3)(C) of the Department of Transportation Act, as amended, notwithstanding the limitations set forth in section 5(h)(3)(B)(ii).

CONRAIL LABOR PROTECTION

[(INCLUDING RESCISSION)]

Such sums as may be necessary shall be made available for necessary expenses of administration of section 701 of the Regional Rail Reorganization Act of 1973 by the Railroad Retirement Board[: *Provided,* That, of the funds heretofore appropriated under this head, $8,000,000 are rescinded.]

NORTHEAST CORRIDOR IMPROVEMENT PROGRAM

For necessary expenses related to Northeast Corridor improvements authorized by title VII of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended (45 U.S.C. 851 et seq.), $12,500,000, to remain available until expended: *Provided,* That, notwithstanding any other provision of law, the provisions of Public Law 85-804 shall apply to the Northeast Corridor Improvement Program: *Provided further,* That the Secretary may waive the provisions of 23 U.S.C. 322 (c) and (d) if such action would serve a public purpose: *Provided further,* That all public at grade-level crossings remaining along the Northeast Corridor upon completion of the project shall be equipped with protective devices including gates and lights.

GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

(INCLUDING TRANSFERS OF FUNDS)

To enable the Secretary of Transportation to make grants to the National Railroad Passenger Corporation for operating losses incurred by the Corporation, capital improvements, and labor protection costs authorized by 45 U.S.C. 565, to remain available until expended, [$603,500,000] *$616,000,000,* of which [$15,000,000] *$23,000,000* shall be derived from unobligated balances of "Conrail labor protection" *and $5,500,000 shall be derived from unobligated balances of "Rail labor assistance" as of September 30, 1985: Provided,* That none of the funds herein appropriated shall be used for lease or purchase of passenger motor vehicles or for the hire of vehicle operators for any officer or employee, other than the president of the Corporation, excluding the lease of passenger motor vehicles for those officers or employees while in official travel status: *Provided further,* That the Secretary shall make no commitments to guarantee new loans or loans for new purposes under 45 U.S.C. 602 in fiscal year 1986: *Provided further,* That the incurring of any obligation or commitment by the Corporation for the purchase of capital improvements prohibited by this Act or not expressly provided for in an appropriation Act shall be deemed a violation of 31 U.S.C. 1341: *Provided further,* That no funds are required to be expended or reserved for expenditure pursuant to 45 U.S.C. 601(e): *Provided further,* That none of the funds in this or any other Act shall be made available to finance the rehabilitation and other improvements (including upgrading track and the signal system, ensuring safety at public and private highway and pedestrian crossings by improving signals or eliminating such crossings, and the improvement of operational portions of stations related to intercity rail passenger service) on the main line track between Atlantic City, New Jersey, and the main line of the Northeast Corridor, unless the Secretary of Transportation certifies that not less than 40 per centum of the costs of such improvements shall be derived from non-Federal sources: *Provided further,* That, notwithstanding any other provision of law, the National Railroad Passenger Corporation shall not operate rail passenger service between Atlantic City, New Jersey, and the Northeast Corridor main line unless the Corporation's Board of Directors determines that revenues from such service have covered or exceeded 80 per centum of the short term avoidable costs of operating such service in the first year of operation and 100 per centum of the short term avoidable operating costs for each year thereafter: *Provided further,* That none of the funds provided in this or any other Act shall be made available to finance the acquisition and rehabilitation of a line, and construction necessary to facilitate improved rail passenger service, between Spuyten Duyvil, New York, and the main line of the Northeast Corridor unless the Secretary of Transportation certifies that not less than 40 per centum of the costs of such improvement shall be derived from non-Amtrak sources.

RAILROAD REHABILITATION AND IMPROVEMENT FINANCING FUNDS

[The Secretary of Transportation is authorized to issue to the Secretary of the Treasury notes or other obligations pursuant to section 512 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, in such amounts and at such times as may be necessary to pay any amounts required pursuant to the guarantee of the principal amount of obligations under sections 511 through 513 of such Act, such authority to exist as long as any such guaranteed obligation is outstanding: *Provided,* That no new loan guarantee commitments shall be made during fiscal year 1986.]

The total commitments to guarantee new loans pursuant to sections 511 through 513 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, shall not exceed $4,000,000 of contingent liabilities for loan principal during fiscal year 1986: Provided, That the Secretary of Transportation is authorized to issue to the Secretary of the Treasury notes of other obligations pursuant to 512 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, in such amounts and at such times as may be necessary to pay any amounts required pursuant to the guarantee of the principal amount of obligations under sections 511 through 513 of such Act, such authority to exist as long as any such guaranteed obligation is outstanding: Provided further, That the aggregate amount of such notes or other obligations during fiscal year 1986 shall not exceed $100,000,000.

REDEEMABLE PREFERENCE SHARES

[(INCLUDING TRANSFER OF FUNDS)]

[The] *Notwithstanding any other provision of law, the* Secretary of Transportation is hereby authorized to expend proceeds from the sale of fund anticipation notes to the Secretary of the Treasury and any other moneys deposited in the Railroad Rehabilitation and Improvement Fund pursuant to sections 502, 505-507, and 509 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, and section 803 of Public Law 95-620, for uses authorized for the Fund, in amounts not to exceed [$35,500,000] *$33,500,000,* [of which $5,500,000 shall be derived from unobligated balances of "Rail labor assistance"] *of which $17,000,000 shall be derived from unobligated balances of this account as of September 30, 1985.*

[CONRAIL COMMUTER TRANSITION ASSISTANCE

[For necessary capital expenses of Conrail commuter transition assistance, not otherwise provided for, $10,000,000, to remain available until expended.]

URBAN MASS TRANSPORTATION ADMINISTRATION

ADMINISTRATIVE EXPENSES

For necessary administrative expenses of the urban mass transportation program authorized by the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), and 23 U.S.C. chapter 1, in connection with these activities, including hire of passenger motor vehicles and services as authorized by 5 U.S.C. 3109, [$31,000,000]

$30,000,000[*, of which not to exceed $350,000 shall be available for the Office of the Administrator.*]

RESEARCH, TRAINING, AND HUMAN RESOURCES

For necessary expenses for research, training, and human resources as authorized by the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), to remain available until expended, [$28,103,000] *$17,400,000*: *Provided*, That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities and private sources, for expenses incurred for training.

FORMULA GRANTS

For necessary expenses to carry out the provisions of sections 9 and 18 of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), [$2,210,000,000] *$2,100,000,000*, to remain available until expended.

DISCRETIONARY GRANTS

None of the funds in this Act shall be available for the implementation or execution of programs in excess of [$1,010,000,000] *$1,100,000,000* in fiscal year 1986 for grants under the contract authority authorized in section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.).

LIQUIDATION OF CONTRACT AUTHORIZATION

For payment of obligations incurred in carrying out section 21(a)(2) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), administered by the Urban Mass Transportation Administration, [$720,000,000] *$775,000,000*, to be derived from the Highway Trust Fund and to remain available until expended.

INTERSTATE TRANSFER GRANTS—TRANSIT

For necessary expenses to carry out the provisions of 23 U.S.C. 103(e)(4) related to transit projects, [$237,500,000] *$200,000,000*, to remain available until September 30, 1987.

WASHINGTON METRO

For necessary expenses to carry out the provisions of section 14 of Public Law 96-184, [$237,500,000] *$187,500,000*, to remain available until expended.

SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION

The Saint Lawrence Seaway Development Corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to the Corporation, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Corporation's budget for the current fiscal year except as hereinafter provided.

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed [$1,890,000] *$1,942,000* shall be available for administrative expenses which shall be computed on an accrual basis, including not to exceed $3,000 for official entertainment expenses to be expended upon the approval or authority of the Secretary of Transportation: *Provided*, That Corporation funds shall be available for the hire of passenger motor vehicles and aircraft, operation and maintenance of aircraft, uniforms or allowances therefor for operation and maintenance personnel, as authorized by law (5 U.S.C. 5901-5902), and $15,000 shall be available for services as authorized by 5 U.S.C. 3109.

RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

RESEARCH AND SPECIAL PROGRAMS

For expenses necessary to discharge the functions of the Research and Special Programs Administration, for expenses for conducting research and development and for grants-in-aid to carry out a pipeline safety program, as authorized by section 5 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1674), [$19,400,000] *$19,200,000*, of which $6,975,000 shall remain available until expended: *Provided, That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources for expenses incurred for training.*

OFFICE OF THE INSPECTOR GENERAL

SALARIES AND EXPENSES

For necessary expenses of the Office of the Inspector General in carrying out the provisions of the Inspector General Act of 1978, [$27,950,000] *$27,250,000*.

TITLE II—RELATED AGENCIES

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

SALARIES AND EXPENSES

For expenses necessary for the Architectural and Transportation Barriers Compliance Board, as authorized by section 502 of the Rehabilitation Act of 1973, as amended, [$2,000,000] *$1,975,000*.

NATIONAL TRANSPORTATION SAFETY BOARD

SALARIES AND EXPENSES

For necessary expenses of the National Transportation Safety Board, including hire of passenger motor vehicles and aircraft; services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18; uniforms, or allowances therefor, as authorized by law (5 U.S.C 5901-5902), [$22,400,000] *$22,200,000*, of which not to exceed [$300] *$500* may be used for official reception and representation expenses.

INTERSTATE COMMERCE COMMISSION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses of the Interstate Commerce Commission, including services as authorized by 5 U.S.C. 3109, and not to exceed $1,500 for official reception and representation expenses, [$50,480,000] *$49,300,000*, of which $2,300,000 shall be derived from unobligated balances of "Payments for directed rail service": *Provided*, That joint board members and cooperating State commissioners may use Government transportation requests when traveling in connection with their official duties as such.

PAYMENTS FOR DIRECTED RAIL SERVICE

None of the funds provided in this Act shall be available for the execution of programs the obligations for which can reasonably be expected to exceed $1,000,000 for directed rail service authorized under 49 U.S.C. 11125 or any other legislation.

PANAMA CANAL COMMISSION

OPERATING EXPENSES

For operating expenses necessary for the Panama Canal Commission, including hire of passenger motor vehicles and aircraft; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); not to exceed $10,000 for official reception and representation expenses of the Board; operation of guide services; residence for the Administrator; disbursements by the Administrator for employee and community projects; [not to exceed $5,000 for official reception and representation expenses of the Secretary;] not to exceed $25,000 for official reception and representation expenses of the Administrator; and to employ services as authorized by law (5 U.S.C. 3109); [$401,284,000] *$400,284,000*, to be derived from the Panama Canal Commission Fund: *Provided*, That there may be credited to this appropriation funds received from the Panama Canal Commission's capital outlay account for expenses incurred for supplies and services provided for capital projects: *Provided further, That the Commission shall deposit in the Treasury as miscellaneous receipts that part of the tolls and other receipts that covers interest on the investment of the United States in the Panama Canal collected during the fiscal years ending September 30, 1980, 1981, 1982, 1983, 1984, 1985, and each fiscal year thereafter. The investment of the United States in the Panama Canal shall not be increased as prescribed in section 1603(b)(1)(A) of the Panama Canal Act of 1979 for such deposits of interest collected from tolls made during the fiscal years ending September 30, 1980, 1981, 1982, 1983, 1984, and 1985.*

CAPITAL OUTLAY

For acquisition, construction, replacement, and improvement of facilities, structures, and equipment required by the Panama Canal Commission, including the purchase of not to exceed [forty-seven] *four* passenger motor vehicles for replacement only (including large heavy-duty vehicles used to transport Commission personnel across the Isthmus of Panama, the purchase price of which shall not exceed $14,000 per vehicle); to employ services authorized by law (5 U.S.C. 3109); [$26,500,000] *$25,500,000* to be derived from the Panama Canal Commission Fund and to remain available until expended.

DEPARTMENT OF THE TREASURY

OFFICE OF THE SECRETARY

INVESTMENT IN FUND ANTICIPATION NOTES

For the acquisition, in accordance with section 509 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, and section 803 of Public Law 95-620, of fund anticipation notes, [$35,500,000] *$33,500,000*.

UNITED STATES RAILWAY ASSOCIATION

ADMINISTRATIVE EXPENSES

For necessary administrative expenses to enable the United States Railway Association to carry out its functions under the Regional Rail Reorganization Act of 1973, as amended, to remain available until expended, [$2,100,000] *$2,400,000*, of which not to exceed $500 may be available for official reception and representation expenses.

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

INTEREST PAYMENTS

For necessary expenses for interest payments, to remain available until expended, $51,663,569: *Provided*, That these funds shall be disbursed pursuant to terms and conditions established by Public Law 96-184 and the Initial Bond Repayment Participation Agreement.

TITLE III—GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; purchase of liability insurance for motor vehicles operating in foreign countries on official departmental business; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. Funds appropriated for the Panama Canal Commission may be apportioned notwithstanding section 3679 of the Revised Statutes, as amended (31 U.S.C. 1341), to the extent necessary to permit payment of such pay increases for officers or employees as may be authorized by administrative action pursuant to law which are not in excess of statutory increases granted for the same period in corresponding rates of compensation for other employees of the Government in comparable positions.

SEC. 303. Funds appropriated under this Act for expenditures by the Federal Aviation Administration shall be available (1) except as otherwise authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for expenses of primary and secondary schooling for dependents of Federal Aviation Administration personnel stationed outside the continental United States at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents and (2) for transportation of said dependents between schools serving the area which they attend and their places of residence when the Secretary, under such regulations as may be prescribed, determines that such schools are not accessible by public means of transportation on a regular basis.

SEC. 304. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18.

SEC. 305. None of the funds appropriated in this Act for the Panama Canal Commission may be expended unless in conformance with the Panama Canal Treaties of 1977 and any law implementing those treaties.

SEC. 306. None of the funds provided in this Act may be used for planning or construction of rail-highway crossings under section 322(a) of title 23, United States Code, or under section 701(a)(5) or section 703(1)(A) of the Railroad Revitalization and Regulatory Reform Act of 1976 at the—

(1) School Street crossing in Groton, Connecticut; and

(2) Broadway Extension crossing in Stonington, Connecticut.

SEC. 307. None of the funds in this Act shall be used for the planning or execution of any program to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings funded in this Act.

SEC. 308. None of the funds in this Act shall be used to assist, directly or indirectly, any State in imposing mandatory State inspection fees or sticker requirements on vehicles which are lawfully registered in another State, including vehicles engaged in interstate commercial transportation which are in compliance with Part 396—Inspection and Maintenance of the Federal Motor Carrier Safety Regulations of the U.S. Department of Transportation.

SEC. 309. None of the funds contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 310. Notwithstanding any other provision of law, total amounts of contract authority authorized for fiscal year 1986 in section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended, shall be available for obligation through fiscal year 1989.

[SEC. 311. None of the funds in this or any other Act shall be available for the planning or implementation of any change in the current Federal status of the Transportation Systems Center.]

SEC. [312] *311.* The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

SEC. [313] *312.* (a) For fiscal year 1986 the Secretary of Transportation shall distribute the obligation limitation for Federal-aid highways by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bear to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(b) During the period October 1 through December 31, 1985, no State shall obligate more than 40 per centum of the amount distributed to such State under subsection (a), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(c) Notwithstanding subsections (a) and (b), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code.

(2) after August 1, 1986, revise a distribution of the funds made available under subsection (a) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code, and giving priority to those States which, because of statutory changes made by the Surface Transportation Assistance Act of 1982 and the Federal-Aid Highway Act of 1981, have experienced substantial proportional reductions in their apportionments and allocations.

(3) not distribute amounts authorized for administrative expenses and the Federal Lands Highway Programs.

[SEC. 314. None of the funds in this Act shall be available for salaries and expenses of more than one hundred and five political appointees in the Department of Transportation.

[SEC. 315. Not to exceed $1,000,000 of the funds provided in this Act for the Department of Transportation shall be available for the necessary expenses of advisory committees.]

SEC. [316] *313.* The limitation on obligations for Federal-aid highways and highway safety construction programs for fiscal year 1986 shall not apply to obligations for the remaining approach and bridge removal work necessary to complete the new bridge alignment for the Zilwaukee Bridge.

SEC. [317] *314.* (a) Section 5(b)(2) of the Urban Mass Transportation Act of 1964 is amended by inserting after the first sentence the following new sentence: "Any funds apportioned for fiscal year 1982 or 1983 under subsection (a) for expenditure in an urbanized area with a population of less than 200,000 may be expended in an urbanized area with a population of 200,000 or more.".

(b) Section 5(c)(4) of the Urban Mass Transportation Act of 1964 is amended by striking the period at the end of the first sentence, by inserting the following: "except that any fiscal year 1982 funds made available to a Governor under section (b)(2) of the Urban Mass Transportation Act of 1964, as amended, that are unobligated as of October 1, 1985, or become unobligated thereafter, shall remain available for expenditure under section 5 until October 1, 1986.".

SEC. [318] *315.* Notwithstanding any other provision of law, within 60 days of the effective date of this Act the Urban Mass Transportation Administration shall reapportion under section 9 of the Urban Mass Transportation Act of 1964, as amended, those funds available for reapportionment pursuant to subsection (c)(4) of section 5 of that Act.

SEC. [319] *316.* None of the funds in this or any other Act shall be made available for the proposed Woodward light rail line in the Detroit, Michigan, area until a source of operating funds has been approved in accordance with Michigan law: *Provided*, That this limitation shall not apply to alternatives analysis studies under section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended.

[SEC. 320. (a) Notwithstanding any other provision of law, the Secretary shall, with regard to the Discretionary Grants Program of the Urban Mass Transportation Administration, within 30 days after the enactment of this section, issue a letter of intent and enter into a full funding contract with the Southern California Rapid Transit District for $429,000,000 to complete the Minimum Operable Segment, MOS-1, of the downtown Los Angeles to the San Fernando Valley Metro Rail Project: *Provided*, That the $429,000,000 shall include $11,800,000 earmarked for fiscal year 1984, $117,200,000 earmarked for fiscal year 1985, $117,000,000 in fiscal year 1986 and, subject to the availability of funds from Congress, $183,000,000 in subsequent fiscal years.

[(b) The Urban Mass Transportation Administration shall enter into a contract with the Southern California Rapid Transit District to conduct a study of the potential methane gas risks relating to the proposed alignment of the Metro Rail Project beyond the Minimum Operable Segment, MOS-1. None of the funds described in subsection (a) may be made available for any segment of the downtown Los Angeles to San Fernando Valley Metro Rail project unless and until the Southern California Rapid Transit

District officially notifies and commits to the Urban Mass Transportation Administration that no part of the Metro Rail project will tunnel into or through any zone designated as a potential risk zone or high potential risk zone in the report of the City of Los Angeles dated June 10, 1985 entitled "Task Force Report on the March 24, 1985 Methane Gas Explosion and Fire in the Fairfax Area". Funds for this study, in an amount not to exceed $1,000,000, shall be made available from funds previously allocated for the MOS-1 project, commencing within 30 days of enactment.

[SEC. 321. Notwithstanding any other provision of law or regulation, the Secretary shall, with regard to the Discretionary Grants Program of the Urban Mass Transportation Administration, within 30 days after the enactment of this section, issue a letter of intent and, upon completion of the current environmental impact statement, enter into a full funding contract with Metropolitan Dade County, Florida, for $180,000,000 to complete the north and south legs of the downtown component of metrorail, which shall be exempt from the major capital investment policy issued by the Urban Mass Transportation Administration on May 18, 1984: *Provided*, That the $180,000,000 shall include $20,000,000 earmarked for fiscal year 1984, $49,000,000 earmarked for fiscal year 1985, $36,000,000 in fiscal year 1986 and, subject to the availability of funds from Congress, $75,000,000 in subsequent fiscal years.

[SEC. 322. Notwithstanding any other provision of law, the Secretary shall, with regard to the Discretionary Grants Program of the Urban Mass Transportation Administration, within 30 days after the enactment of this section, issue a letter of intent and enter into a full funding contract with the Municipality of Metropolitan Seattle, Washington, for $175,000,000 for completion of the bus tunnel project: *Provided*, That the $175,000,000 shall include $24,300,000 in fiscal year 1986, and subject to the availability of funds from Congress, $150,700,000 in subsequent fiscal years.]

SEC. [323] *317.* The limitation on obligations for the Discretionary Grants Program of the Urban Mass Transportation Administration shall not apply to any authority for section 21(a)(2)(B) previously made available for obligation.

SEC. [324] *318.* (a) Notwithstanding any other provision of law, the Secretary of Transportation may use not to exceed one-half of 1 percent of—

(1) the funds made available for fiscal year 1986 by section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964 to carry out section 3 of such Act to contract with any person to oversee the construction of any major project under such section;

(2) the funds appropriated for fiscal year 1986 pursuant to section 21(a)(1) of the Urban Mass Transportation Act of 1964 to carry out section 9 of such Act to contract with any person to oversee the construction of any major project under such section;

(3) the funds appropriated for fiscal year 1986 pursuant to section 21(a)(1) of the Urban Mass Transportation Act of 1964 to carry out section 18 of such Act to contract with any person to oversee the construction of any major project under such section;

(4) the funds appropriated for fiscal year 1986 pursuant to section 4(g) of the Urban Mass Transportation Act of 1964 to contract with any person to oversee the construction of any major public transportation project substituted for an Interstate segment withdrawn under section 103(e)(4) of title 23, United States Code; and

(5) the funds appropriated for fiscal year 1986 pursuant to the National Capital Transportation Act of 1969 to contract with any person to oversee the construction of any major project under such Act.

(b) Any contract entered into under subsection (a) shall provide for the payment by the Secretary of Transportation of 100 percent of the cost of carrying out the contract.

(c) This section shall take effect on October 1, 1985, and shall cease to be in effect at the close of September 30, 1986.

[SEC. 325. (a) GENERAL RULE.—Tolls collected for motor vehicles on any bridge connecting the borough of Brooklyn, New York, and Staten Island. New York, shall only be collected for those vehicles exiting from such bridge in Staten Island.

[(b) ENFORCEMENT.—The Secretary shall withhold 1 percent of the amount required to be apportioned to the State of New York under sections 104 and 144 of title 23, United States Code, on the first day of the fiscal year succeeding any fiscal year in which tolls collected for motor vehicles on the bridge referred to in subsection (a) are collected for those vehicles exiting from such bridge in the borough of Brooklyn.

[(c) PERIOD OF APPLICABILITY.—This section shall apply on and after the 90th day following the date of enactment of this section, except that this section shall not apply after the date on which the Secretary publishes in the Federal Register a determination under subsection (d).

[(d) REMOVAL OF LIMITATION.—

[(1) DETERMINATION OF SECRETARY.—Subsections (a) and (b) shall cease to be in effect if, upon petition by the Governor of New York under paragraph (2), the Secretary determines that—

[(A) a substantial loss of revenues has resulted from the limitation imposed by subsection (a), or

[(B) such limitation has resulted in significant traffic problems,

and the Secretary publishes such determination in the Federal Register.

[(2) PETITION.—The Governor of New York may petition the Secretary for a determination under paragraph (1) at any time after a period of six consecutive months in which tolls collected for motor vehicles on the bridge referred to in subsection (a) have been collected only for those vehicles exiting from such bridge in Staten Island.]

SEC. 319. Notwithstanding section 127 of title 23, United States Code, the State of Wyoming may conduct a demonstration project for a period not to exceed two years in order to determine the effects on the National System of Interstate and Defense Highways located in Wyoming of the use of such Highways by vehicles in excess of 80,000 pounds gross weight but meeting axle and bridge formula specifications in section 127 of title 23, United States Code.

SEC. 320. Notwithstanding any other provision of Federal law enacted heretofore or subsequently (including section 138 of title 23, United States Code, and section 303 of title 49, United States Code), the Secretary of Transportation is authorized to approve construction of a 10.7-mile section of Interstate Route H-3 from the interchange of such route with Interstate Route H-1 (commonly known as the Halawa interchange) to the interchange of Interstate H-3 with the Kamehameha Highway (commonly known as the Halekou interchange), and the Halekou interchange. Said highway would be located through the North Halawa Valley, the Haiku Valley, and portions of the Kaneohe-Kamooalii area. This provision shall remain in effect for each fiscal year until the said highway project is completed.

SEC. 321. Section 18(e) of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following: "For the purpose of this subsection, the term 'Federal funds or revenues' does not include funds received by a recipient of funds under this section pursuant to a service agreement with a State or local social service agency or a private social service organization.".

SEC. 322. The Secretary of Transportation is directed to release all funds made available through the obligation ceiling for fiscal year 1986 and prior years for grants under the contract authority authorized in section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.) within ninety days after the enactment of this section according to the language included in the statements of managers accompanying conference reports for appropriations Acts for fiscal year 1986 and prior years, unless the Committees on Appropriations have received reprogramming requests affecting these funds, or Congress has received a deferral message or rescission request affecting these funds, within the ninety day period. In the event that either the Appropriations Committee disapproves the reprogramming, or Congress disapproves the deferral, or does not complete action on a rescission proposed by the President within forty-five calendar days of continuous session, any funds being withheld must immediately be made available for obligation. This section shall take effect immediately upon enactment.

SEC. 323. Section 119(d), 23 U.S.C. is amended by adding at the end of such section: "Notwithstanding any other provision of law, and for the purposes of this subsection, the phrase 'segments of the interstate system open to traffic' shall include a proposed four-lane, limited access highway, 6.4 miles in length, the construction of which will relocate to a southern alignment a portion of an existing interstate highway which was originally built without the aid of funds authorized by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, and which connects to the east with an interstate highway on which tolls are charged. The construction of the proposed highway shall include a bridge over the Monongahela River.".

SEC. 324. (a) Title XI of the Federal Aviation Act of 1958 (49 App. U.S.C. 1501 et seq.) is amended by adding at the end thereof the following:

"AERONAUTICAL CHARTS AND MAPS

"SEC. 1118. Notwithstanding the provisions of section 1341 of title 31, United States Code, or any other provision of law, the United States Government shall enter into agreements to indemnify any person who publishes a chart or map for use in aeronautics from any claim, or portion of a claim, which arises out of such person's depiction on such chart or map of any defective or deficient flight procedure or airway, if such flight procedure or airway was—

"(1) promulgated by the Federal Aviation Administration;

"(2) accurately depicted on such chart or map; and

"(3) not obviously defective or deficient.".

(b) The table of contents of the Federal Aviation Act of 1958 is amended by inserting immediately after the item relating to section 1117 the following:

"Sec. 1118. Aeronautical charts and maps.".

SEC. 325. Notwithstanding section 108(b) of the Federal-Aid Highway Act of 1956, sums appropriated to the State of New York under 23 U.S.C. 104(b)(5)(A) during the fiscal year ending September 30, 1986, may be obligated for Interstate construction projects under section 108(b) of the Federal-Aid Highway Act of 1956 or for Interstate substitute highway projects under 23 U.S.C. 103(e)(4) provided that the withdrawal value for New York under 23 U.S.C. 103(e)(4) shall be reduced by the amounts obligated hereunder for Interstate highway substitute projects. The Federal share of the cost to complete any such Interstate substitute highway projects to which this provision applies shall be 85 per centum. In carrying out this provision the State of New York and the Secretary of Transportation shall assign highest priority to the completion of Interstate construction projects. This section shall expire on October 1, 1986.

This Act may be cited as the "Department of Transportation and Related Agencies Appropriation Act, 1986".

Mr. ANDREWS. Mr. President, I ask unanimous consent that the committee amendments, with the exception of the amendment beginning on page 50, line 20, through page 51, line 8, having to do with Hawaii interstate construction, be agreed to en bloc and that the bill, as thus amended, be regarded for the purpose of amendment as original text, provided that no point of order shall have been considered to have been waived by agreeing to this request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, today I am pleased to present to the Senate the fiscal year 1986 transportation appropriations bill.

The bill as reported by the committee contains new budget authority totaling $10,014,716,569. This amount is over 14 percent below the level of new budget authority enacted for fiscal year 1985 for transportation and related activities.

This was not an easy exercise nor was the result achieved without major reductions in each and every mode. Coast Guard operating expenses are reduced by 10 percent from the 1985 level. The Federal Aviation Administration's operating expenses are reduced 8 percent from the 1985 level. Other activities are cut even more. The Federal-aid highways obligation ceiling is approximately 12 percent below the level established for 1986 in the Surface Transportation Assistance Act of 1982. The mass transit formula program is 14 percent below that provided for fiscal year 1985. Amtrak's new budget authority is cut 14 percent below the 1985 level.

Cuts of this magnitude were necessary since the conference agreement on the first budget resolution contained less for transportation than what was provided by either the House or Senate in their separate measures.

Mr. President, even though I am a member of the Budget Committee, I voted against that conference report, because I felt it was flawed, particularly in this area. Let me state again that we do not have much in the way of mass transit or Coast Guard in the State of North Dakota, so this is not a parochial thing. I believe those budget conferees erred and erred to the degree of about $600 or $700 million in this very key piece of legislation.

Let me look at the problem a little more closely.

Not only did the budget conference cut the transportation function far deeper than the Senate voted on, the budget conference contained a few other surprises for the Appropriations Committee. When it adopted the budget conference, the Senate, Mr. President—you and I here voting together—was told that transit was only cut 15 percent; that transit capital was frozen at last year's level; that Amtrak was cut 15 percent—and as a matter of fact, we had a vote, Mr. President, on the Senate floor on that very subject and the Senate voted by a vote of 53 to 41 to sustain those figures. We were told that highways would be held to the $13.25 billion level. However, no one mentioned that, in addition to these assumptions, there was an "unspecified savings"—that is a wonderful thing, Mr. President, that comes along when the spooks ride on Halloween. We should better be doing this bill next week, perhaps, because the spooks rode in the night on that budget conference and came up with the "unspecified savings" cut of $800 million in budget authority and almost $500 million in budget outlays. The conferees, in essence, told the Appropriations Committee to cut programs far deeper than what was advertised to the Senate on August 4.

Well, I should point out that this bill before you does cut highways and transit and Amtrak, but that is not enough because of these deep unspecified cuts. So the committee had to go and find the rest of the unspecified savings in the only two accounts which spend out dollar for dollar; namely, FAA and Coast Guard.

Let me point out, Mr. President, the arithmetic of this thing. I am sure our friends in the press and the general public do not understand that before we made the final cut, we made a cut of $500 million in highway construction and, Mr. President, we only saved $80 million in budget outlays. Now, if we were to get this unspecified savings of $700 million that the Budget Committee gave us, we would have to go find $5 billion or $6 billion or $7 billion in cuts in highway construction. I do not believe the Nation would tolerate that. I think it is ridiculous, it is completely wrong-headed, and it is the problem that we are faced with.

I do not like it, the members of the committee do not like it. But we were told to find savings and we did. Despite the need to achieve deep savings, this is a fair, and balanced bill.

Now I should point out that outlays associated with the bill are expected to be approximately 5 percent above the 1985 level. This is simply because much of this bill goes for investment, investment in highway construction, bridge replacement, Coast Guard cutter and aircraft procurement, retrofit and modernization of the Nation's airways and airports, and the procurement of capital equipment through the mass transit trust funds.

Since so much of the bill is capital intensive. Only 31 percent of fiscal year 1986 outlays occur because of the new discretionary budget authority provided. Any attempt to further reduce outlays through an across-the-board amendment would only fall on those accounts that have already experienced serious budget authority cuts.

The committee has carefully considered each and every item that is within its jurisdiction. The bill before you is a result of that extensive effort and has been favorably reported to the floor.

I am particularly grateful to the subcommittee's ranking member, Senator LAWTON CHILES, for the leadership he has displayed this year as in the past. As fellow members of the Budget Committee, we have shared the difficulty of bringing a bill to the floor which is in conformance with the budget resolution.

I urge my colleagues' support for this measure, and yield now to Senator CHILES for his remarks.

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. Mr. President, I rise to compliment Senator ANDREWS on his hard and long work on the transportation bill. It is a pleasure to work with Senator ANDREWS. His work on this appropriation bill is both thorough and insightful, and he is attentive to the special transportation needs of each State and region of the country.

We know there are some problems with this bill. We know that we have a problem with outlays. First, the bill is $127.2 million in outlays over the 302b allocation. The bill is, therefore, not in compliance with the budget and we will need to address that problem before we go to third reading and pass the bill out of the Senate.

Second, two very deep cuts were made in the bill in the full committee markup—a $200 million cut in Coast Guard operating expenses and a $300 million cut in FAA operating expenses. Those are tough cuts. Secretary Dole, in a letter dated October 16, 1985, or

Wednesday of last week, referred to these cuts as damaging and drastic.

The Coast Guard cut would result in the loss of 6,000 Coast Guard personnel, 13 cutters, 4 icebreakers, 23 patrol boats, 3 buoy tenders, and several small icebreaking tugs would be decommissioned; 46 aircraft would be laid up or roughly 25 percent of the total fleet.

According to Admiral Engen's office, the FAA cut would require the furlough of all air traffic control personnel 42 to 45 days out of the year, resulting in a 14-percent reduction in air system capacity. New hiring would be frozen. No new air traffic controllers; no new safety inspectors; no new air marshals will be hired.

I think Secretary Dole's characterization of these cuts as damaging and drastic is right. Unfortunately, good programs must be cut as we struggle toward a balanced budget. The pain, however, needs to be spread more evenly. I think we can do that in the bill we have before the Senate. This bill needs to be modified before it leaves the Senate and I am hopeful we can do that this morning.

There is a lot said about what the budget resolution does and does not require.

We find oftentimes the budget resolution is criticized for being too specific and not being specific enough or, on the other hand, intruding on the Appropriations Committee. It is sometimes criticized for being too general because by being general, it avoids hard analysis. The budget resolution for transportation includes both specific and general assumptions so there is a choice for those who wish to criticize it from either side.

Some have argued that the resolution requires deep cuts in Coast Guard and FAA operations. It does not. To clarify this matter, I thought it would be useful to review what the budget resolution did for transportation—function 400. This, of course, has been available since August 1, 1985 in Report No. 99-249, the conference agreement on the budget resolution. The Budget Committee has also published a description of major provision on August 8, 1985, the key assumptions are:

Amtrak and transit would be cut 15 percent.

The Federal Highway Administration spending ceiling would be reduced to $13.250 million.

Two FAA accounts—facilities and equipment and research and development—would be kept at House Appropriations Subcommittee reported levels.

Finally, the budget resolution assumed a $658 million unspecified cut to direct spending programs in the function. Compared to last year's bill totals, this unspecified cut represents an approximate 6 percent across-the-board reduction.

The Appropriations Committee has the authority to make the cuts anyway they determine to be most appropriate. The Appropriations Committee was not required to make a 6 percent across-the-board cut nor were they were required to make 11 percent cuts in the Coast Guard and the FAA that was included in the bill before the Senate.

The number actually assumed by the budget resolution for Coast Guard operations is $1.782 billion or $6 million less than the President's request. The bill before us is $228.5 million below the President's request. It is $222 million below the budget resolution.

The number actually assumed in the budget resolution for FAA operations is $2.879 billion or $63 million more than the 1986 request. The bill before us is $337.6 million below the President's request. It is $401 million below the budget resolution.

Clearly it would be difficult to meet the budget resolution targets without some reduction in the Coast Guard and the FAA. Nothing, however, in the resolution requires 11 percent cuts to these two operating accounts.

The cuts in these two accounts are so deep as to be unrealistic. Many argue that they will either be restored here in the Senate or in conference with the House or the administration will send up a supplemental or a transfer from the Defense bill will cover the problem. In other words, cuts are so deep that no one really takes them seriously. Some think we will take care of the problem in conference. But if we do, that will mean that the conference agreement will be too high and it will not be consistent with the budget resolution. At some point, we need to produce a realistic bill. I think we need to do that here in the Senate. I think the Stevens-Kassebaum amendment helps provide a more realistic bill.

Mr. President, I do not minimize in any way the difficulty that was experienced by the transportation subcommittee. I think that we had a task in which there was no way it could be resolved in a proper way. If you look and see the bill, I believe the distinguished chairman said that we are $1.5 billion below the bill of about a year ago. So actually we are considerably below in this function, and I know the distinguished chairman, and the subcommittee has worked, too, to try to reduce all of these functions.

Mr. President, another point I would like to make, though, is that while we talk and make great criticism of the Budget Committee, the Budget Committee's numbers and what it puts in its functions are simply advisory numbers to the Appropriations Committee. We simply give those functional requests in an effort to show the Appropriations Committee the exercise that we went through. Those numbers are not binding on the Appropriations Committee. There are only two numbers that are binding on the Appropriations Committee out of the entire budget resolution. Those are the bottom line numbers that have to do with budget authority, and the number that has to do with the budget outlays—those two totals. Then the task passes to the Appropriations Committee, and its is up to the Appropriations Committee to work to determine what their crosswalk will be, and how they will divide the numbers between the appropriate subcommittees. Mr. President, I think this is where we got into a problem with this bill. The vast majority of those in the Senate voted for the low budget number. We went home and made our speeches stating what we were trying to do to restrain spending. So we were for that low budget number. Now we are having to deal with specific programs.

I think the Appropriations Committee should have given some relief to the Transportation Committee by putting us into this kind of situation. It was tough on all the committees. I will say that. So maybe a number could ask for relief.

But when you see what we are talking about in some of the areas here, when we are talking about the Coast Guard which is that operation that basically protects our shores, saves our lives from accidents and ship distress, we use so much in my area of the State, and the Senator from North Dakota has been so helpful in trying to provide additional funds for drug interdiction and everything that we do, we have an agency which under any event is going to have to experience great cuts in this bill. Then we have the FAA when we now see we have had a rash of air traffic accidents in this country. And we know that the existing facilities and the existing personnel are strained to the limit, if not understaffed and then we are talking about having to make cuts in the FAA. We have drastic cuts in the bill before us now. Whatever we do to try to resolve this question and get this budget down, we will have to make further cuts as well.

Mr. President, I think that is going to be very hard to do. There is a letter which many know about with a large number of signatures that was sent in effect saying we should transfer some of the moneys from the defense authorization for capital for the Coast Guard to build some additional vessels.

Now we can see there is no reason to build some additional vessels if we are going to have to lay up vessels that we actually have. That transfer money that we were talking about probably should be used now, or we should seek

that, for some operating funds for the Coast Guard, because we know that without some kind of relief we are actually going to have to curtail operations.

We know also as part of the Defense authorization bill we now have required more Coast Guard personnel to serve on Navy platforms and to serve on other platforms of the Armed Services for interdiction in the drug war.

I think it might make some sense if we could get some kind of transfer or relief in that regard.

Mr. President, I would hope that we could come out of here with what will be a very drastic, across-the-board cut in a number of these agencies and then see if there is some way of trying to get some restoration of some of that money for the Coast Guard and these other agencies from other areas.

I think it is a difficult task that we face. It is one that even a Solomon could not decide because no matter how you decide you are going to have a lot of blood on the floor, given the kind of agencies that we are working with. But it is one that I think we have to do the best that we possibly can with today and see how we can make further improvements from there.

Mr. ANDREWS. Mr. President, I appreciate the comments of my good friend and colleague, Senator CHILES.

Let me say in reiterating what he said, the Budget Committee asked us to make these specific cuts in all of these different functions the Senator outlined. We made those cuts and they are in this bill.

Then the Budget Committee asked us to do certain things with the FAA and the Coast Guard, which we would have liked to have done and in the subcommittee bill we were even responsive to that.

But the Budget Committee also, as the Senator from Florida pointed out, said that we were to make these unspecified cuts. He went on to say that we need relief from that particular issue, relief from the other appropriations subcommittees.

That is really, Mr. President, the nub of our problem here today, because we did make these cuts in these various and sundry programs, but it is the unspecified cuts that get to us.

I would like to reiterate, Mr. President, that this bill as it now stands is $800 million below the bill as it emerged from the House. The House felt it was in compliance with the budget resolution over there. We are $476 million under in budget outlays. If it had not been for the need to get down even further and the reduction in Coast Guard and FAA, Mr. President, and had we been allowed the figures that CBO states are legitimate figures, which would have resulted in another $100 million in budget outlay savings, we would have been $400 million under the House bill without these wrong-headed amendments to cut the Coast Guard and the FAA, which were forced on us by the intransigence, shall we say, of those who stand by the figures the Budget Committee gave this subcommittee in its conference report even though they themselves admit those figures are in error.

Mr. President, I submit that the floor of this body is the place where we correct those mistakes. The thing that bothers me as a Member of this body is the fact that everybody seems to say that those figures, even though we admit they were made in error, and even though they should have been adjusted, are now something that we have to see carved in stone.

If they are carved in stone, so be it, but then the Members of this body have to realize that they are going to be cutting transportation programs, whether it is highway programs to the extent of a couple billion dollars, or whether it is FAA programs. In fact, if the amendment we have seen for restoring FAA funds and Coast Guard funds is adopted and accompanied then by a general cut across the board, we will still have a cut of $150 million in FAA below what we need in an area where we are all concerned about air safety.

That is idiotic. It is wrong-headed. It is not right for this body to go along with that kind of a restriction when we realize it was done in the dark of the night by a bunch of conferees who then brought it back to this floor and ran it through without saying that all of the specifics that have been debated on this floor were now thrown out the window and the figures were inoperable.

That is what we are faced with today, Mr. President, and that is the challenge that we face.

Mr. President, I ask unanimous consent to temporarily lay aside the pending committee amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 841

Mr. ANDREWS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from North Dakota [Mr. ANDREWS] proposes an amendment numbered 841.

On page 18, line 24, strike "13,250,000,000" and insert "12,750,000,000".

Mr. ANDREWS. Mr. President, the amendment I propose is a technical correction. It changes the reported bill to reflect the committee's action to reduce the highway obligation ceiling from $13.250 billion to $12.750 billion. I move adoption of the amendment.

The PRESIDING OFFICER (Mr. CHAFEE). Is there further debate?

Mr. CHILES. Mr. President, I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 841) was agreed to.

AMENDMENT NO. 842

Mr. ANDREWS. Mr. President, further under the unanimous-consent request, I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from North Dakota [Mr. ANDREWS] proposes an amendment numbered 842.

On page 29, line 10, delete the word "of" the second time it appears, and insert the word "or".

Mr. ANDREWS. Mr. President, this is a technical amendment. The amendment changes the word "of" to "or." It corrects a typographical error in the bill. I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 842) was agreed to.

Mr. ANDREWS. Mr. President, I move to reconsider the vote on the adoption of both amendments.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHILES. Mr. President, I ask unanimous consent that we continue to temporarily set aside the pending amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 843

Mr. CHILES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Florida [Mr. CHILES], for Mr. EAGLETON, Mr. DANFORTH, Mr. WILSON, and Mr. CRANSTON, proposes an amendment numbered 843.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At an appropriate place in the bill add the following new section:

"SEC. . The Congress disapproves the proposed deferral D86-21, pertaining to the Urban Mass Transportation Administration, as set forth in the message of October 1, 1985, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law

of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation."

Mr. CHILES. Mr. President, Senator EAGLETON had intended to offer this amendment, but he is necessarily away from the Senate. The amendment is also cosponsored by Senators DANFORTH, WILSON and CRANSTON.

Mr. President, this amendment would disapprove the proposed deferral of some $223.6 million in funding for new start rail projects in five cities which Congress authorized last year.

The cities and the amounts affected are Los Angeles, $129 million; Miami, $71.5 million; San Diego, $11.3 million; Jacksonville, $1.8 million, and St. Louis, $10 million.

Mr. President, this proposed deferral has nothing to do with saving money. The administration makes it clear in its own deferral message that it fully intends to obligate the same $223.6 million for other transit projects which it believes have more merit. The only issue involved in this amendment is whether Congress or the bureaucrats at the Urban Mass Transportation Administration are going to set the priorities for the funding of new start rail projects. After thorough deliberation, Congress made its judgment. Some people in the administration disagree with Congress and want to set congressional directives aside through the device of this proposed deferral.

Mr. President, I will point out that the bill before us contains similar earmarks for new start rail projects and section 322 of the bill actually requires the Urban Mass Transportation Administration to release funds previously earmarked.

To fail to disapprove this proposed deferral would make a mockery of the legislative process we are now engaged in and it would be inconsistent with the bill now before us.

Mr. President, I have discussed this amendment with Senator ANDREWS, the chairman of the committee, and I believe he agrees with me on this matter.

Mr. ANDREWS. Mr. President, I accept the amendment on behalf of the Senator from Missouri. The effect of this amendment is to overturn a deferral request sent to Congress on October 1, 1985.

The request would have denied funding for cities that had received congressional earmarks of mass transit new start funds. The request would defer a total of $223.6 million spread among five cities: Los Angeles, $129 million; San Diego, $11.3 million; St. Louis, $10 million; Jacksonville, $1.8 million; and Miami, $71.5 million.

I feel that the original intention of Congress should be upheld and that the release of these funds should occur, assuming that each applicant complies with all necessary Federal regulations.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 843) was agreed to.

Mr. CHILES. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ANDREWS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that we set aside the pending business.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT NO. 844

(Purpose: To clarify certain employment restrictions on the Chairman of the Board of Directors of the U.S. Railway Association, and to lengthen the term of such Chairman)

Mr. LAUTENBERG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG] proposes an amendment numbered 844.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, insert between lines 8 and 9 the following new section:

SEC. 326. Section 201 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 711) is amended—

(1) in the first sentence of paragraph (2) of subsection (d) by inserting "freight" before "railroad"; and

(2) in the first sentence of subsection (e) by striking out "1985" and inserting in lieu thereof "1987".

Mr. LAUTENBERG. Mr. President, under the Regional Rail Reorganization Act of 1973, as amended by the Northeast Rail Services Act of 1981, the president of a railroad may not serve as Chairman of the U.S. Rail Association. USRA serves as a congressionally created overseer of Conrail. The current Chairman of the U.S. Rail Association Board is Stephen Berger, who was recently appointed executive director of the Port Authority of New York and New Jersey. Mr. Berger has served with distinction as USRA Chairman.

With his appointment to the port authority post, Steve Berger technically became president of the mass transit facilities known as the PATH system. He has not had, nor does he have today, a financial relationship with a freight railroad. There is, therefore, no conflict of interest between Mr. Berger's role with a commuter agency, PATH, and a freight railroad, Conrail. It is possible that, absent this amendment, the Nation could lose the services of Steve Berger as USRA Chairman on a purely technical point. That is my reason for offering the amendment.

Mr. President, no public purpose would be served by removing Mr. Berger from his post at this time. Congress will soon consider Conrail legislation. During this period of time, USRA's role will be critical.

My amendment, therefore, would clarify the prohibition against a railroad president serving on the USRA Board by placing the word "freight" before the word "railroad" in the USRA statute. In addition, my amendment extends the term of Mr. Berger from December 31, 1985, to December 31, 1987.

Mr. President, I urge the adoption of the amendment.

Mr. ANDREWS. Mr. President, the amendment offered by the good Senator from New Jersey, a member of our subcommittee, is acceptable. The amendment simply provides for continuity at the U.S. Railway Association [USRA] considering that the Conrail issue is still unresolved.

The amendment allows for the existing Chairman of USRA to remain as Chairman by making a technical change to the Regional Rail Reorganization Act of 1973.

The amendment is necessary to clear up any apparent conflict of interest that may arise because of the existing Chairman accepting new employment at the Port Authority of New York and New Jersey.

I join my colleague in urging the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from New Jersey.

The amendment (No. 844) was agreed to.

Mr. ANDREWS. I move to reconsider the vote by which the amendment was agreed to.

Mr. LAUTENBERG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 845

Mr. ANDREWS. Mr. President, I send an amendment to the desk. This is the amendment that is in order.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Dakota [Mr. ANDREWS] proposes an amendment numbered 845:

On page 50, line 20, strike all through page 51, line 8.

Mr. ANDREWS. Mr. President, this amendment has been agreed to by all parties at interest. It concerns the highway construction matter in Hawaii that was inserted in the bill at the request of the Senator from Hawaii [Mr. INOUYE]. This satisfactorily resolves the matter.

Mr. INOUYE. Mr. President, I rise with my colleague, Senator STAFFORD, today, to address an issue of utmost importance to the State of Hawaii. The H-3 highway project on Oahu, vital to the State's transportation needs, has been carefully planned by the State of Hawaii and the Department of Transportation over the past 20 years. This planning has involved a great deal of environmental mitigation with extensive coordination being done by the State in its simultaneous planning of the highway and the adjoining park—a park which in fact was created by this highway project.

Despite this careful coordination, however, H-3 has met with repeated judicial delays which now threaten to hold up the project long enough to force the State to abandon it in the face of 1986 and 1990 deadlines for interstate transfer and construction. Because of this situation, Mr. President, and in light of the great importance of this project to Hawaii's transportation system, I requested the Appropriations Committee to include language in the fiscal year 1986 DOT bill which would exempt the project from 4(f) requirements.

I have been in contact with my distinguished colleague from Vermont, Senator STAFFORD, on this issue for a number of months now, as he is the chairman of the Environment and Public Works Committee which has jurisdiction over interstate highway issues. I have informed him of the importance of the legislation which is now part of the DOT bill and my desire to get it approved by Congress. In the time since this language was approved by the Appropriations Committee, I have discussed this matter with him further and he has expressed to me his belief that this issue would more appropriately be considered by his committee rather than in an appropriations bill. He has expressed his willingness to provide an opportunity to consider this problem this year, as he understands the time-sensitive nature of the situation and the significance it has for the State of Hawaii.

I certainly understand my colleague's position on this matter and I certainly want to accommodate his concerns. He has assured me that he will bring this issue before the Environment and Public Works Committee and make sure that there is an opportunity to resolve this problem in a timely way, and on the basis of the assurances of the distinguished chairman of the Environment and Public Works Committee, I hereby withdraw section 320.

Mr. STAFFORD. I thank my colleague for accommodating my concerns and those of the committee in offering to withdraw this language.

I understand Senator INOUYE's concerns in this matter and the importance of this highway project to his State. I also appreciate the time constraints this project faces. Let me assure my colleague from Hawaii that I will bring the 4(f) issue created by the Ninth Circuit Court of Appeals decision before the committee as soon as possible this year so this issue can be resolved in a timely manner.

Of course, I cannot speak for all the members of the Environment and Public Works Committee, and I cannot say to my friend from Hawaii how the other members of the committee will view the 4(f) problem H-3 has encountered. I can assure him, however, that I will do all I can to provide a forum for the discussion and timely resolution of this issue. I know that Senator INOUYE has been in contact with the ranking Democrat on the committee, Senator BENTSEN, on this issue for a number of months. Perhaps at this time the ranking member of the Transportation Subcommittee can add a perspective from the other side of the aisle on this matter.

Mr. BURDICK. Mr. President, I am aware of this issue and the State of Hawaii's strong support for the H-3 project. I also understand Senator INOUYE's concerns, which he personally expressed to the committee leadership when he brought the director of Hawaii's Department of Transportation for a briefing on H-3 this past February. I agree that the H-3 issue would best be handled by the Environment and Public Works Committee, and I want to extend my fullest cooperation in getting committee action, on this issue.

Mr. STAFFORD. I am certainly pleased that the ranking minority member of the Transportation Subcommittee supports me in this matter.

Mr. ANDREWS. I appreciate the Senator from Hawaii's willingness to accommodate Senator STAFFORD's wishes in this matter. I supported the inclusion of the H-3 language in the transportation appropriations bill, as I understand the importance of the H-3 problem to the Senator from Hawaii and share his belief that it needs to be addressed forthwith. I am pleased that he and Chairman STAFFORD have worked out an agreement to act on this issue in the Environment and Public Works Committee, and I accept the withdrawal of the language from the DOT bill based on that agreement.

Mr. BENTSEN. Mr. President, I have been aware of this issue for some time now, and I am aware of the State of Hawaii's strong support for the H-3 project. I also understand Senator INOUYE's concerns, which he personally expressed to me and Senator STAFFORD when he brought the Director of Hawaii's Department of Transportation to brief us on H-3 this past February. I agree that the H-3 issue would best be handled by the Environment and Public Works Committee, and I want to extend my fullest cooperation in getting committee action on this issue.

Mr. SYMMS. Mr. President, I am pleased to join with the other members of the Environment and Public Works Committee in assuring my distinguished colleague from Hawaii that I will do all I can to assure a timely review of this issue.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 845) was agreed to.

Mr. ANDREWS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Later the following occurred:)

Mr. ANDREWS. Mr. President, I ask unanimous consent that the action on amendment No. 845 be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXCEPTED COMMITTEE AMENDMENT REJECTED

The PRESIDING OFFICER. The question now occurs on the excepted committee amendment on page 50, line 20, to page 51, line 8, section 320.

The excepted committee amendment was rejected.

Mr. ANDREWS. Mr. President, I move to reconsider the vote by which the committee amendment was rejected.

Mr. NICKLES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Conclusion of later proceedings.)

Mr. ANDREWS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 846

(Purpose: To implement the Administration's proposal to eliminate Amtrak subsidies in FY 1986—saving $616,000,000 in budget authority)

Mr. ARMSTRONG. Mr. President, I send an amendment to the desk on behalf of myself and the Senator from Wisconsin [Mr. PROXMIRE] and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado [Mr. ARMSTRONG] for himself and Mr. PROXMIRE, proposes an amendment numbered 846. Beginning on page 26, line 11, delete through page 28, line 15.

Mr. ARMSTRONG. Mr. President, this amendment abolishes Amtrak.

Years ago, a distinguished Member of this body, Sam Ervin, said that the oldest sin is doing evil hoping good will come of it.

That is what Amtrak is. The people who thought up the idea of a federally sponsored and subsidized railroad passenger service really thought they were doing something that was good. They really thought it was for the future of the country. They really had the notion that what this country should have is silver bullets criss-crossing America carrying hordes of passengers to their destination. They really believed that if the Federal Government just gave a little seed money, a little help to get the darn thing started it would not be long before passengers would be flocking to Amtrak service, that, in fact, this federally subsidized railroad service would not have to be subsidized for long, it would get back on its feet, and that if they would sort of refurbish the railroad cars and fix up the roadbed a little and do a little advertising, run some commercials on the radio, and what not, before long things would be humming down at Amtrak and they would be in the black.

So the original suggestion was that we appropriate about $40 million for Amtrak and it would not be long before this thing would be a paying proposition, probably be given back to the private sector, and so on.

We do not hear that story anymore because a dozen years later the awful truth has become obvious to everyone, and that is, this thing is a turkey. It is not ever going to be profitable. It is not ever going to break even. It is not ever going to pay its own way. It is not ever going to be a competitive means of transportation. And this is not ever going to be on a large scale, a coast-to-coast passenger railroad service.

People will not ride it. I suppose if we can imagine that if it were free we might get a larger number of people but, in fact, it is almost free now in the sense that the Government pays well over half the cost of the trip, but people will not ride it.

Why would anyone want to ride coast to coast, say from Washington to California or from Washington to Colorado or from Washington to Chicago when they can ride cheaper on an unsubsidized airplane and get there in a couple of hours or 3 hours or 4 hours, instead of taking a couple of days to do it.

The answer to that is the people who wish to do so are those who want to travel by rail and want the experience of doing so. I happen to be one of those people. As a matter of fact, I have been all over the country on the railroad. It is a great, a wonderful way to travel.

I brought my family back here when I was elected to Congress 13 years ago. We came back on the railroad, and it was just great. There were my wife and I and my two children, my mother and dad, and 17 pieces of luggage. It took 2 days. It was a once-in-a-lifetime experience. It is something that I do not care to do again. In fact, I venture to say there is not a Member of Congress who has traveled for long distances on a passenger railroad train in a dozen years or more except as a pleasure trip, except to see the beauty, for example, of the Rocky Mountains through Glenwood Canyon as the train pulls out of the canyon and goes to Grand Junction and out West.

I think there is perhaps a market for scenic travel by passenger railroad. I think that is great.

What I object to and what this amendment addresses itself to is the notion that the taxpayers should pay for it. If there is enough of a market to keep a passenger railroad train going, say up through Glenwood Canyon and on out to the west coast 1 day a week, 1 day a month, or twice a year, or whatever it is, I say fine. Let the private enterprise sector put up such a train and the people who want to ride it pay for it.

What I do object to is the notion that people who will never use Amtrak have to pay taxes year after year to continue to subsidize the travel which would otherwise be by airline or inner-city motor bus.

Mr. President, let me just tick off quickly the arguments in support of this amendment, and then I will yield to my friend from Wisconsin and perhaps to others.

I think the issue is well known to the Senate, but I do not want to delay the discussion of it for a long period of time.

First of all, Amtrak is expensive. It started, as I pointed out, with a $40 million appropriation. We have now invested over $12 billion, and we are spending even in this bill at the rate of hundreds of millions of dollars a year.

We are doing so notwithstanding the fact that the actual number of passengers is declining and the mileage is declining.

Second, I wish to point out that Amtrak really serves no fundamental service. There is not any place you can go to or come from on Amtrak that is not reasonably well served by alternative modes of transportation. Practically all such destinations, virtually all of them are served by more than one alternative competing mode of transportation. That is to say, the Interstate Highway System, by inner-city motor bus, or by commercial airline service. There are a handful of locations that only have one alternative. That is to say the highway network.

Senators will remember we debated that a few months ago and the Senate decided by a narrow margin not at that time to abolish Amtrak, and one of the things that was thrown up was there would be cities left without transportation.

Honest to Pete, we sent over for the list where those cities are and it turns out it is places in the remote far reaches of America like Rockville, MD, suburban Philadelphia, places from which it is easy to get around by car, or for that matter it would be cheaper and more efficient if the Federal Government would terminate Amtrak and send everyone where they want to go by taxicab. So I do not think we are really providing a needed service.

Third, I wish to make the point that this is not a service or a subsidy that goes to poor people. It is a well-documented fact that most of the actual travel which is subsidized by Amtrak is for the affluent, for the middle class and upper middle class.

Fourth, I wish to point out that there would be some surviving passenger rail service in this country even if we do away with Amtrak. I do not think the long-haul trains would make it. I just do not think there is enough of a market to sustain that. But I do happen to believe there is enough of a market in certain selected areas, Washington to New York, New York to Boston, New York to Philadelphia, and some other areas like that, where a free enterprise private sector passenger railroad service would survive.

I wish to address very briefly a point that should be reckoned with and that is the question of the environmental costs of Amtrak travel.

One of the original motions was that Amtrak was somehow more environmentally sound than other forms of

transportation, and I will direct the attention of Senators to a study produced by the General Accounting Office that points out that the alternative transportation modes, airplane and bus, are productive of less carbon monoxide, particulates, sulfur dioxide, nitrous oxide, and hydrocarbons, according to the Environmental Protection Agency. They produce less pollution per passenger mile than do the railroads.

Finally, before I yield, let me just debunk in advance the argument that if we did away with Amtrak we are going to be the only major country in the world that does not have a great passenger railroad system. I mean people say look Japan has a railroad system. Surely the great United States of America should have a passenger railroad. France has it. Germany has it. Europe has it. Surely we can have it, also.

Mr. President, that is a superficially attractive argument, but I wish to point out two things: the circumstances of Japan, France, and Germany are quite different. First of all, they are densely populated, much smaller countries, and they do not have a well-developed highway network. The analogy of Japan to the United States really, except in terms of national pride, is not a comparison that makes a lot of sense.

Mr. President, I will close as I began by saying that Amtrak is an idea which, though well intentioned, has been thoroughly tested and has failed to meet the benchmarks which the advocates of Amtrak originally established.

So in consideration of our budgetary situation and as a matter of fundamental equity and fairness, I believe this is the time to terminate further subsidy to Amtrak.

Mr. President, I yield the floor.

Mr. ANDREWS. Mr. President, might I point out that the Senator from Colorado has made a very cogent argument, but, unfortunately, in several instances he has overlooked some other issues. I am not arguing this from the fact that it is nice to ride the train. That argument has been used and obviously many people think it is because 20.8 million people annually ride Amtrak.

But that brings up part of the problem, Mr. President. In the Northeast corridor, 17,500 individuals ride Amtrak daily. Mr. President, might I point out that in the hearings that we had on this issue, and they were exhaustive hearings, we questioned the FAA to ask about the airport impact in New York and Washington. And they candidly admitted, they have no answers. They have done no study. They have no contingency plan on what would happen to the space requirements for those airports if these 17,500 people moved to the airways, nor do they know how they would handle them on the highways which are already overcrowded.

Mr. ARMSTRONG. Mr. President, will the Senator yield before he leaves that point?

Mr. ANDREWS. I am happy to yield.

Mr. ARMSTRONG. I believe I can see his concern on that issue, which is an obvious area of concern, and I believe I can respond. The Senator's point, as I understand it, is if Amtrak were abolished, these 17,000 people who ride Amtrak in the line between New York and Washington, for example, would have to ride other forms of transportation which are already overcrowded—highways or the airports.

Let me just tick off for you the following statistics in response to that concern, which is an actual one. First, of the 17,000 people, only 2,700 travel the full distance between Washington, DC, and New York. The rest are primarily suburban commuters; that is, from New York to New Jersey, Baltimore to Washington, and so on. So that would not add much to the impact at either end, as far as airports or that kind of thing.

Second, the notion of 17,000 passengers a day means people taking roundtrips, so the total really is half of that. Also, they are spread out along the whole corridor.

Third, let me point out that, while 17,000 people seems like a lot, there are 3 million people that take the car or bus into New York City every day. So that if every one of these additional people went by car, it would not be an insurmountable problem.

Fourth, let me mention that Amtrak's own figures indicate that 32 percent of Northeast corridor passengers will go by bus, which means about 100 buses will be needed to accommodate 5,500 people. Forty-eight percent would go by car, according to Amtrak's figures, or 8,400. Sixteen percent would go by air, and that would be 2,800 air passengers. That would be about 12 flights daily split between the six airports around New York and Washington, DC. There are 21,000 empty seats daily on flights in the Boston-Washington, DC, corridor, or about 40 percent of the seats.

So, while I believe the concern is a natural one, I believe that the actual figures demonstrate that the existing transportation network could easily absorb these extra passengers.

I thank the Senator for yielding.

Mr. ANDREWS. I appreciate the statistics the Senator has shared with us.

We have asked, of course, the experts in the FAA and they have asked this subcommittee for and we are funding some $31 million in this bill for additional radar capability to keep up with the traffic in and out of the New York terminal area. And the additional load of 12 flights daily will mean a half-hour at congested National Airport.

But this is not even the substance of some of the problems that we get into. We have diligently tried to find answers to these.

The Senator suggests that a lot of these are people who are commuting. That is true. But the Senator also realizes that the commuters are subsidized at an even higher rate than Amtrak passengers are subsidized. So they would transfer, probably, from one Government program into another one, notwithstanding the fact that if we cut out Amtrak, I point out to the Senator from Colorado, we would have approximately $2 billion in liabilities to the employees of Amtrak who would be put out of work.

Let me also point out, since the Senator discussed the subsidy—and there is, indeed and in fact, a $35 per-passenger subsidy which the Government picks up for everyone who gets on an Amtrak train—but might I share with the Senator the fact there is a $37 per-passenger Government subsidy for everyone who goes on an airplane.

Mr. ARMSTRONG. Will my good friend yield?

Mr. ANDREWS. I am more than happy to yield.

Mr. ARMSTRONG. Let me respond to both of those points.

First of all, as to the question of the labor agreements, Amtrak negotiated a labor agreement providing up to 6 years of salary——

The PRESIDING OFFICER. Will the Senator withhold?

Mr. ARMSTRONG. Yes.

The PRESIDING OFFICER. We have to have quiet in the Chamber so the debate of the proponents and opponents of this measure may be heard.

The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I am grateful to the Chair for establishing order, because this is an important point.

The chairman is correct in raising the question about the potential shutdown costs of Amtrak. I do want to make this absolutely clear. Amtrak has negotiated, as I understand it, a labor agreement providing up to 6 full years of salary for employees who are furloughed, and the potential cost is $2.5 billion.

However, these are not liabilities of the U.S. Government. They are corporate liabilities. The U.S. circuit court has ruled that Amtrak is not a Government agency. If Amtrak were abolished, labor protection costs would be funded out of the court-supervised liquidation of the assets in full or in part. So we are not responsible for that.

Now, even if we were and even if, as a matter of policy, Congress wished to assume that responsibility—and we might well do that; perhaps we ought

to—it would be cheaper than going the way we are year after year.

Mr. ANDREWS. Mr. President, let me point out to my colleague and friend from Colorado that even that one does not match up with needs, because the assets of Amtrak, the capital assets of Amtrak consist largely of cars. Outside the Northeast corridor, Amtrak does not own the track. The Senator knows that very well. And these cars, might I point out, cannot be sold in Europe because they are too high to go through the tunnel structures in Europe. So, unless you can find some mass transit system in New York City or Los Angeles that can use the cars, there is no place we have been able to find to sell them.

Mr. ARMSTRONG. The Senator is correct. I am just making the point that that is not an obligation of the Government, but that, even if it were, it would be cheaper than going on.

Let me also respond to the point the Senator has raised about the FAA being subsidized, that is the service provided by the FAA and other Government agencies subsidizing air travel. I believe the Senator is correct about that and, at the right time, I believe it would be appropriate to look at an additional tax on tickets or airplane fuel so that the revenues would be increased sufficient to pay the cost of the FAA. I do not think it is any more defensible for nontravelers to pay the cost of airplane travel, of air controllers and of the other things which are part of air travel costs, than it is to pay the Amtrak costs.

Now, there is a greater tradition in highways, for example, of user payment. The motor fuel tax pays for it, and that is why it is a great system. I think the same could well apply in air travel.

I thank the Senator for pointing that out.

Mr. ANDREWS. Mr. President, the Senator from Colorado is one of the few purists we have in this body. He is, indeed, totally on track and on target. The Senator wants no subsidies for travel, period, and that is a totally honest way to be.

He is pointing out the fact that perhaps down the line we ought to have user fees to pay for the $37 per person charge that the Government absorbs in business tax write-offs of airline passengers. That may well be in order and it is totally in line with the Senator's longstanding position.

The only reason I brought it up is the fact that if you are saying that Amtrak somehow or another is wrong because there is a $35 subsidy when the other means of transportation has a $37 per person subsidy, we ought to bring that out on the floor.

And if we are addressing both, let us address both, but let us not call just one subsidy bad. I do not want to prolong the debate. I think these points are well known by our colleagues.

I yield my time because I am sure the Senator from Wisconsin who cosponsored the amendment has some comments that he would like to make.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, first, I congratulate my good friend from Colorado on this amendment. Obviously, I think there is a devastating case for it. The Senator is clearly loaded for bear on it because this is a most meritorious amendment.

Mr. President, I want to put this amendment in perspective. I think we should realize that we meet here today in the context of an enormous, enormous budget deficit. We have to cut spending. We have to do it. We have to increase taxes, too, in my view but we certainly have to cut spending. There is no question about it. The Senate has successfully rejected a whole series of proposals we have to cut spending over the last few days. Here is a proposal which the Senator from Colorado has so well pointed out does not hurt the people who are most needy in our country. By and large, it is an amendment which would make it slightly less convenient for people who are generally affluent.

Mr. President, the Armstrong amendment accepts the President's proposal to end Amtrak subsidies. Amtrak had an initial goal of profitability, and revitalizing the Nation's passenger rail system was originally authorized by Congress on a 2 year—2 year, mind you—trial basis as a for-profit corporation. Instead, Amtrak just since 1971 has cost the Nation's taxpayers almost $9 billion, and the cost projected for the next decade could well exceed another $8 to $10 billion.

Let me ask what does the Nation get for this massive subsidy? Let me ask what proportion of the Nation's travel does Amtrak carry. Just guess. Inner city passenger miles—does it account for 50 percent? No. Twenty-five percent? No. Maybe 10 percent? No. Less? Less than 10 percent? You bet. How about 5 percent? Even less? Two percent? Less. One percent? No. Amtrak accounts for one-quarter of 1 percent, Mr. President—one-quarter of 1 percent—of inner city passenger miles.

This is what the American taxpayers' bills have bought in Amtrak. Practically nothing, one-quarter of 1 percent. How many passengers have patronized Amtrak's stations each day? Five or six hundred? No. Fifty? No. At 44 percent of the Amtrak stations, less than 10 passengers per day board the train.

Mr. President, 10 passengers per day would not keep a one-cab taxi stand in operation; 10 passengers a day, and in two-thirds of the stations less than 25 passengers board trains.

The usual vision of a passenger train carrying several hundred passengers just is not true with Amtrak. These are passenger trains. You have to have a locomotive, you have to have a car, you have to have a conductor, you have to have people to operate the locomotive, and very often they carry one, two, three, or four passengers.

The average passenger on that highly subsidized, but not well-used system is not the elderly or poor, but middle- or upper-income individuals. For example, 55 percent of the Northeast corridor passengers in 1983 had incomes above $30,000. Mr. President, it is important to compare that to the figure that shows that only about 28 percent of the general population in 1983 had income above $30,000. A high percentage of Amtrak passengers were found to be on business travel or commuting to work. On some routes, the subsidy cost per passenger is greater than the cost of a bus or airplane ticket. In other words, it would be cheaper for Congress to end Amtrak service on some routes and buy all the passengers bus or airplane tickets.

The Senator from Colorado in responding to the Senator from North Dakota, the chairman of the committee, pointed out that the argument that this is going to overload our airports or put a burden on our highways or our buses is ridiculous because, as he points out in one of the most heavily traveled areas, between New York and Washington, 40 percent of the seats are empty on the average. And as I would like to point out, too, only two-tenths of 1 percent of the inner city passenger miles are operated by Amtrak. I think one figure that the Senator from North Dakota brought up was that 17,000 people travel on that Amtrak route he discussed. The Senator from Colorado pointed out that compares with 3 million people who travel by plane, by bus, and by car between these cities. It is absolutely a drop in the bucket.

Mr. President, while service is desirable and economically profitable, as I say other modes of transportation will certainly pick up the slack left by ending Federal subsidies by Amtrak, and services will be provided by rail, bus, or air without overloading them in any way. In fact, buses serve—this is a figure that I think all of us should ponder—14,000 communities in the Nation. How many does Amtrak serve? Does it serve anything like 14,000? Does it serve 10,000? No. 5,000? No. 1,000? No. Amtrak serves only 531. Amtrak serves 531 compared to 14,000 served by buses. So if we are talking about small communities being affected by this, the fact is that the small communities by and large are infinitely better served, many, many times more served, something like 28 times

more likely to be served by buses than by Amtrak.

Finally, nothing will prevent States and localities from subsidizing these areas desiring service which cannot be economically justified. As the Senator from Colorado pointed out, if we still feel that in those heavily traveled parts of our country between great centers, if it seems economical to have a rail line, there is nothing to prevent the States and the localities from handling it.

I suppose there is no place in the country that would be more concerned with this than New York City because New York City uses Amtrak probably more than any other city in the country. I think all of us realize there are few papers in the country that have a greater prestige than the New York Times, or a greater, more objective and more competent view in these areas than the New York Times has. You may disagree with the New York Times, but they certainly are not afraid to have the Federal Government provide a service when the service is necessary. What does the New York Times say on this? Just 3 days ago the New York Times, in an editorial, said the following: "What Congress says it wants is to balance the budget by 1991. What does Congress do? Well take Amtrak. Created 14 years ago"—this is the New York Times speaking—"on a 2-year trial to see if it could operate profitably, Amtrak has needed close to $49 billion in subsidies so far. President Reagan, proposed ending the subsidy this year—a sensible move."

That is not a conservative publication. This is the New York Times—"a sensible move. Instead, Congress' budget resolution directed a 15-percent cut. That cut would have reduced the appropriations to $477 million. Six weeks later the House actually appropriated $604 million. Then it passed a separate authorization bill saying in effect if that is not enough to keep the system service and maintenance at substantially the same levels as before, keep spending. And now the Senate Appropriations Committee has voted $616 million." This is the New York Times, Mr. President. The New York Times concludes "With a few more cuts like those, Amtrak will be sitting pretty. Does this Congress seriously believe that a balanced budget law would actually balance the budget? Not if Congress has anything to do with it."

Mr. President, that is a severe and sensible challenge by what I think is probably our Nation's greatest newspaper. It is certainly a paper that all of us recognize does its very best to get the information necessary to speak with authority and honesty on issues of this kind.

I hope Members of Congress will adopt this amendment, although we recognize it is very, very hard to cut this kind of appropriation for so many communities in all of our States which have a few Amtrak employees. That is what they care about, and that is what they will vote on.

It is something that we should have the will to do, recognizing our current conditions.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. Mr. President, I have a noncontroversial amendment which has been cleared on both sides. I wonder if the manager would permit the pending amendment to be set aside briefly.

Mr. ANDREWS. If the Senator wishes to ask unanimous consent for that, we have no objection.

Mr. PROXMIRE. Mr. President, would the Senator let me get the yeas and nays on the pending amendment?

Mr. MITCHELL. Yes.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays on the Armstrong amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside so that I might proceed with my amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 847

(Purpose: To authorize a partial transfer of the authority of the Maine-New Hampshire Interstate Bridge Authority to the States of Maine and New Hampshire)

Mr. MITCHELL. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL], for himself and Mr. HUMPHREY, proposes an amendment numbered 847.

Mr. MITCHELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

On page 54, after line 8, insert:

SEC. . That the Act approved July 28, 1937 (50 Stat. 535), is amended by striking out in the first paragraph thereof, "and approaches thereto" and by inserting at the end thereof "The States of Maine and New Hampshire are authorized to assume all construction, maintenance, and operational authority over the approach roads and grade separation structures in their respective areas. As provided in Maine Private and Special Law, Chapter 38, 1985, and New Hampshire Statutes, Chapter 415, 1985, the respective States shall require the Authority to provide Authority funds for capital improvements.".

Mr. MITCHELL. Mr. President, in late June, both Maine and New Hampshire enacted identical bills regarding the Maine-New Hampshire Interstate Bridge Authority [IBA]. These measures require congressional ratification in order to be implemented. This amendment, which I have sponsored with my colleague from New Hampshire Senator HUMPHREY, would accomplish this. The measure has been considered by the Committee on Environment and Public Works, and has previously been approved by the Senate. It would require no additional expenditure of Federal funds.

The IBA was created by an act of Congress in 1937 to oversee the construction, maintenance, and operation of a toll bridge and approach roads between Kittery, ME, and Portsmouth, NH. This facility presently constitutes what is commonly referred to as the "U.S. Route 1 Bypass" connecting Kittery and Portsmouth, and provides the only rail service to the Portsmouth Naval Shipyard.

The discontinuance of tolls on October 31, 1972, combined with limited revenues derived from interest on the IBA endowment account and high inflation in the last decade have forced the authority to delay or cancel several capital improvement projects for the facility. As a result, the entire facility is experiencing increasingly rapid deterioration.

A task force comprised of representatives from both State transportation agencies analyzed the mandate, operation and viability of the IBA. It found, after assessing numerous alternatives over the past 2 years, that the IBA cannot financially carry out its mandate. The authority needs the assistance of both States and their available Federal funds in order to continue to provide transportation services for the shipyard and for vehicles utilizing the bypass. The State and Federal bills would provide them assistance.

The Federal legislation would constitute an amendment to the original 1937 compact as ratified by Congress. No additional funds are necessary to support this legislation as the proposed realignment of responsibilities will be funded by a combination of authority assets and currently allocated Federal highway funds.

The provisions of the proposed act would accomplish the following:

First, transfer ownership of the approach roadways and grade separation structures—underpasses, overpasses, et cetera—to the respective State transportation agencies;

Second, allow each State to channel available Federal aid primary highway funds to the transferred portion of the facility for capital improvements and rehabilitation;

Third, require the authority to fund the non-Federal share of such capital improvements and rehabilitation when deemed necessary by the authority and engineering representatives of both States;

Fourth, continue the authority's obligation for the main bridge structure as well as the roadway and railway facilities presently on the structure;

Fifth, transfer authority employees to Maine or New Hampshire's transportation agency, thus providing comparable wages and benefits; and

Sixth, transfer authority equipment presently used on the facility to the representative State transportation agencies.

To summarize, Mr. President, this amendment would merely provide the required congressional ratification for the Maine-New Hampshire Interstate Bridge Authority. This has previously been approved by the Senate. It would require no additional expenditure of Federal funds.

Mr. ANDREWS. Mr. President, the amendment offered by Senator MITCHELL, I understand, has been cleared by Senators STAFFORD, SYMMS, BENTSEN, and BURDICK of the authorizing committee, Environment and Public Works.

The bill authorizes a partial transfer of the authority of the Maine-New Hampshire Interstate Bridge Authority to the States of Maine and New Hampshire.

I have no objection to the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. CHILES. Mr. President, I have no objection.

Mr. MITCHELL. Mr. President, I ask unanimous consent that my colleague, Senator COHEN, be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment.

The amendment (No. 847) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 846

Mr. ARMSTRONG. Mr. President, is the pending business the Armstrong-Proxmire amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. ARMSTRONG. Mr. President, I believe the case has been well proven. I am prepared to vitiate the order for the yeas and nays if the managers would be willing to accept the amendment, or I am ready to go to a rollcall vote.

Mr. ANDREWS. What, might I ask my good friend——

Mr. ARMSTRONG. Mr. President, is the Senator willing to accept the amendment?

Mr. ANDREWS. Mr. President, we have no intention of accepting the amendment. As a matter of fact, I am prepared to move to table the amendment, but I understand the Senator from Pennsylvania wants to speak to it. We thought he might be here momentarily.

Mr. ARMSTRONG. Mr. President, I did not realize other Senators wanted to address the question.

Mr. SPECTER. Mr. President, I must rise and speak in opposition to the elimination of funding for Amtrak.

The $616 million for Amtrak contained in this bill already represents a 10-percent cut from the 1985 appropriation. This is the maximum cut that Amtrak can take and still maintain its important operations. The cut that Amtrak took already represents a major contribution to fiscal responsibility.

This body also agreed to the $616 million figure in the budget resolution process. The debate had taken place and it was decided that Amtrak would be allowed to continue its services. My colleagues are, in this amendment, attempting to take us back to that debate.

The appropriations subcommittee and full committee saw fit to maintain this funding. They saw the vital service that Amtrak provided. We cannot accept this cut.

Preservation of Amtrak's passenger service is a matter of great national importance. It provides vital services for the entire Nation, particularly for the populous eastern seaboard. With its elimination, traffic will be snarled all over the east coast, with highways jammed and airports clogged. It would become impossible for traffic to get through the Baltimore Harbor Tunnel. In fact, the U.S. Senate might have difficulty getting a quorum.

The elimination of Amtrak will also have serious economic implications nationwide. Amtrak presently employs some 25,000 people in 44 States, and in 1984, contributed $1.4 billion to our economy through its payroll and the purchase of goods and services. During 1984, Amtrak remained the sixth largest transportation company in the country.

In my State of Pennsylvania, in 1984, Amtrak employed 3,242 residents with an annual payroll of $85.5 million. Amtrak contributed another $76 million to Pennsylvania's economy through the purchase of goods and services in 1984.

Amtrak's passenger service plays a vital role in our intercity transportation network and Amtrak's sustained progress in improving its service and reducing its dependence on Federal funds shows that continued Federal support will pay great dividends in the long run. Amtrak's current funding level of $684 million is the lowest since fiscal year 1977. In 1986, Amtrak expects to cover at least 60 percent of its costs through revenues, compared to 48 percent just 4 years ago.

Amtrak's capital plant, assembled almost entirely with Federal funds, is now worth some $3.1 billion. Salvage value on these assets—rail line, stations, maintenance facilities, and the like—will be minimal if all intercity rail passenger service is eliminated.

In addition to the investment of the Federal Government, many States have made capital expenditures that total more than $100 million in order to support and enhance passenger service within their borders. This investment will be lost if Amtrak is phased out.

Amtrak currently carries 20 million passengers each year. The total elimination of rail passenger service will leave many communities, particularly in the more sparsely settled areas of the country, without any common carrier passenger transportation. Even travelers that count on other modes of transportation under normal conditions find they must depend on Amtrak in the event of weather emergency or labor strikes.

Among the major cities between Washington and New York, Amtrak trains carry almost 18,000 people daily, or 60 percent of the total air/rail ridership. Elimination of Amtrak service in the Northeast corridor will add to air congestion and will ultimately require billions of dollars in additional Federal investment for airport and highway construction.

Amtrak's Northeast corridor is also used by Conrail freight trains and commuter rail trains. If Amtrak is eliminated, Conrail and the commuter agencies will have to absorb $116 million in additional costs to sustain their own operations on the Northeast corridor.

The elimination of funding for Amtrak would trigger a $2.1 billion Amtrak liability for labor protection agreements, which provide up to 6 years full salary for employees who are furloughed. Neither the Government nor the public would derive any benefit in service or value from these payments.

State and local governments are unable or unlikely to pick up Amtrak rail passenger service. If they do, costs will still be borne by the taxpayer but with reduced service because Amtrak's current contracts allow for more favorable operating agreements than outside parties could hope to negotiate.

The private sector will not pick up lost Amtrak service, as confirmed by Transportation Secretary Elizabeth

Dole on April 23. The cost of doing so in competition with publicly subsidized air and highway transportation would be prohibitive.

The effective elimination of Amtrak will result in serious adverse economic consequences to the Nation in terms of: Loss of investment, loss of income to equipment and supply contractors with Amtrak, loss of rail passenger service, and loss of jobs along with the strain on the railroad retirement system.

When these costs and consequences are considered, it is clear that the far better choice is for the Federal Government to continue providing support to Amtrak.

Mr. WARNER. Mr. President, I rise in strong opposition to the amendment of the Senators from Colorado and Wisconsin.

I do so for a number of reasons, not the least of which is a project on which I have been working with my distinguished colleague in the House of Representatives, STAN PARRIS as well as State and local officials in the Commonwealth of Virginia.

I do not know how many of my colleagues have had the misfortune to find themselves on I-95 or I-395 in northern Virginia during peak rush hours, but those who have are painfully aware of the volume of traffic carried by that facility.

I-95 and I-395 are being used to capacity during peak hours, in the morning inbound and the afternoon outbound the road is jammed.

Furthermore, there is no way to expand the facility—this road has as many lanes as it is ever going to have and, Mr. President, northern Virginia is growing.

Where are we going to put all the cars that will come with this growth?

I know that this problem is not limited to the northern Virginia area—there are metropolitan areas all over our Nation that find themselves in similar situations.

This is where Amtrak can be helpful.

We in Virginia have been working with Amtrak to find a solution to commuter traffic problems.

We have proposed that a train now being operated at a loss by Amtrak be used as a commuter rail system between Helpful, VA, and Union Station in Washington, DC.

The responsibility for operating cost will be borne by not only the fare box but by the State and local governments that will be served by the system.

This is an alternative that could be employed by many metropolitan areas with traffic problems similar to the one's we have in northern Virginia.

These localities can use existing infrastructure to move people without constructing expensive new mass transportation systems when the expansion of roadways is no longer feasible.

We have reached that point here in the Nation's Capital.

However, this option will no longer exist should the amendment of the Senators from Colorado and Wisconsin prevail.

We have substantially cut Amtrak subsidies in this legislation already.

If we totally eliminate Amtrak we will continue to add traffic to our already overburdened highways.

If we can expand our commuter rail concept not only in northern Virginia but to other high traffic areas as well, Amtrak will have a new revenue service—the commuters and their State and local governments.

In my judgment, this is the proper course that will result in removing cars from our roads and aggravation from traffic jam bound commuters.

It will also result in increased economic development and additional revenue for the States and localities.

Mr. President, I urge my colleagues to vote against the amendment to abolish Amtrak.

Mr. WALLOP. Mr. President, this morning I heard my dear friend and colleague, Senator SIMPSON, relate some of the characteristics of a native Wyoming bird, the sage chicken, with the action or inaction of the Senate. Today, I, too, would like to equate a well known characteristic of Wyoming's most familiar symbol—the cowboy—and his knack for telling a story with Amtrak's continuing penchant for stretching the facts and selling Congress a fiscal year 1986 budget bill of goods.

Mr. President, the cowboy has long been known for his ability to spin a tall tale, especially about the speed or endurance of his trusty horse. And, as many of my colleagues may recall, Amtrak's so-called Iron Horse pulled out of the State of Wyoming about 2½ years ago. As a consequence of this decision, the citizens of Wyoming have no train service at all, but continue to subsidize Amtrak's service to other parts of the country as a so-called valuable public service worthy of all taxpayers hard-earned money.

While providing no service whatsoever, Amtrak keeps coming back to the State to add insult to injury. During this year alone, Amtrak sped through Wyoming without stopping to pick up passengers some 27 times because of mud slides, snow slides, high water, or track washouts on its more scenic route through the Rocky Mountains of northern Colorado. But, what is far worse, Mr. President, is the cover of the brochure Amtrak is presently using for its "Amtrak's RailAmerica Tours West" tourist package.

This latest publicity stunt convinces me there has been and never will be a cowboy with boots high enough or steed fast enough to compete with the tale Amtrak attempts to spin about its own "Iron Horse" as it is presently depicted speeding through the Grand Teton National Park. Since Amtrak refuses to come anywhere into the State of Wyoming, because of our lack of spectacular scenery, it is particularly ironic, not to mention the height of hypocrisy, that the corporation chose one of Wyoming's most famous and more beautiful mountain ranges to promote its tourist service through the West. It is also interesting to note that this superimposed train speeding through this national park would end up sinking in one of the park's most beautiful lakes—Jenny Lake—where a speeding boat is not even permitted, let along a speeding locomotive!

Mr. President, the fiscal year 1986 DOT appropriations bill is about $2 billion over the President's budget request, and close to $700 hundred million of that amount is for the continuation of Amtrak. That is why I cosponsored, and voted for Senator ARMSTRONG'S amendment to discontinue this subsidy. Our country can no longer afford to financially underwrite a tourist service cloaked as a public service which refuses to serve all of America's traveling public. More importantly, what is the point of passing an amendment such as Gramm-Rudman, which requires a balanced budget by 1991, if Congress does not have the courage and conviction to begin making those difficult choices right now?

Mr. BYRD. Mr. President, the National Railroad Passenger Corp., often referred to as Amtrak, has served the Nation well since its creation in 1971. I want to strongly state my opposition to any funding reduction below the $616 million recommended for fiscal year 1986 by the Senate Committee on Appropriations.

The Federal Government has a legitimate and vital role in meeting the transportation needs of this country, a role that has long been recognized. During World War II, one area of major concern to General Eisenhower was the lack of a network of highways to reach from one end of the United States to the other on which to move troops and supplies. As a matter of fact, one of General Eisenhower's first actions when he became President was to propose the Interstate Highway system. Thus, the Interstate Highway system was established, recognizing the need for such a network as vital to the national security. Likewise, the Federal Government has recognized its role in transportation in providing support to our air traffic control system.

Just as highways and air travel are essential to our national transportation system and our national security, so is our rail transportation system. Indeed, Congress recognized the role

of the Federal Government and the importance of rail service when Amtrak was established.

Amtrak has been working closely with the Federal Emergency Management Agency as well as with the Army's logistics staff at the Pentagon to develop plans for mobilization in the case of a national emergency. Amtrak could make available, on immediate notice, 75 percent of its total capacity and within 48 hours, all of its capability to meet the needs of the military in moving troops, supplies or to move citizens should evacuation of an area become necessary. As a matter of fact, if the "traffic jams" materialize during a national emergency as predicted, the railroads may be the only practical way to move troops and supplies. Should Federal support be withdrawn from Amtrak, trackage would fall into disrepair and consequently, even if rail cars were available, we would no longer have the trackage or manpower to operate trains.

Amtrak carries 20 million passengers per year. Many of its passengers prefer the train over all other forms of transportation; to others, the train is the only form of Transportation available. Of the over 500 communities Amtrak serves, 52 communities have no bus service and it is estimated that there will be another 161 communities, which Amtrak serves, that will not have air service should the essential air service subsidy be terminated.

Further, there are fewer and fewer affordable transportation alternatives for rural America. Rail passenger service is a vital link in our transportation infrastructure. To disrupt rail passenger service would only hurt rural America, which has already suffered from the loss of air and bus service since the deregulation of those industries. If Amtrak service is severely curtailed, what are the alternatives? The Federal Aviation Administration testified before the Senate Appropriations Subcommittee on Transportation that it had no alternative plans to deal with the influx of commuter traffic in the Northeast Corridor were rail service to be disrupted. Further, the Interstate Commerce Commission testified that it had no alternative plans, and indeed, no role in insuring bus transportation for those communities that would no longer be served by Amtrak.

It is worth repeating that Amtrak serves 20 million Americans, including more than 55,000 West Virginians. Many of the people served by Amtrak are either elderly, poor or from rural areas. I do not feel that it is in our best interests as a Nation to terminate funding for Amtrak or to severely reduce that funding. It has been said that the chain is only as strong as its weakest link. Amtrak surely is a vital link in our transportation chain, and to weaken that link could well jeopardize our total transportation system—not only as it relates to rural America but also in times of national emergency. To withdraw support precipitously is shortsighted and disruptive.

We can't simply close Amtrak down, turn off the lights, and leave 20 million people waiting at the stations.

Mr. ANDREWS. Mr. President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficent second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Colorado.

The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Missouri [Mr. DANFORTH] and the Senator from Alabama [Mr. DENTON] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from Hawaii [Mr. INOUYE] are necessarily absent.

The PRESIDING OFFICER (Mr. KASTEN). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 71, nays 25, as follows:

[Rollcall Vote No. 242 Leg.]

YEAS—71

Abdnor	Glenn	Melcher
Andrews	Gore	Metzenbaum
Baucus	Gorton	Mitchell
Bentsen	Grassley	Moynihan
Biden	Harkin	Nunn
Bingaman	Hart	Packwood
Boren	Hatch	Pell

Gramm	Nickles	
Hecht	Proxmire	

NOT VOTING—4

Danforth	Eagleton
Denton	Inouye

So the motion to lay on the table amendment No. 846 was agreed to.

Mr. ANDREWS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ARMSTRONG. Mr. President, a footnote to the debate which has occurred.

I congratulate the chairman on his victory. I hope Senators will take a long, hard look at this issue.

Senator PROXMIRE and I understand why this is not the day to make a major decision to terminate a program like Amtrak, but I know there are many Senators who realize that something must be done. I invite Senators to take a look at the issue; and in due course, on another occasion, we would like to ask the Senate to take another look and perhaps to reconsider.

AMENDMENT NO. 848

(Purpose: To amend the Motor Vehicle Information and Cost Savings Act)

Mr. EVANS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Washington [Mr. EVANS] proposes an amendment numbered 848.

Mr. EVANS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following: Section 502(1)(1) of the Motor Vehicle Information and Cost Savings Act [15 U.S.C. 2002(1)(1)] is amended by inserting at the end thereof the following new paragraph:

"(F) Notwithstanding the provisions of subparagraph (B), no manufacturer shall be entitled to a credit for exceeding the fuel economy standard for any model year for which the Secretary has reduced the fuel economy standard to a level below the standard originally established by Congress for that year. *Provided*, That a manufacturer shall be entitled to a credit to the extent that the fleet average fuel economy of the manufacturer exceeds the standard that applied prior to modification by the Secretary."

Mr. EVANS. Mr. President, today I bring before the Senate an amendment to current automobile fuel economy law. It is a relatively simple but necessary amendment: It would modify the provision in current law that grants credits to automobile manufacturers whose corporate average fuel economy exceeds the fuel economy standard for that model year. Before I explain to my colleagues precisely what this amendment does, I would like to bring them up to date and explain once again why I believe we must not totally abandon the efforts we have taken in Congress to encourage fuel economy.

On October 1, 1985, the Administrator of the National Highway Traffic

Safety Administration formally announced her decision to lower the CAFE standard for passenger automobiles from 27.5 miles per gallon—the level established by Congress—to 26 miles per gallon for the 1986 model year. I was not surprised by the decision; it had been proposed several months before. Yet, while I was not surprised, I was saddened. Once again we have forgotten yesterday and overlooked tomorrow.

How can we forget the economic turmoil caused by the oil shocks of the 1970's? Inflation raged and unemployment exploded. All of us felt the strain then, and in fact are still struggling to recover.

Of course, we should not fail to recognize that 1985 is not totally unlike 1972. In 1972, no one could conceive of paying even 50 cents for a gallon of gas. The same is true in 1985. Unfortunately, we are on the wrong side of 50 cents today, and headed further away in the future.

It is impossible to predict with complete accuracy what the future holds in store for us. Yet, as I have reviewed recent government and private studies of predicted oil reserves, I note that there has been a disturbing trend: Every estimate made today indicates a likelihood of substantially lower petroleum stocks than we thought was the case only 5 years ago.

In short, all estimates indicate that the United States will become increasingly dependent on foreign sources of oil, particularly if present consumption trends continue. Today, with increasing economic activity, we are consuming ever larger amounts of petroleum. The invisible hand of the market gives us the thumbs up to profligacy; the pump price of a gallon of gas has actually declined over the last year. Yet, the more we use, the faster we come to the precipice of energy vulnerability.

I guess we deserve the energy policy we have in this country today. Myopia and complacency are the parents not only of our energy policy, but our economic policy as well. How else can we explain today's choking deficits? It is time we look around for some responsible foster parents, like prudence and fairness.

The amendment I offer today is, I believe, both prudent and fair. In 1980, Congress amended the CAFE law to allow automobile manufacturers to obtain fuel economy credits when the manufacturer's fleet fuel economy average exceeded the standard applicable for a given year. These credits can be carried forward, or back, 3 model years to be applied in years when the manufacturer fails to achieve the specified CAFE level. To date, the credit provision has allowed all manufacturers to avoid the monetary penalties prescribed in law for a CAFE shortfall.

I am not generally opposed to the credit provision for it gives manufacturers some flexibility in meeting the CAFE standard. As long as the standard is not lowered, the credit provision does not unduly weaken the incentives for achieving specified CAFE performance. However, when the standard is reduced, the credit provision seriously enervates these incentives by providing manufacturers with a reward for failure.

We have heard a lot about double-dipping around here. This is one of the most classic cases of double-dipping I have ever seen. You fail to meet the standards. You ask the National Highway Traffic Safety Administration to lower the standards so that you comfortably meet them, and then the excess, by which you met those lowered standards, creates a new credit which you can use to fail to meet the standards in future years.

If we are going to keep this law on the books, it must have some integrity.

My amendment would simply modify current law by denying credits to manufacturers in years when the CAFE standard has been reduced, unless the manufacturer exceeds the standard that applied prior to reduction. Thus, while manufacturers would be allowed the tremendous benefits of the reduced CAFE standard, they would still have an incentive to improve fuel economy and meet what was until recently the legal standard.

Let us not misunderstand or have misrepresented the nature of the amendment. I opposed relaxation of standards. I lost that amendment on the floor.

The Secretary of Transportation subsequently, for 1 model year, 1986, reduced standards from 27½ to 26 miles per gallon.

But how in the world can we further reward those who fail? It is estimated that the manufacturers, most all of the manufacturers, and all three of the big American manufacturers, will exceed the 26 miles per gallon standard for the model year 1986.

Let us assume that one of them comes in at 26½ miles per gallon. That is 1 mile per gallon lower than the original standard but it is one-half mile a gallon better than the reduced standard.

If they are now given credit for that one-half mile per gallon, they can carry it forward and use it next year. They have already applied to have the standard for 1987 reduced from 27½ miles to 26 miles per gallon. I presume, based on past experience, it is likely the Secretary will ultimately grant that request for reduction, so again they will have 26 miles per gallon, only this time they will have another credit of one-half mile per gallon which will allow them only to meet 25½ miles per gallon and still not be subject to any penalty.

Mr. President, we are headed in the wrong direction through this double-dipping and extra credit.

It is bad to relieve standards. That is bad enough. It is, Mr. President, unconscionable to reward failure and to reward those who cannot meet the standards.

Mr. President, several letters have been placed on the desk. I have sent a letter out to my colleagues, but there are two letters I wish to refer to, written to all of my colleagues in opposition to this amendment, but these letters I believe are so clearly flawed that I ask unanimous consent, Mr. President, that those two letters be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

GENERAL MOTORS CORP.,
October 23, 1985.

U.S. SENATE,
Washington, DC.

DEAR SENATOR: We understand that Senator DAN EVANS may offer an amendment to the Department of Transportation authorization bill, H.R. 3244, which would critically affect the Corporate Average Fuel Economy (CAFE) regulations. You will recall that the Senate voted to table a resolution by Senator Evans as regards action on the CAFE petition pending before the Secretary of Transportation. That vote was 52-39.

According to our information, the new Evans amendment would prohibit the accumulation of CAFE credits until a manufacturer had exceeded 27.5 miles per gallon.

Because of the existing CAFE situation, the Evans amendment—if passed—would have the effect of forcing U.S. full line automobile manufacturers toward decisions to curtail a substantial portion of their production in the coming model years. The result would be severe economic dislocation, unemployment, and increased foreign penetration of the U.S. auto market. It would have an insignificant effect on energy conservation.

We urge you to vote against the Evans amendment on CAFE.

Very respectfully,

WILLIAM C. CHAPMAN,
Director, Washington Office,
Industry-Government Relations.

U.S. DEPARTMENT OF TRANSPORTATION,
October 23, 1985.

U.S. SENATE,
Washington, DC.

DEAR SENATOR: The Department of Transportation opposes an amendment which may be offered to the Appropriations bill for the Department of Transportation for Fiscal Year 1986, preventing an automobile manufacturer from earning "credits" for exceeding the fuel economy standard established by the Secretary of Transportation, unless the manufacturer's corporate average fuel economy exceeds 27.5 mpg. Recently, the Department determined that 26.0 mpg was the "maximum feasible average fuel economy level" for Model Year 1986. It is also currently considering petitions to establish the fuel economy standard at 26.0 mpg in later model years.

When the fuel economy law was enacted in 1975, it set 27.5 mpg as a goal for 1985. However, it also recognized the difficulties inherent in establishing an appropriate fuel economy level a decade in advance. In recog-

nition of those difficulties, the law provided the Secretary of Transportation administrative authority to adjust the fuel economy level by rulemaking. The law also recognized the difficulties that a manufacturer might face in complying with the standard in any given model year. Instead, it established a system of "credits" which a manufacturer could earn for exceeding the standard in one year and apply them to a shortfall in another year. The credits are available by statute for a three year period, forward or backward.

Before this amendment is considered further, the Department believes that several issues should be explored completely. First, in enacting and expanding the credit system, Congress was very clear in its desire to provide manufacturers with flexibility in complying with the fuel economy standards. We question whether this amendment would comport with this Congressional intent. Second, we question whether there is any support in the legislative history of the original Act or in its subsequent amendments to provide different consequences for compliance with a standard at 27.5 mpg and compliance with a lower standard established by rulemaking. Third, we question whether the amendment would bring about any improvements in fuel economy. Finally, we question whether this would have a more severe effect on full-line we question whether this would have a more severe effect on full-line domestic manufacturers, while benefitting those manufacturers whose fleets are primarily smaller and more fuel-efficient, particularly foreign manufacturers.

The credit provision in the fuel economy law is a complex system, provided by Congress after consideration of its ramifications and expanded by Congress in 1980 after long and thoughtful consideration of the provision and several alternatives. The Department does not believe that it is appropriate to change this provision without the same thoughtful consideration that accompanied its original enactment and subsequent amendment. The amendment under consideration now would accomplish a major policy change in the fuel economy law and would serverly alter the manufacturers' compliance strategies and work to the detriment of full-line manufacturers, without producing any fuel saving benefits for the Nation.

Accordingly, the Department of Transportation opposes enactment of the amendment.

Sincerely,

ROSALIND A. KNAPP,
Deputy General Counsel.

Mr. EVANS. Mr. President, let me refer to them more explicitly.

From the Washington office of General Motors Corp., let me read the last and most important paragraph of that letter:

Because of the existing CAFE situation, the Evans amendment—if passed—would have the effect of forcing U.S. full line automobile manufacturers toward decisions to curtail a substantial portion of their production in the coming model years. The result would be severe economic dislocation, unemployment, and increased foreign penetration of the U.S. auto market. It would have an insignificant effect on energy conservation.

Mr. President, that letter and that paragraph is pure unadulterated hokum and nonsense. I suggest that it is up to American automobile manufacturers to instead advance fuel efficiency, become more competitive, and in becoming more competitive, reduce rather than increase foreign penetration of the U.S. auto market.

I do not think there is any question we do not need to revisit all of the arguments which were made during the previous debate on reducing the standard. Suffice it to say that there is unquestionably the technological capability to provide a full range of automobile sizes, to meet whatever needs and desires there are on behalf of the American public to do it and still meet fuel efficiency standards. And to say that the result of not giving an extra credit, after we have already reduced standards by a substantial amount and after the manufacturers have already applied for a second year of reduced standards, to say that somehow this amendment that did not doubly reward manufacturers would create severe economic dislocation is just plain nonsense.

Mr. President, let me read from a letter submitted to my colleagues from the U.S. Department of Transportation signed by Rosalind Knapp, Deputy General Counsel. Let me read one paragraph, the most important one in the letter:

Before this amendment is considered further, the Department believes that several issues should be explored completely. First, in enacting and expanding the credit system, Congress was very clear in its desire to provide manufacturers with flexibility in complying with the fuel economy standards.

Of course, we did. There has never been a suggestion that the original concept of the credit system should be eliminated or abandoned.

She goes on further to say:

We question whether this amendment would comport with this congressional intent.

How can it not comport with congressional intent when all it does is retain credits on the basis of what Congress originally passed and what we understand and what we gave the credit based upon?

The credits were an opportunity for flexibility based on the original increasing standards that were set by Congress. It was never intended that once those standards were breached by administrative action that greater credits than otherwise could have been gained would have been awarded.

So I suggest that this amendment does indeed comport very closely, in fact, identically, with congressional intent.

Second, she says:

• • • we question whether there is any support in the legislative history of the original Act or in its subsequent amendments to provide different consequences for compliance with a standard at 27.5 mpg and compliance with a lower standard established by rulemaking.

There is no different standard through this amendment. I am merely saying that all manufacturers, any manufacturer can do as was authorized in the original legislation, and that is gain a credit if they meet 27.5 miles per gallon. That is not a different standard. It is the original standard. I guess I would say it is a standard standard. It is one that General Motors, Chrysler, Ford, Volkswagen, and any other manufacturer, foreign or domestic, can meet.

Third she says:

We question whether the amendment would bring about any improvements in fuel economy.

I cannot imagine how anyone could seriously write such a sentence into a letter like this. If you keep the standard higher, of course you are going to increase fuel economy. What in the world did we pass the act for in the first place?

Finally she says:

We question whether this would have a more severe effect on full-line domestic manufacturers, while benefiting those manufacturers whose fleets are primarily smaller and more fuel efficient, particularly foreign manufacturers.

No, this does not have a more severe effect on full-line manufacturers than others who have more efficient fleets, although it probably ought to benefit those who have more fuel efficient fleets. The more severe effect would fall on those manufacturers who are less efficient, more recalcitrant, who have not moved ahead fast enough on technology. And if they are more fuel efficient, if they work harder on technology, we have the best chance of all of meeting foreign competition.

It is my understanding that all three domestic manufacturers will meet the 26-miles-per-gallon for the coming model year. There will be no disruption in 1986. They have already applied for 1987 to reduce standards. The Secretary will examine the questions of technological feasibility, of economic difficulties and all of the other standards which are established in the act to decide whether a relaxation should be made next year.

We have a system in place and this system should be retained. Extra credits of double dipping should not and must not be allowed to go to those manufacturers who simply not only cannot meet the existing standards but who now suggest they should be rewarded for not doing so.

Mr. President, I ask unanimous consent that Senator LAUTENBERG be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Will the Senator yield for a question?

Mr. EVANS. Yes.

Mr. NICKLES. I appreciate the Senator's interest on this issue. The Senator talks about the fuel economy standards and we have debated that issue on the floor before. We have not really gone into the credit issue. Could the Senator give us an exact standing on where the major domestic and foreign automobile manufacturers stand on their accumulated credits or maybe the deficiencies that they have, that they can carry forward or carry back?

I have a couple of plants in my State, a lot of Senators have plants in their States, How is this going to impact, say, GM? How is it going to impact Ford? Is this detrimental to them? How is it going to impact Chrysler? How is it going to impact Toyota? Is this going to help Toyota? I am kind of wondering how it will impact various domestic and foreign manufacturers.

Mr. EVANS. It is my understanding that virtually all manufacturers will meet it in 1986, the model year which is the first one in which this will apply. Because this is the first year in which there will be a reduction in the standard, all will meet the reduced standard of 26 miles per gallon. So no one would be penalized for model year 1986.

Model year 1987 is a question that is still in front of us, because the Secretary has not made a decision on the basis of the original request. The original request of the manufacturers, as I understand it, was for relief of more than 1 year. The Secretary only applied it for 1 year. That request, as I understand it, has now been renewed for the subsequent year and decisions will be made ultimately on whether or not she believes that those standards ought to be reduced.

So for the model year 1986, this should have no effect. I do not know whether any of the manufacturers will qualify under this amendment for credits. I suspect some of them will because some of them will meet the original 27½ miles per gallon. To the extent they exceed that original standard, they ought to get credit and they ought to be able to carry them forward. But other manufacturers who required a reduction, asked for a reduction that would allow them to meet that standard, now to give them credit so that they can come even further from meeting the standard in subsequent years I think is the wrong thing to do.

Mr. NICKELS. I appreciate the Senator's comments.

Mr. EVANS. Mr. President, I yield the floor.

Mr. NICKELS. Mr. President, I rise in opposition to the amendment of my good friend, the Senator from Washington. We have debated in the past, as most of our colleagues will probably remember, at some length whether or not we should allow the Department of Transportation to roll back the standard from 27½ miles per gallon, the CAFE standard, to 26.

Basically, if you go back to the law when it was enacted in 1975, it allowed that flexibility and that was really the vote of the Senate, a vote of 52 to 39 that said yes, that was the law. And I do not think there is any dispute over that fact, that, yes, the Department of Transportation had statutory authority to roll back the standard, and that is exactly what they did.

The amendment that the Senator from Washington has deals with credits. Credits are a system that was enacted to allow back in 1975. If you go back in history it set guidelines or CAFE standards for each of the years and allowed a system of credits where, if they came up a little short one year and if they would make it the next year, they could balance out. And that would alleviate two things: One, paying, in some cases, very large monetary penalties, and, two, so they would be in compliance with the law. And so the credit system has worked.

The Amendment of the Senator from Washington would basically go in and say, "Well, wait a minute. We are not going to allow credits for anything above 26 this year."

I will give a different answer from the Senator from Washington. I think it would adversely affect at least two major domestic full line manufacturers in the United States, that being General Motors and Ford. I think people need to be aware of that fact.

We have not seen the Senator's amendment. We have not had hearings on it. We had hearings on CAFE standards. We had hearings on whether or not it should be rolled back or not. We discussed those and debated those. We had administration witnesses up, we had industry witnesses up, and really thoroughly investigated that issue.

We never considered whether or not credits should or should not be given. that is not anything that our committee nor the Senate has really investigated.

I will tell my colleagues that there is very, very serious economic consequences that would apply, at least to those two manufacturers, if this credit system is altered by the Senator's amendment. I will also tell you that we have contacted—again we have had a short period of time to work. But I do have a letter from the Secretary of Transportation, Elizabeth Dole, stating her opposition to the Senator's amendment. I ask unanimous consent to have that printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF TRANSPORTATION,
Washington, DC, October 23, 1985.

Hon. MARK O. HATFIELD,
U.S. Senate,
Washington, DC.

DEAR CHAIRMAN HATFIELD: The Department of Transportation opposes an amendment which may be offered to the Appropriations bill for the Department of Transportation for Fiscal Year 1986, preventing an automobile manufacturer from earning "credits" for exceeding the fuel economy standard established by the Secretary of Transportation, unless the manufacturer's corporate average fuel economy exceeds 27.5 mpg. Recently, the Department determined that 26.0 mpg was the "maximum feasible average economy level" for Model Year 1986. It is also currently considering petitions to establish the fuel economy standard at 26.0 mpg in later model years.

When the fuel economy law was enacted in 1975, it set 27.5 mpg as a goal for 1985. However, it also recognized the difficulties inherent in establishing an appropriate fuel economy level a decade in advance. In recognition of those difficulties, the law provided the Secretary of Transportation administrative authority to adjust the fuel economy level by rulemaking. The law also recognized the difficulties that a manufacturer might face in complying with the standard in any given model year. Instead, it established a system of "credits" which a manufacturer could earn for exceeding the standard in one year and apply them to a shortfall in another year. The credits are available by statute for a three year period, forward or backward.

Before this amendment is considered further, the Department believes that several issues should be explored completely. First, in enacting and expanding the credit system, Congress was very clear in its desire to provide manufacturers with flexibility in complying with the fuel economy standards. We question whether this amendment would comport with this Congressional intent. Second, we question whether there is any support in the legislative history of the original Act or in its subsequent amendments to provide different consequences for compliance with a standard at 27.5 mpg and compliance with a lower standard established by rulemaking. Third, we question whether the amendment would bring about any improvements in fuel economy. Finally, we question whether this would have a more severe effect on domestic manufacturers, while benefitting foreign manufacturers whose fleets are primarily smaller and more fuel-efficient.

The credit provision in the fuel economy law is a complex system, provided by Congress after full consideration of its ramifications and expanded by Congress in 1980 after long and thoughtful consideration of the provision and several alternatives. The Department does not believe that it is appropriate to change this provision without the same thoughtful consideration that accompanied its original enactment and subsequent amendment. The amendment under consideration now would accomplish a major policy change in the fuel economy law and would severely alter the manufacturers' compliance strategies, without producing any fuel saving benefits for the Nation.

Accordingly, the Department of Transportation opposes enactment of the amendment.

Sincerely,

ELIZABETH HANFORD DOLE.

Mr. NICKLES. I will also place in the RECORD the entire letter from Rosalind A. Knapp, who is Deputy General Counsel for the Department of Transportation, which the Senator from Washington alluded to in one paragraph.

Mr. EVANS. I did have that printed in the RECORD.

Mr. NICKLES. Then I will not place it in the RECORD. I appreciate the Senator notifying me he did put it in the RECORD.

But I will read the first line in the first paragraph. It says:

The Department of Transportation opposes an amendment which may be offered to the appropriations bill for the Department of Transportation for fiscal year 1986, preventing an automobile manufacturer from earning "credits" for exceeding the fuel economy standard established by the Secretary of Transportation.

The balance of that, of course, has already been put into the RECORD.

Just a couple of final points. I think these are important points. We have not had hearings on this issue. We have not really gone into the credit side of the debate. This is legislation on appropriations. It is something we have not taken up.

Mr. President, at this time I wish to make a point of order that this is legislation on appropriations under rule XVI.

Mr. EVANS. Mr. President, I raise the defense of germaneness. I believe this is germane. It is regulatory material dealing with highway regulation, and the transportation bill. I believe it is germane.

Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. THE Senator from Oklahoma.

Mr. NICKLES. Mr. President, I will ask for the yeas and nays in one-half a second. It is my opinion that this is not germane. It does not relate in any way or shape whatsoever to the transportation appropriation bill. This is legislation dealing with CAFE standards. I hope we rule it is not germane.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate? If not, the question is on the question of germaneness of the amendment of the Senator from Washington. Under rule 16, the question is submitted to the Senate. On this question, the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Missouri [Mr. DANFORTH], the Senator from Alabama [Mr. DENTON], and the Senator from Nevada [Mr. LAXALT] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from Hawaii [Mr. INOUYE], are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 56, nays 39, as follows:

[Rollcall Vote No. 243 Leg.]

YEAS—56

Abdnor	Domenici	Mattingly
Andrews	Durenberger	Metzenbaum
Baucus	Evans	Mitchell
Bentsen	Goldwater	Moynihan
Biden	Gorton	Nunn
Bingaman	Harkin	Packwood

Gore	McConnell	Wallop
Gramm	Melcher	Warner
Grassley	Murkowski	Weicker
Hart	Nickles	Wilson

NOT VOTING—5

Danforth	Eagleton	Laxalt
Denton	Inouye	

The PRESIDING OFFICER. On this vote, the yeas are 56, the nays are 39. The judgment of the Senate is that the amendment is germane.

Mr. EVANS addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. EVANS. Mr. President, I think this issue has been well argued. I understand my colleague from Oklahoma wants to take a few minutes. I think we all want to vote on the issue. Let me once again explain it as clearly and as simply as I can.

I introduced an amendment several months ago because I thought we should not reduce fuel efficiency standards. I lost on the floor of the Senate. That issue is behind us. The Secretary has now authorized the standards to be reduced from 27.5 miles per gallon to 26 for the 1986 model year.

I do not believe it is appropriate for us, in addition to giving that dispensation—in other words, reducing the standard sufficiently so that all manufacturers can meet it—to give credits which can be carried forward to the degree they meet 26 miles per gallon but cannot meet the original standard.

Mr. President, I think one bite at the apple is sufficient. This does not in any way eliminate the dispensation which has been authorized, and I am ready to vote. I think the issue is quite simple and quite clear.

In the earlier argument I pointed out that if we in fact do not adopt this amendment, we are merely saying we have lost all interest in fuel economy. We will be giving carry-forward credits which can be used in fiscal 1987, 1988, and beyond to further reduce the chances of meeting the standards.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. RIEGLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. I have not spoken on this issue. We have been meeting in the Banking Committee on the international debt problem and currency misalignments, and so forth, and have been tied up in committee with witnesses from the administration as well as some Senators who had asked to testify.

One can, I think, argue both sides of this issue and certainly the Senator from Washington has argued his side. This is not a simple matter. This is a complex matter. Frankly, I am troubled by the fact that we are endeavoring to deal with a matter as complex as this in this kind of legislative fashion, coming in without the benefit of going through the normal committee process which is available to the Senator from Washington. His party controls the Senate. There are ways and means to bring these matters through the committees of jurisdiction, if there is a compelling argument for doing so. But to bring it up at this time, while it meets the test of germaneness in the sense that Senators are willing to have it considered because we are considering other extraneous issues, is not appropriate in the normal legislative flow. There is not the time to deal with it adequately. We have a letter on our desk from the Secretary of Transportation, Elizabeth Dole, which contains views that would normally be expressed in a committee process if we were following the proper routine. But by circumventing that routine, even the Secretary responsible for carrying out these laws is resigned to the need of having to send us communications in this form because we are taking it out of order. We are not taking it up in the proper sequence in which it might be done.

There is a very strong and compelling set of arguments that can be made on both sides of this proposition, and within the industry itself there is a very fundamental difference of opinion. General Motors and Ford, for example, feel very strongly on one side

of this issue, Chrysler on the other. But let us step back for a minute and think about something else, and that is we are in serious difficulty in terms of our trade situation as we look at the domestic automobile industry today. I do not happen to have in front of me right now the article out of the morning paper, but I trust others have seen it. The article says that one of the major Japanese auto manufacturers will bring onto the United States market within a matter of a few months a luxury sedan, a car that is designed not to compete at the low end of the fuel economy spectrum and at the low price end of the automobile market spectrum, but to come right at the heart of what have been the cars that many Americans still prefer, those cars which are larger, which have somewhat lower fuel economy, are more expensive, and are the cars that are very important to American firms to sell at a certain volume percentage if they are going to be able to generate the cash flow to continue to modernize and improve on car design, car quality, factory productivity, and so forth.

So we are talking about an industry that is still in the midst of a very difficult international transition. Foreign penetration of the U.S. auto market is up about 24 percent at the present time, but it is rising sharply. The estimates are that within a period of less than probably 5 years, maybe even inside of the 5-year period, we will see foreign penetration go up by 10 percentage points in this country, going up from 24 to 34, maybe as high as 38 or 40 percent.

Now, let me just tell you, Mr. President, what that means to the economies of scale within this industry. These are enormous companies in the United States. Even the small companies are large, and their capital requirements are enourmous. If we are going to see that kind of continuing foreign penetration into the U.S. market, we will find that increasingly even the strongest of our domestic automobile manufacturers are going to have a very difficult time generating the sales volume needed to earn off the profit and generate needed capital to be reinvested in the business so that we can continue to make fundamental improvements in the manufacturing process right on down through to the final production of a high quality, fuel-efficient car.

Now, today there are any number of car alternatives available to the American consumer, both from domestic producers and foreign makers. If the Senator from Washington, for example, wants to buy a small car that gets 50 miles a gallon, he can buy that car today. He is free to do so. It is his choice as a consumer in the American market. He can buy that car produced by an American producer or a foreign producer. If he wants a different mix in terms of the type of car, maybe a larger car, maybe more horsepower in terms of engine speed or acceleration, more size to accommodate a larger family and therefore a somewhat lower fuel economy, he has that option now right up and down the scale. But the point is today the consumer is free to shop and get the kind of car that he or she wants; there is a very wide variety of choices available.

If they want greater fuel efficiency as a tradeoff against other factors, that option is available in both domestically and foreign produced cars. Frankly, I like to see the situation where the consumer is in the position to make that decision.

I am all for having the highest possible fuel efficiency, but the fact is that we have available under our marketing system cars produced by many competitors. If somebody wants the most fuel-efficient car available, it is there and they can buy it. They are not going to buy it in terms of a directive from the Senator from Washington or a directive from the Department of Transportation or some other Government bureaucrat. It will be a decision they will make on their own.

I think we have come about as far as we can in terms of injecting the Federal Government into the process of telling the automobile industry, or any other domestic industry, exactly how they should build their products or what their goals should be or what the tradeoff should be between size of car, fuel efficiency, emissions standards, or what have you.

We have gone a long way in that direction as it is, and much has been constructive. But are we now at a point where we will make decisions as legislators, sitting here for 30 minutes—no hearing on this, no effort to bring it up in committee—deciding, in the middle of the lunch hour, what the national policy is going to be in this area? That is one reason why we look ridiculous on the outside.

Whether you agree with the Secretary of Transportation or not, we should at least read her letter, in saying that a matter of this complexity, on which she and the experts in the Department of Transportation have spent hundreds if not thousands of hours, trying to evaluate and make decisions, requires that kind of care and balancing.

Does it mean that in the end all companies will be happy? No. Today, one company may be happy and another unhappy, but we cannot make decisions on that basis. We have to make the decision on the basis of whether this is the way for us, as legislators, to try to reach into an industry situation and mandate public policy solutions that in the end determine what the product mix is going to look like.

Our established Federal policies that affect the auto industry represent a reasonable balance.

I think we are at the point where the market is in a position to make their own individual product decisions within that framework. If we do not let the market do it, let us at least permit people devoted to that job, who are paid to do it, as technical experts, do it.

There is the opportunity within the administrative process for all people to be heard and to make their presentations—the industry as a whole or individual companies—and then we are in a position to have that kind of judgment made in the administrative process.

If the Senator from Washington does not like it, that is his privilege, but I do not think it is appropriate to come in here in the midst of a legislative process totally unassociated with this, come around the committee of jurisdiction, on which I serve, and say: "I have a different way of approaching this thing, and here is the answer I want; and even though we don't want to take the time for hearings, this is what we should do today."

Frankly, representing Michigan, the largest automotive producing State in the country, I admit that we have made mistakes in the automobile industry in the past. We recognize that, and we have paid dearly for it, in the industry, among the workers, and in the country. We have missed the turn at different times on different things. I am just as frank to say that some of the problems that have hit us are not the fault of the industry, in terms of the energy crisis, shifting consumer preferences in this country, and the weight of Federal Government policies on the industry. But the bottom line today is that we have a broad range of choices available to people. If they want a highly fuel efficient car, at low price, produced here or abroad, they can buy it.

I do not like anybody in this Chamber, by direction or indirection, trying to reach through that decision process to steer people in a direction they might not otherwise be inclined to go. People can make their decisions on their own, and are making them.

If we move in a direction here so that 5 years from now we find the domestic automobile industry sales that are taken by foreign producers are not 24 percent in this country but 35 percent or 40 percent, we will be back here on other issues having to do with widespread unemployment, trade adjustment assistance, and other difficulties which we have been through not long ago.

We were here on the Chrysler issue, and we made an intervention which worked successfully. We made money on it, as a country, and we avoided an

enormous calamity, not just in certain regions of the country, but it would have hurt the country as a whole. I do not want to get back into that again.

The industry is making some progress. It seems to me that if we are going to make further governmental decisions that determine how this industry is going to do its work, let us do it in a deliberative fashion and not on the basis where, all of a sudden, an amendment pops up in literally a 24-hour period, or close to that.

However meritorious the idea may be, this is not the way to evaluate it. This is not the way to try to deal with it.

What we look like is what we are, and that is a group of tamperers trying to make decisions when we do not know the facts.

I have seen this industry struggle with its own mistakes and with mistakes put on it from the outside, some by the Government. We have come through a long, difficult journey, and we do not need more of the same.

I may have more to say about it, but I felt compelled to make these remarks.

Mr. ANDREWS. Mr. President, I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Missouri [Mr. DANFORTH], the Senator from Alabama [Mr. DENTON], and the Senator from Nevada [Mr. LAXALT] are necessarily absent.

I further announce that, if present and voting, the Senator from Missouri [Mr. DANFORTH] would vote "nay."

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from Hawaii [Mr. INOUYE] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 46, nays 48, as follows:

[Rollcall Vote No. 244 Leg.]

YEAS—46

Abdnor	Garn	Johnston
Andrews	Glenn	Kassebaum
Boren	Gore	Long
Byrd	Gramm	Lugar
Cochran	Grassley	McClure
D'Amato	Hatch	McConnell
DeConcini	Hatfield	Melcher
Dole	Hawkins	Murkowski
East	Hecht	Nickles
Exon	Heflin	Pressler
Ford	Helms	Pryor
Quayle	Stevens	Warner
Riegle	Symms	Weicker
Sasser	Thurmond	Wilson
Specter	Trible	
Stennis	Wallop	

NAYS—48

Baucus	Evans	Mattingly
Bentsen	Goldwater	Metzenbaum

Domenici	Mathias	Stafford
Durenberger	Matsunaga	Zorinsky

NOT VOTING—6

Armstrong	Denton	Inouye
Danforth	Eagleton	Laxalt

So the motion to lay on the table amendment No. 848 was rejected.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the yeas and nays on the amendment be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Washington.

The amendment (No. 848) was agreed to.

Mr. ANDREWS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. EVANS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO 849

(Purpose: To prohibit formula grants for operating subsidies)

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE] for himself and Mr. ARMSTRONG, proposes an amendment numbered 849.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31, line 14, strike out "$2,100,000,000" and insert in lieu thereof "$1,230,000,000".

On page 31, line 14, before the period insert the following: "*: Provided*, That none of such funds may be available for operating subsidies".

Mr. PROXMIRE. I will explain the amendment.

Mr. President, this amendment would terminate Federal operating subsidies for local transit, leave capital subsidies in place, and capital subsidies constitute about 80 percent of the total Federal subsidies for mass transit. It would make a real contribution toward reducing outlays in the bill before us. It would cut it by $870 million. It would lower the projected deficit in the Federal budget. Approval of the amendment would show the Senate means business, and not business as usual, in cutting Federal spending. The amendment proposes that we adopt the recommendations made by the President in his budget message. I believe the President was absolutely right in calling on Congress to discontinue the operating assistance program—operating assistance—of the Urban Mass Transit Administration. Let me list some of the reasons in support of this. What they add up to is that operating assistance for transit is not only very expensive—Treasury has poured over $9 billion into transit fare boxes since the program was initiated—but it is actually self-defeating. The operating assistance program was enacted like many programs as a temporary measure. In the words of its chief sponsor, operating subsidies were described as a needed blood transfusion so that curative surgery could be performed. Surgery was needed to improve services and operating efficiency.

The operating assistance was to provide the cash needed to maintain affordable transit fares which was the requisite for inducing more people to get out of their cars and into metro buses and subways. So what happens? Well, experience indicates that the cure is making the patient sicker. Local transit is no better able today to run on its own wheels than it was 10 years ago. Local transit authorities clearly have taken a liking to a regular diet of Federal fare supplements. The Office of Management and Budget evaluation is that operating subsidies have become a costly addition. It says that Federal aid has achieved wage increases for transit workers and fare reductions for riders, but no cure for an industry whose costs continue to exceed its revenues. OMB's analysis shows that industry wages have increased 28 percent in real terms, fully allowing, that is, for inflation—after inflation. Rider fares have fallen 22 percent in real terms since 1970. Neither of those outcomes were stated objectives of the Federal subsidy program—but that is about all they have accomplished—nor has Federal aid resulted in productivity increases that are needed to cure what ails the transit industry. In fact, revenues from fares have actually declined when taken as a percentage of operating costs, and costs per passenger carried

have increased. Transit's share of commuter trips also has declined. So the point of such statistics can easily be ignored. The operating subsidy has not been the wonder drug it was anticipated. Operating subsidies for transit moreover are not well targeted to aid the poor. Most transit riders who benefited from the subsidies do not have incomes below the poverty line. Subsidies chiefly cover peak period transit service—haul service, I should say—for urban and suburban commuters, expensive rail and long-haul service. OMB argues, and I believe they are correct, that keeping the price of transit service low for an entire society in order to keep fares low for a small segment of society is both irrational and expensive. It also places an undue burden on some taxpayers who get nothing in return because their taxes subsidize riders in other localities.

We have all been asked at one time or another whether such cost subsidies are justified. I am convinced that taxpayers in Wisconsin should not have to support the level of transit subsidy now supporting low transit fares in some bigger cities which are economically better off. There are other arguments that can be made against subsidized transit operations to the tune of $870 million each year. Frankly, the case can be made simply. We need to cut Federal spending now. Subsidies for transit operations are clearly not justified. They should be discontinued.

Mr. President, unfortunately, my cosponsor on this bill, Senator ARMSTRONG, is not here at the present time. But let me point out that earlier today Mr. ARMSTRONG made an absolutely devastating case for eliminating the billions of dollars we will pour into Amtrak over the next few years. No one even tried to answer his arguments. No one tried to respond further to the arguments that other modes of transportation could easily handle the 0.2 of 1 percent of passenger miles that Amtrak provides for that colossal Federal expenditure. The Senate plowed right ahead, and voted overwhelmingly to continue pouring millions into this most inefficient form of transportation.

Now I am offering an amendment to save $870 million in outlays this year and billions over the next few years by reducing the $4 billion in subsidies the Federal Government pours into local mass transit every year. My amendment would continue the Federal Government's huge capital subsidies to mass transit but require the localities to pick up their own operating costs.

Mr. President, it is like buying your daughter or son a car, and telling them, kid, you have got the car, I paid for it, now you pay for the gas to operate it.

Mr. President, I know this amendment will not even provoke respectable rebuttal. It will just provoke this body to vote no, and thereby spend nearly a billion this year on paying the cost of operating a system the Federal Government has largely bought, paid for, and presented to the large communities. Furthermore, I understand the distinguished Senator from Kansas [Mrs. KASSEBAUM] will shortly offer an amendment that will somewhat reduce the subsidy for Amtrak by 15 percent, the operating subsidy for mass transit by 10 percent, other accounts by 6 percent, and use most of that money to restore spending in other parts of the bill. The amendment of the Senator from Kansas would result in a net saving of $127 million and bring it into compliance with the budget resolution. It has an excellent chance of passing. I will vote for it but because it does make at least a modest saving, I will withdraw my amendment.

I have another amendment I would like to offer, Mr. President, at this point, and then I will yield the floor.

The PRESIDING OFFICER. The amendment is withdrawn.

AMENDMENT NO. 850

(Purpose: To eliminate payments to air carriers)

Mr. PROXMIRE. Mr. President, I send another amendment to the desk and ask for its immediate consideration. I will take just a couple of minutes on this. I think it is important to call this to the attention of my colleagues.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE] proposes an amendment numbered 850.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

The amendment is as follows:

On page 4, beginning with line 1, strike out all through line 6.

Mr. PROXMIRE. Mr. President, I will take just a couple of minutes on this. I think it is important to call to the attention of my colleagues. I will describe this amendment.

Mr. President, the reason I am bringing this amendment up, and I will not take more than a few minutes, is because it illustrates how much fat, water, and waste there is in this bill.

I have painfully discovered over the last few days, particularly today, how difficult it is to get the Senate to vote to cut this spending. What this amendment does is it ends after 7 rather than 10 years the Essential Air Service Subsidy Program established in 1978 to provide a short transition period for communities to adjust to the deregulation of airline service.

My proposal to sunset this program at the beginning of fiscal year 1986 is in line with the President's budget recommendations and would save $28 million this year and considerably more over the next 3 years.

It is interesting to note that nearly half of the cities currently receiving subsidies are within 100 miles of a major hub airport. As any frequent air-flyer can tell you, flights of this distance usually save little if any time.

Ironically these subsidized short-hop flights are deterring the development of cheaper and probably more efficient transportation alternatives including limousine or bus service.

There are numerous examples of ludicrous situations of outrageous Federal subsidies of incredibly expensive and unnecessary Federal support of air service.

Let me just quote a couple of examples cited with the President's budget submissions.

The General Accounting Office found that the roundtrip subsidy per passenger to fly 180 miles from Blythe, California, to Los Angeles, was $1,096. At 80 cents per mile, the same passenger could have used the subsidy to take a taxi to Las Vegas, lose $500 at blackjack, and take a taxi home with cash to spare.

Passengers in Clinton, Iowa, 37 miles from a hub airport, are provided almost $200 in subsidy to convince them to leave their cars at home.

Mr. President, it is clear that as we desperately struggle with runaway deficits these subsidies to air carriers primarily for commuter services deserve to be ended now.

I fear if we provide further subsidies to cities for small community air service the temporary, transitional program will soon crystalize into a permanent entitlement with growing special interest support.

In addition, to continue providing subsidies to commuter airlines contradicts the deregulation atmosphere intended by the 1978 act and provides a disincentive for such airlines to hold down or reduce their cost or Federal subsidies. In fact, this program which guarantees airlines a set profit as a percentage of cost actually encourages the airlines to inflate and overstate costs. Let me give just two examples.

In one instance an airline claimed credit for purchasing fuel at what appeared to be an unrealistically high price. The reason for paying inflated prices became clear when it was revealed that the airline just happened to own the fuel company providing the excessively expensive fuel products.

In another example an airline used its subsidy payout to finance a promotional $100 round-trip fare to Hawaii.

It is clear that this program has been abused, has outlived its usefulness and needs to be immediately ended. The results of such a termination will not only save the taxpayers

money but will lead to more rational and efficient use of the Federal and private transportation dollar.

Mr. President, I think it is useful to call this to the attention of my colleagues. I hope as time goes on, the Senator from Colorado said this morning, more and more of our colleagues will see that we should step up and vote no on these measures, even though there is a handful of our constituencies in every city in the country who support these programs. It is time we find the will to disallow them.

Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. CHILES. Mr. President, I have listened with interest to the distinguished Senator from Wisconsin on the two amendments he has proposed. I know he has a reputation in this body as being one who tries to hold down costs. There is certainly some merit in trying to hold down the costs in this bill.

The subcommittee worked hard on this bill. We are about $100 million below what we presented last year. Yet we still find ourselves $125 over the outlays compared to where we should be, even with these horrendous cuts. We have cut 11 percent from the Coast Guard and FAA, which I think everyone knows will work tremendous hardships on those agencies.

I have to say to the distinguished Senator from Wisconsin that to adopt his amendments and abruptly cut off either one of the areas he is talking about might have worked some great hardship, given the signals we have already sent. We did cut 11 percent out of the Coast Guard and 11 percent out of the FAA. We can really figure what that means in the operating budgets of those agencies.

I do not think anybody can contemplate the catastrophic results that could come from that.

Mr. President, we know we have had more air traffic accidents this year than we have had for many, many years.

We know we are stretching to the breaking point a lot of the personnel. We know we are trying to modernize some of the equipment and require better technology. We know air traffic continues to increase.

If we just look at the number of near misses in addition to the bad accidents, we get some idea of what could happen.

We should be doing more for this agency. We have to do something to have better training for personnel, certainly more personnel, and move forward to get better technology.

But here we are talking about cutting 11 percent.

It is the same thing with the Coast Guard. We know the multiple roles of the Coast Guard as they try to take care of boater safety and perform as the long arm of defense in coastal protection. We have been trying to update some of their equipment, working hard to get some more modern cutters and equipment, while at the same time giving them the additional role of drug interdiction and refugee and illegal alien interdiction. In my neck of the woods, both of those are so terribly important. The Coast Guard is working very hard in those areas.

We have given the Coast Guard an additional role this year. In the Defense authorization bill, we require there be more Coast Guard personnel trained and put on board Navy vessels so trained in arrest procedures, so that same Navy vessel out there patrolling could make drug interdictions, and use the equipment the taxpayers pay for to try to block us from the drug invasion.

Even with that additional mission, here we are talking about cutting this area by 11 percent. Why? Not because anybody wants to but, because in this bill it is one of the only places where there are dollars in operating costs, and we have such a tough time getting outlays in some of the other areas.

The distinguished Senator from Wisconsin said that before long there will be an amendment to try to even this up some. I will say I am going to support that amendment. Even that is a horrible consequence. We will still end up with the Coast Guard and the FAA being cut about 6.5 percent and then we will have to cut a lot of these other areas at the same time.

I really think that in the appropriations process—and neither the Senator from Wisconsin nor the Senator from Florida had the chance to sit in on the chairman's meeting—is when someone should have been looking at all of these areas and should have said, "Wait a minute. These are very, very important. If we are talking about cuts, we should look at the ones that are most important."

On the HUD bill we ended up with across-the-board cuts which no one wanted to make. We saw veterans getting an across-the-board cut and then being put back again as the body wrestled with that.

It seems as though these two bills are the ones getting especially hurt. I have heard the Budget Committee blamed for this. It makes good sense, I suppose. The Budget Committee can take a lot of blame. It is hard to convince people that the Budget Committee figures are only advisory.

They do not count for anything. The Appropriations Committee can take all those figures and change them, except the final number on outlays and the final number on budget authority, and when they finish all of the crosswalks, those numbers should come into being.

As the Senator from Wisconsin knows because he was supportive, the chairman of the Budget Committee and I did raise that. We did hope the Appropriations Committee would come in with a crosswalk that not only totaled budget authority, but also got the outlays. That, of course, caused some consternation. We had the first bills—Treasury and Post Office—come out here that did not get to the bottom line and we had an across-the-board cut.

Then we came up with a permanent crosswalk with a plug of $400 million, unspecified cuts, and no one knows whether that one will materialize or not.

That plug, as the Senator from Wisconsin knows, sort of helped the Labor-HHS bill come in. But there was no plug for Transportation, not that the Senator from Florida would argue for that, because I am sort of against the bill to start with. But this bill was left out again in the crosswalk process.

If we want the bill to be within the budget and if we want the bill to go out of here without these terrible, terrible cuts in Coast Guard and FAA, then we are going to have to make some kind of across-the-board cut.

I hope that the body will respond to that. Then, I think, we have to determine what we can do at some stage—a continuing resolution or, when we look at the defense bill, whether there is some way of making the transfer. I am still not satisfied with cutting the Coast Guard 6 percent or cutting the FAA 6 percent or some of these other agencies, not knowing what sort of hardship that is going to work.

What we are talking about is sharing the pain. It does not make anybody happy. I know there are all kinds of representatives here from the different groups I hear from them in my State. It seems that Florida has a stake in all of these—operating subsidies, the mass transit, the highway portion of the bill, certainly the Coast Guard and certainly the FAA, Amtrak—all of those are concerned. I think we should try to do something that at least spreads the pain fairly across the board.

I hope when this amendment comes up, the Senator from Wisconsin will be supportive and recognize that it is something we need to do.

I yield the floor, Mr. President.

Mr. ANDREWS. Mr. President, I appreciate what my good friend, the Senator from Florida, has pointed out in response to the Senator from Wisconsin. But I think the point also has to be made that the Senator from Wisconsin is addressing the issue of operating subsidies for transit and that is not even set by this subcommittee. That is set by the Banking Committee. They set the cap. We have no authority over it.

So when the Budget Committee says we have to cut, that one is outside our sphere of influence. We cannot cut these subsidies so the cuts have to be even deeper in other areas.

Mr. PROXMIRE. Will the distinguished manager yield on that?

Mr. ANDREWS. I am happy to yield.

Mr. PROXMIRE. I appreciate that very much. As the Senator from North Dakota knows, I have been on the Banking Committee for 26 years, I was chairman for 6 years. The manager makes a good point; however, I was unsuccessful in taking out mass transit operating subsidies, which I have opposed all along. It was perfectly proper for me to offer that amendment and I did so. If a point of order had been raised, I would have challenged the point of order, which would certainly be my privilege.

Mr. ANDREWS. But the Senator from Wisconsin was perfectly in order in offering the amendment. He withdrew the amendment, which was his decision to make and we had talked about that. I am not arguing with the Senator's point. He considers it a way to reduce the budget.

The point I want to make crystal clear on this floor, because the debate is going to come up a little later on in these across-the-board cuts, is that we did not have the ability in this subcommittee to attempt to reduce the overall spending because, in this phase, at least, this phase is outside our purview. It is done by the Senate Banking Committee.

When they do make that decision, if the Banking Committee does decide later on in the spring when they reauthorize transit to follow the suggestion of the Senator from Wisconsin, then indeed and in fact, this part of the spending will be reduced.

In the meantime, having the budget resolution tell us we have to cut across the board and holding harmless certain areas like this skews the results to the point that we have to cut other things.

Mr. PROXMIRE. The Senator from North Dakota could have offered the same amendment the Senator from Wisconsin offered and just eliminated those subsidies, could he not? Why not?

Mr. ANDREWS. In a sense, but then it would have been pointed out that we were invading another committee's territory.

Mr. PROXMIRE. Here is one of the former members of the Banking Committee who would have agreed to do just that.

Mr. ANDREWS. I just wanted to point out that this is one case that illustrates my point. The budget resolution directed a $800 million cut to our function, and without reconciling some programs like this that the Senate has no intention of cutting, and I shall get to that a little later on.

Mr. CHILES. Mr. President, my understanding is that the Senator from New Mexico wishes to come to the floor when these amendments are completed to offer his amendment. So I now suggest the absence of a quorum while he comes over.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, it is my understanding that we are down to a couple of amendments, and if the Senator from New Mexico [Mr. DOMENICI] would come to the floor and offer his, we would be down to one amendment; is that correct?

Mr. ANDREWS. That is true.

Mr. DOLE. We would like to complete action on this bill and move to the reconciliation bill, and I can indicate to my colleagues that we would probably like to spend—how much time is left on reconciliation?

The PRESIDING OFFICER. Seven hours, eight minutes.

Mr. DOLE. So maybe, depending on the managers, 4 or 5 hours on that today, say to around 7 o'clock, 7:30?

Mr. CHILES. I would think if we could go to 7 o'clock or so, it would be good from what I hear on our side.

Mr. DOLE. And complete action today because, as I understand, the House is today completing action on reconciliation. The sentiments of the manager of the bill are that we could complete action on the bill tomorrow?

Mr. CHILES. I would think so, with the time left.

Mr. DOLE. So there will not be any all-night derby here to see if we can complete action. But we are still trying to put it together. Tomorrow morning at 8:30 we will come in and at 9 o'clock we will be on the State, Justice, Commerce appropriations bill. I am advised that we may be able to dispose of that measure by 1 o'clock and then complete reconciliation, and at that point take up the Micronesia bill and file cloture and then move on to the farm bill and be on the farm bill sometime tomorrow and again on Friday, and I assume there will be votes on the farm bill on Friday. Somewhere along the line we need to take up the D.C. appropriations bill and the Interior appropriations bill. As I understand, D.C. appropriations will be disposed of rather quickly. There is one amendment. I think the Presiding Officer has one amendment to the D.C. appropriations bill. The question is bringing it up and voting on it. So we would like to dispose of all the appropriations bills that are pending by Wednesday of next week.

If my friend from New Mexico, the distinguished chairman of the Budget Committee, would come to the floor, we would defeat his amendment.

Mr. ANDREWS. I make a point of order, a quorum is not present, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO 851

(Purpose: To make appropriations for Waste Isolation Pilot Project Roads)

Mr. DOMENICI. Mr. President, I send an amendment to the desk on behalf of myself, Senators JOHNSTON, GORTON, THURMOND, BENTSEN, HOLLINGS, BINGAMAN, SYMMS, EVANS, MCCLURE, and GRAMM, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI], for himself, Mr. JOHNSTON, Mr. GORTON, Mr. THURMOND, Mr. BENTSEN, Mr. HOLLINGS, Mr. BINGAMAN, Mr. SYMMS, Mr. EVANS, Mr. MCCLURE, Mr. GRAMM, proposes an amendment numbered 851.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, line 1, insert the following: "Waste Isolation Pilot Project Roads.".

For necessary expenses in connection with the upgrading of certain highways for the transportation of nuclear waste generated during defense-related activities, not otherwise provided for, $16,260,000, to remain available until expended.

Mr. DOMENICI. Mr. President and Members of the Senate, this amendment would add approximately $3 million in outlays to this bill, about $16.26 million in budget authority. The reason I have to offer it should be obvious when you see the list of cosponsors. The United States of America is spending somewhat less than $1 billion on what is commonly known as the waste isolation pilot project [WIPP]. That waste isolation pilot project is an underground storage facility for low-level transuranic waste. It is the only one in the country.

In the not too distant future, we will be accepting into New Mexico literally thousands of tons of low-level transuranic waste that at present is temporarily stored at various places in the United States, among which are Washington, Idaho, South Carolina, and Texas.

The WIPP project, as everyone might suspect, has been a long time in coming. It is extremely expensive and obviously has not been without controversy. However, it is moving along well.

I believe it is fair to say that it is a model for participation between scientists and the State government, and scientists and the Federal Government, in that they have pioneered an agreement between the Federal Government and the State of New Mexico to bring the waste isolation pilot project into being.

There is one thing we have obligated ourselves to do as a nation. That obligation is contained in a Federal court decision, whereby the United States of America stipulated, when it was sued a few years ago, that we would upgrade the entrance routes, the highways, into this facility so that we could safely carry this nuclear waste to the WIPP site.

For the past 2 years. Congress has funded in the appropriation bills the amounts needed: $5.8 million in 1984, $16.4 million in 1985. These funds allow the State highway department, under the direction of the Federal Government, to let contracts to improve the roads the Government has committed to improve so that trucks and other kinds of transportation vehicles can get from around the country to this site. The appropriators have funded it 2 years in a row. We now have little or no obligation or authority left to continue the program.

We have a letter from the Federal Highway Administrator that as of September 30, $17.9 million, will have been obligated for the WIPP roads. It is anticipated that the remaining $4.3 million will be obligated in October, with contract awards scheduled in November 1985.

It appears to me that we have one or two alternatives. The Congress ought to fund it as the Federal Government obligated itself to fund it, or Congress should send a message that we do not intend to live up to the commitment to improve these roads, even though we will have spent just under $1 billion on the WIPP facility—that is, the facility in which we are ultimately going to store low-level nuclear wastes.

I do not think the Government should do that. I think the U.S. Government realizes that this is a very minor commitment compared to the expenditures for this kind of facility.

There will be a response that this breaks the budget. Yes, it adds $2.75 million in outlays, according to CBO, for fiscal year 1986.

I can assure everyone that before we are finished here, whatever the estimated excess, if it is $125 or $130 million that this bill is over, I will do my best to bring it in line with the Transportation Subcommittee's 302(b) allocation. And if, in that circumstance, we have to cut this program like all the others, I will do that. But I believe, as do the other cosponsors, that if we are going to move this transuranic nuclear waste from across this country, we should put up money to upgrade the WIPP roads this year as we did the 2 previous years.

Perhaps the subcommittee will want to object to $2.75 million in outlays and the continuation of this program. I assume they will argue that this program is not technically authorized as part of the highway program. That is correct. Congress has funded it for 2 years in a row in appropriation bills because it was deemed necessary. We have reported an authorizing bill from the Environment and Public Works Committee, and it passed the Senate on February 23, 1985, as part of S. 391, the Interstate Highway Funding Act of 1985. The Senate also passed a similar authorization in the previous Congress.

Frankly, I am willing to stand up here and argue about all these things. This is not the first and only unauthorized program funded in this bill. If one wants to make a case on that, I can find examples in the bill which are not authorized.

I believe we should fund the WIPP roads project. I urge the committee to accept this amendment. Clearly, the U.S. Government would not otherwise build a facility of this type, without the support of the Department of Energy and the court approved agreement. The project has been challenged at every level, and there remains a Federal commitment to improve the roads. We have improved some of them with 2 years of appropriations, and I do not think we should say this year that we are not going to proceed. This is low-level radioactive waste, low-level transuranic waste, which we must dispose of safely, and I think such a project is a darn good investment.

We are lucky that New Mexico has accepted this facility. We are fortunate that, in a couple of years, we will be able to permanently move low-level transuranic waste from Hanford, WA; the Idaho Engineering Lab; Rocky Flats, CO; Oak Ridge, TN; Savannah River, SC; and Los Alamos, NM. These facilities will be the primary contributors to this huge underground facility, built by the best engineers, under the highest specifications, at significant cost to the Government.

If the committee does not accept the amendment, we will let the Senate decide whether it wants to risk an almost $1 billion facility over an item of this type. We will decide that quickly. I have no intention of delaying the Senate.

Mr. WEICKER. Mr. President, I am disposed to raise a point of order, but I do not intend to do so.

I am, however, disposed to ask the sponsor of the amendment if, subsequent to action on this amendment, he intends to propose another amendment of an across-the-board cut on this appropriation.

Mr. DOMENICI. I say to my good friend that there is an amendment I am going to cosponsor that will be offered by the Senator from Kansas [Mrs. KASSEBAUM] which will modify the bill; that will reflect our recommendation to the Senate. Two of the major accounts, which have to do with the operations of the Coast Guard and the FAA, would be given additional money. The amendment would then take the nondefense discretionary appropriated accounts as of that time and reduce them sufficiently to make this bill consistent with the 302(b) outlay crosswalk allocation that was given to this subcommittee by the Appropriations Committee.

Mr. WEICKER. I must confess that I find somewhat of a contradiction in the amendment proposed by the Senator from New Mexico and that kind of amendment. It seems to me that these matters might very well be needed and valid. I am not arguing the merits.

I ask the chairman of the committee: Is there already money in the bill for this project?

Mr. ANDREWS. There is no money in this bill, I state to my colleague from Connecticut. As he knows, this project funds improvements to existing roads in New Mexico that also serve as transportation routes to the disposal site of transuranic nuclear waste.

It is $16.4 million below that which we provided for the project in fiscal year 1985.

We checked before we put this bill together. As my colleague from Connecticut knows, our staff does a pretty thorough job of this kind of checking, so that our figures are right. We knew we were going to be under attack particularly because we had this totally impractical request from the budget conference to cut $800 million from transportation and then they do not specify where to cut. So we were looking for all places that we could save money.

The yearly funding schedule set forth in the Federal Highway Administration's January 1984 report to the committee estimated 1986 funds availability as $16,260,000. As of September 20 when we last asked, the unobligated balance of this account was $16.4 million. So the money was there ready to be spent, we didn't hold it up. I might also state to my colleague from Connecticut that to date this program has not even been authorized.

I sympathize with our colleague from New Mexico. We appreciate the fact there is a nuclear waste disposal site in his State, and I suppose we

should upgrade the roads that are already there to take care of it.

But again in this time of budget shortfalls, it is difficult to be funding additional money for an unauthorized project in a State where the money is already available and has not been spent.

Mr. WEICKER. I understand. Believe me I also have tried as best as my ingenuity can serve me to meet the dictates of the Budget Committee with all the fiscal piety that goes with those dictates. I understand we are talking about a $16 million road project in New Mexico. We already have $16 million in unexpended funds which are to be used. Is that correct?

Mr. ANDREWS. The Senator is correct.

Mr. WEICKER. What the Senator is doing is what we all had to do on the committee: go back to these unexpended funds, if you will, and use them so we could cut down the budget authority and the outlays in our committee.

Is that what the Senator did?

Mr. ANDREWS. That is precisely it.

Mr. WEICKER. That is what I did in my committee, and now we have $16 million for a little road project in New Mexico, and we are going to have this big, across-the-board cut again because we are not meeting the demands of the Budget Committee.

Mr. ANDREWS. Actually, this project will take in about $60 million throughout the life of the program.

It is like many. Once you get your nose under the edge of the tent, it adds on and adds on.

Mr. WEICKER. I think in terms of the integrity of the budget process really what we should have is an up and down vote, not a motion, very frankly, not a point of order. I think we should have an up and down vote on this project, and I might add at this time I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, let us find out whether even the budgeteers are serious about this process or whether it is a process that applies to everyone here and the various committees except for those in situations that occur within their own States.

Again I suppose what bothers me is not so much the project but the fact that there is money for this project in this budget and that money was gotten the same way we have to scrounge and get money for far more worthwhile projects throughout the list existing in various committees which we chair.

I do not know what the chairman intends to do. I hope we have an up-and-down vote. I hope there is no tabling motion on this but that we go ahead and defeat the amendment of the Senator from New Mexico.

Mr. CHILES. Mr. President, I only wish to say that this debate gives the Senate a chance to kind of whip on the Budget Committee people for a while. And I say to my good friend from New Mexico that he will go through and find all of his projects that he tried to work out suddenly start disappearing and fading in this thing. I guess that is part of the problem.

Mr. DOMENICI. Yes.

Mr. CHILES. If you wear one hat in the Budget Committee, as we have to wear, you are not supposed to be a Senator any more. It is kind of like becoming a nun or becoming a priest. You are supposed to be celibate. You cannot fight for anything or do anything for your State or for what you think is important in some of these other areas.

Obviously, everyone in this body knows that all of us do not give up our prerogatives of being a Senator or our ability to try to support things that we think are necessary or good, and yet we do come down to the role of trying to see that the bottom line comes within that number.

What I just say to my good friend from New Mexico is that maybe giving people a chance to whip on him a little bit is good and healthy and might make him feel a little better, and I know from his Jesuit background he likes a little punishment once in a while and he is used to it. So he might take his stripes along there. Maybe if the Senator can make me a cointroducer of his amendment, I will take some stripes on it also, although this project was not one that I am concerned about. But I would like to go along and shed a little blood on this one in case they decide to vote it down.

Mr. DOMENICI. Mr. President, I thank the Senator. I will not do that. I will take them all myself.

Mr. President, let me suggest to the good Senator from Connecticut that the Budget Committee did not assign the 302(b) allocations to this bill. The Appropriations Committee assigned an allocation the allocation to the Transportation Subcommittee just as they assigned to the Senator's Labor-HHS Subcommittee, just as they gave him $400 million more than the Budget Committee assumed, because they saw his need. So it is not the Budget Committee that assigned these totals.

This bill is $127 million over, and I will confess to everyone I am going to make it $130 million over so everyone will know I am committing a mortal sin. I am adding $3 million because I strongly believe that this program is absolutely necessary.

I do not think there was any reason for it to be left out unless it was for reasons implied by the good Senator from Florida, and he implied them very nicely. It is not true—it is not true that there is no need. We have a letter from the Department of Transportation that says the funds are obligated. To keep to the proposed funding schedule, we would need to provide the third round. But now we are saying it is not authorized after the Congress has appropriated funds for this program out of a sense of emergency for 2 successive years.

I will be delighted to vote on the amendment. If it is $3 million in outlays that bothers the Senator, I will offer another amendment. I will play an appropriations game; I will find some unobligated balances in a program, and I will take the money from that, and then it will add no new budget authority to this bill.

I choose not to do that. I do not think I should be doing that. But that is one way to approach it if one wants to.

The distinguished subcommittee chairman is going to argue that the Budget Committee put him in a bind. The Budget Committee did not put him in a bind because the Budget Committee cannot recommend anything specifically, and when we do they say, "It is none of your business," and we agree.

But they ask us for our assumptions, and we give them to them as guidelines, but they do not have to follow them. What they have to follow are two aggregate numbers—the total budget authority for the congressional budget resolution and the total outlays. They are free as a committee to go into their own meeting and assign these amounts. If they add it up, and if that sum total of budget authority and outlays exceeds the total amounts that the Congress voted in, then they are supposed to do something about it.

In this case, they have made the number very tight for this subcommittee, and they will say it is tight because the Budget Committee made certain assumptions. It would be tight anyway, because the Appropriations Committee happened to use the outlay number that was given to them by the Budget Committee. They are not required to do that.

All of this is merely by way of background because a big to do is being made about fiscal responsibility versus my amendment. My amendment has nothing to do with fiscal responsibility.

What it had to do with is much about what the Senator from Florida was saying. I mean, I have been down here making my position on budgetary matters, and they would like to make my little amendment be the epitome of fiscal irresponsibility.

The problem is it just will not wash. I am not in the least bit embarrassed over this one. This amendment is

worthy and important to addressing the national problem of the safe disposal and storage of nuclear wastes.

So I am delighted to vote, and I am ready at any time. If the Appropriations Subcommittee would like it to be neutral, then I will find some unobligated balances to use for the next amendment, so there will be no concern over the budget.

I choose not to do it, and I urge the Senate to adopt this amendment as the right thing to do. There will be no budget busting; that will be fixed before we leave here. I believe I am entitled as a Senator to add $2.75 million in outlays to a bill that is over its 302 (5) outlay allocation, and then try to fix it across-the-board. The Appropriations Committee was entitled to add whatever they added to make the bill exceed the outlay allocation, and then those of us in the Senate must try to bring it back into conformance.

I yield the floor.

Mr. ANDREWS. Mr. President, I think that it is a great tactic. I have not seen this used too much before when you look for sympathy to get an amendment through that has no business being adopted. Nobody is trying to beat on the head of the Budget Committee.

I might point out, as my colleague from Florida well knows, we added some $16½ million to a project in Florida in the subcommittee over and above the amount requested because it was needed.

I think if my friend from New Mexico would read our report, he would find out that the reason that we took out his request for $16 million for roads in New Mexico is not because we were dissatisfied with the personality of the Senator from New Mexico. The Senator from New Mexico is a very close friend of all of ours and he does a fantastic job in an extremely difficult situation as head of the Budget Committee. The reason we took it out is clearly spelled out in our report, that the Transportation Department told us there was $16 million in unobligated balances in that fund.

Now, my friend from New Mexico comes back and says, as of today, the Transportation Department has changed its figures. That is fine, but this bill was put together and brought to the floor long before this new letter came from the Transportation Department. Sixteen million dollars is not going to make this bill sink or swim and it is not going to impact that much in the budget of the Congress. But I think that we ought to make crystal clear why the decision was made.

If someone wants to play martyr to get something through when the Transportation Department just told us 3 weeks ago there was adequate funds, it was not needed, that is fine.

But let me address a bigger issue, and that is the one the Senator from New Mexico pointed out, that we had the leeway in the Transportation Subcommittee to handle the assignment that was given us from the Budget Committee. Let me point out that our total bill in budget authority is $10 billion—and we will discuss this a little bit more later on.

But the Senator from New Mexico knows that the specific order from the Budget Committee to this subcommittee was to find $800 million somewhere in unspecified cuts. Maybe you can do it with smoke and mirrors, but you cannot do it pushing a pencil or running a calculator in an appropriation subcommittee without hurting other areas of this Government that should not be hurt.

This bill is a solid figure, starting out at $300-plus million under the House, and, after the committee vote, another $500 million under the House, a total of $800 million. The last $500 million under the House I am not proud of. I think it is the most idiotic way to legislate I have seen in 21 years in Congress. We were demanded by the Budget Committee's wrong-headed assumption that somewhere or another you can find, by magic, $800 million in unspecified budget authority. The only place we could find it was in the large accounts, like FAA. And the only place else we could find it was in the Coast Guard. Now, there is no way.

They say, "Oh, fine, in North Dakota you don't have much Coast Guard." Let me tell you, in all 50 States, the interdiction of drug supplies is extremely important to us. The Coast Guard should not be cut. The FAA represents safety in the skies. There is no way the FAA should be cut.

But, because of the demand in that budget conference report that came out in the dark of the night and because it was totally different from what was said about it on the floor—a few of us voted against it because we saw what had been done in some of these specifies—we have been asked to make some of these cuts.

Now, a rollcall vote has been asked for up or down on the amendment of the Senator from New Mexico. The committee left it out, as I said, because there was an unobligated balance sufficient to carry out construction. And that is why the committee did it, not because of some personal pique against a Member of this body. That is not the way the subcommittee operates. That is not the way any committee in this Senate should operate. I just wanted to make that point crystal clear.

(Mr. WILSON assumed the chair.)

Mr. McCLURE. Mr. President, I rise only to make plain two points that affect the Senator from Idaho. We are interested, as the entire Nation is, in the waste isolation project. The transportation network is essential to that project. I have a particular interest because many of the military wastes that have been generated in the military program are in temporary storage in the State of Idaho and has generated political controversy over a period of time; controversy because on the main the Senators from Idaho, both past and present, and Governors in Idaho, both past and present, have been assured that the storage is temporary; that is, the storage will be put in appropriate permanent facilities when they are developed. And we have some nearly permanent storage in my State, but we also have waste stored that they have told us will be removed.

Essential to a portion of that removal, therefore, and the handling of a portion of that waste is the progress on the waste isolation project. And, therefore, we, for very parochial reasons, support the amendment.

I think it is also important for us to note that the waste isolation project is of national interest, not just of interest to New Mexico or to Idaho. The Senator from New Mexico has been instrumental in saying that the waste isolation project was structured properly, with the kind of consultation and concurrence—and I use those terms with due attribution to the Senator from New Mexico, because they are his terms—that allows the State the maximum opportunity for consultation about the process of that project, and it is construction and concurrence which follows as with consultation. It is important. It is his contribution to that process and it works. That is the important part. It works.

But part of that making it work is having an adequate transportation network to make that project whole. And, therefore, it is in the national interest that we go ahead as planned.

Finally, to address the question my good friend, the chairman of the subcommittee, has raised with respect to the statement by the Highway Administration 3 weeks ago that indeed there was unobligated money and the change that is now apparent by their letter in transmission to the Senate with respect to the obligation of those funds, whatever their statement may have been 3 weeks ago, it is now that it has all been obligated or will be within this month. And if that is the case—and I have no reason to refute what they now say—if that is the case, then it seems to me very clear that additional money is justified and necessary.

Now, I share with the good Senator from North Dakota the frustration that we all feel when the administration gives us one set of figures or one bit of information and then changes the story after we have acted. But I

think if, indeed, they have changed the story, and if those facts are indeed facts, we ought to be in a position to respond to what their statement of facts are now.

Mr. WEICKER. Will the Senator yield for a question?

Mr. McCLURE. Certainly.

Mr. WEICKER. I agree with the statement of the Senator from Idaho vis-a-vis the change in numbers. Let me say, prefatory to my remarks to him, that I wish to reiterate what the Senator from North Dakota said, that no one here in any manner, shape, or form has any personal ax to grind with the Senator from New Mexico or the Budget Committee, but we are talking about a process.

Now, to the Senator from Idaho, does the Senator from Idaho recall that at the Appropriations Committee hearing, when we were trying to allocate these various figures, committee after committee came in with revised numbers that were based on administration figures?

Mr. McCLURE. That is correct.

Mr. WEICKER. The Budget Committee, or more particularly, not the Budget Committee, but Senator DOMENICI at that meeting of the Appropriations Committee, said, "Look, there has to be a cutoff point," which is fair enough. When you devise any sort of budget, there has to be a cutoff point, otherwise everyone comes in with new figures, which might be perfectly correct.

What we are running into here is the very point made by the Senator from New Mexico at that allocation hearing. There had to be a cutoff point. That is the point at which the Senator from New Mexico had to work with his Budget Committee and the Senator from North Dakota had to work with his Appropriations Subcommittee. That was the rule set at that allocation meeting.

Now, what we are saying is, "But, nevertheless, now we have some further information on this one point." But we had further information on a lot of other points, but we used one cutoff date.

So I recognize the absolute validity of what has been said. I do not contest what the Department of Transportation is saying. But we all agreed on that committee that there was to be one point. That point was determined. And now I think that rule should be applied to the Senator from New Mexico, as well.

Mr. McCLURE. I thank the Senator for his comment. I have a slightly different view of what occurred in the Appropriations Committee. I do not recall that it was any cut-and-dried rule that we must ignore any further information that might come forward to us. As a matter of fact, I think in the area of the Senator from Connecticut, and in my area of the appropriations process we constantly try to update our information so we can make the best judgment possible based upon the current information. Certainly, at some point you make a decision. At the point we were making the decision on the allocations it had to be based upon the information we then had. I will say to my friend from New Mexico that his defense of the budget process in the application this year needs to be understood in a different context because I do not think the Senate has really focused on the budget process in the way it is working today as contrasted to what was anticipated in the Budget Act.

We contemplated in the Budget Act there would be a First Concurrent Resolution by May 15. That would be based upon the best information we had at that time, and the best estimates that could be made. We would then follow with the appropriations process. It was within those rules, or that violated those rules, or went those limits, or was within the targets, or that violated the targets that we would take the appropriations process, all the legislative process through the year, and the end of that period of time we adopt a concurrent second resolution that adapted to what changes had been made in the appropriations-legislative process.

Last year we had a first concurrent resolution that by a little sentence at the end said this shall automatically extend the concurrent resolution. We are at this time of year substituting in much greater magnitude than before a first concurrent resolution that not only is the second concurrent resolution but also substitutes for the legislative process of the Reconciliation Act. What we are doing to ourselves we are doing to ourselves. We are doing it without a rational discussion of what that is doing to the orderly process established under the Budget Act. The reason I mention that at this particular time is that the Budget Act structured certain steps which would in themselves take advantage of the late information that we had and the latest legislative action that we had, but that clearly contemplated that the Congress, the legislative branch in conjunction with the administration, would make some changes, and the assumptions we had in the spring might not necessarily be reflected in the actions we took during the balance of the year.

And to complicate this problem further, to complicate it further, this year for the first time—and quite properly—we are being asked to look at outlays, and not just authority. An authority is easy to deal with because you can add up figures. Nobody can quarrel with particular figures. A million dollars, or a million dollars, or a million dollars is what it is. But outlays are estimates. They are estimates of what will happen in the future. Therefore, they are very, very subjective evaluations. They are not objective. It is not simply adding it up. It is trying to guess what will happen. It is trying to determine what will happen in the future. We are not this year trying to work in this process in order to get more discipline on the spending, more discipline on the spending than is given by controlling authority. We are trying to get control of outlays as well.

We have some uncertainties. We will have some arguments about those estimates. That is proper. But that also indicates we update our information, and that we look at what actually happens so we can make the best judgments.

I believe had the subcommittee had the knowledge at the time—and I think the Senator from North Dakota indicated this—and had the subcommittee had the information at the time they might have acted differently. They acted based upon the information they had at the time they acted which is different than the information we have now. I think that justifies action on the floor of the Senate.

Mr. ANDREWS. Mr. President, let me respond to a couple of points and state again on the floor of this body that as chairman of the subcommittee I have yet to hear from anyone in the administration that they are requesting this money. I have yet to hear from anyone in the administration that says they do not have $16 million in unobligated funds for this project, and they need the additional money. Let me also point to the excellent statement my friend, the Senator from Idaho, brought forth—that when we find changes we ought to adapt. It is hard to adapt to them when the Transportation Department does not tell us what is needed. We ran this money out last year, $16 million, in an election year. We put it out there probably before it could be spent. Maybe that is why it is down there. Maybe that is why it is not needed now by the administration. That is the word we got.

But my friend from Idaho, the good senior Senator from Idaho, makes an excellent point. We ought to change when we get new information. So far we have not gotten that information. But in the Appropriations Committee—as the Senator from Idaho and the Senator from Connecticut remembers, and the Senator from New Mexico should remember this—we made a point that with new information there were outlays for two FAA accounts that ought to be changed to let us get within this budget parameter. It would have made a difference of some $88 million. The Senator from New Mexico who is a member of the

Appropriations Committee, also chairman of the Budget Committee, said, no. You cannot use this new information. There is no way you can use this new information. Therefore, we will not allow you to take these $88 million worth of credits that would have given us the outlay credit to stretch to accommodate some of the other things. That is a strange double standard. In some places it is OK to use new information even though we have not gotten the new information yet. But in other instances, please do not use new information.

I wish somehow or another we could establish, Mr. President, in this body some type of orderly procedure so we know what we are doing when we are dealing with these important items called dollars of the taxpayers' money, and trying to fund projects. All I am saying is that I wish we had had this information up front. I wish that there was not a double standard being applied by the Budget Committee to new information depending on what projects you are talking about or what the new information applies to.

These are some of the things that would make the appropriating process a lot easier.

Mr. JOHNSTON. Mr. President, will the Senator yield 3 minutes?

Mr. DOMENICI. Mr. President, there is no time limit. I would be pleased to if I had it.

Mr. JOHNSTON. Mr. President, would the proponents of the bill yield?

Mr. DOMENICI. Mr. President, there is no time limit.

Mr. JOHNSTON. Mr. President, legislative bodies sometimes do peculiar things. I hope we are not ready to do one of those peculiar things by turning down this amendment. What I refer to is the propensity of legislative bodies at times not to go through and finish with an important project. We almost did it a few years ago with the Hart Building. We had the Hart Building up, all the superstructure was up, all the steel was up, and but for one or two votes we almost left the Hart Building standing to rust out as a monument to the foolishness of Members of this Senate who would not finish what they started to do.

Mr. President, what we have here is a project we have been working on for over 10 years in the Energy Committee, the waste isolation pilot plant in New Mexico. It is a $1.5 billion project. All the Senator from New Mexico wants to do is come up with $3 million for roads because how are you going to get the big trucks in if you cannot finish the roads. Are they needed? Of course they are needed. The court order says not only are they needed but we have to have it.

Mr. President, I do not know about the intricacies of when information became available but I can tell you we need the $3 million for the roads. We ought to vote it now. It is a $1.5 billion facility. Let us not be so foolish as to have a $1.5 billion facility ready 1½ years from now and no way to get to it.

Mr. DOMENICI. Mr. President, I have a copy of the supplemental stipulated agreement between the State of New Mexico, and JEFF BINGAMAN—the Senator from New Mexico was then the attorney general of the State of New Mexico—and the U.S. Department of Energy, a supplemental decree which I ask unanimous consent to be made part of the RECORD. This document clearly indicates that this case was settled between the State of New Mexico and the U.S. Government based upon certain stipulations.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[In the United States District Court for the District of New Mexico]

STATE OF NEW MEXICO, EX REL., JEFF BINGAMAN, ATTORNEY GENERAL OF THE STATE OF NEW MEXICO, PLAINTIFF, VS. THE UNITED STATES DEPARTMENT OF ENERGY, ET AL., DEFENDANTS

[No. 81-0363 JB]

SUPPLEMENTAL STIPULATED AGREEMENT RESOLVING CERTAIN STATE OFF-SITE CONCERNS OVER WIPP

* * * State's Environmental Evaluation Group through September 30, 1985 in its present organizational structure in the approximate amount of $600,000.00 annually.

The D.O.E. recognizes the State's desire to continue the State review capability and further agrees to negotiate for an appropriate State review capability independent of D.O.E. beyond 1985 for the full operational life of WIPP through and including the decontamination and decommissioning stages and post-operational stages of WIPP. However, because of the difficulty in accurately predicting the full nature and scope of future operational activities of WIPP beyond 1985 the parties agree that the extent of the funding and the organizational structure of such an independent State review capability will be the subject of annual or other periodic negotiation between the State of New Mexico and D.O.E. The first of such negotiations will commence no later than 60 days prior to October 1, 1985.

E. UPGRADING OF STATE HIGHWAYS

1. Summary of the State of New Mexico's concerns

The State of New Mexico is concerned that based on the identification of probable transportation routes by D.O.E. for WIPP shipments in the Final Environmental Impact Statement for WIPP, certain portions of State highways may be used which are presently unsafe and substandard and must be repaired and upgraded. The State seeks to have D.O.E. assist the State in obtaining federal funding for the State to pay for the upgrading of those portions of State highways designated for WIPP shipments which are most in need of repair and for which State or federal appropriations are not otherwise available. The State has designated portions of the WIPP transportation routes which have the highest priority for repair based upon their substandard condition and the fact that almost all shipments must necessarily funnel down those highways. The State also seeks assurance that it shall not pay for the upgrading of any county roads or the construction of new roads in the vicinity of the WIPP site which may be used as access roads for the transportation of waste to WIPP.

2. Stipulations and agreements for resolving the State's concerns in the area of upgrading of State highways

(a) *Agreement by D.O.E. to Pay for Construction of New Roads and that the State Shall not Pay for Upgrading or Construction of County Access Roads Used to Carry Waste to the WIPP Site.* The D.O.E. agrees that in the event any existing New Mexico county road in the vicinity of the WIPP site is used as an access road for the transportation of waste to WIPP, the State shall not be responsible for the cost of any upgrading of such roads which D.O.E. determines to be necessary in connection with such use. In the event a new road must be constructed for use as an access road for the transportation of waste to WIPP, D.O.E. shall pay for the construction of such new road.

(b) *Agreement to Jointly Seek a 58 Million Dollar Special Appropriation From Congress for Upgrading of Certain New Mexico Highways.* The D.O.E. agrees that, with the support of the New Mexico Congressional Delegation, which support will be solicited by the State officials in furtherance of implementing this Agreement, D.O.E. will make a good faith effort to join and support the State and its Delegation in seeking a special appropriation from Congress in the amount of $57,886,544.00 (1982 dollars) for the purpose of assisting the State in the timely upgrading and repair of the following described portions of New Mexico highways which have been determined by the State to be most in need of repair along the designated WIPP transportation routes: (Listed by order of priority.)

1. U.S. Highway 285 (FAP-023-3) from its junction with U.S. Highway 70 north of Roswell to junction with U.S. Highway 60 at Vaughn for a distance of 89.4 miles. Estimated cost: $25,700,000.00.

2. U.S. Highway 60-285 (FAP-027-1) from Encino toward Vaughn for a distance of 9.2 miles for an estimated cost of $2,760,000.00.

3. U.S. Highway 285 (FAP-050-1) from Torrance/San Miguel County line north and from White Lakes north for a distance of 19.8 miles for an estimated cost of $5,840,000.00.

4. U.S. Highway 60-285 (FAP-023-1) between Carlsbad and Loving for widening and resurfacing of 7.4 miles for an estimated cost of $2,710,422.00 and for resurfacing of 9.1 miles for an estimated cost of $1,386,122.00.

5. N.M. Highway 4 (FAP-054-1) from Pojoaque to the Rio Grande Bridge for a distance of 1.8 miles at an estimated cost of $2,430,000.00.

6. U.S. Highway 54 (FAP-20-3) from its junction with U.S. Highway 60 at Vaughn to junction with N.M. Highway 219 at Pastura for a distance of 32.2 miles at an estimated cost of $9,660,000.00.

7. U.S. Highway 62/180 (FAP-022-2) east of Carlsbad and three sections of U.S. Highway 285 (FAP-023-1) between Carlsbad and Roswell for a distance of 30.7 miles at an estimated cost of $7,400,000.00.

All as shown on Appendix B hereto. Total: 205.9 miles—$57,886,544.00.

The State recognizes that such funding may be appropriated over a four-year period commencing, ideally, four years prior to any waste being transported across these roads

to come on a priority basis for those portions of highways most in need of repair with the highest risk of accident in the order of priority as set forth above.

F. FUNDING AMOUNT ADJUSTMENTS

The parties recognize that the level of funding for the commitments set forth herein are based upon 1982 dollars and the parties further recognize that the stated amounts herein will be adjusted for inflation at the time payment is made. All such commitments for funding are subject to the availability of appropriated funds.

G. MODIFICATIONS

The parties recognize that the particulars of this Supplemental Agreement may be modified by the parties in the future by formal written agreement of the parties.

H. EFFECT OF THIS AGREEMENT

This Supplemental Stipulated Agreement, as well as the prior Stipulated Agreement entered herein on July 1, 1981, resolves and settles, subject to the respective contingencies provided for therein and future compliance therewith, all of the issues raised in this litigation. Such agreements entered into between the State of New Mexico and D.O.E. in these proceedings constitute a full settlement of such issues. It is further agreed and recognized by the parties that this Supplemental Stipulated Agreement and the previous Stipulated Agreement of July 1, 1981, are binding contractual agreements the compliance with which is subject to the appropriate oversight jurisdiction of this Court. No provision in this Agreement shall be construed to prevent either the State of New Mexico or the United States from seeking further dispositive orders in this case at an appropriate future time.

Mr. DOMENICI. Mr. President, the distinguished subcommittee chairman has made a number of statements about whether we need this or not. I just want to tell the Senate honestly what happened.

When I submitted the request, I was clearly of the impression that the budget authority for the 2 previous years that I have enumerated had run out. I was told by his staff that they had something from the Department of Transportation indicating that, in fact, they had not obligated the money.

I told them then and there, "I think that is wrong. But I will go check." They told me they would look also.

I did look and I have a letter dated October 8 from R.A. Barnhart, Federal Highway Administrator, that says:

As of September 30, 1985, of the total $22,200,000 of funds made available for this project, $17,922,574.02 had been obligated. It is anticipated that the remaining $4,277,425.98 will be obligated in October with contract award scheduled for November 1985.

Mr. President, I ask unanimous consent to have printed in the RECORD two letters about the obligation of appropriated funds to date.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF TRANSPORTATION,
FEDERAL HIGHWAY ADMINISTRATION,
Washington, DC, October 8, 1985.

Hon. PETE V. DOMENICI,
U.S. Senate, Washington, DC.

DEAR SENATOR DOMENICI: This is to advise you of the status of the Waste Isolation Pilot project in New Mexico.

As of September 30, 1985, of the total $22,200,000 of funds made available for this project, $17,922,574.02 had been obligated. It is anticipated that the remaining $4,277,425.98 will be obligated in October with contract award scheduled for November 1985.

I hope this information is helpful. We will be pleased to furnish any further information you may require.

Sincerely yours,

R. A. BARNHART,
Federal Highway Administrator.

STATE OF NEW MEXICO,
HIGHWAY DEPARTMENT,
October 4, 1985.

Hon. PETE DOMENICI,
U.S. Senator, Dirksen Senate Office Building, Washington, DC.

DEAR SENATOR DOMENICI: The following is provided in response to your recent telephone request relating to the utilization of the 1985 WIPP authorized funds.

The New Mexico State Highway Department has scheduled three projects and a portion of another project to utilize the 1985 WIPP funds authorized to New Mexico and are listed below:

(1) Project No: WIPP-(F)-023-3(5). Location: On US 285, from the junction with US 70, north of Roswell—north. County: Chaves. Length: 15.05 miles. Estimated cost: $5,191,923.29. Status of Funds: Obligated. Contract Schedule: October 25, 1985.

(2) Project No: WIPP-(F)-023-3(6). Location: On US 285, 15.5 miles north of Junction US 70, north of Roswell—north. County: Chaves. Length: 14.90 miles. Estimated Cost: $5,715,662.65. Status of Funds: Obligated. Contract Schedule: October 25, 1985.

(3) Project No: WIPP-(F)-023-3(7). Location: Approximately 1.8 miles south of Junction NM 20-North. County: Chaves and DeBaca. Length: 15.10 miles. Estimated Cost: $5,000,000. Status of Funds: Balance unobligated $4,277,425.98, to be obligated October, 1985. Contract Schedule: November 22, 1985.

(4) Project No: WIPP-BRF-054-1(2). Location: On NM 4, from the east San Ildefonso Pueblo Boundary—east, including bridge #3461. County: Santa Fe. Length: 2.75 miles. Estimated Cost: $6,442,000. Status of Funds: Project is dual funded, WIPP portion $1,214,979.08 and is obligated. Contract Schedule: December 20, 1985.

As indicated above the WIPP funding has been obligated for three projects (1), (2), & (4) in the amount of $12.1 million dollars. For project (3), the WIPP funding will be requested to be obligated shortly and all the projects are scheduled to be let to contract before the end of the year. In addition, we are enclosing a schedule from the Department's 1985/86 fiscal year Annual Program which shows the WIPP projects scheduled for the following year to utilize the proposed additional $16.2 million dollars requested. Also enclosed for your information, under separate cover, are 37 slides of road section along US 285 and NM 4 which are designated as WIPP routes in New Mexico and which are scheduled to be improved under the WIPP road improvement program with the additional special WIPP federal road funds requested to be authorized.

We wish to express our sincere appreciation for your assistance in obtaining the WIPP road funding for the important needed projects in New Mexico and if any additional information is needed, feel free to call on us.

Sincerely,

L.A. LARRANAGA,
Chief Highway Administrator.

[1] District No. 2 will manage the construction.
[2] Tri-funded project. Also listed in the bridge replacement program and the consolidated primary plan.

Note.—$16,200,000 requested (Federal funds).

Mr. DOMENICI. I told them I had such information. I did not give them the letter as I assumed they had it. Clearly, if we are going to keep the project going as planned, we need fiscal year 1986 funding. I repeat, it is $2.75 million, which I rounded to $3 million, in outlays for fiscal year 1986 that we are talking about.

The budget authority in this bill is below the allocation by $0.5 billion. It is the outlays that are over. My amendment will add $2.75 million to that overage, which is already about $127 million. So I take full credit for adding that much to it, but I think we ought to adopt this amendment.

Frankly, I believe that Senator JOHNSTON has hit it right on the head. If we are going to build a project like this and then not keep the road program to get ready to send trucks safely across this land, I really believe it is foolish.

Mr. BINGAMAN. Mr. President, I am pleased to be a cosponsor of this amendment to continue funding for the improvement of roads leading to the Waste Isolation Pilot Plant [WIPP] near Carlsbad, NM.

The WIPP facility is a research and development project of the U.S. Department of Energy. It is designed for the receipt, handling, and permanent disposal of defense transuranic waste and for the experimental temporary storage of a limited amount of high-level defense waste. This is the only permanent repository for transuranic and low-level waste in the country.

The waste material will be transported to New Mexico on State highways in specially designed containers that minimize the possibility of leakage during a serious transportation accident. To further ensure safe transport of these wastes, it is critical that the roads leading to WIPP be improved to accommodate the increased traffic that is expected once the facility is completed.

This amendment earmarks $2.75 million in outlays and $16.2 million in budget authority for fiscal year 1986. Without this funding, the completion of the project could be unnecessarily delayed. The State highway department would be unable to contract for the needed improvements.

The Congress made a decision in 1979 to authorize the WIPP project and has provided funding since that time. As attorney general of New Mexico in 1981, I negotiated an agreement with the Department of Energy to address specific concerns raised by the State regarding the operation of the facility. The stipulated agreement provided a State review of scientific studies and established a method of consultation, cooperation, and conflict resolution. One of the concerns raised in this agreement was the need for improvements of State roads leading to WIPP. The Congress has recognized this need over the past 2 years by providing funding for these improvements. It is important that the Congress continue to honor the agreement with New Mexico.

The WIPP project is important to our Nation. Therefore, safe transport of wastes to the WIPP facility must be assured. This assurance is possible without highway improvements. I encourage my colleagues to support the amendment.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, in order to focus on the issue before the Senate and to make certain that in no way is this determined on the basis of personality, I would be willing to go ahead and withdraw my request for the yeas and nays if indeed the chairman of the Budget Committee would give the assurance on this floor that from now on the figures used in the budget-appropriations process will be the latest figures that we have at hand.

This is what the Senator from Idaho was referring to, that we should not act on something that is out of date. I could not agree more. That is foolishness. It was foolishness when the Appropriations Committee met because there were many figures both in Senator ANDREWS' subcommittee and mine that were, by evidenced fact, statements of various agencies, out of date. We were told, "Sorry, there is a cutoff date and that is it."

That is the same as the statement of the Senator from New Mexico.

If the Senator from New Mexico will assure us that in this budget process we use some common sense and that we are entitled to use the latest figures rather than figures set as of a certain date and time by the Budget Committee, if we have that assurance, I will withdraw my request for the yeas and nays.

Mr. DOMENICI. I cannot agree to that, I say to my good friend. As I indicated in the committee as a member of the Approrpriations Committee, there are two numbers that are binding on the U.S. Congress through the Committee on Appropriations and they are as follows: $567.1 billion in budget authority and $554.1 billion in outlays. The committee itself has chosen to allocate that money. They are going to be about $400 million in outlays over if we are successful in keeping every bill at the levels allocated by the Appropriations Committee.

What the Senator is asking is that we take the accounts that are estimated in this budget, and I am sure that some are estimated too low and some are estimated too high and reestimate them. Some of the subcommittee chairmen in a desire to have more money available to spend—and I do not criticize them for it, it is a very difficult year—have taken those accounts where the estimating ran in their favor and said, "We are entitled to an adjustment."

I said then, "If you want to go through all of the accounts where they are wrong upward and where they are wrong downward, and if you want to do that every week for all the appropriation accounts, you will tax the capacity of any agency I have ever heard of, including CBO. But if you want the downward reestimates, also take them up. Do it everywhere periodically and take credit for both the pluses and the minuses, and you will have no argument from this Senator."

It is impossible to give only credit when we err the wrong way, in their favor. We have to look through the whole budget and find where they erred the other way. I submit you will probably end up no better or worse off than you are now because many estimates err upward and many err downward in relation to the original estimate. That is the best I can do. I cannot offer any more than that.

Mr. WEICKER. I agree with everything the Senator from New Mexico says, but I am saying apply what he has just said to his own amendment. He cannot have it both ways.

I agree that there would be no end to this process.

All I am saying is the principle that the Senator has now espoused does not exist in the very amendment that he has before this body. That is the only point I make.

Mr. DOMENICI. That is apples and oranges. This is not that kind of account, but if the Senator thinks it is the same, fine. But it is not the same. I have current information, and I furnished it to the Senate. I think we ought to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Missouri [Mr. DANFORTH] and the Senator from Alabama [Mr. DENTON] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from Hawaii [Mr. INOUYE] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 56, nays 40, as follows:

[Rollcall Vote No. 245 Leg.]

YEAS—56

Armstrong	Cranston	Garn
Bentsen	Dodd	Goldwater

Dole	Packwood	

NOT VOTING—4

Danforth	Eagleton
Denton	Inouye

So the amendment (No. 851) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I am advised that there may be just one more amendment on this bill. If that is the case, we may complete action. I know that Senator CHILES and Senator DOMENICI would like to turn to reconciliation.

Is that correct?

Mr. DOMENICI. We are ready.

Mr. DOLE. If we can dispose of that amendment, there will be final action.

Mr. ANDREWS. Mr. President, we know of only one amendment, the Kassebaum amendment.

The PRESIDING OFFICER. The Senator from Kansas.

AMENDMENT NO. 852

Mrs. KASSEBAUM. Mr. President, I send to the desk an amendment on behalf of myself and Senators DOMENICI, CHILES, GORTON, MATSUNAGA, and NICKLES, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas [Mrs. KASSEBAUM], for herself, Mr. DOMENICI, Mr. CHILES, Mr. GORTON, Mr. MATSUNAGA, and Mr. NICKLES, proposes an amendment numbered 852.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

"SEC. . Notwithstanding any other provision of this bill and except as otherwise provided in this section, each dollar amount contained in this Act which is provided for nondefense discretionary programs and activities is hereby reduced 6 per centum; provided that this section shall not apply to the amounts on page 36, line 7, and page 37, line 10; provided further that for purposes of applying the 6 per centum reduction, the amount to be reduced on page 4, line 14 shall be considered to be $1,785,100,000, and the amount to be reduced on page 10, line 12 shall be considered to be $2,714,400,000, and the amount to be reduced on page 31, line 14 shall be considered to be $2,013,000,000; provided further that notwithstanding any other provision of law, the amount available for transit operating assistance, contained in this bill, in fiscal year 1986 shall not exceed $736,000,000."

Mrs. KASSEBAUM. Mr. President, I have enormous respect for the Senator from North Dakota [Mr. ANDREWS], who has had the major responsibility in assigning the priorities of funding for transportation. I know of no more able chairman than Senator ANDREWS, so far as protecting the interests of transportation is concerned.

However, there are concerns with aviation that I feel we have to address in this legislation before it goes to conference, with respect to some reordering of priorities, and I should like to explain briefly what this amendment would do.

The overall effect of it would be to reduce the level of funding in the bill in toto by 1.51 percent. It does shift the funding priorities contained in the bill to lessen the severity of the drastic operating cuts that have been imposed on the Federal Aviation Administration and on the Coast Guard. Those have been about 11-percent cuts.

Specifically, it would restore $138 million, about half of the $300 million that has been cut from the FAA operations, and $93 million, about one-half of the $200 million cut from Coast Guard operations.

Second, it reduces mass transit operating assistance by 10 percent, which is the budget resolution level. It reduces Amtrak by approximately 15 percent instead of 10 percent. This, again, is the budget resolution level. It reduces all accounts in the bill that have not been previously mentioned above by an across-the-board 6 percent.

This is not restoring, as I say, without holding harmless the moneys for FAA or the Coast Guard. I wish we could do that. I do not think it is possible.

I certainly look to the chairman to work his magic in conference, which I know he has done—and which he has said he can do, as a matter of fact—to get the full funding restored; because the safety of our airways and the security of our Coast Guard is paramount, I think, for all Members of this body.

It seems to me irresponsible to just assume, sort of like buying a pig in a poke, that this will be done in conference, without our debating it and addressing it and expressing our concerns on the floor.

It is for this reason, Mr. President, that I believe—even though I wish we could get more and restore the full funding to FAA and the Coast Guard—and this somewhat divides the pain, as has been said. It seems to me that it is a responsible amendment to instruct the Transportation Subcommittee when it goes to conference with the House on this appropriation.

(Mr. GRASSLEY assumed the chair.)

Mr. ANDREWS. Mr. President, I rise in opposition to the amendment, and I do so reluctantly, because the Senator from Kansas has exactly the same objectives that I have and, I am sure, that the vast majority of Senators have. Unfortunately, we cannot have it both ways.

The problem, as we have been talking about all day, is that a missile, in the midst of the night, came at us, called the conference report on the budget resolution; and it said that we should cut some $800 million from this function. We asked for relief, giving some new figures we had from the various entities, and we were denied the relief that would have given us an additional $88 million or $89 million, by the chairman of the Budget Committee, who said, "You can't use new figures." That is why we had the test case in the vote earlier. I guess you can use new figures in the right place, at the right time.

This amendment restores funding for Coast Guard operations and Federal Aviation Administration operations. That is laudable and very desirable, highly necessary, and something we have to do. But the amendment is curious at best because, while it purports to make whole these two accounts and at the same time stay within the budget resolution, there is no way we can make whole these two accounts and stay within the budget resolution, given the budget resolution's directive to remove these massive amounts of dollars from this particular subcommittee's bill.

I do not know who is trying to fool whom, but the amendment falls far short of its objective. After adding funds for the Coast Guard and FAA, the amendment then reduces all transportation accounts by a certain percentage. The effect of this percentage cut, therefore, reduces the Coast Guard and FAA by half the amount previously restored, as the Senator from Kansas pointed out.

It is sort of a half a loaf. The amendment at best I guess could be described as half a loaf. Probably that is better than no loaf at all.

But before Senators vote on this amendment and congratulate themselves on restoring Coast Guard and

FAA, let me point out the costs associated with that action.

The Coast Guard operations, which just had $200 million restored, would then get cut almost $100 million by the across-the-board provision. In addition, the Coast Guard acquisition and procurement account would get cut $18 million, reserve training would get cut $4 million and research $1 million.

I would hope, Mr. President, that those legislative assistants who are tuned in back in the office would be taking down some of these figures to advise Senators before they come to the floor and vote because these are some pretty critical cuts we are talking about.

The Federal Aviation Administration would have $300 million restored in operations and then have that very same activity cut $170 million. In addition, the across-the-board provision reduces facilities and equipment by $64 million, the grants-in-aid to airports by $60 million, the research activities by $12 million and the local Washington airports which, God knows, are in a terrible way by another $2 million, and they are already $2 million below the President's request.

As to the Federal-Aid Highway Program, and let me state this clearly and concisely so everyone will understand it, if this amendment passes an additional $800 million will be taken out of the Federal-Aid Highway Program, down to an obligation ceiling of approximately $12 billion. This is a $2.5 billion cut from current law in highway construction. That is what Senators are voting for in the highway area.

In the transit area, Senators are voting for a 16-percent cut in operating assistance and a 22.5-percent cut in the Small Urban and Rural Transportation Section 18 Program, the one program in mass transit designed to provide rural citizens with mobility and access, access often to health care and social services that is often more accessible in large metropolitan areas.

In addition, this amendment reduces the interstate substitute program by an additional $12 million, a program that is already $12 million below the budget resolution assumption. And the local transit system, WMATA, which I know is fairly dear to the Senators from this area, certainly to the press that works in this area and the people who live in this area, is reduced an additional $10 million or 30 percent below last year's funding.

The cut in Amtrak amounts to more than what this body agreed to in its vote on the Specter amendment that reduced Amtrak by 10 percent, and that was just revisited in an overwhelming vote earlier today. This amendment would cut Amtrak by almost 20 percent in new funding. A cut of this magnitude would jeopardize the continuation of a national rail system. We are not talking about service reductions or frequency reductions but possible train reductions. If this is the will of the Senate fine, but I think Members should know that when they cast their votes.

Senators from the Budget Committee—and I guess I am one but I was not on this conference and I looked at that conference that came back and saw some of the fallacies in it and I voted against that conference report—keep saying that the Appropriations Committee has the ability to make program decisions within the total allocation. They continue the logic to say that budget conferences do not dictate the amounts for specific programs.

That is true I guess in one sense. But I would like to get back to the point I made in my opening statement: We really today have a truth in budgeting problem here. We have a bill that we are considering today with 10 billion dollars' worth of total budget authority. To make an $800 million unspecified cut in a bill like this is extremely difficult. In order to get $85 million in budget outlay reduction we had to cut $500 million from the road-building program in this Nation, a program that is desperately needed. We cut another $800 million to come up with this percentage cut that the Senator offers in this, but an additional $800 million in highway building appropriations is a pretty severe cut.

I think that we should restate the reason FAA and Coast Guard cuts were necessary in the first place. It is because the budget conference said Amtrak is cut 15 percent, transit formula is cut 15 percent, transit capital is frozen, highway spending is frozen. That, Mr. President, is what that wonderful document that came back onto this floor from that budget conference said.

The reported bill we are now considering meets or cuts deeper than all of these assumptions of the budget resolution. So what is the problem?

The problem comes with the Budget Committee ordering further unspecified savings of almost $800 million in budget authority and $500 million in outlays. There are only two accounts where that kind of money can be found. So FAA and Coast Guard were cut in the committee by a vote of 16 to 3, a cut that was not appreciated by anyone.

I welcome any other Senator, however, to propose another way to find $500 million. I can give some suggestions.

Cut transit by 20 percent; legislate a change in the law for transit operating subsidies; cut, as we are going to in this amendment, Amtrak by 20 percent which, as I pointed out, means train discontinuance; and practically eliminate all transit capital funding.

Senators might ask why do I not propose this. We do not have that much transit in North Dakota. We do not need transit operating subsidies. I am not proposing it because it is not the right way to legislate. These were not the votes and overall assumptions of the budget resolution. I suggest that cuts that deep do not have the votes now.

The only other way is what I think of as the easy way out, propose a 5.4- to 6.4-percent cut and ignore the distorted effect on the program that that implies.

I saw what happened with the votes on the HUD appropriation last week. Members increased revenue sharing and veterans' medical care, only to come back and cut the entire bill across the board.

That is wrong. That misleads the public. That is why I pointed out some of these figures so that everyone would know what they are voting on.

A vote for the Kassebaum amendment is equally wrong. I think we have to have some truth in budgeting. I think we have to admit that the budget resolution was flawed. That is the key thing. I think we should either make the hard, specific deep cuts and own up to them, or add the FAA and Coast Guard money back and tell the Budget Committee to rewrite their resolution. There are the hard choices.

It would be my hope, Mr. President, that by leaving the bill as is, by rejecting this amendment, we then come within the purview of the Budget Committee. We have cut all of these other programs where the Budget Committee said to cut them to the degree they said to cut them. We have said that the only way in this bill that you are going to cut the $800 million that they said to find is to do it in FAA, Coast Guard, highway construction or some of these other things.

The amendment of the Senator from Kansas spreads the burden and I guess really when you look at it with a need for FAA funding and the need for Coast Guard funding that certainly is as important as the need for highway construction and the need for mass transit. But I would like to keep this concentrated on these two areas. Maybe as this bill moves to conference someone finally is going to wake up with some authority on the Budget Committee and say we goofed and that these are totally irresponsible cuts. The Budget Committee must find some money to replace that which this subcommittee is forced to cut, because the Appropriations Subcommittee has very limited sources to make up the cuts.

This bill before the $500 million cut in FAA and Coast Guard is, I submit, Mr. President, $300 million below the bill total as it comes from the House of Representatives. We have done a

conscientious job of addressing the issue, trying to stay within the concept and the goal of budget restraint, but there is no magic in the appropriations process and there is no magic in saying that we should cut this drastically in FAA or Coast Guard, and there is equally no magic or good sense in making these kinds of cuts in highway construction and the other funds that the amendment of the Senator from Kansas would force.

I think if we keep the misery in two categories instead of spreading it out maybe somehow or another the happy bird of truth will fly in through the window and those who lead the Budget Committee will realize that that document that came at us in the middle of the night was something that should have hung on a peg someplace out there and never seen the light of day.

I hope our colleagues, Mr. President, will reject this amendment, although I totally agree with the Senator from Kansas in saying that we have to address the issue of FAA and the Coast Guard.

I might also point out that the amendment of the Senator from Kansas exempts the Panama Canal, and I do not really know why. I would like to see if the Senator from Kansas could share some light on that.

Mrs. KASSEBAUM. Mr. President, I would like to respond just a moment to the Senator from North Dakota regarding confining the misery to two areas. I am not pleased with this amendment. I doubt if anybody here thinks it is the answer.

On the other hand, the Senator from North Dakota has pointed out exactly what he has done, I believe, in a very astute manner in protecting all of the other interests addressed in transportation, because he knows that in conference the FAA and the Coast Guard will be the ones that clearly everyone would feel should be fully restored. So that is guaranteed. I can appreciate his thinking as far as what he would hope to accomplish, because then he has protected, as a matter of fact, all of the other interests which could be very controversial and has assured that support.

What I question is, if, in conference, with the restoration of funding for FAA and Coast Guard, there will be any effort to get any sort of reasonable reductions which are going to be supported by the administration. I think it risks a veto and I do not think we can count on a supplemental. And that is why I think it is not responsible of us, as a matter of fact, at this point to argue some of the changes of the priorities that I think should be addressed.

Mr. ANDREWS. Might I respond to that, Mr. President, if we have a recorded vote in the Senate that at first fixes the cuts by restoring and then takes away, we are stuck with the lower figure of a $150 million reduction in FAA and a $100 million reduction in Coast Guard, because we have to live up to that Senate vote. Remember this bill came out of the subcommittee with full funding for the Coast Guard and full funding for the FAA. We adopted this amendment under duress in the committee to gain time for the Budget Committee to make the necessary adjustments to do this. If we can carry the bill that way to conference, we are in a much better position to protect the FAA and Coast Guard than if we have a recorded vote to cut $150 million, which is what it amounts to, from the FAA and $100 million from the Coast Guard.

Mrs. KASSEBAUM. I believe clearly, Mr. President, what this amendment does is say there is strong support here for funding for the FAA and the Coast Guard and that most of us who are concerned simply cannot let it go off the Senate floor without having at least tried to get back, as the Senator says, half a loaf. And in the hopes—and, obviously, I think the Senator from North Dakota would agree with me—that in conference the additional funds will be restored. It is desired by the administration. It is necessary for all of us who are concerned about the additional requirements for aviation safety today or the security of the Coast Guard.

Mr. ANDREWS. Mr. President, in response to the Senator from Kansas, this amendment does not give the sense of the Senate that the most important features in transportation are the FAA and the Coast Guard. This amendment, as it is laid out before the Senate, would establish the priority that the most important transportation function is the Panama Canal because the Panama Canal is exempted. This amendment attacks highway building, mass transit, operating subsidies, cuts FAA, and cuts the Coast Guard, but holds harmless the Panama Canal. So, if you are a boat skipper from Liberia, you are doing darn well, but if you have to move around these United States, I suggest you have a problem.

Mrs. KASSEBAUM. If I may answer the Panama Canal issue, it is exempt because of the fact that they receive funds by the canal operations. These are appropriated. Any difference between the amount raised and the amount appropriated would have to go to Panama. It is not a deficit reduction.

Mr. ANDREWS. It is still part of the budget outlay and the budget authority figures in this bill. And the Senator from Kansas makes the precise point that I had hoped she would when I asked about the Panama Canal, because what she has now spoken to in front of the Senate is the unique characteristic of this bill and why an "$800-million, go-find-it" type mandate from the Budget Committee in this particular bill raises havoc all over the place. There is no place you can find $800 million. And I am not standing up to support mass transit funding from a parochial standpoint. We recieve very little in North Dakota. I am not trying to protect the Coast Guard because, unfortunately, there is not too much Coast Guard in North Dakota.

But these functions in this bill are important for the continuation of the transportation function in this Nation. I think they ought to be protected. I think what we ought to be addressing on this floor is a way we get relief from this onerous, odious, odorous, whatever you want to call it, budget resolution that we are stuck with. Because I do not like the things that we had to do to the FAA and the Coast Guard, but, equally, I am concerned about this amendment cutting $800 million from highway construction, which is desperately needed in the Plains States that the Senator from Kansas and the Senator from North Dakota come from.

Mr. SYMMS. Will the Senator yield?

Mr. ANDREWS. Yes, I yield to the Senator from Idaho.

Mr. SYMMS. I would say to the Senator that as soon as this Senator gets the floor, it is my intention to offer an amendment to take the highway reduction out of this Kassebaum amendment. I think we have already reduced the highway program sufficiently, and the money is in the trust fund anyway.

Mr. ANDREWS. Might I respond to the Senator that I understand why he wants to do that. But then the only way, if he holds harmless that additional $800 million in cuts from the highway construction, is to take more money out of mass transit, Amtrak, the Coast Guard, and the FAA. It is the problem we are faced with. The one answer to the problem we are debating today on the Senate floor is to get relief from that wrong-headed budget resolution assumption that somehow or other we can find another $800 million worth of savings in this bill.

IN SUPPORT OF THE COAST GUARD, THE STEPCHILD OF THE ARMED SERVICES

Mr. MATSUNAGA. Mr. President, as a cosponsor, I rise in strong support of the Kassebaum amendment, particularly as it pertains to the Coast Guard.

Mr. President, the U.S. Coast Guard has had a long and distinguished history which dates from our Nation's earliest days. An armed service since its inception, it has served in every armed conflict of this country since 1792.

Although the Coast Guard has distinguished itself time and time again in its military assignments, this service

plays a considerable and impressive role in other critical activities which benefit not only the coastal States, but the Nation as a whole.

According to its motto, the Coast Guard is always prepared for a multitude of missions which strain its thinly spread resources. A nationwide search and rescue system is credited with saving an estimated 4,000 lives annually; other duties include providing navigational aids such as light houses and ice-breaking service, marine safety programs, and environmental protection. As seagoing police, this service enforces laws and international treaties concerning fisheries, interdicts the shipment of illegal drugs, and act to prevent vessel highjacking and illegal immigration. Given the magnitude of these tasks, the Coast Guard should not be treated as a stepchild but as a full-fledged member of this Nation's military family.

An issue of the Coast Guard's service which I find most pressing is that of their strong drug enforcement activities. While the administration and the Appropriations Committee have correctly put some fiscal priority on combating the ever-increasing menace of drug abuse and the illegal trade which feeds it in our society, the role of the Coast Guard in this critical battle of curbing drug smuggling by water has been sorely neglected. The trespass of drug smugglers must be obstructed at our seashores and the Coast Guard represents the Nation's first line of defense. While the Senate Appropriation's Committee allocates $3 million more than the House has, the move is largely illusory since the appropriation's language calls for more work. The report suggests that the Coast Guard should continue its fine job and in addition, increase the drug interdiction programs, while at the same time the committee decreases the total operating budget by $200 million. This is, at best, a contradiction. The key role that the Coast Guard plays in drug interdiction alone certainly warrants greater budgetary emphasis.

Certainly, among the armed services, what the Coast Guard lacks in size it makes up for in the range of its missions. It is the one branch that has very few expensive missions yet its multiple missions run a gamut of services. It is evident to me, Mr. President, that the Coast Guard is too small and undermanned in its present position to perform the multitude of tasks assigned it.

In addition, it is the one branch of the armed services to which our country has recently assigned new and important missions, such as the maritime defense zone exercises conducted jointly with the Navy, in which a forward projection strategy has been implemented in order to assure the coastal defense of our country. Yet it is the only branch to receive across-the-board budget cuts.

Mr. President, a $200 million reduction in the operating expenses of the Coast Guard would cause a loss of over 6,000 personnel, consequently decommissioning and a closing or curtailment of more than 200 units with repercussions in almost all of the States and territories in which the Coast Guard operates. More specifically, 25 percent of the total air fleet would be grounded, merchant marine safety units would be diminished by 47 percent, and many of the navigation aids I referred to earlier will be seriously affected. As a result of these cutbacks the 60,000 rescue, search, and response missions the Coast Guard conducts annually will be reduced by at least 4,000 nationwide; helicopter shipboard deployment will be curtailed by 75 percent. Domestic ice-breaking capabilities will be diminished by 72 percent. The budget cuts also will drastically curtail the environmental response capability on inland waters other than coastal areas. Finally, such a reduction is certain to cause serious morale problems which will adversely affect the Coast Guard's national recruiting capabilities.

Mr. President, I implore my colleagues to seriously consider the benefits that an efficiently run and well-staffed Coast Guard provides, both at the national as well as international level. In light of these benefits I urge the support of my colleagues to adopt the pending Kassebaum amendment.

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President I rise in opposition to the amendment offered by the Senator from Kansas.

My former colleagues on the Commerce Committee would restore funds to this bill cut—and very reluctantly cut—by the Appropriations Committee. But, the amendment restores funds for the FAA and the Coast Guard—both very, very worthwhile agencies, and I cannot disagree at all with the comments made by my colleague from Hawaii about the value of a strong Coast Guard operation. That is true also of the FAA. But these funds are going to be restored by taking them from other essential services from many parts of the country from Amtrak and mass transit, and in addition imposing an across-the-board cut.

Mr. President, there are few accounts in the Transportation appropriations bill which can be reduced without doing some damage to my State. New Jersey is known as the Garden State; it could as easily be referred to as the transportation State. We have the Nation's fastest growing airport at Newark, an extensive coastline, miles upon miles of highways, freight and passenger rail lines, and a heavy dependence on mass transit. In addition, New Jersey is a leader in auto safety and the campaign against drunk driving. Indeed, New Jersey has a stake in almost every line of this bill.

It was with no enthusiasm that this Senator or, I might add, the capable subcommittee chairman, Senator ANDREWS, moved to bring this bill into line with the restrictions applied by an unrealistic budget resolution. It was clear to me that when the transportation numbers came back from the budget conference below the amounts specified in either the House or Senate budget resolutions, that it would be impossible for the Subcommittee on Transportation to provide the resources necessary to meet national needs.

If the Senator from Kansas wants to add back money to insure adequate resources to FAA and Coast Guard, I will vote with her. But, if she wants to take these funds from other vital programs that were cut back in committee, I oppose her.

We were instructed by the budget resolution to cut mass transit—and we cut mass transit. In fact, we cut mass transit deeper than called for by the budget resolution.

We were instructed to cut Amtrak—and we cut Amtrak.

We were instructed to cut highways—and we cut highways.

We made the cuts we were expected to make. The bill before the Senate is a resonable product produced under very trying circumstances.

Mr. President, there is a clear need for more funding for FAA and the Coast Guard. I want to provide more, the subcommittee wants to provide more. But if we had brought this bill to the floor with these funds, we would have been faced with an amendment to reduce this entire bill. So, as a committee, we went back and made cuts to comply with the budget resolution, but we are still facing the same situation with the amendment offered by the Senator from Kansas. This amendment proposes to solve the problem by going after other programs.

In the committee report, Mr. President, the committee comments on the FAA problem. Many of us now believe we need more air traffic controllers. Secretary Dole says she wants more air traffic controllers. Unfortunately, as the committee report notes, we do not know how many controllers the FAA currently employs. Administrator Engen says he has all he needs, 14,306. The Secretary says FAA has 14,000. I think they need more than 14,306 and so do all those folks sitting on runways waiting and waiting to take off. The

trip from Washington to the New York area which is about 200 miles often takes 3 to 4 hours. I know. I have tried it.

The subcommittee will be examining the FAA's resources in the air traffic control and other areas in the near future. I have no doubt that we will recommend a supplemental to adequately fund the FAA Program when we have a clear idea of what FAA has and what it needs.

The Coast Guard has a list around the Senate specifying the consequences of the reductions made by the Appropriations Committee. New Jersey is on that list. A supplemental appropriation is going to be necessary for the Coast Guard too.

Mr. President, the bottom line is that the Coast Guard and the FAA need more money than the budget resolution allows. The Senate has several options to deal with this reality.

The Senate can approve this bill, as reported by the Appropriations Committee and defended by the chairman of the Transportation Subcommittee, and take the bill to conference with the House. The House is higher than the Senate in both the Coast Guard and FAA accounts. The conference committee can discuss these differences and negotiate with the administration to determine what the President will sign. I strongly favor this option.

The Senate can add back the funds reduced by the Appropriations Committee, when it considered the recommendations of the Subcommittee on Transportation. By doing so, the Senate would acknowledge that the budget resolution shortchanged transportation. It would acknowledge that Congress' first allegiance is to meet national needs for safe air travel and secure coastlines. It would recognize that we have to make some adjustments for real world conditions, like the air disaster in Dallas. Sooner or later, we will have to address the needs of the Coast Guard and FAA.

The last option before the Senate is the Kassebaum amendment. This amendment restores funding for the FAA and the Coast Guard by taking it from other accounts, accounts which have already been reduced under the committee-reported bill. The fatal flaw of this amendment is that it is grossly unfair.

The Subcommittee on Transportation labored, under the leadership of my friend from North Dakota, Senator ANDREWS, to produce a bill that was responsible in meeting national needs and is fair to all sections of the country. The subcommittee's work underscores one basic fact—this is a big country, with diverse needs and different modes of transportation affect various parts of the Nation differently. The committee bill tries to serve a national transportation network by treating all modes fairly.

As a former member of the Commerce Committee, I recall the eloquent pleas of the Senators from rural States for essential air service, so that small communities in their States would not be cut off from air service. It so happens that my State is not greatly affected by the essential air service program, but this Senator has never moved to kill that program. I happen to believe that the Nation is not well served by cutting off small rural communities from a national aviation system. If I only voted on what was in this bill for New Jersey, I would vote to cut that program. I would observe, Mr. President, that there are two programs in this bill protected from across-the-board cuts—the Essential Air Service Program is one of them.

The bill before us provides $398 million for the construction of new mass transit systems, $9 million more than the House bill. These new systems, which the administration hotly opposes, are funded at $9 million more than the House bill. New Jersey is not on the list. We have Houston at $10.5 million more than the House; St. Louis at twice as much as the House and Miami—among others—at $4 million more than the House. These are funds that come from the Highway Trust Fund mass transit account. These are protected by a trust fund.

I happen to favor expanding mass transit to urban communities which are beginning to have the problems of traffic congestion we have long had in New Jersey. But, if I was only voting on what was in this bill for my State, I would have to oppose funding these new starts.

When and if the day comes that Senators come to the floor to vote on legislation based solely on what is in it for their State, we will have come to a very sad day indeed. If Senators ask why their State should support mass transit for New Jersey and why I should support essential air service for Alaska, I answer: "That is why we call it the United States."

No, Mr. President, the amendment before the Senate is not fair and it is not a responsible way for the Senate to legislate in the national interest. I strongly urge the defeat of this amendment.

AMENDMENT NO. 853 TO AMENDMENT NO. 852

(Purpose: To conform the bill with the Second Concurrent Resolution on the Budget for Fiscal Year 1986)

Mr. SYMMS. Mr. President, I call up my amendment to the Kassebaum amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho [Mr. SYMMS] proposes an amendment numbered 853 to amendment No. 852.

Amendment number 852 is amended by striking "6.0" and inserting in lieu thereof "7.9"; and by adding at the end thereof the following:

"The obligation limitation for Federal-Aid Highways and Highway safety construction programs for Fiscal Year 1986 shall remain at $12,750,000,000."

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, I believe the Senator from New Jersey made a particularly important point at the conclusion of his remarks when he stated that Members to the greatest extent possible should deal with appropriations bills of this nature and amendments like that of the distinguished Senator from Kansas not on the basis of parochial considerations but on the basis of what is best for the United States as a whole.

Yet I come to precisely the opposite conclusion to that reached by the Senator from New Jersey with respect to the principal amendment which is before us at the present time.

In my view it would be difficult to find any subject in the field of transportation more important than the Coast Guard of the United States or than the functions of the Federal Aviation Administration, which are primarily directed at air traffic safety.

I have the highest respect for the chairman and for all of the members of the subcommittee who were faced with intensely difficult choices in meeting the goals set out for them by our debate on the budget resolution during the course of the spring and summer of this year.

At the same time, Mr. President, I must disagree with a method of operation pursuant to which the lion's share of the reductions required by resubmission of this bill to the Appropriations Committee came out of two agencies which are so imminently concerned with the national safety and welfare.

I do not like the idea of cutting back on any of these other proposals, and yet it seems to me that to cut so sharply out of the appropriations for the Coast Guard and for the Federal Aviation Administration may be the worst of all possible choices.

This morning, for example, Mr. President, we voted on an amendment proposed by the distinguished Senator from Colorado [Mr. ARMSTRONG] which would have resulted in lowering this appropriation by some $600 million by terminating the subsidy for Amtrak. Having taken part in the work and the compromises which led to reduced appropriations for Amtrak, I felt it appropriate to vote against that amendment, in favor of the position of the manager of this bill.

And yet, Mr. President, I say most sincerely that if I had only the choice between adequate funding for the

Coast Guard and for the Federal Aviation Administration, which are vital to this country, and a subsidy for rail passenger service, I would unhesitatingly vote to terminate that subsidy for rail passenger service and see to it that we adequately supported the FAA and the Coast Guard.

I do not believe we have to make that choice if we are willing to say first the basic appropriation to these two agencies is restored and then every transportation agency takes an equitable reduction, which will be difficult for each of those agencies but possible for them to live with.

For that reason, I support the amendment of the Senator from Kansas. I oppose the second-degree amendment of my friend from Idaho simply because it would make those across-the-board cuts too great.

I agree with him on the importance of the highway trust fund. I think it is very significant. I believe that committees which have dealt with that trust fund have already operated responsibly in their cuts to it.

Nevertheless, I feel that these two agencies selected out of all the others for this huge cut deserve restoration and from that point on we should look for roughly equal reductions in everything else to pay for these restorations.

For that reason, I oppose the second-degree amendment of my friend from Idaho and strongly and enthusiastically support the amendment of the distinguished Senator from Kansas [Mrs. KASSEBAUM].

Mr. SYMMS. Mr. President, I ask unanimous consent that the Senator from North Dakota, Senator BURDICK, be added as a cosponsor to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, my amendment exempts the highway trust fund obligation ceiling from cuts made in the Kassebaum amendment. I would say to my colleague that this exemption is absolutely necessary if we are to distribute the funds equitably under this appropriations bill.

Mr. President, I want to outline the history of this amendment. The budget resolution assumed a reduction in the fiscal year 1986 obligation ceiling from $14.45 billion, which was set in the Surface Transporation Act in 1982, down to $13.52 billion. The reconciliation instructions to the Committee on Environment and Public Works incorporated, and were limited to, these reductions. I compliment the Public Works Committee; it was very, very conscientious with regard to the need to reduce general funding. When we met, and we were one of the first committees to meet, we included spending for the trust fund accounts. The fact is we voted to reduce the obligation ceiling for 1986 by $500 million more than was required by the budget resolution.

That is, rather than simply setting the obligation ceiling at $13.25 billion as was required by the resolution, we reduced the ceiling another $500 million down to $12.75 billion.

We adopted this spending limitation knowing good and well that it is far less money than is necessary to meet the Nation's tremendous highway needs. I know of no other program where the public benefits more, which offers more opportunity and individual freedom for Americans, than the highway program. We must have a good road system, a safe, adequate road system, a system that is also adequate for transporting products from the farms and mines and forests to the Nation's cities where they are consumed.

So I think it definitely is not a wise, prudent use of the taxpayers' money to reduce this highway program by another 5 or 6 percent, as the amendment of the Senator from Kansas would do. What I am saying, Mr. President, is the highway program has already taken far more than its share of the cuts. If we accept the Kassebaum amendment as offered, the Senate would be voting to reduce the highway obligational authority 11.8 percent from the level we anticipated when we enacted the Surface Transporation Assistance Act in 1982 and nearly 9.9 percent from the level assumed in the budget resolution.

I think this is a far bigger burden than we should put on our highway program. The highway users are paying those taxes. If we do this, we should reduce the Federal fuel users' fee by a couple of cents a gallon during this period, so people will not be paying highway taxes which are not spent to construct and repair the Nation's highways. I think it is the wrong way for us to operate. I think it represents an unreasonable and unwarranted threat to our Nation's economy.

It is not going to be good for our system of national defense to allow our road system to become worn out, to disintegrate. We have bad enough problems as it is. Experts who study highway conditions state that we need somewhere between $18 billion and $34 billion a year to adequately fund the highway system so we are not wearing out the roads faster than we are taking care of them and actually losing ground. We are not anywhere near that level and here we are talking about cutting more.

Highway taxes are collected to build and maintain highways. If they are left unspent, it is going to mean less highway maintenance in the country. That is a never-ending proposition. When we get behind on that, it gets more expensive next year and more expensive the following year. We should not take more money out of one of the very few programs in the Federal budget that is paid for in advance—when people buy their fuel and pay their taxes, they are paying for next year's highway projects. The money goes into the trust fund, those programs are authorized, money is appropriated, it goes out to the State departments of transportation and the people in the respective States benefit from new and better highways.

Bad roads cost lives, they add to medical expenses due to increased accidents, they add to the time we must spend traveling, and they increase maintenance costs on automobiles. I urge my colleagues to support my perfecting amendment.

I appreciate what the Senator from Kansas is trying to do, but I think if we cut that highway trust fund, we are only robbing Peter to pay Paul. In the long run, it will damage the road system in this country. The worst thing we can do is have an on-again-off-again program. What we need is a steady, even flow of appropriated funds that go out to the States to keep the highway contracts going, so the maintenance, reconstruction, rehabilitation moneys are out there in the States. We are losing ground anyway. I hope my amendment will be favorably looked upon by my colleagues. I hope they can accept this amendment.

Mr. President, I would ask if the Senator from Kansas wishes to accept the amendment and make it part of her amendment?

Mr. BURDICK. Mr. President, I am in support of the Symms amendment to restore the highway obligation limitation ceiling to $12.75 billion for fiscal year 1986. The Senate Environment and Public Works Committee has already met its reconciliation target. In fact, it came under the target by further reducing the Highway Program's outlays for a 3-year savings of $3 billion. The committee's reduced the obligation ceiling by $500 million which will result in a savings of outlays for the highway program by $250 million in fiscal year 1986, $1.2 billion in fiscal year 1987; and by $1.55 billion in fiscal year 1988.

The Highway Program cannot withstand further cuts in the obligation limitation ceiling. The Public Works Committee's recommendation of $12.75 billion for fiscal year 1986 is already $1.7 billion below the ceiling recommended in the 1982 Surface Transportation Act. The Kassebaum amendment would reduce the Public Works Committee's recommendation by an additional $765 million and bring it down to $11.98 billion for fiscal year 1986. That is, $2.5 billion less than what the current Highway Program recommends.

I would encourage my colleagues not to lose sight of the Federal commit-

ment we have made to State Highway agencies by establishing a trust fund supported totally by dedicated user fees. The Federal Government established a multiyear program because of the necessity for long-term planning, design, and construction period required for major projects. Most Federal programs are subject to an annual review by the appropriations process. However, because the highway funds are apportioned and available to States over several years, a different mechanism is used to control the Highway Program to respond to fluctuating fiscal situations and prevailing economic policy. That mechanism is the obligation limitation ceiling. The ceiling does not reduce the total authorization of funds nor specify which projects receive funds. Rather each State is assigned a dollar amount it can spend in a given year based on its apportionment and total dollars available nationally. The decision on what projects should receive funds is left up to each State.

Every time Congress reduces the obligation limitation States are forced to drop projects from their bid lettings. Under the Kassebaum amendment, States will have $2.5 billion less to spend on projects than they were promised in the current Highway Program. Many States are not comfortable with the $1.7 billion reduction already agreed upon by the Public Works Committee but the $2.5 billion reduction is almost certain to result in unfavorable comments by State highway agencies and the highway industry.

As the ranking minority member of the Public Works Transportation Subcommittee, I have voted in committee against further reductions in the obligation limitation. While I recognize that the highway trust fund is part of the unified budget and therefore has an impact on the Federal budget, it is unfair that Congress has relied on trust funds to do more than their fair share to control Federal spending. Reduction of the obligation limitation ceiling merely postpones highway spending, it does not relieve the Federal obligation to pay States in the future. Someday soon the consequences of postponing highway spending will catch up to Congress.

In closing, I would like to add that unfair use of the dedicated highway user trust fund to bail out other items in the budget, which have not taken their fair share of cuts to reduce outlays, makes it harder to justify need for a nation Highway Program. Congress raised the gas tax by a nickel and it should out of fairness allow States access to this revenue. I would encourage my colleagues to restore the obligation limitation ceiling to $12.75 billion as proposed by Senator SYMMS.

Mrs. KASSEBAUM. Mr. President, I say to the distinguished Senator from Idaho that I share his concern about trust funds. We have discussed the fact that we wished both the highway trust fund and the aviation trust fund could be moved off budget because indeed, it is frequently held hostage in these budget considerations. But that is not the issue before us at the moment. For that reason, I cannot accept this amendment because I think it is patently unfair.

I think as we analyze what it would do to the whole transportation appropriation, we have to recognize that it will cut 7.9 percent across the board for everything except the Federal-aid Highway Program, Federal-aid highway moneys. What it would do, as a matter of fact, is cut the $138 million that we have in FAA to only $87 million. We have gone from bad to worse, in my opinion, in that area.

Mr. SYMMS. If the Senator will yield for a comment, I appreciate what she is saying, but I would turn the question around and ask, What is fair about asking people to pay highway users' fees every time they buy a gallon of gas and then holding the funds hostage in a trust fund in order to make the entire Federal budget look better in an accounting procedure? I am trying to keep the accounting straight on highway funds vis-a-vis the highway users' fee. I do not think it is in order to offer a reduction in the Federal highway tax here, but if we are not going to spend these moneys out of the trust fund, this Senator is going to be in favor of reducing highway user fees and let the States take care of it.

Mrs. KASSEBAUM. I would only suggest that at some point, perhaps in conference, the levels in the trust fund are going to have to be addressed. I also think we have a responsibility here to send a package that has some priorities that are more realistic about what will ultimately be the result.

Mr. CHILES. Mr. President, will the Senator from Kansas yield?

Mrs. KASSEBAUM. I would be happy to yield.

Mr. CHILES. The way I understand it, the highest figure for the highway trust fund we have received so far is $13.250 billion. That was last year. In the bill we now have $12.750 billion. That is what the Senator from Idaho would leave it at, the $12.750 billion. So it means then only highways would be reduced from the $13.250 billion to the $12.750 billion, around a 3-percent figure.

Then, if the amendment were adopted after his amendment taking that out, Amtrak would be cut over 15 percent, mass transit would be cut over 15 percent. Coast Guard would be cut almost 7 percent, FAA almost 7 percent.

Certainly, highway authorization is very important in my State. But when you rank it with these others, I do not know if you can justify that you made a fair apportionment and cut FAA and Coast Guard well over 6 percent, almost 7 percent, and then cut Amtrak 15 percent, transit 15 percent, and 4 percent——

Mr. SYMMS. Will the Senator yield?

Mr. ANDREWS. And those cuts are in addition to the cuts that have already been made.

Mr. CHILES. Absolutely.

Mr. ANDREWS. We have already made the cuts to bring us into compliance with the budget resolution. Mr. President, what the Senator from Florida is pointing out is that we would have far more than the cut of 15 percent in Amtrak, maybe as high as 20 percent in Amtrak, and similar other cuts.

Mr. SYMMS. If the Senator from Florida will yield so I can comment, what happened was that the committee went a half-billion dollars more than they should have. If we had left it at $13.25 billion, what the budget resolution called for, then if you came in with your across-the-board cut we would be back at $12.75 billion. I am not trying to speak for or against other areas in this resolution but only to say if we do this we are doing serious damage to the Federal Highway Program and I do not believe that is what the Senate wants to do. That is my point.

Mr. CHILES. I would say to the Senator from Idaho, any of these cuts do some damage to all of these programs. A 6-percent cut in the Coast Guard does very serious damage. Compared to an 11-percent cut, you just have to say it is less. And the other problem is that if we take out the highway authorization, then we go to 7.9 percent across-the-board cuts in all of these other areas, and that again gets us into a situation where someone can say, "Well, let's just take the Coast Guard out entirely now and let the others go up to 10 percent or whatever."

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I hope that we could get to a vote and defeat both the Symms amendment and the Kassebaum amendment. I think the problem is very simple in relation to both and that is that, one by one, everybody comes in and tries to undo the very careful work of the committee, the Appropriations Subcommittee on Transportation, where indeed, as my good friend from Florida has already stated, it was not a question as to whether or not anybody was going to get hurt; it was a question of trying to do it in the fairest possible way.

Now we are all going to come out here and specially plead. Some of the rural States want this, others in the

urban States want that. I am sure that Senator CHILES, Senator ANDREWS, and their committee took into consideration all the needs. What worries me about the process being introduced by this amendment on the Senate floor is, you are balkanizing this country. I do not have that much interest, for example, in the agriculture bill in the State of Connecticut. But I sure have a great interest in transportation. And you are really hurting the State of Connecticut with this kind of an amendment. This does not mean to say that in any way the urban needs have been over-balanced in what it is the subcommittee has done.

A lot of people have some very short memories on this floor. This Nation almost had no rail transportation system at all when I first came to the Senate in 1970. The system, from one end to the other, from the East to the West and everything in between, had been bankrupted by private industry. They had raped it, taken the money, and run. And one by one, we had to rebuild it at the State level and rebuild it at the national level. Is there anybody who is going to deny that an economically advanced nation needs a good, solid rail system, both passenger and freight, if indeed it is to maintain its economic viability and greatness?

Everybody complains about the drug traffic. That is a great one for all of us to go back with to our constituents—"I am against drugs." While there are really two principal agencies fighting drug traffic, the Coast Guard takes second place to no one. If you want to stop drug traffic, you better go ahead and have the Coast Guard do that job.

Last night, I sat and watched the special news report on Channel 5 about the air traffic control system and the FAA—the report on safety in the skies really scared me. There is a real problem there.

What my friends on the Appropriations Subcommittee have done is to dig into this. This is their work. This is really the entire work in the main for any of us who chair one of these subcommittees—to try to balance out these needs against the various appropriations to be recommended within the context of this reduced budget.

Now everybody comes along and has a better idea. Well, I like to think that the subcommittee has done a mighty good job. I have to say to you right now, Mr. President, I am not pleased with the Amtrak appropriation; I am not pleased with the mass transit appropriation; I am not pleased with the Coast Guard appropriation, but I think we all understood we had to take some cuts and indeed only the totally unnecessary, unjustifiable was to be eliminated.

I do not know how many shots there are in this process. It used to be that we would have one or two. Now we have Budget Committee deliberations, allocations within the Appropriations Committee, then we come to the floor and everybody targets it again and, I might add, all this preceded by agreements with the administration supposedly on these various items. I would suggest that in this particular instance, none of us are pleased by the decisions of this Appropriations Subcommittee. Therefore, probably we have all been best served under the economic circumstances of this time.

I urge defeat of the Symms amendment, which totally distorts the Kassebaum amendment, and the Kassebaum amendment which distorts the work of the Subcommittee on Appropriations.

Mr. DOMENICI. Mr. President, I am compelled to rise in opposition to the Department of Transportation and related agencies appropriation bill, as reported by the Appropriations Committee, because outlays for the bill exceed the subcommittee's 320(b) crosswalk allocation.

H.R. 3244 provides $10 billion in budget authority and $8.7 billion in outlays for the Department of Transportation, the Interstate Commerce Commission, and other transportation-related activities.

Taking into account outlays from prior-year budget authority and adjustments to conform mandatory programs to the budget resolution level, the bill is $0.5 billion below the subcommittee's 320(b) allocation for budget authority. However, the bill's outlay level is $0.1 billion above the 302(b) allocation as adopted by the Appropriations Committee.

Mr. President, the Senate is again confronted with an appropriation bill that exceeds its 320(b) outlay allocation. And, as I have said on many occasions, outlays are what determine deficits.

This outlay overage must be addressed, and if conforming amendments are not adopted, I will offer an amendment that would reduce budget authority and obligation limitations for the nondefense appropriated programs in this bill by 1.6 percent across-the-board to conform outlays for the bill to the subcommittee's 302(b) allocation.

I will oppose any major amendment adding appropriations to this bill and urge my colleagues to do the same.

Mr. President, I ask unanimous consent that a table showing the relationship of the reported bill to the congressional budget, the House-passed bill, and the President's budget request, and a summary of total appropriations action to date, be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TRANSPORTATION SPENDING TOTALS—SENATE-REPORTED BILL

[In billions of dollars]

	Fiscal year 1986—	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed		18.0
H.R. 3244, as reported in the Senate	10.0	8.7
Adjustment to conform mandatory programs to budget resolution assumptions	[1]+	[1]+
Subcommittee total	10.0	26.7
Senate subcommittee allocation:		
Subcommittee 302(b) allocation	10.5	26.6
House-passed level	10.8	27.2
President's request	7.9	26.0
Subcommittee total compared to:		
Subcommittee 302(b) allocation	−0.5	+0.1
House-passed level	−0.8	−0.5
President's request	+2.2	+0.7

Note.—Details may not add to totals due to rounding.

[1] Less than $50 million.

Note.—Details may not add to totals due to rounding.

Mr. DOMENICI. Mr. President, it is really difficult for me to disagree with my good friend, Senator WEICKER, who has just spoken, but I think what we are doing is precisely what the Senate ought to do. I remember being in the Senate 10 years ago and we would get an appropriation bill on the floor and we would take 2 weeks. I off the top of my head can remember an appropriation bill where we had 30 votes up and down, people saying, "Add this, take from that, I want more of this."

That is precisely the problem. To get the idea that because we have a subcommittee's bill on the floor from appropriations, that they have done all the allocating for this country and we ought not to offer any amendments, because to offer amendments is some kind of balkanization, just does not wash. As a matter of fact, speaking of balkanizaton, the bill itself is better categorized as a conscious effort to balkanize, because who in the world believes this subcommittee bill? Does anybody believe that we are really going to cut FAA $300 million? That is what is in the reported bill. Does anybody really believe we are going to cut the Coast Guard operations account by $200 million? Nobody believes it. And that means that nobody believes this bill is going to stay like it is. Somehow there is a rumor around, "Vote for it, even though it cuts FAA $300 milion. Vote for it even though it cuts Goast Guard, with all the things it is supposed to do, $200 million." Now, that is not going to be the way the conference report will end up on these two accounts.

I would even risk asking the distinguished subcommittee chairman if he believes that is what is going to happen. He would probably tell the Senate, "Of course it is not going to happen. We are going to go to conference and put the money back."

Now, that is exactly what the distinguished Senator from Kansas does in her amendment; she restores FAA and Coast Guard funding, and instead reduces mass transit operating assistance 10 percent, and cuts across the board 6 percent. Now, that is pretty fair, unless people here really believe that the FAA is going to get cut $300 million and the Coast Guard $200 million.

I think it is an excellent approach. I think it is totally within the prerogatives of the U.S. Senate, and I compliment the Senator from Kansas for offering it.

I would like to address whether or not the budget resolution, in the dark of the night, brought to the U.S. Senate something that is totally void of credibility and this poor subcommittee has been absolutely disarmed from any capability to serve the national interest. Let me say this. It is very interesting that when the Senate produced a budget resolution, it had two numbers allocated to the full Appropriations Committee.

The amount allocated to the Senate Appropriations Committee were $554.1 billion in outlays and $567.1 billion in budget authority.

I repeat what I have said three times when the chairman of the subcommittee said, "In the dark of the night, they brought back a subcommittee charge that we could not live up to." In the dark of the night, we brought back a resolution that said when we are finished with all the appropriations bills, the full Appropriations Committee will not exceed $567.1 billion in budget authority and $554.1 billion in outlays.

I repeat: That is what Congress ordered the Senate and the House to do—nothing more, nothing less.

It is also interesting that the budget process charged this body and the House with going through an exercise called a budget resolution, to say "let us see if those numbers make sense"—those two numbers I read. In order to make sure they make sense, make some assumptions. Make some assumptions that you will cut this program. Add to another one. Once those assumptions are added up, the Appropriations Committee is on their own. Do whatever you like, but do not go more than these two numbers.

It is interesting. One of the assumptions was an undistributed reduction in the discretionary accounts of transportation. I am being told and the Senate is being told that, "in the dark of the night, you brought us back a budget resolution with an assumption in it that we cannot live with."

If the Appropriations Committee wants to say to the U.S. Senate that they adopted all the budget resolution assumptions in every bill and could not fit within their allocation, then they have a legitimate complaint. But the truth of the matter is that the Appropriations Committee should not be bound by the assumptions in the budget resolution. The truth of the matter is that they have not been bound by the assumptions. The truth of the matter is that in much of each bill they have made their own recommendations. And many of their funding recommendations are higher than the assumptions in the budget resolution. Their assumptions will become law. The Budget Committee's assumptions are nothing but guidelines.

The Congress has said to take all of the budget assumptions and say that together they are reasonable, the Appropriations Committee is free to choose not to use these assumptions. You cannot use this one bill, where we assumed an undistributed reduction in transportation funding and say, "Where is the truth in budgeting?"

In another bill, the Interior Appropriation bill, the subcommittee chooses to add $750 million for a new program that does not yet exist, that is assumed by no one. Where do we give credit for that in the budget resolution? That happens to be a factual example. There is a $750 million unauthorized research program in the Interior bill that was not assumed in the budget resolution. In the budget resolution you voted on, it was not assumed; in the budget resolution that came here in the dark of the night.

I am not arguing that that program is good or bad. If you want to take all, the assumptions in the budget resolution, you have abandoned your appropriations role and yielded to the guidelines of the budget process. I have never asked anyone to do that, nor has the Senate. But you do not like some of the assumption because they happen to be onerous, when you have exceeded other assumptions. Do not claim it is not truth in budgeting or that the budget resolution was brought back in the dark of the night.

You cannot claim that somebody gave you some mandate you cannot live by because you are picking and choosing which assumptions you want to follow. That is your privilege. It is the privilege of the Appropriations Committee.

In this case, the Appropriations Committee did something very interesting. They chose the Senate's numbers. They chose the budget resolution assumptions for outlays for this subcommittee. Appropriations made this choice, not the Senate, and not the conference report on the budget.

They said to the Transportation Subcommittee, "You live within it." They could have given this subcommittee more and taken away from other subcommittees, if they chose. They did not choose. That is the truth in budgeting. Now the Transportation Subcommittee has to live with a very difficult limit imposed by the full Appropriations Committee.

I think the Senator from Kansas has a much better approach to living within the subcommittee's allocation. I believe her approach is fair and represents truth in budgeting. Who in the world believes that an appropriations bill with a $300 million cut in FAA and a $200 million cut in Coast Guard operations is truly what anyone thinks is going to happen?

Mr. LEVIN. Mr. President, I will vote to table the amendment of the Senator from Kansas, even though I support her effort to restore funding for the Coast Guard and for the Federal Aviation Administration. Under Senator KASSEBAUM'S amendment, funding for the Coast Guard and the FAA would still be reduced drastically. Because the amendment calls for a $100 million cut in Coast Guard funding, I am concerned that funding for essential search and rescue operations on the Great Lakes will still be cut. At the same time, under the Kassebaum amendment, funding for highway programs, Amtrak, and mass transit operating assistance, among other important transportation programs, will also be reduced.

The chairman of the Subcommittee on Transportation Appropriations has assured me that my concerns relative to the Great Lakes Coast Guard stations will be considered in the conference. The House DOT appropriations bill provides sufficient funds to keep all the Great Lakes Coast Guard stations open. The chairman of the Senate Subcommittee on Transportation Appropriations, Senator ANDREWS, has stated that he will have more flexibility in conference to restore cuts in the FAA and the Coast Guard if the Kassebaum amendment is defeated. Senator ANDREWS has also assured me in a colloquy that he will keep my concerns relative to the Coast Guard stations in mind in the conference on the DOT appropriations bill. With that assurance and because there is no assurance that Senator KASSEBAUM's amendment would provide adequate funds to keep the Great Lakes stations open, I will vote to table the Kassebaum amendment.

Mr. D'AMATO. Mr. President, I rise to offer my comments on the amendment proposed by my distinguished colleague Senator KASSEBAUM. Their amendment would add back funds that were deleted by the full Appropriations Committee from the Coast Guard and Federal Aviation Administration [FAA] programs and make further, deeper cuts in mass transit assistance, Amtrak, and other programs.

I have long been a supporter of a strong Coast Guard and a tough drug interdiction program. The inflow of drugs into the United States from foreign countries must be stopped and the Coast Guard is a vital force in that effort. In addition, given the astounding number of fatal airline crashes this year. I do not believe anyone would argue against the need to take decisive action to improve and safeguard this Nation's air traffic control system. The Secretary of Transportation has often stated her commitment to the safety of all our Nation's transportation systems, and I know that the FAA is one of her top priorities.

Having stated my firm commitment to both of these programs. I regret that I must now express my opposition to this amendment. Chairman ANDREWS has striven to put together a transportation funding bill that responsibly meets the Nation's transportation funding needs. In accomplishing this difficult task, he has crafted a bill that provides sufficient levels of funding for many different programs, while making meaningful cuts wherever possible. I commend Chairman ANDREWS for his excellent work on this bill. It is my position that the reasoned funding cuts in this bill should not now be reworked to strengthen particular programs at the cost of devastating cuts to others.

This amendment would add millions to the cost of this bill, but offsets these additions by targeted cuts in Federal aid for mass transit and Amtrak—which have already been cut about 15 percent and 10 percent respectively by the Appropriations Committee. On top of these cuts, the amendment calls for an across-the-board cut of about 6 percent in all transportation programs. I believe that this is simply unfair.

Transit operating assistance has already taken its cuts. If other federally aided programs had taken the 20 percent, 10 percent, 5 percent type of cuts that transit operating assistance took in the Surface Transportation Assistance Act of 1982, we wouldn't have such a severe deficit problem. This amendment would cut operating assistance by a total of 15 percent. Federal operating assistance has not grown like other programs. It was capped at $875 million, with no adjustment for inflation. Transit must not be made the scapegoat for other programs that have failed to hold the line in fighting the deficit.

Federal operating assistance covers only about 3 percent of the NYC Transit Authority's operating costs. However, smaller rural areas depend on this aid for over 40 percent of their costs. Cutbacks in Federal operating assistance will cause drastic service reductions or eliminations in rural areas. In these smaller areas, basic transit service is essential to meet the mobility needs of the transportation disadvantaged.

The Federal commitment to transit is over 20 years old. We have invested billions of Federal dollars in transit infrastructure. As a result of that commitment, millions of people each day are able to travel to work and to school by an affordable means of transportation.

Transit is not a middle-class subsidy as the administration has claimed. In September 1984, the Department of Transportation submitted a report to Congress which contradicts the argument that transit primarily assists the comfortable in our society. DOT's report, "Status of the Nation's Local Public Transportation—Conditions and Performance," revealed that 71 percent of all transit riders have incomes under $20,000 per year and 40 percent have incomes under $10,000 per year. Most of the 28 million daily transit trips in America are taken by lower income people to and from work.

APTA's studies show that 28 percent of all transit riders are under the age of 16 or over age 65. Riders over the age of 65 comprise 16 percent of all riders. These groups have limited access to automobiles or a diminishing ability to drive. How will they travel without viable mass transit systems? How will our handicapped citizens replace the vital accessible transportation services provided by many transit systems?

If, in the effort to reduce the deficit, we must control spending on transit, then I believe that the best approach is the one already adopted by the full Appropriations Committee which provided for a 15-percent reduction in transit formula grants and a 9.9-percent cut in Amtrak. Further cuts in operating assistance are not prudent. Further cuts in Amtrak, which has been cut from its fiscal year 1985 level of $684 million to $616, are not warranted. This proposal would cut Amtrak by about 16 percent from fiscal year 1985. I do not believe such funding is sufficient for our Nation's passenger rail system.

Cutbacks in the section 3 discretionary grant—gas tax—program are simply not justified. Section 3 is a

user-fee-funded program and the taxpayers should benefit from their contributions to this program.

Mr. President, I urge my colleagues to defeat this amendment. Thank you, Mr. President.

Mr. RIEGLE. Mr. President, I voted to table the Kassebaum amendment. The subcommittee bill was modified in the full committee resulting in a $500 million reduction in just two accounts: the Coast Guard and the Federal Aviation Administration. Neither agency could absorb reductions of the magnitude suggested in the committee bill and still meet all of its statutory obligations.

I am most concerned about the $200 million reduction in the Coast Guard, given its importance to the Great Lakes, and to my State in particular. Earlier this year, the administration proposed the downgrading or elimination of 13 Coast Guard Stations on the Great Lakes. Due to the combined efforts of all of the Great Lakes Senators, we were able to defeat that proposal and preserve intact Coast Guard operations on the Great Lakes.

If the Senate had apporoved the Kassebaum amendment, the Chairman of the Transportation Appropriations Subcommittee would have been unable to distribute the mandated reductions in any fashion other than that described in the amendment. These reductions would have occurred in the Coast Guard, the FAA, Amtrak, and mass transit, all accounts that have been significantly reduced in the subcommittee process. In addition, there would have been no way for the operations on the Great Lakes to have been preserved.

By maintaining maximum flexibility for the Appropriations Subcommittee, I believe that we have a much better opportunity to limit the impact of reductions on Coast Guard operations, while distributing the necessary spending reductions in a fashion that the chairman and subcommitte feel are more appropriate and which will enable all of the DOT programs to meet their statutory objectives. In addition, I have received assurances from the chairman in a colloquy that our specific concerns with respect to the Great Lakes will be represented in the conference with the House.

Mr. BYRD. Mr. President, I rise in opposition to the amendment to reduce mass transit operating assistance by approximately $870 million.

With the advent of bus deregulation, many bus companies discontinued their routes and left communities, especially in rural States like mine, without any form of public transportation. Because bus companies such as Greyhound and Trailways have discontinued routes, communities, with the assistance of mass transit funding, have formed transit companies to fill that gap.

Let us just look at my State of West Virginia. There are 12 transit systems in West Virginia. Six of the communities affected (Charleston, Huntington, Clarksburg, Parkersburg, and Wheeling) have voted excess property tax levies to subsidize their transit systems.

The State's transit systems provide 6 million rides per year; 65 percent of the rides are by people totally dependent on public transportation and 45 percent of those riding use public transportation for travel to and from work.

The loss of operating assistance will jeopardize not only those transit systems in my State, but those in other States as well. I oppose this amendment and urge my colleagues to do likewise.

The PRESIDING OFFICER. Is there further discussion?

Mr. SYMMS. Mr. President, I ask for the yeas and nays on the pending amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. SYMMS. Mr. President, I again ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ANDREWS. Mr. President, let me revisit this Budget Committee crosswalk.

We are not complaining. We are not coming to the floor griping or bellyaching or anything else. We are coming to the floor of the Senate stating the facts as we know them.

The Senator from New Mexico knows full well that in their budget resolution crosswalk, we were asked to find $800 million in unspecified savings.

It is absolutely true, as the Senator from New Mexico has said, that the Appropriations Committee, when they realized the error of the Budget Committee's ways in transportation, could have transferred funds from the Defense Subcommittee to our subcommittee. But the Defense Subcommittee had problems. They could have taken it from Labor-HHS and transferred it over, and we would have been whole, but Labor-HHS would have problems. They might have found it someplace else.

What the Senator says is true, but in a sense it does not answer the question we have stated time and time again: What do you do when you have a transportation bill totaling $10 billion and you are saddled with having to find $800 million someplace else?

In defense of the subcommittee, both sides of the aisle were conscientious. We were told in the budget conference report that Amtrak should be cut 15 percent. Now budget authority is cut about 15 percent. We were told that transit should be cut 15 percent, and it is. The transit capital program is frozen. Highway spending as a matter of fact, and as the Senator from Idaho pointed out, has been cut $500 million below the resolution assumptions.

What we are finding now in trying to get to this $800 million worth of unspecified cuts, as the amendment of the Senator from Kansas points out, is that we need an additional cut of almost $1 billion from our Federal Highway Program, and that is not right, either.

The Appropriations Committee, when you look at recent history, has had across-the-board cuts on appropriations bills of HUD, 1.1 percent; Treasury, 2 percent; a 4-percent cut was proposed in Agriculture and was defeated. Labor-HHS was proposed for an across-the-board cut at 6 percent, and that was defeated.

Mr. President what they are proposing in this mishmash of amendments right now is, in essence, to put a 7.9-percent cut across the board on this subcommittee's bill, and that does not make any sense at all. It does not make any sense in the legislative process. It would deeply cut transit and Amtrak and a whole host of programs. It would gut the Federal Highway Building Program, cutting almost $2 billion below the authorized level.

For those reasons, Mr. President, I move to table the amendment of the Senator from Kansas, and I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. QUAYLE). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from North Dakota to lay on the table the underlying first-degree amendment of the Senator from Kansas.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Missouri [Mr. DANFORTH] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from Hawaii [Mr. INOUYE] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 59, nays 38, as follows:

[Rollcall Vote No. 246 Leg.]

YEAS—59

Abdnor	Bradley	Cohen
Andrews	Bumpers	Cranston
Baucus	Burdick	D'Amato

NOT VOTING—3

Danforth	Eagleton	Inouye

So the motion to lay on the table Amendment No. 852 was agreed to.

Mr. ANDREWS. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico was recognized.

AMENDMENT NO. 854

Mr. DOMENICI. Mr. President, I send an unprinted amendment to the desk on behalf of myself and Senator CHILES and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI], for himself and Mr. CHILES, proposes an amendment numbered 854.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

"SEC. . Notwithstanding any other provision of this bill and except as otherwise provided in this section, each."

Mr. DOMENICI. Mr. President, I send a second-degree amendment to the desk and ask for its immediate consideration.

Mr. BYRD. Mr. President, sending a second-degree amendment on the part of the same offeror is not in accordance with the rules.

The PRESIDING OFFICER. The minority leader is correct.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call to roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 855

Mr. CHILES. Mr. President, I send a modification, a second-degree amendment, to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Florida [Mr. Chiles] proposes an amendment numbered 855.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment, add the following: "dollar amount contained in this Act which is provided for non-defense discretionary programs and activities is hereby reduced 1.6 per centum; provided that this section shall not apply to the amounts on page 36, line 7, and page 37, line 10; provided further that notwithstanding any other provision of law, the amount available for transit operating assistance, contained in this bill, in fiscal year 1986 shall not exceed $856,000,000."

Mr. CHILES. Mr. President, this will simply bring the bill now within the crosswalk. I urge its favorable adoption.

Mr. ANDREWS. Mr. President, we understand that the Domenici-Chiles amendment cuts 1.6 percent. I have not seen it. We are in the process of looking at it now. It does have, I'm told, certain exceptions. We have no objection to this. We can accept it. We will take it to conference. Hopefully, we can go to final passage of the bill. This is certainly less objectionable than the 7- or 8-percent cut.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Florida [Mr. CHILES].

The amendment (No. 855) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Is there further debate on the amendment, as amended? If not, the question is on agreeing to the amendment, as amended, of the Senator from New Mexico [Mr. DOMENICI].

The amendment (No. 854) was agreed to.

Mr. ANDREWS. Mr. President, I know of no further amendments.

● Mr. STAFFORD. Mr. President, the Department of Transportation and related agencies appropriations bill for fiscal year 1986 contains a provision which concerns me. Section 325 of H.R. 3244 permits the State of New York to use interstate construction funds for interstate highway and transit substitute projects in New York City.

According to the 1985 interstate cost estimates, $15.2 billion in Federal funds will be required to complete the Interstate System and $4.9 billion is needed to complete all interstate substitute projects. Under current law, the final year of interstate construction funds becomes available to the States in 1990. Our goal has been to complete the Interstate System by 1990. It is already apparent that the sums already authorized through 1990 will not be sufficient to complete the Interstate System.

Highway needs across the country continue to grow, particularly for interstate reconstruction, the primary system, and bridge repair and replacement. At the same time that needs are growing, the Treasury Department has revised downward its estimate of receipts into the Highway Trust Fund by $600 million per year. With these revenue projections, authorizations for the Highway Program will have to be reduced substantially in the Highway Program will have to be reduced substantially in fiscal year 1987 and beyond. According to preliminary estimates by the Congressional Budget Office, the Highway Trust Fund could only support $13.8 to $14.0 billion per year in new authorizations under the Treasury Department assumptions. After 1990 this may be as low as $10 to $12 billion per year in new authorizations. This compares to the $15.3 billion authorized for the Highway Program in fiscal year 1986.

The Highway Program is not permitted to deficit spend. It must be contained within the revenues from highway user fees coming into the Highway Trust Fund. If authorizations exceed revenues, the so-called Byrd amendment is triggered and apportionments to the States are automatically reduced. After the hard fought battle to increase the gas tax in 1982, I believe that an increase in highway user fees is very unlikely for quite some time.

It is correct that section 325 will not increase budget authority or reduce any State's apportionment in fiscal year 1986. However, it will likely reduce interstate construction funds normally redistributed to other States

to expedite completion of the Interstate System. In the Surface Transportation Assistance Act of 1978 Congress agreed that completion of the Interstate System was a high Federal priority and in order to expedite completion directed that interstate construction funds be available for 2 years rather than 4. Any interstate construction funds which are lapsed are redistributed to those States which have interstate construction projects ready to go. That policy has worked well over the last 7 years in contributing to completion of the system.

My second concern is that section 325 moves 1 State ahead of 19 other States and the District of Columbia who have been waiting in line, some of them for over 10 years, for interstate substitute funds. I cannot guarantee, or bind any other Congress to guarantee, that sufficient interstate construction or interstate substitute funds will eventually be made available to buy out each State's entitlement. I believe it is unfair to penalize those States who have patiently waited by allowing other States to move ahead of them when there is no guarantee that those States who have waited will receive all their funds. As I stated, because this program is bound to the receipts collected from highway user fees, there is a fixed amount of money available which must be divided among the various highway programs. Because the existing needs far exceed existing revenues, some needs will not be met with Federal dollars.

New York's decision to withdraw Westway was made and approved just hours before the September 30, 1985, deadline. The interstate cost estimates had already been approved by Congress so that funds could be apportioned to the States on October 1. I understand that because of these circumstances New York may be placed in a difficult position. I do not intend to move to strike section 325 because it is my view that such a motion will not be successful. However, I want the record to show that I believe the proper place for review of this issue and its effect on the Highway Program and on other States is within the jurisdiction of the Environment and Public Works Committee.

Mr. President, I have had a long standing concern over big trucks and I have voiced that concern many times on the Senate floor in the past. There are two provisions in H.R. 3244 regarding big trucks and once again I want to register my opposition to the possibility of even heavier and longer trucks using the highway system.

I am convinced that the heaviest trucks cause considerably more damage and wear and tear on highways and bridges than other vehicles. As chairman of the Environment and Public Works Committee the needs of the Highway Program in each State across this country are frequently brought to my attention. At the same time, it is very clear to me that sufficient Federal resources are not available to meet all the existing needs. The Treasury Department recently issued revised projections on trust fund income and these projections show a significant downward trend in revenues coming into the trust fund.

The Surface Transportation Assistance Act of 1982 mandated the States to allow larger trucks. There are portions of the Interstate System which were built many years ago and were not designed to accommodate even the vehicles permitted under the STAA of 1982. There are segments which do not have 12-foot lanes and there are interchanges which have configurations that cannot accommodate the larger vehicles. The cost of bringing interstate and primary routes to the point of safely carrying the size of trucks on the road today is substantial. Current revenues will not cover that cost and the trucking industry is not willing to pay additional user fees.

The trucking industry may argue that they are requesting the ability to use larger equipment only in the wide-open Western States where the roads have plenty of room for big trucks. I agree that the Western States can, in most cases, accommodate larger vehicles. However, I have found through my long association with highway issues that once trucks are successful in getting bigger in the West, the productivity argument is made and the bigger trucks start moving east toward Vermont and the other Eastern States which are considerably more congested and have older highway systems.

I am also concerned about truck safety. The General Accounting Office has recently issued a study on "Stronger Enforcement Would Help Improve Motor Carrier Safety," which outlines some of the problem. The Bureau of Motor Carrier Safety has approximately 130 field investigators. I have seen statistics showing that there are over 210,000 trucking companies operating over a million trucks. Obviously the Bureau does not have the resources to monitor truck safety compliance.

I realize the trucking industry has had some economic hard times. There is a temptation to cut corners on maintenance and safety during those times. Our first responsibility, however, is the safety of the motoring public. Many different kinds of hazardous materials are now hauled by trucks. An accident involving these materials can have tragic consequences. We need only look in our backyard at the Washington Beltway to realize the impact of truck accidents and the potential for such accidents in heavily populated and traveled areas.

The Federal-Aid Highway Program must be reauthorized next year. I believe this is the appropriate place for the committees of jurisdiction, the Commerce, Science, and Transportation Committee and the Environment and Public Works Committee to review truck size and weight.

● Mr. BURDICK. Mr. President, during full committee markup on the fiscal year 1986 DOT appropriations bill, I raised an objection to an amendment successfully offered by Senator D'AMATO. Section 325, provides New York City with $150 million upfront against the $1.75 billion Federal commitment created by turning in the Westway Highway project. It is my opinion that this matter should be handled by the Senate Public Works Committee rather through the appropriations process.

As ranking minority member of the Transportation Subcommittee I am concerned about fairness. According to the 1985 interstate cost estimates, $15.2 billion in Federal funds will be required to complete the Interstate System and $4.9 billion is needed to complete the interstate substitute projects.

Congress in past highway programs has encouraged States to complete their portion of interstate as soon as time permits in order to meet the national goal of a 1990 completion date. In 1978, for example, interstate funds were provided to States for 2 years rather than 4. Funds not utilized by a State during those 2 years would lapse and be redistributed by the Federal Highway Administration.

Under the congressionally approved 1985 interstate cost estimate, New York's apportionment contained funds for the Westway project. However, just hours prior to the September 30 deadline, New York decided to drop Westway in favor of the Interstate Substitute Highway Program. As a result, the State of New York would not be able to spend approximately $150 million of its interstate funds. Under the appropriations langauge, New York City would be entitled to receive these funds and apply it toward its share of interstate substitute highway funds due at a later date under the separate program. As a result, New York would be allowed to step ahead of other States who could have taken advantage of lapsed interstate funds and who have waited for as much as 10 years for their interstate substitute funds.

The Federal Government has a commitment to ensure fairness to other States. While I recognize the problem created for New York City by the sudden turnback, I do not support this section because it provides an unfair advantage.

It is my intent to raise this concern with the Public Works Committee during its deliberations on reauthorizing the Highway Program. Congress

must focus on the Federal commitments made under the Substitute Interstate Highway Program in order to guarantee States that a fair process will be maintained for the competition of limited highway dollars.●

● Mr. BENTSEN. Mr. President, section 325 of the Department of Transportation and related agencies appropriations bill contains a provision that permits New York City to retain whatever interstate construction funds New York State does not obligate in fiscal year 1986. It is estimated that $150 million is involved in this proposal.

There are two inequities created by this section. First, these are funds that normally would be placed in the interstate construction discretionary fund to be redistributed to States that are ready and waiting with interstate construction projects. Thus, New York not only withdraws its own interstate segment, it also prevents other States from building theirs. Second, under normal procedures States withdrawing interstate segments then compete with other States for interstate substitution funds. There are some 19 States competing for these funds; some have waited for more than 10 years. Section 325 places New York in a unique and unwarranted position. It neither competes nor waits. This is simply not fair. All the other States, States that played by the rules, will now wonder why and may now seek their own special provisions.

I don't believe that this provision was included in the bill with the intention of penalizing any of these States. More than likely, those who added this provision did not even realize that other States would be adversely affected. So much work goes into drafting a bill that it is not always possible to know in detail the impact of every provision.

But this is why Congress established the committee system and divided up our work among various committees. In the case of the Environment and Public Works Committee, our share of the work—our jurisdiction—includes authorization of the Highway Program.

Projects under the Federal-Aid Highway Program operate under contract authority, unlike programs that rely on an appropriations act to provide budget authority. This important and effective authority was established by Congress to give our States advance notice of the amount of money that will be available in the future. This allows our States time to undertake the long-term advance planning so necessary for large-scale highway projects. It's an orderly process, and it works.

To control spending, Congress also mandated that the Highway Program must be financed only from the Highway Trust Fund. The Highway Program cannot obtain general revenue funds and it cannot engage in deficit spending. It must operate within the confines of a fixed amount of money. Therefore, when a provision such as section 325 is enacted, taking $150 million from the trust fund and making it available to one State under unusual conditions, that money comes out of the pockets of other States, and deserving projects are unfairly penalized.

Mr. President, the questions of whether these projects should be affected, and how funds should be divided under the contract authority of the Highway Program, are issues that clearly fall under the jurisdiction of the Environment and Public Works Committee. These are not matters to be decided in appropriations legislation because this is not appropriated money. But the key issue here is that by interfering with contract authority, the long-term planning and programming process of our States is disrupted, we would introduce the uncertainty that is inherent in the annual appropriations process, and we jeopardize the entire Highway Program by placing one State in a unique position without the benefit of a normal legislative process to determine whether such treatment is justified and fair.

We should not risk jeopardizing a workable and highly successful Highway Program which has served us well. Therefore, I am joining with Senator STAFFORD in stating for the record that the proper place for section 325 to be reviewed and considered is before the Environment and Public Works Committee.●

● Mr. MOYNIHAN. Mr. President, I rise today to offer a few remarks about a provision of the Transportation and related agencies appropriation bill, one I support wholeheartedly, regarding the so called Westway trade-in.

This provision will enable the State of New York to use funds already apportioned to our State from the Highway Trust Fund for this fiscal year for substitute projects and interstate completion projects within the State. As we all know, the interstate cost estimate allocated $323 million for New York from the Highway Trust Fund. A large portion of this was to be used for the Westway Interstate Highway. After more than 12 years of design plans, environmental impact studies, and court battles, on September 30 Secretary of Transportation Elizabeth Dole signed at the behest of Governor Cuomo and Mayor Koch, papers approving the trade-in of Westway for a less ambitious highway and mass transit projects. I was present at the approval ceremony, witnessing the end of a great project which could have been for New York City in the 20th century what Central Park was for the city in the 19th century.

Westway was to be an expensive project—but it would have incorporated the best of what we know about how to build a highway. Westway would have offered better driving and safety on city streets, better air quality above the streets, and 93 acres of new parkland along the Hudson River. Here was a chance for New Yorkers to reclaim a once beautiful waterfront lost to the steamboat, the railroads, and the highways.

It has taken decades of practice for interstate highway planners to learn how new highways can best be integrated with the design of our cities. They need not bisect neighborhoods and carve up commercial districts; they can enhance both. After 30 years experience, it is ironic that one of our last segments of interstate—one with a truly sensitive design; indeed, a design of genius—was singled out for defeat.

Past mistakes continue to haunt us, and mistrust of highway plans and planners helped to spur protracted litigation over Westway. The Army Corps of Engineers spend more than $1.25 million just to process Westway applications. This, on top of the $233 million spent by the State of New York for environmental studies, engineering work, and other costs. The Army Corps of Engineers was unable to convince a trial judge that the highway's landfill would have no significant impact on the striped bass living under waterfront piers. The Federal Court of Appeals for the Second Circuit ruled, however, that there was nothing—I repeat—no grounds to prevent the corps from issuing the necessary permits for Westway. But by then, time had run out for the project, and the Governor and mayor decided wisely to ensure New York's fair share of transportation funds, and to trade-in the Westway authorization.

The provision in the appropriations legislation before us will not affect budget reconciliation, nor will it increase the total amounts of trade-in funds available to New York. It merely assures that New York can go to work on Westway substitutes and interstate completion, using funds already set aside for the State. This is only fair.

I support this provision, and ask my colleagues do the same.●

● Mr. SYMMS. Mr. President, I share the concerns of the chairman of the Committee on Environment and Public Works regarding section 325 of H.R. 3244, the Department of Transportation and Related Agencies Appropriation bill for fiscal 1986.

I understand the very serious transportation issues that the State of New York and the city of New York have faced over a period of many years. I do believe that in the final analysis, the decision to withdraw the Westway highway project was correct, not only for New York but for the remaining 49 States which also must meet their critical transportation needs.

I would like to reiterate the importance of focusing the available Federal-Aid Highway Program dollars on a transportation network that meets national needs. As construction costs and needs continue to escalate, I believe we must target our resources carefully. I also believe that States which have patiently waited their turn in the Interstate Transfer Program are justifiably concerned about the effect of the Westway trade-in on their ability to fund their own substitute projects.

As chairman of the Transportation Subcommittee, I know that the Federal-Aid Highway Program is an extremely complicated and delicately balanced program. I concur with the views of the chairman of our committee, Senator STAFFORD, that the appropriate place for consideration of these important issues is the authorizing committee.●

● Mr. BRADLEY. Mr. President, I would like to take this opportunity to call my colleagues' attention to language included in the committee report (99-152) to H.R. 3244.

Under the provisions for the Northeast Corridor Improvement Program [NECIP], the committee provided that funds made available for the Atlantic City rail line rehabilitation project would remain available until expended. I applaud the members of the committee for their continued support of this project.

The Atlantic City rail line project was authorized by the Rail Safety and Service Improvement Act (Public Law 468) in 1983. The original operating plan for the rail line, submitted by the New Jersey Department of Transportation, called for a high-speed express train with limited commuter service between Atlantic City and Philadelphia. I did not believe that the plan, as submitted, addressed the best interests of the residents of southern New Jersey. Other members of the New Jersey congressional delegation shared my view. After discussions with members of the Appropriations Committee, it was agreed that the funds spent under the Department of Transportation authorization bill would be used to develop a commuter line rather than a high-speed express line.

Since 1983, the administration has, in one way or another, made it known that it opposed the funding for the rail line. Its 1986 budget recommended that funding be deferred, but, as you know the 1985 Supplemental Conference Report disapproved of any deferral. I commend the members of the committee, and especially my colleague from New Jersey for their efforts to ensure that these funds would be made available.

After endless administrative delays, a light has appeared at the end of the tunnel. The committee report to H.R. 3244 acknowledges that final documentation relating to the non-Federal funding portion of the project has been received by the Department of Transportation, and it urges the Secretary of Transportation to certify this financing plan as soon as possible.

Congressional support for this project ensures that a balanced transportation system will be created for the millions of people living in the southern New Jersey/Philadelphia metropolitan area. This system will tie into the remaining Northeast rail corridor, ease the severely congested traffic conditions at the New Jersey shore, and provide greater commuter access to the residents of southern New Jersey.●

CARBONDALE RAIL RELOCATION PROJECT

● Mr. SIMON. Will the distinguished Senator yield so that the Senior Senator from Florida and I may engage in a colloquy?

Is it my distinguished colleague's understanding that the committee bill does not include continued funding for the railroad highway crossings demonstration project in Carbondale, IL, for fiscal year 1985?

● Mr. CHILES. The distinguished Senator from Illinois is correct. The committee did not find it possible to include funding for any of the projects authorized under the Railroad/Highway Crossings Demonstration Program. At an earlier time we had hoped to be able to include this funding, but I know the Senator from Illinois is aware of the budget constraints that compelled us to delete or scale back many worthy programs in this year's bill. I understand the longstanding concern that you and our distinguished colleague Senator DIXON have had in this matter over the years, and the committee is also well aware of the leading role you have played as author of the current authorizing statute for this program.

● Mr. SIMON. I thank the Senator from Florida. The Carbondale rail relocation project is a partnership that includes the city, the State of Illinois, Southern Illinois University and Illinois Central Gulf Railroad. It has long been recognized as one of the best-managed of these projects. It is an innovative effort that will have direct application to similar railroad-highway conflicts in cities and towns across the Nation. This work is also a vital element in the economic progress of this area of southern Illinois. So the Senator is correct: We are concerned that the committee's bill suggests a break in the work schedule for this project. This issue will be a matter to be decided when the Senate goes to conference on this bill with the other body. On behalf of my colleague ALAN DIXON and myself, we strongly urge that the gentleman from Florida and the chairman of the subcommittee do all that is possible, as these differences between the two bills are resolved, to accommodate the follow-on funding requirements of the Carbondale project.

● Mr. DIXON. Mr. President, I want to join my warm friend and colleague from Illinois, Senator SIMON, in expressing my strong support for the Carbondale project. It is a well-designed, cost-effective effort to reduce railroad-highway conflicts in that community. It is also a vitally important element of Carbondale's economic development plans. I understand the problems facing my colleagues on the Appropriations Committee, and I know they understand the need for this project, since they have been so helpful in providing funding in prior years. I urge the chairman and ranking member of the Transportation Subcommittee, Senator ANDREWS and Senator CHILES, to take another look at this project during the upcoming conference on the DOT bill, and I hope they will be able to find a way to accommodate this interest in the conference version of the bill.

● Mr. CHILES. I appreciate the concern that the distinguished junior and senior Senators from Illinois have in this matter, and it is correct that this will be a matter for the conference. As the Senator from Illinois knows from the debate today, this bill is still over the budget resolution even after the committee cut the bill over $1.5 billion from last year. In the past, I have supported rail-highway projects similar to the Carbondale project. I know they are useful projects of great importance to local communities. Within the constraints of our budget problems, I hope we can accommodate the Carbondale project.

● Mr. SIMON. I thank the distinguished Senator from Florida.●

Mr. MATHIAS. Mr. President, the Senate Transportation Appropriations Subcommittee reduced the administration budget request for the Washington Metropolitan Area Rapid Rail System by 25 percent—from $250 to $187.5 million. This is much greater than the budget reductions recommended for other transit programs around the country. I am well aware of the funding constraints placed on the subcommittee and the competing demands on the subcommittee for funding for many worthwhile programs. However, I am disturbed that Metro would be forced to bear a disproportionate share of the economic burden and am troubled about the potential consequences.

The three jurisdictions that comprise the Washington Metropolitan Area Rapid Transit Authority—Maryland, the District of Columbia, and Virginia—recently completed and signed a 4-year agreement—the Interim Contributions Agreement-4—which lays out a construction program for Metro. This document was developed

with guidance provided by the administration on annual funding levels. A reduction of funding by 25 percent would undermine this carefully crafted agreement by preventing the construction of some segments within the 89½ mile system approved by the administration.

Furthermore, a reduction of this magnitude leaves open the question whether Metro can sign a full-funding agreement with the Urban Mass Transit Administration. Such an agreement, which spells out the scope of the construction to be undertaken for the entire 89½ miles and associated costs, is required for Metro by the Federal Government before it commits to any further funding. I would like to point out that we are not talking about the completion of the entire 103 mile system, we are merely trying to ensure that the full 89½ miles approved by the administration are completed in a timely and cost-effective manner.

I do not think anyone can question the efficiency and effectiveness of Metro. It is, as many of my colleagues have witnessed, an exemplary model for other transit systems around the country. Its ridership is high and increasing, its operating costs are being held in check and its service reliability is among the best in the nation.

Mr. ANDREWS. Mr. President. As the distinguished Senator from Maryland is aware, I have had a longstanding involvement in the Washington Metro System and I know how successful the program has been to date. However, against the backdrop of the Federal deficit, the committee was faced with hard choices for very worthwhile programs. I understand the Senator's concern and believe he has made a compelling case in favor of continuing Metro funding at a higher level.

Mr. WARNER. Mr. President, I appreciate the comments of the chairman of the Transportation Appropriations Subcommittee. As the Senator from Maryland has stated, it is critical that an adequate construction funding level for the Washington area Metro rail be maintained.

Construction schedules and agreements, have been reached by the States of Virginia and Maryland, the District of Columbia, the Federal Government and the local jurisdictions served by Metro. These agreements have been based on an expected level of construction funds from the Federal Government which have been agreed to by the Federal Government. The States and localities have upheld their part of the Metro funding agreement. I am hopeful that the Federal Government can do likewise.

Mr. MATHIAS. As the distinguished chairman knows, the House approved $237½ million for Metro, $50 million above the Senate figure, which constitutes a 5-percent cut. Even with the 5-percent cut, Metro may be hard pressed to make ends meet. However, Metro's managers believe that they have some room to manuever, enabling them to keep the basic construction schedule intact, at the House approved level. But they indicate that they would find it difficult to make up the difference for any cut below that level.

I appreciate the support the subcommittee has given Metro over the years. In particular, the role it played in helping to obtain the removal of the 76-mile cap has been a key to the success of the overall effort. So, there is no doubt in my mind that the subcommittee chairman will continue to try to do everything he can to keep the construction schedule on track.

Mr. President, I appreciate the kind words of my colleague from Maryland. I will be carefully reviewing this as well as other worthwhile programs as we go into conference. Rest assured, I will do my best to meet the needs of this vital and healthy rapid system.

Mr. LEVIN. Mr. President, as the chairman knows, Senator RIEGLE and I joined other Great Lakes Senators in expressing our concern about the administration's plan to cut funding for search and rescue facilities on the Great Lakes in a letter we wrote to him and to Senator CHILES in July 1985. We were therefore greatly disturbed when we learned that although the subcommittee had recommended against cuts in funding for Coast Guard operations, the full committee voted to cut $200 million from Coast Guard operations in fiscal year 1986.

The Coast Guard has informed us that:

> A $200 million reduction in Coast Guard Operating Expenses (OE) account would cause a loss of over 6,000 personnel and consequent decommissioning, closing or reducing of over 200 units and activities in practically all the states and territories in which the Coast Guard has units.

Before the committee adopted the $200 million cut, the Subcommittee on Transportation Appropriations included language in its report which would have required operation of Great Lakes search and rescue facilities at the current level. We understand that this language will have no affect given the $200 million cut approved by the full committee. However, the House bill provides adequate funds for the continued operation of all Great Lakes stations that were proposed to be closed or downgraded.

Can the chairman of the Subcommittee on Transportation Appropriations assure us that our concerns relative to the importance of maintaining current funding for search and rescue facilities on the Great Lakes will be considered in the conference on the DOT appropriations bill?

Mr. ANDREWS. Yes; I can assure both of the Senators from Michigan that although the subcommittee was forced to accept these cuts, I will do everything I can to see that your concerns will be represented in the conference with the House.

Mr. ANDREWS. Mr. President, section 319 of this legislation authorizes the State of Wyoming to conduct a 2-year demonstration project on the use of heavier trucks on interstate highways within Wyoming.

Senator DANFORTH has expressed his concern that this project be a true demonstration project, limited in scope, and that the impacts of this demonstration project on highway safety and the condition of the highways be evaluated by the U.S. Department of Transportation.

I want to assure Senator DANFORTH that this is a 2-year demonstration project, limited to the State of Wyoming, and that I shall seek such an evaluation from the Department of Transportation.

SHAWNEE MUNICIPAL AIRPORT IMPROVEMENTS

Mr. NICKLES. Mr. President, the transportation appropriations measure before us today, H.R. 3244, contains language which recognizes the value of improvements at an important airfield in the State of Oklahoma, Shawnee Municipal Airport. The bill urges priority consideration be given to grant applications for airport improvements from Shawnee Municipal. The committee language is welcomed and appreciated but does not directly address the expansion requirements of Shawnee Municipal Airport.

During the last 3 years, the city of Shawnee has been involved in a master plan update and capital improvements program that would permit orderly development of the city's municipal airport. Shawnee is an important reliever airport for Will Rogers World Airport, located just 40 miles away. Shawnee Municipal currently has a completely reconstructed 4,200-foot by 100-foot runway. An 800-foot extension is needed to safely accommodate corporate jet aircraft using the airport.

Airport growth is constrained by roadways to the north and south. Various alternatives have been examined on how to address the airport's and community's needs in the most cost-effective manner. Moving the airport to another site altogether was considered. Relocating McArthur Street, which boundaries on the north, in the form of a sharp curve around the extended runway was considered. However, after extensive review and analysis, it was determined the best option is to build an overpass over McArthur Street in order to address the Airport's expansion demands.

Making the necessary improvements will require efforts from the Federal

Aviation Administration, the Federal Highway Administration, and the local community. My colleague, Senator BOREN, and I have been working with Federal, State, and local officials to upgrade the Shawnee Airport facilities. The House recognized the importance of this project when they transferred and earmarked $2,700,000 to carry out the project.

Despite our arguments to retain the House language, during subcommittee consideration, the project was deleted along with others. I feel it is important to explain the history of this project so conferees will have a better understanding of its importance to improved air service.

Mr. BOREN. Mr. President, along with Senator NICKLES, I urge the distinguished chairman from North Dakota, Senator ANDREWS, and other Senate conferees to give this project the consideration it deserves during conference.

Mr. ANDREWS. Mr. President, I welcome the background information offered by my colleagues from Oklahoma which clarifies the need for the Shawnee Municipal Airport project. It is important that we work to improve our Nation's air service capabilities. Often, it is difficult to ascertain the value of proposed projects without information such as that provided by my colleagues. With this in mind, I will discuss the project with the conference committee, realizing its importance to Oklahoma.

● Mr. LEAHY. Mr. President, I would like to express my appreciation to the Senate for today giving final approval to the Rural Transportation Equity Act of 1985, a measure which I introduced to strengthen our Nation's rural bus program and make it more efficient.

Hundreds of transportation systems in rural areas of the United States are facing a critical lack of funds due to a ruling issued by the Urban Mass Transportation Administration. In addition, doctors and social workers have been forced to drive patients and clients to and from hospitals, clinics, meal centers, and agencies because rural Americans can no longer rely on bus lines for rides, as a result of UMTA's decision.

On August 1, 1985, I introduced the Rural Transportation Equity Act, S. 1601, to reverse UMTA's decision, strengthen our Nation's rural transportation system, and permit doctors and social service workers in rural areas to spend their valuable time treating patients and clients and not driving them.

The section 18 Rural Bus Program is a partnership between the Federal and State and local governments to provide transportation services in nonurban areas. Fifty percent of the funds for section 18 bus lines are provided by the Federal Government, while State and local governments must generally match that contribution. State governments contribute 25 percent to the match; the other 25 percent comes from rural communities.

Realizing that many rural communities find it difficult or impossible to compete with urban areas for State transportation dollars, Congress in 1978 established guidelines under which rural governments could use some Federal moneys to fund the State/local half of a bus or van line. Senator STAFFORD and I sponsored the amendment which set up this formula.

The most common source of Federal funds upon which rural bus lines rely for the local match is contracts with social service agencies to transport clients.

A few brief examples of the kinds of services provided by section 18 bus lines, Mr. President, should bear out the need to restore the previous interpretation of the funding formula. In my own State of Vermont, David Palmer has run a most successful section 18 program in Bethel. The Stage Coach Line is a 15-vehicle operation which devotes the majority of its energy to transporting the elderly and infirm under contract from social service agencies. Elderly residents of eight towns near Bethel are picked up each day and driven to centers which provide low-cost meals and recreational activities. In addition, residents of the area may use the Stage Coach for transportation to mental health workshops and day care centers.

All around the country, section 18 bus programs provide these kind of services.

Section 18 bus lines are a vital link between health care, nutrition, social services and residents of the rural areas of this Nation. It was not too long ago that these important programs were only available in major metropolitan areas. Rural parts of this country were left out, for the most part.

In 1983, UMTA ruled that transportation contracts with social service agencies may no longer be counted as part of the State and local matching funds for section 18 bus lines.

UMTA determined that because social service agencies and nonprofit organizations may receive Federal moneys, any contract they may enter into with a section 18 bus line must be counted as having come from Federal matching funds.

This decision contradicts the funding formula which Congress established and has jeopardized not only the financial well-being of rural bus lines, but has also forced social service and health care agencies in rural areas to act as transportation providers.

In one town physicians are spending their precious time ferrying patients to and from the medical clinic, instead of treating the ill, because UMTA will not permit a section 18 rural bus line to provide transportation for the clinic.

S. 1601, which has been incorporated into the Transportation appropriations bill, would restore the original funding formula established by Congress and permit section 18 bus lines to transport the clients of social service agencies and organizations under contract. Rural bus lines would be restored to a sound financial footing and social service and health care agencies could return to providing services instead of rides.

The section 18 rural bus program has been extremely successful in providing rural Americans access to health care and social service programs. The section 18 bus program has helped make these programs available to all Americans, whether or not they live in cities, towns, or villages.

Mr. President, Americans living in rural areas are entitled to the same services and programs offered to other Americans. This is something we all agree upon. The Rural Transportation Equity Act would require UMTA to recognize that a consensus exists in this country in favor of the equitable treatment of rural America, and would enable section 18 bus lines to more readily provide citizens in rural areas with transportation to social service and health care programs.

Finally, Mr. President, in this age of a $2 trillion national debt, the Rural Transportation Equity Act will improve transportation in rural areas without spending a single new dollar. Instead, the finances of rural bus lines are strengthened by again permitting them to count contracts with social service agencies as part of their matching funds, as Congress originally intended.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. ANDREWS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Missouri [Mr. DANFORTH] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from Hawaii [Mr. INOUYE] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

So the result was announced—yeas 84, nays 13, as follows:

[Rollcall Vote No. 247 Leg.]

YEAS—84

Abdnor	Goldwater	Moynihan
Andrews	Gore	Murkowski
Baucus	Grassley	Nunn
Bentsen	Harkin	Packwood
Biden	Hart	Pell

Cohen	Helms	Proxmire
Denton	Humphrey	
Gorton	Kassebaum	

NOT VOTING—3

Danforth	Eagleton	Inouye

So the bill (H.R. 3244), as amended, was passed.

Mr. ANDREWS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS. Mr. President, I move the Senate insist on its amendments, request a conference with the House, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to, and the Chair [Mr. DENTON] appointed Mr. ANDREWS, Mr. COCHRAN, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. HATFIELD, Mr. CHILES, Mr. STENNIS, Mr. BYRD, and Mr. LAUTENBERG conferees on the part of the Senate.

Mr. ANDREWS. Mr. President, a number of people have been gathering around congratulating one another. I do not know whether they have been congratulating individuals because the bill is passed or whether they are issuing their sigh of relief, but let me, before we leave this bill, point out that whatever success we had today is due in large part to the fantastic staff we have: on the majority, Pat Cregan, Pat McCann, and Mazie Mattson, and on the minority Mike Hall and Marilyn Washington. I thank them for what they did in making this bill possible and for the cooperation they extended to all Members in this body so that everyone had an input and was able to find out about the items at issue. They are doing a fantastic job and they make it possible.

Mr. CHILES. Mr. President, I concur in the remarks of the distinguished chairman. The staff has been very accessible and has helped us on both sides. We appreciate it.

Mr. ANDREWS. They certainly have.

I thank the Chair.

Mr. DOLE. Mr. President, I thank the distinguished managers of the bill and their staffs and all of the Members for their cooperation.

We have finished now another appropriations bill. Tomorrow morning at 9 o'clock we hope to be on the State-Justice-Commerce appropriations, and hopefully we can conclude that bill by 12:30 p.m. We never complete these by 12:30, but if I keep saying 12:30 maybe one day it will happen. Then we will be back on reconciliation, although there could be one intervening vote somewhere during the noon hour. I need to discuss that with the distinguished minority leader before we adjourn or recess this evening.

It would now be my intent that we go back on reconciliation. I understand the Senator from Oregon, the chairman of the Finance Committee, has an amendment.

THE CONSOLIDATED OMNIBUS BUDGET RECONCILIATION ACT OF 1985

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate the reconciliation bill.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 1730) to provide for reconciliation pursuant to section 2 of the First Concurrent Resolution on the Budget for Fiscal Year 1986 (S. Con. Res. 32, 99th Congress).

The Senate resumed consideration of the bill.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, we are trying to, as best we can—there is no requirement under the rules, of course—to ascertain how many amendments there are and their general nature. We are starting a list. Anybody who is interested in seeing the list thus far, we have it. We have not yet scheduled a series of them. But we have agreed that the next amendment should come from this side, and we have agreed that the distinguished chairman of the Finance Committee, wearing the hat of the chairman of the Commerce Committee—is that correct?

Mr. PACKWOOD. On behalf of Senator DANFORTH, that is correct.

Mr. DOMENICI. Should go first.

Mr. PACKWOOD. Mr. President, what is the time limit on the amendment? Is it 1 hour a side?

The PRESIDING OFFICER. First-degree amendments have 1 hour to each side.

AMENDMENT NO. 856

(Purpose: To add provisions facilitating activities of the National Railroad Passenger Corporation)

Mr. PACKWOOD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oregon [Mr. PACKWOOD], from Mr. Danforth, proposes an amendment numbered 856.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 108, line 6, insert "(a)" immediately after "Sec. 402."; and insert the following immediately after line 13:

(b) Section 103(3) of the Rail Passenger Service Act (45 U.S.C. 502(3)) is amended—

(1) by inserting "used" immediately before "automobiles"; and

(2) by striking "and their occupants".

(c) Section 303(a)(1)(E) of the Rail Passenger Service Act (45 U.S.C. 543(a)(1)(E)) is amended by inserting "and shall serve until their successors have been appointed" immediately before the period at the end thereof.

(d) Section 303(d) of the Rail Passenger Service Act (45 U.S.C. 543(d)) is amended by striking the third sentence.

(e) Section 304(c) of the Rail Passenger Service Act (45 U.S.C. 544(c)) is amended by adding at the end thereof the following:

"(3) The preferred stock issued pursuant to paragraphs (1) and (2) of this subsection shall be deemed to have been issued as of the date of receipt by the Corporation of the funds for which such stock is issued.".

(f)(1) Section 305(1) of the Rail Passenger Service Act (45 U.S.C. 545(1)) is repealed.

(2) Section 305(m) of the Rail Passenger Service Act (45 U.S.C. 545(m)) is amended by striking "Center" each place it appears and inserting in lieu thereof "Corporation".

(3) Section 308(a) of the Rail Passenger Service Act (45 U.S.C. 548(a)) is amended to read as follows:

"(a) The Corporation shall submit to the Congress a report not later than February 15 of each year. The report shall include, for each route on which the Corporation operated intercity rail passenger service during the preceding fiscal year, data on ridership, short-term avoidable profit or loss per passenger mile, revenue-to-cost ratio, revenues, the Federal subsidy, the non-Federal subsidy, and on-time performance. Such report shall also specify significant

operational problems which have been identified by the Corporation, together with proposals by the Corporation to resolve such problems.".

(g) Section 306(f) of the Rail Passenger Service Act (45 U.S.C. 546(f)) is amended by inserting at the end thereof the following: "The Corporation shall be permitted to participate in the contract air program administered by the General Services Administration in markets where service provided by the Corporation is competitive with regard to rates and total trip times.".

(h) Section 306(m) of the Rail Passenger Service Act (45 U.S.C. 546(m)) is amended by inserting "only" immediately after "citizen".

(i)(1) Section 403(d) of the Rail Passenger Service Act (45 U.S.C. 563(d)) is amended—

(A) by striking "criteria set forth in section 404(d)(2)(B)" and inserting in lieu thereof "criterion set forth in section 404(d)(2)"; and

(B) by inserting after the first sentence thereof the following: "Beginning October 1, 1986, if such service is not projected to meet such criterion, the Corporation may discontinue such service, unless the Corporation and a State (or States) enter into an agreement which ensures that the criterion will be met.".

(2) Section 404(c)(3)(B) of the Rail Passenger Service Act (45 U.S.C. 564(c)(3)(B)) is amended—

(A) by striking "60" and inserting in lieu thereof "120";

(B) by striking all after "submission" through "amendment"; and

(C) by adding at the end thereof the following: "For purposes of this subparagraph, continuity of session of the Congress is broken only by an adjournment sine die and the days on which either House is not in session because of adjournment of more than 3 days to a day certain are excluded in the computation of such 120-day period.".

(3) Section 404(c)(4)(B) of the Rail Passenger Service Act (45 U.S.C. 564(c)(4)(B)) is amended to read as follows:

"(B) The Corporation shall conduct an annual review of each route in the basic system to determine if such route is projected to meet the criterion appropriate to such route set forth in subsection (d), as adjusted to reflect constant 1979 dollars. If the Corporation determines on the basis of such review that such route will not meet such criterion, the Corporation shall discontinue, modify, or adjust the operation of rail passenger service over such route so that the criterion will be met.".

(4)(A) The first sentence of section 404(d)(1) of the Rail Passenger Service Act (45 U.S.C. 564(d)(1)) is amended—

(i) by striking "if—" and inserting in lieu thereof "if";

(ii) by striking "(A)"; and

(iii) by striking all after "mile" the second time it appears therein and inserting in lieu thereof a period.

(B) The second sentence of section 404(d)(1) of the Rail Passenger Service Act (45 U.S.C. 564(d)(1)) is amended by striking "and passenger mile per train mile".

(C) The last sentence of section 404(d)(1) of the Rail Passenger Service Act (45 U.S.C. 564(d)(1) is repealed.

(5) Section 404(d)(2) of the Rail Passenger Service Act (45 U.S.C. 564(d)(2)) is amended—

(A) by striking "if—" and inserting in lieu thereof "if";

(B) by striking "(A)"; and

(C) by striking all after "mile" the second time it appears therein and inserting in lieu thereof a period.

(6) Section 402 of the Rail Passenger Service Act (45 U.S.C. 562) is amended by adding at the end thereof the following:

"(i) Nothing in this section shall preclude parties from entering into an agreement, after the determination of the Commission or their initial agreement under this section, with respect to related costs described in this section.".

(7) The provisions of this subsection shall take effect on October 1, 1986.

(j) Title VII of the Rail Passenger Service Act (45 U.S.C. 621 et seq.) is repealed.

(k) Section 306(a)(3) of the Rail Passenger Service Act (45 U.S.C. 546(a)(3)) is amended by striking ", except as otherwise provided in this Act,".

(l) Section 306(k) of the Rail Passenger Service Act (45 U.S.C. 546(k)) is repealed.

(m) Section 402(g) of the Rail Passenger Service Act (45 U.S.C. 562(g)) is repealed.

(n) Section 405(a) of the Rail Passenger Service Act (45 U.S.C. 565(a)) is amended by adding at the end thereof the following: "For purposes of this section and any agreement designed to implement the provisions of this section, a 'discontinuance of intercity rail passenger service' shall not include any reduction in frequency, seasonal suspension or other service modification that does not result in elimination of all intercity rail passenger service on a route.".

(o)(1) The first sentence of section 805(2)(A) of the Rail Passenger Service Act (45 U.S.C. 644(2)(A) is amended—

(A) by striking "shall" and inserting in lieu thereof "may"; and

(B) by striking "annually a".

(2) Section 805(2)(A) and (B) of the Rail Passenger Service Act (45 U.S.C. 644(2)(A) and (B)) is amended by striking "audit" wherever it appears and inserting in lieu thereof "audits".

(p) Section 806 of the Rail Passenger Service Act (45 U.S.C. 645) is repealed.

(q) Section 810 of the Rail Passenger Service Act (45 U.S.C. 649) is repealed.

(r) Section 811 of the Rail Passenger Service Act (45 U.S.C. 650) is repealed.

(s) Section 703(1)(D) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 853(1)(D)) is repealed.

(t)(1)(A) Section 1163 of the Northeast Rail Service Act of 1981 (45 U.S.C. 1111) is repealed.

(B) The item relating to section 1163 in the table of contents of the Northeast Rail Service Act of 1981 is amended to read as follows:

"Sec. 1163. Repealed.".

(C) Any decisions of the Interstate Commerce Commission before the date of enactment of this Act under section 1163 of the Northeast Rail Service Act (45 U.S.C. 1111) shall have no force and effect after the date of enactment of this Act.

(2) Section 402(a) of the Rail Passenger Service Act (45 U.S.C. 562(a)) is amended—

(A) by inserting "(1)" immediately after "(a)";

(B) by inserting "(2)" immediately before "Notwithstanding"; and

(C) by adding at the end of paragraph (2), as so designated by subparagraph (A) of this paragraph, the following: "The Commission, in making such a determination, shall assign to an entity obtaining services pursuant to this paragraph the costs incurred by the Corporation solely for the benefit of that entity, plus a proportionate share of all other costs of providing services covered by this paragraph that are incurred for the common benefit of more than one user of the rail properties covered by this paragraph. The proportionate share of such other costs assigned to a user shall be based on relative measures of volume of car or train operations, passengers handled, tonnage, or other factors that reasonably reflect the relative use of the rail properties covered by this paragraph.".

(3) The compensation standard established by the amendment made by paragraph (2) of this subsection shall be effective in any proceeding instituted under section 402(a)(2) of the Rail Passenger Service Act (45 U.S.C. 562(a)(2)) after the date of enactment of this Act.

Mr. PACKWOOD. Mr. President, this is a committee amendment offered on behalf of the Commerce Committee. It would have been offered by the chairman, Mr. DANFORTH. However, Senator DANFORTH and Senator EAGLETON are unavoidably absent due to important business of state and cannot be present today. I am offering it on his behalf.

Mr. PACKWOOD. Mr. President, I offer this amendment dealing with Amtrak as a committee amendment for the Commerce Committee. It is an amendment that enjoys the support of the members of the committee. Its primary purpose is to allow Amtrak to increase revenues and reduce costs so that it can operate its system with fewer Federal dollars in the coming years.

Last month, for purpose of budget reconciliation, the Commerce Committee approved a legislative provision that would limit appropriations for Amtrak to not more than $582 million in fiscal year 1986; not more than $606.1 million in fiscal year 1987; and not more than $630.3 million in fiscal year 1988. This provision is now incorporated in S. 1730.

Until the day of the committee's executive session on reconciliation, it was not clear what budget levels would be approved, and, in turn, what other legislative changes would be required in order for Amtrak to operate within such budget limitations. After the executive session, Amtrak proposed to the committee certain legislative changes that would allow it to operate the system within these budget levels. These provisions are included in this amendment. Also included in this amendment are provisions that were contained in last year's Amtrak authorization bill, which was approved by the Commerce Committee but never considered by the Senate. Let me highlight just a few of the provisions.

First. The amendment would modify the criteria the Interstate Commerce Commission [ICC] is to use in settling future disputes regarding the compensation to be paid to Amtrak for the use of the Northeast corridor by freight railroads, such as Conrail, and various commuter authorities. This would in-

crease Amtrak's revenues by approximately $65 million annually, by 1988.

Second. It would clarify that Amtrak's authority to operate auto-train service extends to the transportation of used automobiles regardless of whether the owners of the automobiles are on the train at the same time. This would increase Amtrak's revenues by approximately $1 million annually.

Third. It would permit Amtrak to participate in the contract air program administered by the General Services Administration in markets where Amtrak's services are competitive with that of air carriers. This would increase Amtrak's revenues by approximately $1 million annually.

Fourth. It would require commuter trains operated by Amtrak to meet the short-term avoidable loss-per-passenger-mile criterion now applicable to other Amtrak trains. If the commuter trains do not meet this criterion, Amtrak may discontinue the trains, unless the States agree to contribute further to the costs of the trains. This would increase Amtrak's revenues by approximately $2 or $3 million annually.

Fifth. It would clarify that Amtrak may adjust the frequencies of trains or make other modifications without incurring labor protection costs. The statute now provides that Amtrak shall incur such labor protection costs only when it "discontinues" trains. The amendment simply clarifies that the term "discontinuance" means what it says, and does not mean "frequency reduction" or "service modification." This would reduce Amtrak's potential costs by approximately $20 million annually.

Mr. President, I believe a majority of our colleagues support continued Federal funding for Amtrak, albeit at reduced levels from years past. This amendment is vitally important to Amtrak if it is to operate its system at these reduced levels. It is supported by Amtrak, rail labor, and the National Association of Railroad Passengers. I urge our colleagues to vote for the amendment.

Mr. President, I ask unanimous consent that a section-by-section analysis be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF THE AMTRAK AMENDMENT TO S. 1730, THE CONSOLIDATED OMNIBUS RECONCILIATION ACT

The following is a section-by-section analysis of the proposed amendment. By way of background, subsections c, e, f, h, i, j, k, l, m, o, p, q, r, and s, are provisions adopted by the Committee last year in S. 2537. Subsections b, d, g, n and t are provisions which Amtrak proposed this year.

Subsection (a)—This subsection amends section 402 of the Consolidated Omnibus Budget Reconciliation Act of 1985 by inserting an (a) to make this section a subsection. This section now contains Amtrak's authorization numbers, which previously were approved by the Committee. The amendment does not change the numbers.

Subsection (b)—This subsection amends section 103(3) of the Rail Passenger Service Act (RPSA) to provide that Amtrak's authority to operate auto-ferry service extends to the transportation of used automobiles regardless of whether the automobiles are accompanied by their owners. Amtrak now operates Auto Train service between Virginia and Florida. Under the current law, it only can transport an automobile if the automobile's owner is also travelling on the train regardless of whether excess space is available. This amendment would permit Amtrak to generate additional revenues of approximately $1 million annually.

Subsection (c)—This subsection amends section 303(a) of the RPSA to provide that the two members of the Amtrak Board of Directors who are selected by the preferred stockholder (the Federal Government) shall serve until their successors are appointed. The law now provides that other members of Amtrak's Board shall serve until their successors are appointed. The amendment makes the law consistent.

Subsection (d)—This subsection amends section 303(d) of the RPSA to strike the provision that states that the president of Amtrak shall not be paid in excess of $85,000.00 and that other officers shall not be paid at a rate in excess of that prescribed for level I of the Executive Schedule. The president's salary has been capped at $85,000.00 since 1975. The salaries of other officers all are below that of the president. Over the last three years, Amtrak has lost three of its top vice-presidents largely because of the statutory pay cap. In one instance, the vice-president took five of his best people. Amtrak can ill-afford to lose top personnel especially at this time when it is under pressure to modify its operations so as to live within new budgetary limitations. With this amendment the salaries of officers will be set by Amtrak's Board of Directors.

Subsection (e)—This subsection amends section 304(c) of the RPSA to permit Amtrak to restate its books and tax returns for years prior to fiscal year 1982 as if preferred stock had actually been issued in the years when it received certain capital grant funds. This amendment is necessary to remove an uncertainty as to the reporting of depreciation of the assets acquired with such capital grants.

Subsection (f)—This subsection repeals section 305(1) of the RPSA as no longer necessary. Also, Section 305(m) and 308(a) are amended to provide for an annual report by Amtrak to Congress by February 15 of each year that includes certain route-by-route data and other information. The amendment's new report replaces monthly and semiannual reports now required to be submitted to Amtrak.

Subsection (g)—This subsection amends section 306(f) of RPSA to permit Amtrak to participate in the contract air program administered by the General Services Administration (GSA) in markets where service of Amtrak is competitive with that of air carriers. Under this program, GSA lists certain carriers as "preferred carriers" for federal employee travel. The program currently is restricted to air carriers. This amendment would allow Amtrak to increase revenues by approximately $1 million annually.

Subsection (h)—This subsection amends section 306(m) of the RPSA to specify that Amtrak shall be considered a citizen only of the District of Columbia for purposes of determining original jurisdiction in Federal district courts. Amtrak has continued to encounter arguments that it can still be considered a citizen of other jurisdictions, and that therefore diversity jurisdiction in Federal courts does not exist. This amendment clarifies the original intent of the law.

Subsection (i)—This subsection amends section 403(d) of the RPSA regarding Amtrak's operation of commuter trains on six routes through Illinois, Indiana, Michigan, New Jersey, New York, Pennsylvania, and West Virginia. Under the present section, Amtrak is required to operate these trains if they meet the current criterion for short-distance trains of 80 passenger miles per train [pm/tm], a criterion which would be eliminated by this subsection. The proposed revision provides that, effective October 1, 1986, if a commuter train operated under this section does not meet the criterion for short-distance trains of a 9-cent short-term avoidable loss per passenger mile, Amtrak may discontinue the train, unless the State or States involved enter into an agreement which ensures that the criterion is met. The amendment is intended to give Amtrak the flexibility it needs to negotiate individual compensation agreements with the States and communities served by these trains to cover any losses associated with this service, which could result in several million dollars in savings.

This subsection also amends section 404 (c) and (d) of the RPSA to eliminate, effective October 1, 1986, the criterion of passenger mile per train mile. Under the current law, each Amtrak route is required to meet both the passenger mile per train mile and short-term avoidable loss criteria. If a route is projected not to meet these criteria, Amtrak must discontinue, modify or adjust the service over the route so that the criteria will be met. Under the amendment, Amtrak will continue to be required to review each of its routes to determine whether it meets the criterion on short-term avoidable loss per passenger mile, which Amtrak believes is a more appropriate measure of cost-effectiveness.

This subsection further amends section 404(c) of the RPSA to provide that any amendments proposed by Amtrak to its Route and Service Criteria shall not be effective until 120 days after they have been submitted to the Congress. This amendment is made necessary by the fact that the current law contains a one-house legislative veto of the type recently declared unconstitutional by the United States Supreme Court.

Subsection (j)—This subsection repeals title VII of the RPSA, which authorized interim emergency Federal financial assistance to private railroads to assist them in carrying out the operating contracts with Amtrak authorized by the Act. This financial assistance was never required or used.

Subsection (k)—This subsection amends section 306(a)(3) of the RPSA to strike an obsolete reference to the Interstate Commerce Act.

Subsection (l)—This subsection repeals section 306(k) of the RPSA which deals with a study the Interstate Commerce Commission was required to do back in 1977.

Subsection (m)—This subsection repeals section 402(g) of the RPSA which requires Amtrak to enter into an industrywide agreement with respect to the operation of charter and special trains. Neither Amtrak nor the operating railroads have been able to

come up with such an agreement. In the meantime, Amtrak has been contracting for charter and special trains on an ad hoc basis, which has proved satisfactory. The repeal of this provision means that Amtrak will continue to handle such trains on an ad hoc basis.

Subsection (n)—This subsection amends section 405(a) of RPSA to clarify that the term "discontinuance" of rail service does not include any reduction in frequency, seasonal suspension or other service modification that does not result in the elimination of all service on a route. The law now provides that employees are entitled to labor protection payments when they lose their jobs as a result of a discontinuance or abandonment of a route. To date, the term discontinuance has not been interpreted to include frequency reductions or service modifications. In order to live within its new budget limitations, Amtrak is expected to have to reduce frequencies and modify service on some routes. In the event these adjustments triggered labor protection, Amtrak could incur an additional $20 million in costs. This amendment makes clear that Amtrak will not incur such costs.

Subsection (o)—This subsection amends section 805(2)(A) of the RPSA to eliminate the requirement that the General Accounting Office perform an annual performance audit of Amtrak. With this amendment, such audits will be discretionary.

Subsection (p)—This subsection repeals section 806 of the RPSA which deals with a report the Secretary of Transportation was required to do back in 1973.

Subsection (q)—This subsection repeals section 810 of the RPSA which deals with a study the Secretary of Transportation was required to do back in 1980.

Subsection (r)—This subsection repeals section 811 of the RPSA which requires Amtrak to submit an annual report to Congress on the ratio of revenue to operating expenses on each of its routes. The report is not necessary, because the same information would be contained in the new report provided for by subsection (f).

Subsection (s)—This subsection repeals section 703(1)(D) of the Railroad Revitalization and Regulatory Reform Act of 1976, which requires Amtrak and the Secretary of Transportation to submit annual reports on the progress of the Northeast Corridor Improvement Project. These reports are time consuming and not necessary.

Subsection (t)—This subsection amends section 402(a) of the RPSA to modify the criteria to be used by the Interstate Commerce Commission (ICC) in future determinations of the compensation to be paid Amtrak for the use of the Northeast Corridor by freight railroads (primarily Conrail) and various commuter authorities. Amtrak owns most of the Northeast Corridor (Washington, D.C. to Boston, Massachusetts) and has been determined to be the dominant user. However, the tracks and other facilities also are used by freight and commuter trains, which pay Amtrak for the use. The Northeast Rail Service Act of 1981 (NERSA) directed the ICC to determine an appropriate costing methodology for compensation to Amtrak for use of the Northeast Corridor. Amtrak believes that under the ICC's decision, the users of the Northeast Corridor are paying annual compensation of approximately $65 million less than they should. The amendment would void the ICC's old determination, and direct it to decide future cases using a different standard if Amtrak and the various users cannot reach agreements on the compensation issue.

Mr. PACKWOOD. Mr. President, I would be happy to answer questions about the amendment. The chairman of the Budget Committee and the ranking minority member are aware of the amendment.

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, I rise to express my opposition to a provision in the amendment offered by the Senator from Oregon. This provision would impose higher costs on users of the Northeast corridor including commuter agencies operated by States and local governments. I do not support this provision, because it will significantly increase costs to a relatively small number of State and local mass transit agencies. New Jersey will bear the heaviest burden under the provision.

Mr. President, let me make clear that I do not oppose those provisions in this amendment which authorize appropriations for Amtrak or improve its ability to operate efficiently. I am a strong supporter of Amtrak and will continue to be. I object to one subsection of this amendment, subsection (t) dealing with the compensation paid to Amtrak by users of the Northeast corridor.

In 1981, the Congress decided that the Interstate Commerce Commission should determine how much users of the Northeast corridor, Conrail, and State and local commuter agencies, should pay to the owner, Amtrak. The decision, to have the users pay avoidable costs has been in place since the decision in ex parte 417 was issued by the ICC in February 1983. In its decision, the ICC concluded that "an avoidable costing methodology was the most appropriate basis for calculating the compensation to be paid to Amtrak by commuter rail passenger and freight services."

Mr. President, Congress specifically left this decision to the experts at the ICC. Congress did not instruct the ICC to come up with a decision which subsidizes Amtrak at the expense of the commuter agencies. The ICC decision was a nonpolitical decision based on the facts.

Mr. President, the facts of the matter might have changed over time. Surely, Congress has reduced its subsidy to Amtrak. I do not hold that no reconsideration of the ICC decision should occur. I do hold that the ICC and not the Congress should make that decision. The provision reallocating rates charged to users of the Northeast corridor reverses the decision made by the Congress in 1981 to have the ICC decide this matter. What Congress was not competent to decide in 1981, it is no more competent to decide now.

The driving force behind this provision is to buffer the budget reductions suffered by Amtrak. I yield to no one in my support for Amtrak. It was this Senator who came before the Senate with a proposal to freeze Amtrak subsidies at fiscal year 1985 levels. I have supported funding Amtrak at a reasonable level in the Appropriations Committee. In fact, in the Appropriations Committee, we have held the line on Amtrak cuts. We have made cuts in many other vital programs. Now we are asked to instruct the ICC to give more to Amtrak and take it from commuter agencies whose Federal assistance has already been cut.

If the Senator from Oregon was asking to instruct the ICC to reconsider ex parte 417 without prejudice to the outcome, I might support that motion. But, this amendment amounts to a simple transfer of funding, about $70 million, to Amtrak from New Jersey Transit, other commuter agencies and Conrail.

My colleague from Oregon has found a way to insure Amtrak gets $70 million from sources closed to Amtrak by the ICC. Such an insurance policy has some appeal to those of us concerned about the future of Amtrak support. But, this insurance policy is bought at a high price for Conrail States and those along the Northeast corridor.

Mr. President, I will not request a vote on this amendment because I can count, and more States stand to gain by this amendment than would lose by it. So I conclude that the votes to delete this provision would be hard to come by. However, I would inform my colleagues that I have been in contact with the chairman of the House Subcommittee on Commerce, Transportation and Tourism, Congressman FLORIO from New Jersey. My House colleague informs me that he strongly opposes this provision and will work to insure that it does not survive conference.

Therefore, at this moment, I rise only to make clear my opposition to this amendment. I will withhold a request for the yeas and nays. I do so in the belief that this provision will not survive a conference with the House on S. 1730.

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. I yield such time as the Senator from New Jersey [Mr. BRADLEY] desires.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I rise in opposition to the amendment offered by the distinguished Senator from Oregon, for many of the same reasons that my distinguished col-

league from New Jersey has already explained.

Conrail and numerous commuter rail lines in the Northeast—and that includes New Jersey Transit—operate part of their service on the Northeast corridor which is owned by Amtrak. In other words, Amtrak owns Northeast corridor, and since commuter rails do not want to build separate tracks, they use the existing lines that Amtrak believes is necessary for its own trains.

Mr. President, under current ICC rulings, both Conrail and the commuter railways pay Amtrak for what are called avoidable costs, which are the additional costs that are incurred by Amtrak because of the use of the Amtrak lines by the commuter rail lines. In addition, according to ICC rulings, as the dominant user of the Northeast corridor, Amtrak is the responsible party for paying the fixed costs associated with the Northeast corridor. In other words, Mr. President, if there were no commuter lines, Amtrak would have to pay the fixed costs involved in keeping the railbed up to date and keeping the rail lines and the tracks up to date. The commuter rail service pays the additional costs. The ICC has determined that there is no reason for commuter rail lines to pay a part of the fixed costs which, whether they were commercial rail lines or not, Amtrak has to pay.

So, Mr. President, the amendment that is now before the Senate would require the commuter rails that use the Northeast corridor to pay for fixed costs as well as avoidable costs. This overturns the judgment of the ICC.

I see no reason why we should ask the users of commuter rail lines to subsidize Amtrak services, particularly in light of the sizeable reduction in funding that has already taken place for mass transit.

Frankly, I believe that New Jersey and other States that have worked long and hard to develop commuter rail service should not have to pick up the cost of maintaining the rails and the rail beds. The ICC agrees. But this amendment overrules the ICC.

Mr. President, there are many issues such as this one that come up from time to time in this body which affect just a few States; and unless a kind of sense of fairness prevails, there is a real temptation to strike at those States. Why? Since there are only two Senators from each State they often do not have the votes if a provision affects only a few States adversely.

Mr. President, that is the case, if you cannot see the whole and continue to see only the part—and ccntinue to interpret your interest as being serving only the part.

So, Mr. President, I have no doubt that if this amendment were brought to a vote we who oppose it would be in the minority and would not prevail.

As my distinguished colleague from New Jersey, Senator LAUTENBERG—who has taken real leadership on a variety of mass transit and transportation issues—has stated, representatives from New Jersey Transit have asked us not to press for a record vote. Frankly, I agree with their assessment. But this is one of those occasions where I say thank goodness for the other body, thank goodness for the seniority system, thank goodness for a potential conference on the issue. I say thank goodness for all of those things on this particular occasion because I know the distinguished chairman of the Finance Committee has had many hours of negotiating with the distinguished subcommittee chairman in the House of Representatives, Congressman Florio, on many issues. It is my hope and expectation that in any conference concerning this issue, the House subcommittee chairman's view of this issue will prevail and that we will not take a step which adversely affects just a few States for a very short-term objective and with very little evidence offered to overrule the ICC's considered judgment.

So, Mr. President, it is my hope and expectation that the provision now before the Senate will be modified in conference to protect commuter rail agencies and soften the burden on the hundred of thousands of commuters who rely on mass transit for their transportation needs.

With that, Mr. President, I am prepared to yield the floor with every expectation that after these two presentations the distinguished chairman from Oregon will modify the amendment so as to exclude the commuter rail payment and find another innovative way to generate the savings.

I hope that that is what he is going to do. If not, I hope that he will at least express some flexibility on this issue when it comes to a conference committee.

Mr. PACKWOOD. Mr. President, I find myself in agreement with my good friend from New Jersey on one point. This is on the merits of the seniority system. I indeed agree that it is a wonderful system. I would hope that this body would not be so foolish as to do away with it some time in the future.

Much as I am persuaded by a great many things that my good friend says, as this is a committee amendment, not my amendment, and I am presenting it on behalf of the chairman of the committee, regardless of how persuaded I might be about the merits, which I am not, I say to my good friend, I feel constrained to say I cannot feel that I could offer to amend it when it has been offered by the committee.

● Mr. ROCKEFELLER. Mr. President, I support this amendment. Amtrak will have to absorb a significant cut in its subsidy from the Federal Government and, in my view, deserves some guidance from the Congress as to how the necessary savings can be achieved.

I have maintained, throughout the debate this year over Amtrak, that the country needs passenger rail service. While I recognize the need to reduce the level of Federal funding, it's counterproductive to stretch savings on Amtrak to the point where rail service deteriorates and the route system unravels. The cutback proposed for fiscal 1986, Amtrak has indicated, is the deepest that can be absorbed. For budgetary reasons, we're forced to stretch Amtrak's resources to the limit, but there's no good reason to push the system over the brink and deny it the means to cut costs as efficiently as possible.

In endorsing the amendment by my colleague from Missouri [Mr. DANFORTH], I would like the record to be clear on a point of potential concern to residents in my State of West Virginia. A provision of the amendment would allow Amtrak to discontinue unprofitable commuter lines if their per passenger costs exceed a certain threshold.

I have a letter from Amtrak President Graham Claytor, which I would like to include with my statement, asserting that the proposed provision would not jeopardize service on the Blue Ridge train which connects areas of my State with Washington, DC. It is also Amtrak's view, as I understand it, that the proposed provision on commuter lines should have no impact on pending negotiations to transfer responsibility for operating the Blue Ridge train to the State of Maryland. I believe my colleague has a copy of this letter and I would like to ask his view of the assurances it provides on this matter.

I thank the Senator.

Mr. DANFORTH. I have reviewed Mr. Claytor's letter to you. I believe it does provide the assurances that you were seeking on these two issues.

The letter follows:

NATIONAL RAILROAD PASSENGER CORPORATION,
Washington, DC, October 16, 1985.

Hon. JOHN D. ROCKEFELLER IV,
U.S. Senate, Senate Russell Office Building, Washington, DC.

DEAR SENATOR ROCKEFELLER: I understand that Amtrak has informed your staff of our support on the Danforth Amendment to S. 1730, the Consolidated Omnibus Reconciliation Act, now pending before the Senate.

Because your staff raised some concerns about the effects of this legislation on the Blue Ridge service to West Virginia, I want to assure you that service is in no way jeopardized because of the proposed changes to Section 403(d) of the Rail Passenger Service Act.

First, the proposed amendment simply applies a cost criterion to the so-called "Sunset Commuter" trains that has always been applied to our basic system trains. That criterion requires that no train can lose more

than 11.4 cents per passenger mile. The Blue Ridge falls well within that criterion and would not be affected in the foreseeable future.

Amtrak has been negotiating with Maryland Department of Transportation for the transfer of the Blue Ridge operation between Washington and Martinsburg. Maryland has provisionally agreed to assume operation of the Blue Ridge service by incorporating it as an additional MARC (Maryland Rail Commuter Service) train, retaining all revenues from the service, continuing operation between Martinsburg and Washington, and maintaining its separate identity as the Blue Ridge. Although no accord has been concluded between Maryland and the Chessie System for the addition of the Blue Ridge to the existing Maryland DOT-B&O Commuter Agreement, the parties are evaluating their respective positions, and we have reason to believe that they will reach agreement in the very near future.

I hope this has been responsive to your concerns. If you have any further comments or questions, please let me know.

Sincerely,

W. GRAHAM CLAYTOR, Jr.,
President, Amtrak.

● Mr. DANFORTH. Mr. President, I offer this amendment dealing with Amtrak as a committee amendment for the Commerce Committee. It is an amendment that enjoys the support of a strong majority of the committee. Its primary purpose is to allow Amtrak to increase revenues and reduce costs so that it can operate its system with fewer Federal dollars in the coming years.

Last month, for purpose of budget reconciliation, the Commerce Committee approved a legislative provision that would limit appropriations for Amtrak to not more than $582 million in fiscal year 1986; not more than $606.1 million is fiscal year 1987; and not more than $630.3 million in fiscal year 1988. This provision is now incorporated in S. 1730.

Until the day of the committee's executive session on reconciliation, it was not clear what budget levels would be approved, and, in turn, what other legislative changes would be required in order for Amtrak to operate within such budget limitations. After the exectuve session, Amtrak proposed to the committee certain legislative changes that would allow it to operate the system within these budget levels. These provisions are included in this amendment. Also included in this amendment are provisions that were contained in last year's Amtrak authorization bill, which was approved by the Commerce Committee but never considered by the Senate. Let me highlight just a few of the provisions.

First. The amendment would modify the criteria the Interstate Commerce Commission [ICC] is to use in settling future disputes regarding the compensation to be paid to Amtrak for the use of the Northeast corridor by freight railroads, such as Conrail, and various commuter authorities. This would increase Amtrak's revenues by approximately $65 million annually by 1988.

Second. It would clarify that Amtrak's authority to operate auto-train service extends to the transportation of used automobiles regardless of whether the owners of the automobiles are on the train at the same time. This would increase Amtrak's revenues by approximately $1 million annually.

Third. It would permit Amtrak to participate in the Contract Air Program administered by the General Services Administration in markets where Amtrak's services are competitive with that of air carriers. This would increase Amtrak's revenues by approximately $1 million annually.

Fourth. It would require commuter trains operated by Amtrak to meet the short-term avoidable loss per passenger mile criterion now applicable to other Amtrak trains. If the commuter trains do not meet this criterion, Amtrak may discontinue the trains, unless the States agree to contribute further to the costs of the trains. This would increase Amtrak's revenues by approximately $2 or $3 million annually.

Fifth. It would clarify that Amtrak may adjust the frequencies of trains or make other modifications without incurring labor protection costs. The statute now provides that Amtrak shall incur such labor protection costs only when it discontinues trains. The amendment simply clarifies that the term discontinuance means what it says, and does not mean frequency reduction or service modification. This would reduce Amtrak's potential costs by approximately $20 million annually.

Mr. President, I believe a majority of our colleagues support continued Federal funding for Amtrak, albeit at reduced levels from years past. This amendment is vitally important to Amtrak if it is to operate its system at these reduced levels. It is supported by Amtrak, rail labor, and the National Association of Railroad Passengers. I urge our colleagues to vote for the amendment.

● Mr. ANDREWS. I am advised that the provision in S. 1730 dealing with the funding levels for Amtrak is basically an authorizing provision. However, the actual language of the provision refers to a limitation on appropriations. Would the gentleman from Missouri please tell me whether this provision is indeed intended to be an authorization, and, if so, whether he intends to clarify the langauge in conference?

● Mr. DANFORTH. This provision is indeed intended to be an authorization for Amtrak. I will make every effort to see that this language is clarified in conference.●

Mr. PACKWOOD. I am prepared to vote, although I have no desire to ask for a rollcall vote.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. CHILES. I yield back.

Mr. PACKWOOD. I yield back the time on this side.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Oregon.

The amendment (No. 856) was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time? If neither side yields time, time will be charged equally against both sides.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

AMENDMENT NO. 857

(Purpose: To provide for controls on expenditures for Federal motor vehicles)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Arizona [Mr. DECONCINI] proposes an amendment numbered 857.

Mr. DECONCINI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 454, after line 24, insert the following new part:

Part D—Federal Motor Vehicle Expenditure Control

MONITORING SYSTEM

SEC. 831. The head of each executive agency, including the Department of Defense, shall designate one office, officer, or employee of the agency to establish and operate a central monitoring system for, and provide oversight of, the motor vehicle operations of the agency, related activities, and related reporting requirements.

DATA COLLECTION

SEC. 832. (a) The head of each executive agency, including the Department of De-

fense, shall develop a system to identify, collect, and analyze data with respect to all costs incurred by the agency in the operation, maintenance, acquisition, and disposition of motor vehicles, including Government-owned vehicles, leased vehicles, and privately owned vehicles used for official purposes.

(b) The Administrator, in cooperation with the Comptroller General and the Director, shall promulgate standards governing the establishment and operation by executive agencies of the systems required by the subsection (a), including standards with respect to data concerning the costs and uses of motor vehicles and with respect to the uniform collection and submission of such data. Each executive agency, including the Department of Defense, shall comply with such standards.

AGENCY STATEMENTS WITH RESPECT TO MOTOR VEHICLE USE

SEC. 833. (a) The head of each executive agency, including the Department of Defense, shall include with the appropriation request of such agency submitted under section 1108 of title 31, United States Code, for fiscal year 1987 and each succeeding fiscal year, a statement—

(1) specifying—

(A) the total motor vehicle acquisition, maintenance, leasing, operation, and disposal costs incurred by such agency in the most recently completed fiscal year; and

(B) an estimate of such costs for the fiscal year in which such request is submitted for the succeeding fiscal year; and

(2) justifying why the existing and any new motor vehicle acquisition, maintenance, leasing, operation, or disposal requirements of the agency cannot be met through the Interagency Fleet Management System operated by the Administrator or through a qualified private contractor.

(b) The head of each executive agency shall comply with the standards promulgated under section 832(b) in preparing each statement required under subsection (a).

PRESIDENTIAL REPORT

SEC. 834. The President shall include with the budget transmitted pursuant to section 1105 of title 31, United States Code, for fiscal year 1987 and each succeeding fiscal year, or in a separate written report to the Congress for each such fiscal year, a summary and analysis of the statements most recently submitted by the heads of executive agencies pursuant to section 833(a). Each such summary and analysis shall include a review of the potential cost savings that could be achieved in the acquisition, maintenance, leasing, operation, and disposal of motor vehicles by executive agencies through—

(1) the use of a qualified private fleet management firm or another private contractor;

(2) increased reliance by executive agencies on the Interagency Fleet Management System operated by the Administrator; or

(3) other existing motor vehicle management systems.

STUDY REQUIRED

SEC. 835. (a) The head of each executive agency, including the Department of Defense, shall conduct a comprehensive and detailed study of the costs, benefits, and feasibility of entering into a contract with a qualified fleet management firm or another private contractor to meet its motor vehicle operation, maintenance, leasing, acquisition, and disposal requirements. Such study shall compare the costs, benefits, and feasibility of such a contract to the costs and benefits of the agency's current motor vehicle operations and to the costs, benefits, and feasibility of the use of the Interagency Fleet Management System operated by the Administrator.

(b) Within 6 months after the date of enactment of this Act, the head of each executive agency shall submit a report concerning the study required under subsection (a) to the Director and the Comptroller General.

(c) Within one year after the date of enactment of this Act, the Comptroller General shall submit an analysis of the reports received under subsection (b) to the Congress.

INTERAGENCY CONSOLIDATION

SEC. 836. The Administrator shall review and identify interagency opportunities for the consolidation of motor vehicles, related equipment, and facilities, and of functions relating to the administration and management of such vehicles, equipment, and facilities, in order to reduce the size and cost of the Federal Government's motor vehicle fleet. Within one year after the date of enactment of this Act, the Administrator shall submit a report to the Congress specifying the findings of the Administrator from the review conducted under the preceding sentence.

CONSOLIDATION OF FACILITIES

SEC. 837. The Administrator shall require the head of each executive agency, including the Department of Defense, to—

(1) review the motor pool, storage, maintenance, and other motor vehicle facilities within the agency;

(2) consolidate such facilities where feasible and cost effective; and

(3) submit to the Director a report identifying possible impediments to any such consolidation, including current accounting methods, budget processes, or organizational structures.

REDUCTION OF STORAGE AND DISPOSAL COSTS

SEC. 838. The Administrator shall take such actions as may be necessary to reduce motor vehicle storage and disposal costs, including actions to increase the frequency of motor vehicle sales by public auction, to reduce presale storage costs, and to improve the rate of return on motor vehicle sales through a program of vehicle reconditioning prior to sale.

SAVINGS

SEC. 839. (a) The President shall take such action as may be necessary to ensure that expenditures for the operation, maintenance, leasing, acquisition, and disposal of motor vehicles by executive agencies, including the Department of Defense, are reduced by fiscal year 1988, to an amount which is $225,000,000 less than the amount requested for such operation, maintenance, leasing, acquisition, and disposal requested by the President in the budget submitted under section 1105 of title 31, United States Code, for fiscal year 1986.

(b) The Director shall monitor compliance by executive agencies with directives of the President to carry out subsection (a) and shall report, within 6 months after the date of enactment of this Act and every 6 months thereafter, to the Committees on Appropriations of the House and Senate, the Committee on Government Affairs of the Senate and the Committee on Government Operations of the House, with respect to the reductions in expenditures by executive agencies, including the Department of Defense, required under subsection (a).

COMPLIANCE

SEC. 840. (a) The Administrator shall comply with and be subject to the provisions of this part with regard to all motor vehicles that are used within the General Services Administration for official purposes.

(b) The provisions of this part with respect to motor vehicles from the Interagency Fleet Management System shall be complied with by the executive agencies to which such motor vehicles are assigned.

APPLICABILITY

SEC. 841. (a) The President shall apply the reductions in expenditures required by section 839(a) primarily to administrative motor vehicle fleets used at the headquarters and regional headquarters of executive agencies, rather than to motor vehicles used by line agency personnel working in agency field operations or activities.

(b) The President shall require the Administrator, in cooperation with the Director, to promulgate appropriate regulations, standards, and definitions that shall assure that executive agencies comply with and implement the reductions in expenditures required by section 839(a) in the manner prescribed by subsection (a).

COOPERATION

SEC. 842. The Director and the Administrator shall closely cooperate in the implementation of the provisions of this part, and shall report regularly to the Congress on the progress made in carrying out this part.

REPORTS

SEC. 843. Not later than 12 months after the date of enactment of this Act, the Comptroller General shall prepare and transmit a report to the Congress on the activities of the Director, the Administrator, and executive agencies in carrying out this part. After transmitting the report required by the preceding sentence, the Comptroller General shall submit periodic reports to the Congress on such activities.

DEFINITIONS

SEC. 844. For purposes of this part—

(1) the term "executive agency" means—

(A) an executive agency (as such term is defined in section 105 of title 5, United States Code), which operates at least three hundred motor vehicles; and

(B) the Postal Service, the Postal Rate Commission, and the Tennessee Valley Authority;

(2) the term "Director" means the Director of the Office of Management and Budget;

(3) the term "Administrator" means the Administrator of General Services;

(4) the term "Comptroller General" means the Comptroller General of the United States; and

(5) the term "motor vehicle" means any vehicle self-propelled or drawn by mechanical power, except that such term does not include any vehicle designed or primarily used for military field training, combat, or tactical purposes.

Mr. DECONCINI. Mr. President, this amendment represents the culmination of nearly 5 years of study, analysis, and effort by this Senator and others to address the size, the cost, and the management of the Federal Government's motor vehicle fleet. In addition to saving the American taxpayers $225 million over the next 3 years, this amendment will, for the

first time, force the Federal Government to take a long, hard look at how Uncle Sam manages the fleet of more than 460,000 motor vehicles and how we can substantially reduce the $1.3 billion annual cost of operating and maintaining this enormous fleet of vehicles. Passage of this amendment will also force the Federal Government to examine private sector alternatives to the current way we do business in the motor vehicle arena.

Mr. President, the Senator from New Hampshire, Senator HUMPHREY, has worked on this for a long period of time. I am glad the Senator was able to get over here on such a short notice. We have had a difficult time arranging an opportune time to get this amendment before the Senate.

Mr. President, this, I think, is a significant way to go. It exempts only military tactical vehicles from the cost-saving measures and reporting requirements of the amendment. It protects online vehicles used for direct program activities from bearing the major brunt of the savings, taking savings from the headquarters or the regional office administrative vehicles first. It establishes for the first time a standardized comprehensive data baseline.

Mr. President, it directs the President through OMB to provide cost data on motor vehicle operations in the budget of the United States, and in each agency, budget jurisdiction for the first time in history. It directs the agencies to do comprehensive cost-benefit studies comparing their current operations with: One, GSA interagency fleet management system; and, two, private-sector fleet management alternatives.

Mr. President, I want to quickly add that this is probably the only amendment that will be offered to the reconciliation bill that will result in more savings than are called for in the bill as reported by the Budget Committee.

Mr. President, let me briefly run through the key provisions of my amendment and then close with a chronology of our efforts to cut the cost of the Federal motor vehicle fleet over the past 5 years.

First, my amendment will force the Government to achieve savings of $225 million over the next 3 years, in the costs associated with the operation, maintenance, acquisition, and disposal of motor vehicles. The savings would begin in fiscal year 1986, with the total amount of the cuts over 3 fiscal years being made from the President's fiscal year 1986 budget, as amended, as the baseline. The amendment contains language directing that these cost savings be applied primarily to headquarters and regional administrative, motor vehicle operations rather than to online agency field operations and activities. In other words, the bureaucrat being driven to and from his home in the Washington suburbs would have to give up his car first, before the Customs drug agent would have to give up his law enforcement vehicle or before the Park Service ranger would have to give up his car to patrol the Grand Canyon. Tactical military vehicles and commercially designed vehicles acquired for military tactical support purposes would be excluded from the reductions mandated in this amendment. However, normal administrative vehicles used within the Department of Defense would be subject to both the cost saving and reporting requirements of this amendment.

Second, the amendment, for the first time, forces the heads of each agency and department, including the Department of Defense, to identify, collect, and analyze data regarding all costs incurred by that agency in operating and maintaining its fleet of vehicles and to—again, for the first time—include that information in their budget requests and submissions to the Congress every year. This sounds so elementary and fundamental that this Senator is almost embarrassed that we had to include these directives in the amendment. But what we have currently are dozens of Federal agencies operating over 460,000 motor vehicles at a cost of over $1.3 billion without any idea of how much they spend every year in their own shops. Furthermore, there is currently no way that the Congress can track how much each agency or department spends on these motor vehicle operations or make judgments as to the efficiency of individual agency operations. The amendment before the Senate starts the ball rolling to correct all of that, by forcing the agencies and the President of the United States through OMB, to account for all motor vehicle costs by agency, and to transmit that information to the Congress every year in official budget documents. The amendment also authorizes the Administrator of General Services, with help from GAO and OMB, to set standards for the agencies to use in reporting the data on motor vehicle costs, so that the Congress and the President can receive uniform, accurate information on the cost of the Federal motor vehicle operations for the fiscal year under review.

Third, the amendment directs each Government agency, including the Department of Defense, to conduct a comprehensive, cost-benefit study of private sector alternatives to either their current motor vehicle management program or the use of GSA's Interagency Fleet Management System. These studies should plow new ground in determining what is the cheapest, most effective and efficient way to operate, maintain, purchase, lease, and dispose of motor vehicles at the individual agencies and departments. Those studies could show that the current system is working well and that certain agencies are operating at peak efficiency. I would doubt that, but it could be the case. Or the studies could show that the Interagency Fleet Management System of GSA is the least expensive, most efficient way to meet our agency motor vehicle fleet requirements. Or the studies could show that qualified private sector fleet management firms could handle small- to medium-sized fleets better than either GSA or the current agency plans.

Frankly, Mr. President, I do not believe that we can or should contract out all Government services. However, if there ever was a prime candidate for the "Heisman Trophy" of contracting out, I would think that motor vehicles would be one of them. Our amendment will allow us to find out in short order.

Finally, Mr. President, the amendment authorizes the administration, and particularly the Administrator of General Services, to identify interagency opportunities for consolidation of motor vehicles; motor vehicle facilities; related equipment; and management functions; and to identify other cost-saving measures that will save the taxpayers' money and make the operation of our huge Federal fleet more efficient.

Mr. President, this amendment is not something that this Senator dreamed up overnight. In fact, for the past 4 years, other Senators and I have been analyzing the problem of the Federal motor vehicle fleet and attempted to make cost savings on several occasions.

In February 1981, I introduced legislation that would have reduced the cost of the Federal motor vehicle fleet by over $100 million. On April 7, 1981, I asked the General Services Administration and the General Accounting Office to study the Federal motor vehicle fleet and its cost to the taxpayers. Their findings showed that the taxpayers were paying in excess of $1.1 billion a year to operate and maintain the Federal motor vehicle fleet—an increase of $724 million or 192 percent over a 10-year period.

In July 1982, the distinguished chairman and ranking member of the Senate Governmental Affairs Committee, Senator ROTH and Senator EAGLETON respectively, joined me in sponsoring Senate Joint Resolution 221 calling for saving of $150 million in the cost of the motor vehicle fleet in fiscal year 1983.

In August 1983, I introduced S. 1798, a bill requiring the executive agencies of the Government to identify all costs associated with the operation of the Federal motor vehicle fleet; requiring cuts of $100 million in fiscal year 1985; and directing the Government to ex-

amine the use of private sector alternatives to the current program for managing the Federal fleet.

On April 26, 1984, my amendment to the Deficit Reduction Act passed the Senate 78–15—mandating a cut of $160 million in the Federal motor vehicle fleet. Unfortunately, after conference with the House, submission of the appropriate recission message from the President and final congressional action on these items, only a few million dollars were cut in the motor vehicle program. Nevertheless, it set the stage for the amendment that the Senator from New Hampshire and I have introduced today.

Mr. President, this is an amendment that is long overdue. It will save the taxpayers $225 million over the next 3 fiscal years and reduce the deficit by a like amount. It will force Uncle Sam to rethink how it manages and operates its fleet of over 460,000 vehicles. It will force the Government to explore private sector alternatives to the way we currently do our Federal motor vehicle business. And it will force this administration and the next administration to finally provide comprehensive, standardized, budget on how much our Federal agencies, including the Department of Defense, spend on motor vehicles annually.

Mr. President, I recognize that this amendment is technically not germane to the reconciliation bill, under the provisions of the Budget Act of 1974. But I would hope that the Senate would allow this amendment to rise or fall on its merits.

Mr. President, I urge the adoption of the amendment.

Mr. President, I want to advise the manager, the distinguished Senator from New Mexico, and ranking member, the distinguished Senator from Florida, that I have discussed this amendment with the chairman of the Governmental Affairs Committee, and my staff has advised me that the ranking member of that committee, Senator EAGLETON, from Missouri, has also approved of this measure and it is properly offered at this time. I can make that assurance to my colleagues.

Mr. President, I would like to yield to the Senator from New Hampshire who has worked for a long time on this effort. We would not have this package here if it were not for the Senator's dedication in trying to do something with these overruns.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, do we have time constraints?

The PRESIDING OFFICER. There is 1 hour on each side.

Mr. HUMPHREY. Mr. President, this is a signal occasion. I believe this is the first piece of legislation to reach the floor which comes out of the Senate Grace Commission caucus which Senator DECONCINI and I chaired. The purpose of that caucus—and we invite Members to join with us, we have a great many already, and wish to have everyone involved—is to move beyond rhetoric about the need to implement many of the Grace Commission recommendations, and indeed to implement them by way of legislation. So it is especially important, I think, that this bill has reached the floor.

With respect to the amendment, Mr. President, the Federal Government operates a motor vehicle fleet of some 443,000 units, trucks, cars, and so on, that cost the taxpayers something like $1.3 billion a year. It would appear that there is a great deal of duplication inasmuch as many agencies have their own separate motor vehicle fleets. They are not all under the management of the GSA. Furthermore, it is only logical to assume or at least be curious about whether or not we could more efficiently provide this transportation through private sector management of the motor vehicle fleet. In any event, those are worth looking at. We do know there is a good deal of use. For instance, three-fifths of the Federal officials who get free transportation between home and office are not entitled to it according to the GAO.

Mr. President, our amendment reduces the fleet vehicle budget authority by $225 million over the 3-year period beginning in the fiscal year 1986. It is a reasonable, reasoned approach which will save money immediately beginning this year, and also at the same time provide reports and data which will enable us to make important decisions later on about the feasibility of privatizing, if you will, or at least having our motor vehicle fleets managed by the private sector.

I understand the floor managers are prepared to accept the amendment, Mr. President, I thank my colleague from New Mexico for his cooperation in this effort.

Mr. DOMENICI. Mr. President, it is my understanding that the committees of jurisdiction have indicated their approval of this amendment and that it is, in fact, an amendment that, if and when totally implemented, will save considerable amounts of money. I compliment the distinguished Senator from Arizona and the distinguished Senator from New Hampshire. We are willing to accept the amendment.

Mr. CHILES. Mr. President, I urge acceptance of the amendment.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 857) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 858

(Purpose: To require earlier notification of changes in the Medicare inpatient hospital deductible)

Mr. BAUCUS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS], for himself, Mr. PACKWOOD, Mr. DURENBERGER, Mr. HEINZ, Mr. GLENN, Mr. MITCHELL, and Mr. MATSUNAGA, proposes an amendment numbered 858.

Mr. BAUCUS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 168, between lines 4 and 5 insert the following:

SEC. 716A. PROMULGATION OF INPATIENT HOSPITAL DEDUCTIBLE.

(a) CHANGE IN DEADLINE.—Section 1813(b)(2) of the Social Security Act is amended by striking out "October 1" and inserting in lieu thereof "September 15".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to calendar years after 1985.

Mr. DOMENICI. Mr. President, a parliamentary inquiry, if the Senator will yield.

Mr. BAUCUS. I yield.

Mr. DOMENICI. Mr. President, if there is no one in opposition to the amendment, who will control the time in opposition? I know of no one on the floor who opposes this amendment. I want to make sure we comply with the rules.

The PRESIDING OFFICER. The time would be controlled by the minority leader or his designee.

Mr. DOMENICI. Even if the minority leader or his designee favors the amendment, I assume he still controls the time?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAUCUS. Mr. President, the amendment I am offering is a technical change in the date by which the Secretary of Health and Human Services must publish a notice in the Federal Register of the annual increase in the Medicare hospital insurance (part A) deductible. It has no budget effect. My amendment simply requires the Secretary to publish notice 2 weeks before the close of each fiscal year, by September 15. I believe that it has been cleared on both sides.

DEDUCTIBLE PROJECTED TO INCREASE BY 23 PERCENT

Mr. President, the Secretary of Health and Human Services had some startling news for Medicare beneficiaries on September 30: Their out-of-

pocket costs for hospitalization are about to go up by 23 percent next year.

That is HHS' projection of the increase in the Medicare part A deductible, the amount beneficiaries must first pay before Medicare begins to pay their hospital bills. The current deductible is already $400—10 times what it was when Medicare began 20 years ago. Now, HHS says that in 1986 Medicare beneficiaries must pay $492 for each hospital stay!

It is not a surprise that the Medicare deductible is going up. It goes up every year to reflect the increases in the cost of medical care nationwide. The annual adjustment is made to keep the deductible in line with the cost of 1 day of hospitalization.

But the size of this year's cost increase is a surprise. Nobody expected that the deductible would jump by 23 percent. If we had known that fact, I am sure that we would have tried to address this problem in the Finance Committee as part of the reconciliation process. We would have reduced this unjustifiable increase and found the savings someplace else.

RISE IN DEDUCTIBLE WILL HURT THE ELDERLY

This sharp and unforeseen increase in the Medicare deductible will have its greatest impact on low-income senior citizens who can least afford the already high costs of health care. For many others who purchase private medicare supplemental insurance, the increase in the deductible will almost certainly be passed along in the form of higher monthly premiums for their "MediGap" plans.

If it were possible to offer an amendment today to reduce this unforeseen cost increase to beneficiaries, I would be the first to offer it.

However, in addition to being nongermane under the special rules of the Budget Act, such an amendment would change the deficit-reduction total achieved by the Finance Committee with no opportunity to make other, offsetting changes. I do not propose that we violate the budget targets set by the Budget resolution.

Rather, the amendment I am offering today is a starting point for further consideration of the proper level of the Medicare deductible. In the months ahead, I hope that we can take the action needed to restrain skyrocketing increases in this direct cost to elderly for health care.

This amendment simply requires the Secretary of HHS to report the projected increase in the deductible 2 weeks sooner than under current law. Right now, the Secretary must publish a notice of the projected increase by October 1 each year. My amendment pushes that reporting date up to September 15. That is it.

This is important for two reasons.

First, it puts the administration on notice that Congress expects timely information on this important feature of the Medicare Program in future years. Congress needs to know about projected increases in costs to beneficiaries to make modifications when they are called for. At a minimum, we need to know this before the start of the new fiscal year.

Second, it provides the conferees on this bill the opportunity to take a more careful look at what a reasonable increase in the Medicare deductible should be for 1986. I intend to urge the conferees to examine this issue when considering the other changes that need to be made in the Medicare hospital insurance program.

FORMULA OVERSTATES RISE IN HOSPITAL COSTS

Under current law, the formula used to increase the Medicare part A deductible for hospital insurance is tied to the annual increase in the average cost per day of hospitalization. It ignores the fact that the amount of time that patients spend in the hospital has decreased significantly in the past 2 years.

As a result, the formula used to index the deductible has dramatically overstated the real increase in hospital costs for next year. Simply put, the fixed costs of hospitalization are being spread out over a smaller number of days. This means the increase in the Medicare deductible was overstated for 1986 by almost $50.

The decline in the length of hospitalization is the result of the reforms in the Medicare Program enacted by Congress in 1983 as well as other cost-conscious decisions being made by consumers, insurers, and employers all over the country.

ACTION NEEDED TO REDUCE DEDUCTIBLE INCREASE

It would be grossly unfair to Medicare beneficiaries if the efficiencies and cost controls in the Medicare Program are allowed to result in an increase in their out-of-pocket costs.

What is more, the increase in the part A deductible results in an automatic increase in other beneficiary cost-sharing provisions. Therefore, HHS estimates an increase in Medicare daily coinsurance costs—which begin on the 61st day of hospitalization for the severely ill—of 23 percent. That comes to $123 per day if you happen to find yourself in the hospital for that long.

Coinsurance for extended care at a skilled nursing home will also increase by 23 percent, up to $61.50 a day.

Today I am offering this "no cost" amendment to bring attention to this shocking increase in costs to the elderly for hospital care. It is the starting point for a solution that I hope we can reach in the months ahead. I urge support for this amendment.

Mr. DOMENICI. Mr President, would the Senator accommodate the Senator from New Mexico while he suggests the absence of a quorum? The time can be charged to my time.

Mr. BAUCUS. I would be delighted to.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, as I indicated, at least by implication, I have no objection as manager of the bill to this amendment. I understand the chairman of the Finance Committee, Senator PACKWOOD, has no objection.

However, I do have some concerns about the impact of this amendment on conference. By including this relatively innocuous provision, the Medicare part A deductible becomes an issue for conference. For every $10 we reduce the deductible, we increase Federal outlays by $100 million per year. If the conference should reduce the deductible to last year's level, it would cost $1.1 billion in the first year.

Finance has no room for these additional outlays in fiscal year 1986 without offsetting savings.

Mr. President, while I will not object, I feel that this amendment creates a dangerous situation in which to go to conference. Substantial new spending could be included in the bill, with no offsetting savings.

Mr. CHILES. Mr. President, I have no objection to the amendment. I yield back my time.

The PRESIDING OFFICER. Does the Senator from Montana yield back his remaining time?

Mr. BAUCUS. Yes.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 858) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 859

(Purpose: To make technical and perfecting amendments)

Mr. DOMENICI. Mr. President, I have a series of technical and perfecting amendments which have been cleared by the distinguished Senator from Florida on his side of the aisle. I send the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI] proposes an amendment numbered 859.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate places in the bill, do the following:

On page 89, line 15, strike out "purpose" and insert in lieu thereof "purposes".

On page 94, line 13, strike out "paragraph (1)" and insert in lieu thereof "subsection (a)".

On page 99, after line 23, insert the following:

(2) by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; and"; and

On page 180, line 5, strike out "following" and insert in lieu thereof "following".

On page 215, line 18, insert ")" after "(e)".

On page 284, beginning with line 22, strike out all through page 285, line 7, and insert in lieu thereof the following:

(2) If—

(A) a document or ticket for transportation of a passenger into the customs territory of the United States is issued in a foreign country, and

(B) the fee charged under subsection (a)(6) is not collected at the time such document or ticket is issued, the person providing transportation to such passenger shall collect such fee at the time such passenger departs from the customs territory of the United States and shall provide such passenger a receipt for the payment of such fee.

On page 308, line 19, strike out "yeas" and insert in lieu thereof "years".

On page 308, line 20, strike out "of" and insert in lieu thereof "to".

On page 308, line 21, strike out "liue" and insert in lieu thereof "lieu".

On page 308, line 21, strike out "plans" and insert in lieu thereof "plan".

On page 309, line 6, insert a comma after "plan".

On page 310, line 13, strike out "Except" and insert in lieu thereof "Exception".

On page 311, line 3, strike out "(ii))" and insert in lieu thereof "(ii)".

On page 312, line 15, insert "for any group health plan maintained by an employer" after "employer".

On page 312, line 18, strike out "(B). Except" and insert in lieu thereof "(B) Exception".

On page 316, line 21, strike out "and" and insert in lieu thereof "any".

On page 320, line 2, strike out "amendment" and insert in lieu thereof "amendments".

On page 321, line 15, strike out "subsectioin" and insert in lieu thereof "subsection".

On page 322, line 16, strike out the second comma.

On page 323, line 2, strike out "the" and insert in lieu thereof "an".

On page 323, line 8, strike out "section" and insert in lieu thereof "subsection".

On page 329, line 9, strike out "tax" and insert in lieu thereof "taxes".

On page 334, line 11, strike out the colon and insert in lieu thereof a semicolon.

On page 335, line 25, strike out "Setpember" and insert in lieu thereof "September".

On page 336, line 10, strike out "be" and insert in lieu thereof "by".

On page 342, line 24, strike out "If" and insert in lieu thereof "if".

On page 343, line 10, strike out "it is" and insert in lieu thereof "if it".

On page 343, line 14, strike out "manufactures" and insert in lieu thereof "manufacturers".

On page 343, line 14, strike out "follow" and insert in lieu thereof "follows".

On page 344, lines 2 and 3, strike out "manufacture" and insert in lieu thereof "manufacturer".

On page 344, line 15, insert "the" after "receiving".

On page 345, line 18, strike out "subparagraph" and insert in lieu thereof "subparagraphs".

On page 347, line 4, strike out "Uospent" and insert in lieu thereof "Unspent".

On page 349, in the matter after line 8, strike out "transaction" and insert in lieu thereof "transactions".

On page 352, lines 13 and 17, strike out the closing quotation marks.

On page 355, in the matter after line 1, strike out "depository" and insert in lieu thereof "depositary".

On page 357, in the matter after line 6, strike out "Definitons" and insert in lieu thereof "Definitions".

On page 362, line 2, strike out "Decembr" and insert in lieu thereof "December".

On page 367, in the matter after line 25, add at the end thereof a period.

On page 368, line 11, strike out "Hazadous" and insert in lieu thereof "Hazardous".

On page 368, line 13, strike out "refenence" and insert in lieu thereof "reference".

On page 368, line 18, strike out "Subchpater" and insert in lieu thereof "Subchapter".

On page 368, line 20, strike out "subchpater" and insert in lieu thereof "subchapters".

On page 369, line 11, strike out "Liabilty" and insert in lieu thereof "Liability".

On page 372, lines 9 and 10, strike out "October 1, 1985" and insert in lieu thereof "November 15, 1985".

On page 374, line 6, strike out "or" and insert in lieu thereof "of".

On page 380, line 8, strike out "growers" and insert in lieu thereof "producers".

On page 381, line 8, strike out "if" and insert in lieu thereof "is".

On page 386, strike out lines 1 through 3 and insert in lieu thereof the following:

(2) by inserting ", except in the case of Burley tobacco," after *"Provided,* That" in the fourth sentence of subsection (e).

On page 386, line 18, strike out "Year" and insert in lieu thereof "year".

On page 387, line 10, strike out "manfacturer" and insert in lieu thereof "manufacturer".

On page 394, line 20, strike out "fluecured" and insert in lieu thereof "Fluecured".

On page 395, line 12, strike out "associ-" and insert in lieu thereof "associa-".

On page 401, line 23, strike out "to" and insert in lieu thereof "the".

On page 407, line 3, strike out "stock of the Corporation" and insert in lieu thereof "stocks of the Corporation of".

On page 412, line 12, strike out "Subsection" and insert in lieu thereof "Subsections".

On page 415, line 17, strike out "relating" and insert in lieu thereof "(relating".

On page 422, line 17, strike out the single quotation marks and insert in lieu thereof double quotation marks.

On page 428, line 24, strike out "Payroll" and insert in lieu thereof "Taxes".

On page 430, line 13, strike out "period" and insert in lieu thereof "period)".

On page 478, line 24, strike out "'the Act'" and insert in lieu thereof "the 'Act'".

On page 517, between lines 13 and 14, insert the following:

PART H—GRADUATE MEDICAL EDUCATION

AMENDMENT TO THE PUBLIC HEALTH SERVICE ACT

On page 519, line 22, strike out "relevent" and insert in lieu thereof "relevant".

On page 536, line 8, strike out "99" and insert in lieu thereof "991".

On page 536, line 11, strike out "if:" and insert in lieu thereof "if—".

On page 536, line 20, insert "of 1954" after "Code".

On page 536, line 21, strike out "termintion" and insert in lieu thereof "termination".

On page 536, line 23, insert "of 1954" after "Code".

On page 537, line 5, strike out "Act" and insert in lieu thereof "Act)".

On page 537, line 17, strike out "organzation" and insert in lieu thereof "organization".

On page 538, line 9, strike out "notifiy" and insert in lieu thereof "notify".

On page 543, lines 20 and 21, strike out "section 4041(c)" and insert in lieu thereof "subsection (c)".

On page 544, line 18, strike out "within" and insert in lieu thereof "(within".

On page 544, line 19, strike out "4042)'" and insert in lieu thereof "4042)".

On page 552, strike out lines 1 through 5 and insert in lieu thereof the following new subsection:

(b) CONFORMING AMENDMENTS.—Section 4041(e) (as redesignated by section 991(a)(2) of this Act is amended—

(1) by striking out "subsection (a)" and inserting in lieu thereof "this section"; and

(2) by inserting "in a standard termination" after "terminated".

On page 554, strike out "trhe" and insert in lieu thereof "the".

On page 555, line 9, insert a period after "4062".

On page 562, line 6, strike out "and".

On page 563, line 4, strike out "." and insert in lieu thereof "."; and ".

On page 563, between lines 4 and 5, insert the following:

(3) by inserting after section 4065 (as added by clause (2)) the following:

"PART 2—ADMINISTRATION AND ENFORCEMENT".

On page 563, line 9, strike out "Act'" and insert in lieu thereof "Act)".

On page 563, line 17, strike out "terminatioin" and insert in lieu thereof "termination".

On page 563, line 18, strike out "plana" and insert in lieu thereof "plan".

On page 563, line 19, strike out "contribution" and insert in lieu thereof "contributing".

On page 563, line 21, strike out "contribution" and insert in lieu thereof "contributing".

On page 563, line 25, strike out "of the" and insert in lieu thereof "for the".

On page 564, line 10, strike out "996(c)(i)" and insert in lieu thereof "996(c)(1)".

On page 564, line 13, strike out "EFFECT" and insert in lieu thereof " "EFFECT".

On page 566, line 9, strike out "1306(a)(2)" and insert in lieu thereof "1306(a)(2))".

On page 567, line 24, insert "by" after "(ii)".

On page 569, strike out lines 18 and 19 and insert in lieu thereof the following:

inserting in lieu thereof "section 4041(c)"; and

On page 570, line 22, strike out "(a)-(aa)," and insert in lieu thereof "(a), (aa)".

On page 572, line 2, insert a comma after "(b)".

On page 572, line 9, strike out "(C)(2)(A)(i)" and insert in lieu thereof "(c)(2)(A)(i)".

On page 572, line 20, insert a comma after "(d)".

On page 574, line 15, strike out "(a)(1)" and insert in lieu thereof "(1)".

On page 575, line 11, strike out "(and)".

On page 576, strike out line 12 and insert in lieu thereof the following: "but it does not include mineral, oil, and gas royalty interests.".

On page 579, line 1, strike out "(i)" and insert in lieu thereof " "(i)".

On page 579, strike out line 4 and insert in lieu thereof the following:

States, and

"(ii) any lien imposed under this section".

On page 579, line 8, strike out "109(c)(1)" and insert in lieu thereof "996(c)(1)".

On page 579, between 14 and 15, insert a period after "413A".

On page 580, before line 1, strike out "of" in the item relating to section 4072 and insert in lieu thereof "to".

On page 580, before line 1, strike out the item relating to section 4075 and insert in lieu thereof the following:

"Sec. 4075. Effect of corporate reorganization.".

On page 605, line 3, strike out "the" and insert in lieu thereof "this".

On page 609, line 3, strike out "of" the second place it appears and insert in lieu thereof "or".

Mr. DOMENICI. Mr. President, I believe these amendments are self-explanatory. When a bill as large and detailed as this one is prepared, there are technical errors. This amendment corrects the technical errors in this bill.

I yield back any time remaining on the amendment.

Mr. CHILES. Mr. President, I yield back my time.

Mr. DOMENICI. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 859) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DURENBERGER addressed the Chair.

The PRESIDING OFFICER. (Mr. HECHT). The Senator from Minnesota.

AMENDMENT NO. 860

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Minnesota [Mr. DURENBERGER] for himself, Mr. KENNEDY, Mr. DOLE, Mr. BAUCUS, Mr. HEINZ, Mr. PROXMIRE, and Mr. RIEGLE, proposes an amendment numbered 860.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 512, line 1, strike out through page 517, line 13.

On page 164, after line 25, insert the following

SEC. 711A. RESPONSIBILITIES OF MEDICARE HOSPITALS IN EMERGENCY CASES

(a) REQUIREMENT OF MEDICARE HOSPITAL PROVIDER AGREEMENTS.—Section 1866(a)(1) of the Social Security Act is amended—

(1) by striking out "and" at the end of subparagraph (G);

(2) by striking out the period at the end of subparagraph (H) and inserting in lieu thereof ", and "; and

(3) by inserting after subparagraph (H) the following new subparagraph:

"(I) in the case of a hospital, to comply with the requirements of section 1867 to the extent applicable.".

(b) REQUIREMENTS.—Title XVIII of such Act is amended by inserting after section 1866 the following new section:

"EXAMINATION AND TREATMENT FOR EMERGENCY MEDICAL CONDITIONS AND WOMEN IN ACTIVE LABOR

"SEC. 1867. (a) Medical Screening Requirement.—In the case of any hospital which has a hospital emergency department, if any individual (whether or not eligible for benefits under this title) comes to the emergency department and a request is made on the individual's behalf for examination or treatment for a medical condition, the hospital must provide for an appropriate medical screening examination within the capability of such hospital's emergency department to determine whether or not an emergency medical condition (within the meaning of subsection (e)(1)) exists or to determine if the individual is in active labor (within the meaning of subsection (e)(2)). The requirements of this subsection shall not apply if the provision of a medical screening examination would delay or otherwise be contrary to the prompt treatment of the individual's medical condition.

"(b) NECESSARY STABILIZING TREATMENT FOR EMERGENCY MEDICAL CONDITIONS AND ACTIVE LABOR.—If any individual (whether or not eligible for benefits under this title) comes to the hospital and the individual is determined (through the screening described in subsection (a) or otherwise) to have an emergency medical condition or to be in active labor, the hospital must provide either—

"(1) within the staff and facilities available at such hospital, for such further medical examination and such treatment as may be required to stabilize the medical condition or to provide for treatment of the labor, unless the examination or treatment is refused; or

"(2) for transfer of the patient to another medical facility in accordance with subsection (c), unless the transfer is refused.

"(c) RESTRICTING TRANSFERS UNTIL PATIENT STABILIZED.—

"(1) GENERAL RULE.—If a patient at a hospital has an emergency medical condition which has not been stabilized (within the meaning of subsection (e)(3)(B)) or is in active labor, the hospital may not transfer the patient unless—

"(A)(i) the patient (or a member of the patient's family if the patient is an unemancipated minor or is unable to communicate) requests that a transfer be effected; or

"(ii) there has been a determination by a physician (within the meaning of section 1861(r)(1)), or by other qualified medical personnel when a physician is not available in the emergency department, that, based upon the reasonable risks and benefits to the patient, and based upon the information available at the time, the benefits obtained from the provision of appropriate medical treatment at another medical facility, taking into account the potential risks to the individual's medical conditions involved in the transfer, outweigh the potential benefits to the individual's medical condition from not effecting the transfer; and

"(B) the transfer is an appropriate transfer (within the meaning of paragraph (2)) to that facility.

"(2) APPROPRIATE TRANSFER.—An appropriate transfer to a medical facility is a transfer—

"(A) in which the receiving facility—

"(i) has available space and qualified personnel for the treatment of the patient;

"(ii) has agreed to accept transfer of the patient and to provide appropriate medical treatment; and

"(iii) is being provided appropriate medical records (or copies thereof) of the examination and treatment furnished at the transferring facility, or, if the patient's medical condition is sufficiently serious to require an immediate transfer, is notified of the transfer as soon as practicable under the circumstances;

"(B) in which the transfer is effected through qualified personnel and transportation equipment, as required, including the use of necessary and medically appropriate life support measures during the transfer; and

"(C) which meets such other requirements as the Secretary may find necessary in the interest of the health and safety of patients transferred.

"(d) ENFORCEMENT.—If a hospital knowingly and willfully, or negligently, fails to meet the requirements of this section, such hospital shall be subject to—

"(1) termination of its provider agreement under this title in accordance with section 1866(b); or

"(2) at the option of the Secretary, suspension of such agreement for such period of time as the Secretary determines to be appropriate, upon reasonable notice to the provider and to the public.

"(e) DEFINITIONS.—For purposes of this section:

"(1) The term 'emergency medical condition' means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the ab-

sence of immediate medical attention could reasonably be expected to result in—

"(A) placing the patient's health in serious jeopardy;

"(B) serious impairment to bodily functions; or

"(C) serious dysfunction of any bodily organ or part.

"(2) The term 'active labor' means labor at a time at which—

"(A) delivery is imminent; or

"(B) there is inadequate time to effect safe transfer to another hospital prior to delivery.

"(3)(A) The term 'to stabilize' means, with respect to an emergency medical condition, to provide such medical treatment of the condition as may be reasonably necessary under the circumstances and within the capability of the hospital—

"(i) so that the transfer of the individual will not, within reasonable medical probability, result in substantial risk of the death or serious impairment of the individual as a direct result of the transfer; or

"(ii) in order to determine that the benefits obtained from the provision of appropriate medical treatment at another medical facility, taking into account the potential risks to the individual's medical condition involved in the transfer, outweigh the potential benefits to the individual's medical condition from not effecting the transfer.

"(B) The term 'stabilized' means, with respect to an emergency medical condition, that such medical treatment of the condition has been provided as may be reasonably necessary under the circumstances and within the capability of the hospital—

"(i) so that the transfer of the individual will not, within reasonable medical probability, result in substantial risk of the death or serious impairment of the individual as a direct result of the transfer; or

"(ii) in order to determine that the benefits obtained from the provision of appropriate medical treatment at another medical facility, taking into account the potential risks to the individual's medical condition involved in the transfer, outweigh the potential benefits to the individual's medical condition from not effecting the transfer.

"(4) The term 'transfer' means the movement (including the discharge) of a patient outside a hospital's facilities at the direction of any person employed by, or affiliated or associated directly or indirectly with, the hospital, but does not include such a movement of a patient who has been declared dead or leaves the facility without the permission of any such person.

"(f) PREEMPTION.—The provisions of this section do not preempt any State or local law requirement except to the extent that the requirement directly conflicts with a requirement of this section.".

"(c) EFFECTIVE DATE.—The amendments made by this section shall become effective on April 1, 1986.

"(d) GAO STUDY.—(1) The Comptroller General shall conduct a study of the problems created by hospitals which transfer patients without providing necessary emergency medical treatment. The study shall include—

(A) a survey and assessment of the extent of the problems;

(B) a survey of the available remedies to such problems, including State law and licensing requirements and the use of professional standard setting organizations, and an assessment of the frequency and effectiveness with which such remedies are utilized;

(C) an assessment of the effectiveness of the remedy provided under section 1867 of the Social Security Act; and

(D) recommendations for changes in Federal law, including changes in section 1867 of the Social Security Act, and the possible use of incentives under title XIX of such Act to encourage States to establish similar remedies.

(2) The Comptroller General shall report the results of the study to the Congress within 2 years after the date of the enactment of this Act.

(e) REGULATIONS.—The Secretary of Health and Human Services shall promulgate final regulations for implementing section 1867 of the Social Security Act within 180 days after the date of the enactment of this Act, and shall report to Congress on the methods to be used for monitoring and enforcing compliance with such section.

Mr. DURENBERGER. Mr. President, this amendment would require hospitals serving Medicare patients to provide emergency services to individuals with life-threatening or potentially crippling conditions regardless of their ability to pay.

The measure was developed by myself and the Senators from Massachusetts [Mr. KENNEDY] and Utah [Mr. HATCH] as an alternative to a provision now in the reconciliation package before this body.

I want to commend my colleagues and their staffs for working to perfect and refine the original provision and compromising in this agreed upon amendment.

The amendment addresses an issue which has gained much public attention over the last year. The CBS news show "60 Minutes" ran a segment exposing the inappropriate transfer of a number of seriously ill patients from the emergency rooms of private hospitals to public hospitals.

Just last June, the Washington Post chronicled a Dallas case of a badly burned laborer who was turned away from a number of hospitals before he could get the treatment he badly needed.

I hope we have agreement on this point: the practice of rejecting indigent patients in life threatening situations for economic reasons alone is unconscionable.

Frankly, we do not know how pervasive this practice of dumping the sick and indigent from emergency rooms actually is. The evidence I have seen so far is primarily anecdotal.

However, there are indications that this practice could escalate. And, in fact, we are seeing change in the health-care marketplace which may even encourage this practice.

This change of which I am an advocate, as my colleagues know, is the movement toward price competition in the health-care marketplace. This competitive approach will bring about higher quality, cost-effective health care.

But, it will also make it difficult for hospitals to continue their tradition of subsidizing services for those who cannot pay, from the charges on those who can.

In this environment the responsibile hospital manager of a private nonprofit or investor-owned institution will not be able to treat many patients who lack health plans or insurance coverage.

All Americans, rich or poor, deserve access to quality health care. This question of access should be the Government's responsibility at the Federal, State, and local levels. We cannot and should not expect hospitals to be this Nation's national health service.

At the same time while we in the Congress and the State legislatures are groping for areas to get quality health care to the uninsured Americans, we cannot stand idly by and watch those Americans who lack the resources be shunted away from immediate and appropriate emergency care whenever and wherever it is needed.

The purpose of this amendment is to send a clear signal to the hospital community, public and private alike, that all Americans, regardless of wealth or status, should know that a hospital will provide what services it can when they are truly in physical distress.

This amendment does not prevent hospitals from making appropriate and safe transfers of patients for economic reasons. It does, however, make it clear that the Medicare Program will not do business with any institution which willfully and knowingly, or through negligence, turns its back on an emergency medical situation.

The amendment is not a cure-all. it is a modest policy to address a problem which only recently began to emerge. We need to learn more about the problem and to see what further steps, if any, are necessary. The amendment calls on the General Accounting Office to thoroughly review the issue. This study should give Congress sufficient information to objectively assess this problem.

Whatever additional steps GAO recommends, whether further Medicare action or refinements in Medicaid, the aim of the Congress should be to encourage States to take definite action to guard against "dumping" at the local level.

Mr. President, in conclusion, I want to commend my colleagues on the Finance and the Labor and Human Resources Committees who put their efforts into formulating this amendment. It is a worthy step which I ask my fellow Senators to support.

Mr. President, I ask unanimous consent that the Senators from Massachusetts [Mr. KENNEDY], Kansas [Mr. DOLE], Montana [Mr. BAUCUS], Pennsylvania [Mr. HEINZ], and Wisconsin [Mr. PROXMIRE] be listed as cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I join my good friend, Senator DURENBERGER, in support of this emergency medical care amendment. This amendment has grown out of a bill that I introduced last month. It addresses a crucial aspect of our health delivery system—the availability of hospital emergency services. Though the amendment before us represents a compromise, it remains a worthwhile and necessary addition to Federal law.

Mr. President, over the last few years, disturbing reports have surfaced about individuals who have been denied emergency services at hospitals in many locations around the country. They have been denied services because they lacked health insurance or funds to pay cash at the door. In some cases, racial discrimination may have been involved.

These patients have been denied the care they need. Some have been sent to another hospital—usually a public hospital. This practice is often called patient dumping. Public hospitals have reported to us a 400-percent rise in the number of patients who have been sent to their emergency rooms after visiting another hospital. Reports of a dramatic rise in dumping have come from D.C. General Hospital here in Washington. They have come from Parkland Hospital in Dallas. They have come from Cook County Hospital in Chicago. and, they have come from other hospitals in California and around the country.

Mr. President, studies done by physicians have documented the danger of this inexcusable practice; death and disability have clearly been the result. In one hospital in California, 458 patients were transferred from one emergency room to another over a 6-month period. Thirty-three of those patients had their lives gravely endangered by the transfer. In that group, there were gunshot wounds, stabbing victims, and severe head injuries from motor vehicle accidents.

Some States have laws which ensure that no emergency patient is denied emergency care because of inability to pay. But, 28 States have no such law. Federal legislation in this area is long overdue.

Mr. President, this bill has several provisions. First, it requires that every patient who presents to a hospital emergency room must be given a medical screening examination. This is not a financial screen examination, but a medical screening examination.

Second, every patient who has a bonafide emergency must receive stabilizing care. Once stabilized, that patient may be transferred, but only if space is available at another hospital.

Third, if transfer is to take place, the transfer must be done in an appropriate manner—in an emergency vehicle with the proper emergency equipment, personnel, and records.

As the distinguished editor of the New England Journal of Medicine said in an editorial on this subject earlier this year, "What are hospitals for?"—if not to offer health care in an emergency. This amendment is a commonsense measure.

And yet, Mr. President, even in the 22 States which already have emergency medical care statutes on the books, enforcement of those laws has been poor. Many of the abuses have occurred in States which already have laws on the books.

Meaningful enforcement is essential. My original bill contained several options for enforcement. It included civil monetary fines, and civil causes of action against the offending hospital in addition to potential loss of medicare reimbursement.

In the spirit of compromise, I have worked with my respected colleague, Senator DURENBERGER, to bring this measure to the Senate floor. Our compromise retains only reimbursement penalties—either through complete withdrawal of Medicare certification or temporary suspension from the Medicare Program.

This penalty may work, but it also represents some danger. The loss of Medicare funds would not only hurt the hospital, it would also hurt Medicare patients. The Secretary of HHS may be reluctant to use this penalty. If this route of enforcement is going to succeed, the Secretary of Health and Human Services must develop procedures for surveillance and for reporting of abuses. Pressure must be put on offending hospitals.

Mr. President, the environment of medical practice is changing dramatically. Hospitals are insecure about their futures. They are more reluctant than before to offer care for which they may not be compensated. At the same time, there are more people who have no health insurance and cannot pay for health care.

These larger problems demand solutions. But we must not wait for complete solutions. It is imperitive that all emergencies be treated appropriately today.

We cannot allow a health care system as advanced as ours to provide emergency care only to those who can pay. This amendment will ensure that hospitals live up to their fundamental responsibilities to the public.

Mr. DOLE. Mr. President, our citizens stake their very lives on the availability and accessibility of emergency hospital care. We must put an end to certain unsafe practices, often referred to as "patient dumping", whereby a hospital, for purely financial reasons, refuses to initially treat or stabilize an individual with a true medical emergency. The amendment I am cosponsoring with the distinguished Senator from Minnesota would prohibit such practices and would provide for the suspension or termination of a hospital's Medicare provider agreement if the hospital knowingly, willfully, or negligently failed to meet these reasonable and humane standards.

Under the provision of this amendment, a hospital is charged only with the responsibility of providing an adequate first response to a medical crisis. That means the patient must be evaluated and, at a minimum, provided with whatever medical support services and/or transfer arrangements that are consistent with the capability of the institution and the well-being of the patient. We should expect nothing less.

Mr. HEINZ. Mr. President, I am pleased to join my colleagues Senators DURENBERGER and KENNEDY as a cosponsor of this amendment to S. 1730, the Consolidated Omnibus Budget Reconciliation Act, addressing the critical problem of hospital emergency department dumping of the medically uninsured.

Recently, the Special Committee on Aging which I chair, conducted a hearing on the severe problems of the medically uninsured in this country. With shrinking resources to serve the uninsured, hospitals are becoming less and less willing to open their doors to people who have no medical coverage. Thus, a lack of insurance can leave a person at great peril of being barred from access to urgently needed care.

At this hearing, testimony from Dr. Gordon Schiff revealed that Cook County Hospital in Chicago receives over 500 patients per month transferred directly from other emergency departments. The sole reason for transferring these patients to Cook County—a public facility—is that they have no health insurance to pay for the costs of private medical care.

Often, these patients are so sick that they require immediate hospitalization, yet are refused admission to private institutions. In Cook County the number of transfers has increased 500 percent since 1979. The results of my committee's investigation demonstrates that the "dumping" of patients from hospital to hospital is not unique to Cook County but represents only the tip of the iceberg regarding the growing and complex problems of the medically uninsured.

Mr. President, the amendment offered today by Senators KENNEDY and DURENBERGER and myself takes a major step toward preventing the "dumping" of emergency patients. This amendment would enable the Secretary of Health and Human Services to terminate a hospital from the Medicare program that has inappropriately transferred or "dumped" a patient from its emergency room.

Mr. President, the time is now for the Senate to address the serious problems of this Nation's most vulnerable citizens. I congratulate the Senator from Minnesota and the Senator from Massachusetts for taking leadership on this critical issue and am pleased to join them in offering this amendment.

Mr. PROXMIRE. Mr. President, I am delighted to join as a cosponsor of this antidumping amendment.

The new prospective payment system for Medicare—better known as the DRG System—has had a tremendous impact on our Nation's hospitals. For the first time, hospital administrators and their staffs have been given incentives for good management and efficiency.

But as we all know, those same incentives for more efficient patient care management can all too easily become incentives for underservice, a refusal to provide service and a drop in the quality of care provided.

This amendment deals with one of the most egregious abuses: The refusal of hospitals with emergency rooms to provide emergency treatment for critically ill patients or women in labor.

Fortunately, these cases have been the exception rather than the rule and tend to occur in large urban areas with major publicly supported hospitals. But in the last few years as we phased in the new DRG payment system for Medicare and competition has begun to take hold in the hospital industry, the number of transfer cases reported by public hospitals and allegations of service denied have increased enormously.

That trend must be stopped in its tracks. And reversed. In my view there can be no excuse for a hospital with emergency room facilities to routinely refuse to provide emergency care and send an ambulance on to the local public hospital.

I think that the overwhelming majority of hospital administrators and emergency room physicians would agree. And I am delighted that the Wisconsin Hospital Association opposes such dumping practices as well.

While I recognize that some of my colleagues would prefer even stronger sanctions than the ones contained in this proposal, it is crucial that we act promptly to establish the fundamental principle that this behavior will not be tolerated by Medicare. It is my hope that the sanctions outlined by the distinguished Senator from Minnesota [Mr. DURENBERGER] will be effective in reversing this unconscionable policy but, if not, the hospital industry should be on notice that many Members of this body stand ready to revisit this issue if necessary and adopt tougher sanctions.

There is one other point that I want to make in connection with the incentives for underservice.

It has become increasingly clear in the last few months that the Federal Government has failed in its responsibility to educate health care personnel and Medicare beneficiaries regarding their rights under the new DRG payment system.

Far too many beneficiaries have been falsely informed that Medicare will no longer pay for their care because their "DRG is up." Or Medicare is forcing the physician to discharge them. Or that they can only receive Medicare-reimbursed home health services if they use the hospital's own service.

Mr. President, these statements are simply not true. In some cases they represent a simple misunderstanding by health care personnel of how the DRG system works. In other cases, it is overenthusiastic competition by hospital-based home health agencies. And sometimes it is a physician's desire to avoid acceptance of responsibility for their own decision to discharge a patient.

But continued reports of this nature are disturbing. And reports of premature discharges are even more alarming.

What is clear is that the Federal Government cannot delay any further in educating both health care personnel and Medicare beneficiaries regarding the right of Medicare patients to treatment and that is why I have introduced a Medicare patient bill of rights, which I intend to offer as an amendment to the Medicare Patient Protection Act when it is taken up by the Senate in the next few weeks.

The Medicare patient bill of rights would assure that Medicare beneficiaries receive information when they need it most—during their hospitalization—and will prove an important safeguard against underservice and premature discharge.

In concert with the provision we are adopting today, these two efforts will go a long way toward assuring the right of Medicare patients to the benefits they have been promised. I congratulate the Senator from Minnesota [Mr. DURENBERGER] on this important amendment and am delighted to join in sponsoring the amendment.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the name of the Senator from New Jersey [Mr. BRADLEY] be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, as I understand this bill and the committee jurisdiction and the various cosponsors, clearly this is something that has no opposition with respect to those who are involved in this notion of Medicare dumping. On my side, I have no objection to it. I do not know the position of the distinguished Senator from Florida. I will yield back time in opposition once he speaks.

Mr. CHILES. Mr. President, I understand that Senator KENNEDY, a cosponsor on our side, is on his way to the Chamber now, and he would like to be here, if we might delay for a moment.

Mr. DURENBERGER. It is all right with me.

While we are awaiting the arrival of the Senator, unless either manager of the bill has some business, I have a few comments to make relative to certain provisions of this bill.

I know that the managers on both sides are concerned about amendments such as this—perhaps other language that has appeared on a reconciliation bill, not necessarily intended to alter public policy, other than to reduce the manner in which we expend funds to the furtherance of that policy.

I say to the managers of the bill, the members of the Budget Committee, and my other colleagues that it is difficult, and has been increasingly difficult, to participate in a legislative process that is so dominated by the budget considerations.

On a number of occasions, I have spoken on this floor about the fact that if it is the mood of the country to balance the Federal budget, and if it really is the mood of the country to live within our means, we are not going to make it by cutting money out of existing programs or by increasing taxes. The difference between our appetite for services and our willingness to pay is too large.

This Senator, together with others, has spent a fair amount of time trying to find other ways to accomplish that end—that is, by the more efficient utilization of the dollars that taxpayers of this country will commit to the services of others and to their own services.

In the Chamber at the present time is the chairman of the Committee on Armed Services, who, together with the ranking minority member of that committee, has committed a lot of time and resources to looking at the way in which the national security policy of this country can be furthered in a different way, with a smaller draw over the period of time on the financial resources of this country.

In the area of health care, we have done much the same thing. We have taken a look at the system that delivered services, found out that it wastes too much money, found out how you can change that system, and started to put that change into effect.

It is unfortunate that we do not have time between first budget resolutions and their conference and their adoption and reconciliation and its conference and its adoption and, in the future, sequestration under Gramm-Rudman to do a lot of the

good that needs to be done. As a result, we do our good on the reconciliation and on the budget resolution.

I trust that the managers of this bill and those who are responsible for the budget process will understand that is the way we have operated in the past and that is the way the process will force us to operate in the future.

I say to them—and I say particularly to the administration—that if deficit reduction is to be accomplished by continuing to freeze Medicare payments, they have another think coming. That was a 1-year deal. While people may say we are only saving money at the expense of doctors and hospitals, the reality is that every chink taken out of a doctor or a hospital in this country eventually, if it is perpetuated, will come out of the health care of the elderly and the disabled.

So I am here to say that we did it once in this kind of freeze and we are not going to do it again, at least as long as I am around here.

Mr. President, I ask unanimous consent that the name of the Senator from Michigan [Mr. RIEGLE] be listed as a cosponsor of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, I think we are ready to yield back the time, and we can accept the amendment.

Mr. DOMENICI. Mr. President, as I indicated previously, I have no objection to the amendment. I yield back any time in opposition.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 860) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum, with the time to be charged equally.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I understand that the distinguished Senator from Massachusetts, Senator KENNEDY, and the junior Senator from California, Senator WILSON, have an amendment which they desire to offer.

AMENDMENT NO. 861

(Purpose: To delete section 203 of the bill relating to a delay in the effective date of the military pay raise and substituting a program for collection by the United States of medical and dental expenses incurred by the United States on behalf of certain persons)

Mr. KENNEDY. Mr. President, I send an amendment to the desk on behalf of myself and the Senator from California [Mr. WILSON] and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY], for himself and Mr. WILSON, proposes an amendment numbered 861.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 89, beginning with line 17, strike out all down through line 7 on page 90 and insert in lieu thereof the following:

SEC. 203. COLLECTION BY THE UNITED STATES OF MEDICAL AND DENTAL COSTS INCURRED ON BEHALF OF CERTAIN PERSONS.

(a) IN GENERAL.—(1) Chapter 55 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1095. Collection from third-party payers of reasonable medical and dental care costs incurred on behalf of retirees and dependents

"(a)(1) In the case of a person who is covered by section 1074(b), 1076(a), or 1076(b) of this title, the United States shall have the right to collect from a third-party payer the reasonable costs of medical and dental care incurred by the United States on behalf of such person through a facility of the uniformed services to the extent that the person would be eligible to receive reimbursement or indemnification from the third-party payer if the person were to incur such costs on the person's own behalf. If the insurance, medical service, or health plan of that payer includes a requirement for a deductible or copayment by the beneficiary of the plan, then the amount that the United States may collect from the third-party payer is the reasonable cost of the care provided less the appropriate deductible or copayment amount.

"(2) A person covered by section 1074(b), 1976(a), or 1076(b) of this title may not be required to pay an additional amount to the United States for medical and dental care by reason of this section.

"(b) No provision of any insurance, medical service, or health plan contract or agreement having the effect of excluding from coverage or limiting payment of charges for certain care solely on the basis that such care is provided through a facility of the uniformed services shall operate to prevent collection by the United States under subsection (a).

"(c) Under regulations prescribed under subsection (f), records of the facility of the uniformed services that provided medical or dental care to a beneficiary of an insurance, medical service, or health plan of a third-party payer shall be made available for inspection and review by representatives of the payer from which collection by the United States is sought.

"(d) Notwithstanding subsections (a) and (b), collection may not be made under this section in the case of a plan administered under title XVIII or XIX of the Social Security Act (42 U.S.C. 1395 et seq.).

"(e)(1) The United States may institute and prosecute legal proceedings against a third-party payer to enforce a right of the United States under this section.

"(2) The administering Secretary may compromise, settle, or waive a claim of the United States under this section.

"(f) The Secretary of Defense, in consultation with the other administering Secretaries, shall prescribe regulations for the administration of this section. Such regulations shall provide for computation of the reasonable cost of medical and dental care. Computation of such reasonable cost may be based on—

"(1) per diem rates; or

"(2) such other method as may be appropriate. However, such regulations shall provide that in no event may the reasonable cost of care or services sought to be recovered or collected from a third-party payer exceed an amount equal to the prevailing rate that such third party payer can demonstrate to the satisfaction of the Secretary of Defense it would pay for the care or services provided in facilities (other than facilities of departments or agencies of the United States) in the same geographic area.

"(g) In this section, 'third-party payer' means an entity that provides an insurance, medical service, or health plan by contract or agreement.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1095. Collection from third-party payers of reasonable medical and dental care costs incurred on behalf of retirees and dependents."

"(b) EFFECTIVE DATE.—Section 1095 of title 10, United States Code, as added by subsection (a), shall apply with respect to health care provided on or after the date of the enactment of this Act (but only with respect to an insurance, medical service, or health plan agreement entered into, amended, or renewed on or after that date.)

(c) REPEAL PROVISION.—Section 1095 of title 10, United States Code, as added by subsection (a)(1), and the item in the table of sections at the beginning of chapter 55 of such title relating to section 1095, as added by subsection (a)(2), are repealed effective two years after the date of the enactment of this Act.

Mr. DOMENICI. Mr. President, will the Senator from Massachusetts yield for a moment?

Mr. KENNEDY. I am glad to yield.

Mr. DOMENICI. Mr. President, I am in favor of the amendment so I wish to designate someone who opposes it. I understand the distinguished Senator from Illinois, Senator DIXON, opposes it. I yield my time to him under the Budget Act to oppose the amendment.

Mr. KENNEDY. Mr. President, I am offering this amendment in an effort to protect the 3 percent military pay raise that the DOD conference report has authorized to take effect as of October 1, 1985. I believe that the pay raise should go forward and take effect on schedule.

But as it now stands, the Reconciliation Bill will delay that pay increase until November 1, 1985 in order to generate a savings of some $146 million in Federal outlays for fiscal year 1986. This savings will come at the expense of our active duty personnel and their families. It is a bad precedent, and it sends the wrong signal.

I respect and support the reconciliation process, and I voted for the budget resolution. I understand the importance of each committee complying with its reconciliation target. But I oppose doing it the way we have done it in the Omnibus Budget Reconciliation Act of 1985.

I am taking this position for two reasons:

First, the pay raise for military personnel is long overdue. It is needed by the military recruiters as well as by the people already in the military—and it is well deserved. We will run a significant risk of injuring our military's efforts to maintain high quality men and women in our services and we will severely damage military morale if we try to achieve these savings on the backs of our men and women in uniform.

Second, I think that there is a better way of achieving these savings—by authorizing the Secretary of Defense to seek reimbursement from private insurance companies for the reasonable cost of medical and dental care provided in military medical facilities to individuals who are also covered by health insurance plans—and that is the way that I have proposed in this amendment.

Let me first explain why I think that it is important to go forward as scheduled with the 3 percent pay raise.

During my years of service on the Armed Services Committee, I have made a point of traveling to military facilities and of meeting and talking with members of our armed forces I have had a special interest in the quality of their lives—and the lives of their families—as members of the United States military. I have found that our people in uniform are grateful for the important and dramatic improvement in the respect and admiration that our society as a whole shows towards our service men and women—particularly when compared with the situation 20 years ago. But I have also found that our active duty personnel still have the feeling that much of their sacrifice and hard work and dedication goes unappreciated if not entirely unnoticed.

To cite one example, just last July, I met and sailed for a few hours with the crew of the nuclear attack submarine, the U.S.S. *Mendel Rivers.* I learned that these sailors are away from their families for months on end and that they live for weeks at a time in the cramped and claustrophobic circumstances of a submarine on patrol. I saw first hand that life for a submariner is tough and exacting. But I heard no complaints from them about that. In fact, what I heard was a great sense of pride in what they were able to do in the service of their country and in their contributions to the effort to protect and defend the United States of America.

But I also discovered that many of these crew members—as is true with many other military men and women stationed at home and around the world—have the sense that their work and their sacrifice and rarely recognized, understood or appreciated by the American public at large. These individuals are not asking for brass bands and military parades every Sunday. That is not why they joined the military. But they do want—every now and then—some sign that the country is grateful to them for what they do, and that the American people understand and appreciate the sacrifices involved in the performance of their duties.

For us to delay this much-needed and much-deserved pay increase would send just the opposite signal. We would be saying to our people in uniform that, when it comes to cost savings, the Defense contractors go untouched, the cost overruns go on and on as far as the eye can see, the big-ticket weapons keep getting bought and the $600 toilet seats somehow find their way into the Defense budget—but when it comes to the people in the military—the most important weapons systems in our Nation's defense—they catch it in the neck every time.

I don't think that we want to send that signal to our military.

But there is more at stake here than just the morale of the men and women in the field. I have heard everybody tell me—from the Chairman of the Joint Chiefs to the commanders in the field—that the quality of the men and women in the military today is at its very highest. From every objective measure, we now have some of the best educated, best trained and most highly qualified military personnel in our Nation's history. And I can say that from my firsthand observations I agree with that assessment. I think we should make every effort to keep it that way.

Military pay today is 10.6 percent behind pay in the civilian sector. We did achieve pay comparability in 1982, but the last four pay raises have been capped, and military pay is now as far behind as it has ever been. The effects of these pay caps are beginning to be seen in our recruiting efforts—more specifically in the Army's failure to meet its targets for the Delayed Entry Program. It is becoming increasingly difficult to get new recruits, and this is a clear indication of serious problems ahead. In the past we have seen what happens when we ignore the human resources in the military. By now we should have learned our lesson.

I urge my fellow Senators to support this amendment—not only because it will restore the pay raise to the military but also because there is a natural and much more desirable way of achieving these savings that will do no damage either to the military or to our national defense.

Today, many individuals entitled to receive health care in military medical facilities are also covered by private health insurance policies. For example, after completing a full active duty career, many service members seek a second career and find another job. In their new employment, these individuals frequently are covered by private health insurance programs. But they are also entitled, as retirees, to continue to obtain care from military medical facilities.

As the system operates today, despite the fact that many military patients have their own private insurance coverage, military medical facilities do not seek reimbursement from those insurance carriers for the cost of the care that is provided to these individuals. It is nothing less than a windfall for the private insurance companies.

This amendment would simply authorize the Secretary of Defense to seek reimbursement from the private insurance carriers in these circumstances.

In a report entitled "Options for Change in Medical Care," issued in March 1984, the Congressional Budget Office found that there were significant savings to be achieved through implementation of this system of reimbursement. With respect to military hospitals, more than one-half million patients who are not on active duty enter military hospitals each year. Roughly 16 percent of them have private health insurance—5 percent of the dependents of active duty personnel are covered by private health care programs, and fully 25 percent of all retirees, their dependents and survivors are similarly covered.

With respect to outpatient visits, there are over 26 million outpatient visits to military clinics by nonactive duty beneficiaries each year. Roughly 20 percent of these outpatient users also have private health insurance coverage.

Based on these figures, the CBO report projected savings in fiscal year 1985 of $165 million for inpatient care and an additional $80 million for outpatient care for a total savings of $245 million. Those savings would increase to $215 million for inpatient care by fiscal year 1989 and $105 million for outpatient care. The total projected 5-year savings would be $1.4 billion.

This idea of seeking reimbursement from third-party payers of costs for medical care provided in military facilities has received careful and extensive scrutiny—by the Senate Committee on Veterans' Affairs, by the House Committee on Veterans' Affairs, and by the House Armed Services Committee. Each of these committees has concluded that such a system of reimbursement is fair and makes sense, and each has included savings based on this reimbursement plan as part of this year's reconciliation bill.

Moreover, the administration also supports this proposal. In May 1984, both the Department of Defense and the Office of Management and Budget notified Congress that they strongly supported enactment of this reimbursement proposal.

There has been some reluctance among some members of the Senate Armed Services Committee to enact this proposal this year because some members gave assurances to the insurance industry that the committee would not go forward with this legislation until there had been a full set of hearings.

For that reason, my amendment is different from the proposal adopted by the House Armed Services Committee and included in this year's reconciliation bill in the House. This amendment will put in place a reimbursement program for 2 years only. This amendment contains a sunset provision that will require the Congress to revisit this issue and enact new legislation in the event the Congress wants to go forward with this program on a permanent basis.

The result will be the following if this amendment is accepted: It will not be necessary to defer the military pay raise for fiscal year 1986 since the Government will collect the same—or greater—savings from the reimbursement program for that year. But we will not have made a final legislative decision on the desirability of the program. We will be able to watch a pilot program in operation—a demonstration project actually at work—and we will be able to evaluate the strengths of that program in full hearings before the Subcommittee on Manpower and Personnel—before the Congress decides whether to enact this system of reimbursement into law permanently.

There is another important difference. At the suggestion of the insurance industry, we have also included a cap on the liability for private insurance companies when it comes to reimbursing the Government. In no event will a private insurance company be required to reimburse in an amount in excess of the prevailing rate that the private insurance companies would pay for the same health care in the same geographic area. This is an important protection for the insurance industry that is not included in the House version.

Mr. President, this amendment deserves the support of the Senate. There is too much reason behind the argument that we should not meet our reconciliation target by taking it out of the military pay raise. And there is too much reason behind the idea that the Government should halt—at least temporarily—the windfall that is now accruing to private insurance companies and should seek reimbursement for health care provided by the military for individuals also covered by private health insurance programs.

Let us send a signal of support and appreciation to the men and women who serve our Nation in uniform; let us lay the foundation for the continued recruitment of high quality people into our military services; let us cast our vote to end the unearned profits now accruing to private insurance companies.

I urge you to support this amendment.

I welcome the opportunity to cosponsor this amendment with my friend and colleague from California, Senator WILSON, who is the chairman of the Military Manpower Subcommittee and spends a great deal of time on the personnel issue.

And I welcome the support of the chairman of the full committee, the distinguished Senator from Arizona, who has indicated that he believes that this would be a useful and helpful amendment.

I am hopeful that the floor managers will accept it.

Mr. DIXON. Mr. President, at the appropriate time I want to be heard briefly against the amendment. But if my distinguished colleague, the Senator from California, who is the chairman of the subcommittee that has jurisdiction, would prefer to be heard, it is satisfactory with me.

Mr. WILSON. I will be happy to speak now or follow the Senator from Illinois.

Mr. DIXON. I thank my friend from California.

Mr. President, may I say that I reluctantly oppose this amendment as a matter of record and hope that my warm friend from Massachusetts understands my personal reluctance.

Mr. President, Unfortunately, I must oppose the amendment of the Senator from Massachusetts. I do this because I do not think the Armed Services Committee has had an adequate opportunity to fulfill its obligation to the Senate to closely examine all of the implications of this proposal before we act on it.

The idea behind Senator KENNEDY'S amendment of billing private insurors for care provided to their policyholders in military medical facilities is not new. The Defense Department proposed this to the Congress earlier this year and in the last Congress as well. The Congressional Budget Office and the Grace Commission have also suggested this idea as a way of reducing the costs of medicals care in the military health care system.

The idea is certainly an attractive one—why should not private insurance companies pay for the cost of medical care that their policyholders receive in military medical facilities? After all, the insurance companies collect premiums from their policyholders who receive care in military medical facilities. If the insurance companies are going to collect these premiums, then why should not they pay for the medical care whether it is in a private hospital or a military medical facility?

Well, it may sound simple, but there are some problems with this concept.

For example, the Defense Department has absolutely no idea what it really costs to provides care in one of its military hospitals. They cannot tell an insurance company—and DOD will admit this—what the cost of an appendectomy is at Walter Reed or Bethesda or any other military medical facility. DOD and the military services just do not have a cost-accounting system to determine the cost of medical care at a specific hospital. The best they can do is take the total amount they spend on medical care throughout the Defense Department, divide that by the total number of inpatient days, and come up with an average cost per inpatient day. This average inpatient cost does not distinguish between someone with a mild case of pneumonia and someone in the coronary intensive care unit.

Last year when the Defense Department originally requested the authority to bill private insurors, they simply wanted to bill private insurors on the basis of an average daily cost of inpatient care. For an insurance company whose policyholder spent that average day in the coronary intensive care unit, that is a good deal. But the insurance company whose policyholder was just recuperating from a mild case of pneumonia gets a pretty raw deal.

There are other problems with this proposal, Mr. President, but I will not take the time to go into them. I am sure the sponsor of the amendment will argue that he has overcome all of these problems. The point I want to make to my colleagues is that the Manpower and Personnel Subcommittee of the Armed Services Committee—the subcommittee of jurisdiction—has not held any hearings on this proposal or examined this proposal carefully.

Last year, the chairman of the Manpower and Personnel Subcommittee, the distinguished former Senator from the State of Iowa, Senator Jepsen, made a public commitment that the Manpower and Personnel Subcommit-

tee would hold hearings on this proposal and carefully examine it before we acted on it. I joined him in that commitment as the ranking member of the subcommittee at that time. That hearing has not been held, and this Senator is not going back on his word.

The Manpower and Personnel Subcommittee has held three excellent oversight hearings on military health care this fall. I understand that the distinguished chairman and ranking member of that subcommittee, Senator WILSON and Senator GLENN, intend to hold a fourth hearing to examine a number of legislative proposals in the area of military medical care, including this proposal in Senator KENNEDY's amendment.

It is very possible, Mr. President, that after this hearing, after hearing from all of the parties interested in this proposal, that this Senator will support the concept of billing private insurance companies for the reasonable cost of care provided to their policyholders in military medical facilities.

But Mr. President, I am not going to make up my mind on this question until the Armed Services Committee—the committee of juridiction—has given this proposal the careful examination that it requires. That careful examination has not occurred yet, and I therefore must oppose this amendment.

Now, Mr. President, I know that this has been pretty generally agreed to on both sides by a number of Members, including the chairman of the subcommittee, the chairman of the committee, and others. I have no reason to try to work my will against theirs; particularly, I do not think that I could. But I do want the record to show my feelings. Senator Jepsen is not here any more. I believe he would want that to be the case as well, because I believe him to be an honorable man and would want to keep his word. This Senator wants to keep his.

I want the record to show that I will vote no on this amendment. I am not going to ask for a rollcall. Clearly, everyone on the floor here that is involved is prepared to do this. Apparently the commitments have been made by everyone and they are going to do it. I am not going to stand in the way of it being done, but I do want the record to show that I support what was done in the committee in reconciliation which was to defer from October the 1st to November 1st the military pay increase to keep our word with the insurance industry in this country. I am going to vote no to keep my word with the insurance industy.

I want to say that I think it is unfortunate that it is being done this way. I do not mean to reflect on anyone. It is nobody's fault. Obviously, nobody pressed for hearings and my distinguished friend from California was not asked to have hearings.

I am told, incidentally, that the House has adopted in their reconciliation a permanent charging of the hospitals for services rendered to policyholders, in hospitals on military installations. I understand what my friend from Massachusetts and others are doing here is only a 2-year pilot program. I have no problem with the concept.

My problem with the whole thing is the fact that we had indicated there would be hearings and there have been no hearings. I think, as a consequence of that, that what we are doing is unfortunate.

Mr. WILSON. Mr. President, let me respond to my good friend from Illinois. He raises a point upon which he is understandably sensitive or, more accurately, he is expressing a sensitivity to keeping, as he put it, his word and the word of the subcommittee.

It is apparently true that my predecessor, Senator Jepsen, who served as chairman of this subcommittee before I was a member of it, made a representation to the insurance industry that before proceeding with legislation of the kind that is pending he would hold hearings and allow them to be heard. I think it fair that they be heard.

There is no intent on my part, nor do I think there is any intent on the part of Senator KENNEDY, to preclude any such investigation or discussion.

But the fact is, Mr. President, whether we like it or not, that we are at this point compelled to make some difficult choices because of the reconciliation process. And my good friend from Massachusetts, the senior Senator from Massachusetts, in offering this measure has stated the reason for that. We were compelled to make reconciliation as it related to the manpower costs of the defense authorization bill and we were faced with unpleasant choices.

I do not think anything needs to be added to his comments about why we felt it important to try, insofar as possible, to accelerate the pay raise that we feel is justly deserved by the men and women of our armed services. The question then arose: If we are to do that, how are we to do that? It is true that questions exist with respect to the solution that he is posing here. But I would say that others have examined it. It is not an entirely new concept. Indeed, it has been extensively reviewed by the Veterans Committee, as he pointed out. It is a recommendation not only of the Congressional Budget Office, but also of the Grace Commission.

While I agree tnat there are questions that deserve our attention, and will represent to the Senator from Illinois that I am more than willing at a hearing very soon to explore those questions fully, at this point I would say that we are compelled to make a choice imposed upon us by the reconciliation process. I think the 2-year pilot program that is proposed is a very good beginning, because it is going to compel a discipline of the kind that would not otherwise be visited upon either the military health care system or the insurance industry. Both are going to have to determine the costs to them of implementing this.

But the concept, I think, Mr. President, is without question a fair one, because what we are talking about are dependents of military personnel who are, as dependents, included in group health insurance programs by virtue of their employment or participation in some other insured group. It is fair, Mr. President, that those persons who are included, and who would in the ordinary course have their health care costs paid for by their private insurance, look instead to the military for completely free care?

Well, I suggest that it is not fair. It is not fair because it is not entirely free. And those to whom it is not fair are the American taxpayers who are, in effect, subsidizing those private insurance companies by giving a free ride to the health care provided by the military to those dependents, who, in fact, pay premiums or have premiums paid for them by a group or an employer and then receive no benefit, either from the carrier or from the health care system that the insurance is designed to pay for within the private sector.

So what we are suggesting is that if someone is to bear the burden where we have this, in effect, double coverage and where the actual costs are being provided by the military health care system, that there should not be a free ride; that the cost of that care should be paid by those who have contracted to pay for the care, and that is the private insurer.

Now, as to the questions that arise, we concede that his will require in its implementation a new system of accounting on the part of the military health care system. They will need to determine the actual costs of their care, whether it costs more to provide a day of care for someone who is recovering from an appendectomy or someone who is recovering from open heart surgery or from gynecological or obstetrical care.

But, Mr. President, these questions are not insoluble. Indeed, I think one of the great fringe benefits of this approach is going to be that we will determine exactly what our health care in the military system is costing. In fact, it may be that some private sector techniques which are applied by the insurance companies to cut those costs will be a welcome addition to the

kind of medical practice that the military is now engaged in.

It may be that, as a result of this, we will, in effect, reduce the costs both by a different technique and also by the fact that we will no longer be giving a free ride to those who are doubly insured; that is, who receive free care form the military and are covered by private care group plans.

So, for those reasons, Mr. President, I rise to cosponsor, with my friend and colleague from Massachusetts, the measure that he has advanced.

I would say to my good friend from Illinois that we will, in fact, be fair to the insurance industry. We will at an early opportunity hold hearings and examine all the questions that arise in the course of implementation. But I think it is time that we began this, because I think it fair both to military dependents and fair to the American taxpayers who have been paying more for health care for dependents than, in fact, they should.

Mr. GLENN. Mr. President, will the Senator from New Mexico yield me 4 minutes in favor of the bill?

Mr. DOMENICI. I yield to the Senator from Ohio.

Mr. GLENN. Mr. President, I support Senator KENNEDY's amendment to restore the effective date of the military pay raise to October 1 and to meet the Armed Services Committee's fiscal year 1986 reconciliation savings target by implementing a 2-year test-program to collect payments from private insurance companies for care provided to their policy-holders in military medical facilities.

The idea of billing private insurors for care provided to their policy-holders in military medical facilities is not new. The Defense Department proposed this to the Congress earlier this year, and in the last Congress as well. The Congressional Budget Office has also suggested this idea as a way to reduce the costs of medical care provided in the military health care system.

When the Armed Services Committee met several weeks ago to decide how to meet the savings required under the reconciliation instructions, the committee considered adopting this proposal. We decided not to hold a series of oversight hearings this fall on the military medical system. As part of these hearings we intended to examine this and other legislative proposals to improve the military medical system.

The Manpower and Personnel Subcommittee has had three very successful oversight hearings on the military medical system in the last 6 weeks, and we intend to have one more. This last hearing will focus on these legislative proposals.

So Mr. President, our decision not to include this proposal in our reconciliation recommendations was not necessarily based on any opposition to the principle of billing private insurance companies for care provided to their beneficiaries in military medical facilities. It was simply based on our desire to examine this proposal more closely before it was enacted into permanent law.

Now many of my colleagues probably regard the Armed Services Committee as the Senate's money-bags when reconciliation comes around, but the fact is that the areas of direct spending authority under the jurisdiction of the Armed Services Committee available to meet the reconciliation instructions are very limited. Since we elected not to recommend this legislation authorizing DOD to collect from private insurers, the committee had little choice other than delaying the effective date of the fiscal year 1986 military pay raise by 1 month to meet the reconciliation savings target for fiscal year 1986.

In recent weeks, however, it has become clear that Congress will enact legislation allowing the Government to bill private insurance companies for care provided to their policyholders in government medical facilities. Both the Senate and House Veterans' Affairs Committees have proposed such legislation to cover VA medical facilities as part of this reconciliation bill. The House Armed Services Committee has also proposed language covering DOD medical facilities as part of this reconciliation bill. So it is no longer a question of whether such legislation will be enacted, but when.

It is in light of this reality that I support Senator KENNEDY's amendment. I am glad that he has found a way to restore the October 1 effective date for this year's military pay raise.

I am also glad that he has made his amendment authorizing DOD to collect from private insurance companies the cost of care provided to their policyholders in DOD medical facilities a 2-year test program. This will allow—in fact require—the Manpower and Personnel Subcommittee to review the initial implementation of this program before deciding whether it will be made into permanent law.

Mr. President, I urge my colleagues to support Senator KENNEDY's amendment. I think it has a lot of merit to it. I am glad to rise today in support of that amendment.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. KENNEDY. Mr. President, I am prepared to yield back the balance of the time.

Mr. DIXON. I yield back the balance of my time.

Mr. DOMENICI. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment (No. 861) was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. First, I want to thank all those who participated in that amendment, and the one previous to it in disposing of two rather important amendments this evening. I would like to say that I have talked with the leader. There will be no further votes tonight. We will probably move off of this bill in a couple of minutes.

Might I say for the RECORD, and for those Senators who are not here and are concerned about this reconciliation bill, that the leader tells me we will be back on this bill sometime around 1:15 tomorrow.

We have just over 5 hours left, just about equally divided between the two sides. I want to remind those who have amendments, and those chairmen or ranking members who want to be on the floor to debate the issues that involve their committees that we are aware of amendments on the OCS issue, AFDC, Medicaid error rates, foreign fishing fees, railroad unemplyment, GRS technicals, food stamp error rates, Medicare, energy assistance, and GTPA. However, this list is by no way all-inclusive. There is also a CHAMPUS amendment.

So those chairmen or ranking members that want to be heard in opposition or in favor of these amendments should know that we will proceed to these amendments sometime after 1:30, in some order, but not necessarily with an awful lot of advance notice. We will try to contact them. If they cannot be here because of conflicts, we would ask that they designate someone to come and defend their committee's position. We are not going to be able to put off very many amendments now. So many of us have to be in conferences on other items. But we are going to have to get the legislation finished. The leader wants to finish if possible tomorrow night.

We also have an amendment on textiles, which I forgot to mention.

Mr. RIEGLE. Mr. President, I would like to bring to the attention of my colleagues a concern about an inequity in the Medicare Prospective Payment System [PPS], which unfairly penalizes some rural hospitals. This inequity could be easily rectified by a small adjustment in the rural referral classi-

fication system, and is included in the House reconciliation bill.

As the distinguished chairman of the Finance Committee knows, the PPS was implemented with an urban-rural payment differential—for the same DRG—in order to accommodate the greater cost of delivering medical care in an urban setting. Congress recognized, however, that there are certain rural hospitals that serve as referral centers for larger communities, thereby incurring greater cost than other rural hospitals. The problem is that one of these criteria for distinguishing urban from rural hospitals—an annual discharge rate of 6,000—makes it impossible for osteopathic hospitals to qualify, despite the fact that they meet all of the other criteria.

The emphasis and approach of osteopathic medicine results in hospitals that are typically small in size, even though they may be able to provide complete referral services. In certain cases it is clear from the range of services they provide, the breadth of their referral base, and the complexity of the cases that they treat, that some of these hospitals ought to be able to qualify as rural referral centers. The required annual discharge rate of 6,000 patients, however, has the effect of unfairly prohibiting osteopathic hospitals from being classified as rural referral centers and receiving fair compensation for their services to their medicare patients.

A minor adjustment—lowering the discharge rate required for classification as a rural referral center to 3,000 cases per year—would rectify the inequity. For these reasons, I introduced, with Senator LEVIN, S. 1316, which corrects this inequity. In addition, this provision has already been incorporated by the House Ways and Means Committee in its reconciliation bill.

I would urge my colleague, the chairman of the Finance Committee to carefully consider this minor adjustment when he goes to conference with the House. This refinement of the rural referral center classification system will both rectify the inequity and contribute in a positive way to the functioning of the prospective payments system.

Mr. PACKWOOD. I thank my colleague from Michigan for his expression of concern, and I assure the Senator that I will keep his request in mind when the House and Senate meet in conference.

NONPROFIT POSTAL RATES

Mr. D'AMATO Mr. President, while I do not intend to offer an amendment to the fiscal year 1986 budget reconciliation bill, S. 1730, I would like to address a provision in this bill that represents a matter of serious concern to many voluntary charitable institutions and other nonprofit groups.

I refer to section 804, included in the bill on the recommendation of the Committee on Governmental Affairs, which specifies further cutbacks which would affect these groups. This provision would direct the Postal Rate Commission to conduct a 6-month study and then recommend legislative changes to Congress that would cut in half the amount of the revenue foregone appropriation that can be attributed to certain nonprofit third-class mailings. The mail affected is that "which advertises or promotes the sale of, recommends the purchase of, or announces the availability of any article, product, service, insurance, or travel arrangements."

Mr. President, I am deeply concerned that this provision could affect some very worthwhile fundraising efforts by countless organizations across America. Before I express my general concerns, I want to spell out my understanding of what the provision means.

It is my understanding that this provision's intent is to cut the postal subsidy for mailings which advertise commercially available items. This means that groups advertising their own products would not be affected.

I would like to mention a few examples.

Let's say an organization which specializes in alcohol and drug abuse treatment also prints and sells pamphlets or books which are designed to educate the public on drug and alcohol abuse. Mailings of this type should not be affected by this provision.

The same would be true for consumers' organizations which produce and sell their own information. Symphonies and performing arts associations which sell tickets or subscriptions to their own productions similarly should not be affected.

Mr. President, items and services sold by an organization which are not commercially available are often central to that organization's fundraising efforts. Quite often, these sales are central to the organization's charitable purpose.

Mr. President, I want to go one step further in expressing my concern. Although I believe we are making it clear today what this provision would mean, I do not want to imply that I support this provision even under this restrictive definition.

However, since the provision does not immediately affect these institutions, and since there is hope that the conference committee will seriously consider this provision and weigh its possible consequences against the relatively modest savings it would bring to pass, I will not propose to strike or amend today. But I do hope the Senate and House conferees will take a careful look at this provision and carefully consider the large number of borderline cases and the difficulty involved in implementing such a provision. I am concerned that extremely worthwhile organizations may be seriously hurt by these decisions.

Thank you, Mr. President.

Mr. DOMENICI. Mr. President, how much time remains on the bill?

The PRESIDING OFFICER (Mr. MATTINGLY). Five hours and eighteen minutes.

Mr. DOMENICI. How much time is on each side?

The PRESIDING OFFICER. Two hours, thirty-two minutes under the control of the Senator from New Mexico and 2 hours, 46 minutes under the control of the Senator from Florida.

Mr. DOMENICI. I thank the Chair.

ROUTINE MORNING BUSINESS

Mr. DOMENICI. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend past the hour of 7:15 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on the Judiciary.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:37 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 104. Joint resolution to proclaim October 23, 1985, as "A Time of Remembrance" for all victims of terrorism throughout the world.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 407. Joint resolution designating the 12-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States".

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

ENROLLED JOINT RESOLUTION SIGNED

At 1:10 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 104. Joint resolution to proclaim October 23, 1985, as "A Time of Remembrance" for all victims of terrorism throughout the world.

The enrolled joint resolution was subsequently signed by the President pro tempore [Mr. THURMOND].

At 3:13 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2409) to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and National Research Institutes, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 79. A concurrent resolution correcting the enrollment of H.R. 2409.

The message further announced that the House disagrees to the amendment of the Senate to the bill (H.R. 2419) to authorize appropriations for fiscal year 1986 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disability System, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and apoints Mr. HAMILTON, Mr. STOKES, Mr. MCCURDY, Mr. BEILENSON, Mr. KASTENMEIER, Mr. DANIEL, Mr. ROE, Mr. BROWN of California, Mr. MCHUGH, Mr. DWYER of New Jersey, Mr. STUMP, Mr. IRELAND, Mr. HYDE, Mr. CHENEY, Mr. LIVINGSTON, and Mr. MCEWEN; and for consideration of matters within the jurisdiction of the Committee on the Judiciary under clause 1(m) of House rule X, Mr. MAZZOLI as managers of the conference on the part of the House.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2095. An act to provide for daylight saving time on an expanded basis, and for other purposes.

MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 2095. An act to provide for daylight saving time on an expanded basis, and for other purposes; to the Committee on Commerce, Science, and Transportation.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, October 23, 1985, she had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 104. Joint resolution to proclaim October 23, 1985, as "A Time of Remembrance" for all victims of terrorism throughout the world.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment:

S.J. Res. 13. Joint resolution proposing an amendment to the Constitution relating to a Federal balanced budget and tax limitation (with additional and minority views) (Rept. No. 99-162).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S.J. Res. 225. An original joint resolution proposing an amendment to the Constitution relating to a Federal balanced budget (with supplemental, additional, and minority views) (Rept. No. 99-163).

By Mr. LUGAR, from the Committee on Foreign Relations, without amendment:

S. Con. Res. 82. An original concurrent resolution expressing support for Chile's National Accord for the Transition to Full Democracy.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. LUGAR, from the Committee on Foreign Relations:

Natale H. Bellocchi, of New York, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Botswana.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Bellocchi, Natale H.

Post: Ambassador.

Contributions, amount, date, donee: $50, 1982; $50, 1984, $50, 1985; Republican, Congressional Campaign Fund.

1. Self.
2. Spouse, Lilan, none.
3. Children names, Luke, Jacqualine, none.
4. Parents names, Peter (deceased) Maryanna (deceased), none.
5. Grandparents names, Annibale (deceased) Anna (deceased), none.
6. Brothers and spouses names, none.
7. Sisters names, Elsie Moller, none.

Michael Sotirhos, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Jamaica.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Michael Sotirhos.

Post: U.S. Ambassador to Jamaica.

Contributions, amount, date, donee:

1. Self, Michael Sotirhos.
2. Spouse, Estelle Sotirhos.

SCHEDULE OF CONTRIBUTIONS MICHAEL AND ESTELLE SOTIRHOS

March 24, 1980, George Bush for President, $250; May 7, 1980, Helen Bentley for Congress, $50; September 8, 1980, Citizens for Olympia Snowe, $25; October 6, 1980, Helen Bentley for Congress, $50.

January 15, 1981, Al D'Amato (Candidate), $1,000; May 4, 1981, Connally for President, $50; March 5, 1981, Citizens for Olympia Snowe, $100; June 22, 1981, Frey for Senate, $25.

March 3, 1982, Citizens for Dewinski, $100; March 3, 1982, Friends of Prescott Bush, $250; April 4, 1982, Igleseas for Congress, $100; April 4, 1982, Cissy Baker for Congress, $100; April 26, 1982, Fore Nevada—Senate, $500; May 13, 1982, Bill Green for Congress, $250; May 23, 1982, Senator Heinz Committee, $250; June 1, 1982, Friends of Senator D'Amato, $200.

January 25, 1983, Charles Percy for Senate, $100.

January 10, 1984, Helen Bentley for Congress, $200; February 25, 1984, Charles Percy for Senate, $500; February 25, 1984, Friends of Senator D'Amato (primary), $1,000; April 19, 1984, Guy Molinari for Congress, $100; April 19, 1984, Mike Bilirakis for Congress, $100; April 19, 1984, George Gekas for Congress, $100; May 11, 1984, Bill Green for Congress, $250; October 1, 1984, Moshosky for Congress, $100; October 17, 1984, Helen Bentley for Congress, $100; December 14, 1984, Helen Bentley for Congress, $100.

January 8, 1985, Bill Green for Congress, $100; February 13, 1985, People for Pete (Domenici), $250; April 22, 1985, Friends of Senator D'Amato (General election), $1,000; April 22, 1985, George Gekas for Congress, $250; April 22, 1985, Helen Bentley for Congress, $100.

3. Children and spouses names, Michael (age 16); Stacey (age 13), none.
4. Parents names, George and Catherine Sotirhos (deceased), none.
5. Grandparents names (deceased), none.
6. Brothers and spouses names, Anthony Sotirhos (deceased), none.
7. Sisters and spouses names, none.

Clyde D. Taylor, of Maryland, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Paraguay.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Clyde D. Taylor.

Post: Ambassador to Paraguay.

Contributions, amount, date, donee:

1. Self, none.
2. Spouse, none.
3. Children and spouses names, Mark Blair Taylor, $25, July 18, 1983, Celebrate America; Courtney Dawn Taylor, none.
4. Parents names, Clyde W. and Ruth Taylor, none.

5. Grandparents names, Robert S. and Mabel Taylor (deceased); Wilhelm and Emma Marstaller (deceased).

6. Brothers and spouses names, none.

7. Sisters and spouses names, Orletta and Jack Gillikin, none; Darlene and Ronald Tate, none; Carolyn and Stephen Thompson, none.

Robert G. Houdek, of Illinois, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Uganda.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Robert G. Houdek.

Post: Ambassador to Uganda.

Contributions, amount, date, donee: (if not, write none)

1. Self, Robert G. Houdek, none.

2. Spouse, Mary W. Houdek, none.

3. Children and spouses names, Pamela L. Houdek, none; William D. Houdek, none.

4. Parents names, George C. Houdek, Sr. (deceased); Margaret Ann Munch, none; Frank Munch (stepfather), deceased.

5. Grandparents names, Otto and Marie Riepel (deceased); James and Anna Houdek (deceased).

6. Brothers and spouses names, George C. and Ruth Houdek, Jr., none; Thomas J. and Sue Houdek, none.

7. Sisters and spouses names, none.

Malcolm Richard Wilkey, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Oriental Republic of Uruguay.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Malcolm Richard Wilkey.

Post: Ambassador to Uruguay.

Contributions, amount, date, donee:

1. Self, none.

2. Spouse, none.

3. Children and spouses names, no children.

4. Parents names, Malcolm Newton Wilkey, Elizabeth Gilbert Wilkey, deceased 1969 and 1971.

5. Grandparents names, Alonzo Moulton Gilbert; Fanny Crawford Gilbert; William Jonathan Wilkey; Martha Clark Wilkey; all four deceased many years ago.

6. Brothers and spouses names, none.

7. Sisters and spouses names, Fay Wilkey Brown; Stewart Gregory Brown; none.

The following-named persons to be Members of the Advisory Board for Radio Broadcasting to Cuba for the terms indicated:

For terms of two years: Jose Luis Rodriguez, of Florida.

For terms of three years: Joseph Francis Glennon, of Florida; and Danford L. Sawyer, Jr., of Florida.

Alan Lee Keyes, of Maryland, to be an Assistant Secretary of State.

Richard Schifter, of Maryland, to be Assistant Secretary of State for Human Rights and Humanitarian Affairs.

Adele Langston Rogers, of Maryland, to be an Alternate Representative of the United States to the Fortieth Session of the General Assembly of the United Nations.

Midge Decter, of New York, to be a Member of the Advisory Board for Radio Broadcasting to Cuba for a term of one year.

John R. Silber, of Massachusetts, to be a Member of the Advisory Board for Radio Broadcasting to Cuba for a term of one year.

Antonio Navarro, of New York, to be a Member of the Advisory Board for Radio Broadcasting to Cuba for a term of three years.

Dwight A. Ink, of Maryland, to be an Assistant Administrator of the Agency for International Development.

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. HATCH, from the Committee on Labor and Human Resources:

Dennis Eugene Whitfield, of Virginia, to be Under Secretary of Labor.

Joyce A. Doyle, of New York, to be a Member of the Federal Mine Safety and Health Review Commission for the remainder of the term expiring August 30, 1986.

(The above nominations were reported from the Committee on Labor and Human Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BURDICK (for himself and Mr. ANDREWS):

S. 1785. A bill to amend the Garrison Diversion Project; to the Committee on Energy and Natural Resources.

By Mr. BOREN (for himself and Mr. GRASSLEY):

S. 1786. A bill to amend the Internal Revenue Code of 1954 to disallow certain credits and deductions and to preclude capital gains treatment regarding the use and disposition of certain highly erodible lands and wetlands; to the Committee on Finance.

By Mr. THURMOND, from the Committee on the Judiciary:

S.J. Res. 225. An original joint resolution proposing an amendment to the Constitution relating to a Federal balanced budget; placed on the calendar.

By Mr. RIEGLE (for himself, Mr. KENNEDY, Mr. BURDICK, Mr. HOLLINGS, Mr. NUNN, Mr. DOLE, and Mr. GORE):

S.J. Res. 226. A joint resolution to designate the week of April 6, 1986, through April 12, 1986, as "World Health Week," and to designate April 7, 1986, as "World Health Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DOLE (for Mr. GORTON (for himself and Mr. BYRD)):

S. Res. 243. A resolution to authorize the reprinting of Senate Document Numbered 87-64; considered and agreed to.

By Mr. SIMON (for himself and Mr. PELL):

S. Con. Res. 81. A concurrent resolution requesting the President to begin talks with the Government of the Soviet Union to establish a United States-Soviet Union student exchange for peace program; to the Committee on Foreign Relations.

By Mr. LUGAR, from the Committee on Foreign Relations:

S. Con. Res. 82. An original concurrent resolution expressing support for Chile's National Accord for the Transition to Full Democracy; placed on the calendar.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BOREN (for himself and Mr. GRASSLEY):

S. 1786. A bill to amend the Internal Revenue Code of 1954 to disallow certain credits and deductions and to preclude capital gains treatment regarding the use and disposition of certain highly erodible lands and wetlands; to the Committee on Finance.

CULTIVATION OF HIGHLY ERODIBLE LANDS AND WETLANDS TAX ACT

● Mr. BOREN. Mr. President, on behalf of Senator GRASSLEY and myself, I am introducing a bill which would eliminate the tax incentives for breaking out highly erodible land. Earlier this year, the Senate Agriculture Committee adopted a provision, as part of the 1985 farm bill, which prohibited the payment of farm program benefits to producers who break out highly erodible land.

Approximately 3.4 million acres of highly erodible grassland have been plowed in the recent past in the Central and Northern Great Plains States. Right now, there are 97.6 million acres of highly erodible grassland which could be plowed out in the Northern and Central Great Plains States.

Clearing and draining of wetlands—swampbusting—for crop production was the largest cause of wetland loss between the mid-1950's and mid-1970's, accounting for more than 80 percent of wetlands converted to other uses. Approximately 12 million acres of wetlands were converted during these time periods.

There is no doubt that there have been economic incentives to plow grasslands and to convert wetlands into production agriculture. Market factors, such as cattle prices, have played a role in providing the economic incentive to break out highly erodible land. However, the two main problems appear to be Government agricul-

tural policies and incentives and the present tax laws. Under the current law applicable to numerous agricultural programs, an agricultural producer may participate regardless of the suitability of the land used for the production of agricultural commodities. The producer under current law is eligible for various price support, production adjustment, Federal crop insurance, agricultural lending and support programs carried out by the Federal Government.

In the farm bill, as reported by the Senate Agricultural Committee, there are provisions to discourage new cultivation of fragile lands that are unsuitable for intensive agricltural production without the application of proper conservation practices. Under these provisions, the cultivation of highly erodible land will be discouraged by denying an agricultural producer access to price support, income assistance, production adjustment, disaster payment, Federal crop insurance and agricultural loan programs carried out by the Federal Government. The prohibition does not apply to land that was cultivated during any of the past 5 years. In addition, the prohibition does not apply to highly-erodible land that is under an approved conservation system.

What we have adopted in the agriculture committee is one step in a two-step process. It goes a long way, but the job is not finished until we also remove all tax incentives to break out highly erodible land.

There are three types of provisions related to agricultural land conversion which reduce income tax liability: Deductions, credits, and capital gains. The deductions for land clearing and soil and water conservation expenditures reduce taxes in the current year in lieu of capitalizing those expenses, which would increase the taxable basis of the improved land. This also has the effect of increasing the amount of long-term capital gain which will be realized on the sale of the property, which is subject to more favorable treatment than ordinary income. Land clearing deductions cannot be claimed after the land is in production and soil and water conservation deductions cannot be claimed for land that is not used for farming. In fact, according to the farmers tax guide, the interpretation of these deductions is sufficently broad so that almost any activity involving clearing of vegetation, earth moving, or construction of ditches can qualify for either one.

The investment tax credit effectively reduces the cost of qualifying investments by a tenth, if tax liabilities are higher than the credit allowed. Accelerated cost recovery allows the investment to be written off faster, increasing after-tax income in earlier years over true economic depreciation. Deduction of interest effectively reduces the cost of financing land conversion investments by a percentage equal to the marginal tax rate, which can be as high as 50 percent. According to some estimates, if a sodbuster is in the 50 percent tax bracket, half of his farming costs can offset actual taxes owed the Internal Revenue Service. At that point, the 10-percent investment tax credit is subtracted from real taxes due the Government. In some areas, tax subsidies for plowing out fragile grasslands can amount to $175 per acre. For a high-bracket operator who converts wetlands to cropland, the tax subsidy can amount to over $130 per acre.

Over the past few years, Mr. President, I have learned very quickly that we cannot solve all of agriculture's problems in the Agriculture Committee. It never fails that what we try to accomplish with agriculture legislation is undone with tax legislation or some other legislation seemingly unrelated to agriculture. If we are going to develop sound agricultural policy, we have to go beyond the purview of the Agriculture Committee. We must begin to address the problems of agriculture that are caused by the Tax Code. I learned earlier this year of one farmer who had received over $200,000 in PIK payments in 1983. For the same year, he also received over $200,000 in tax breaks for beefing up his agricultural operation. Regretfully, this is going on all around us. The left hand has not known, or not paid attention to, what the right hand was doing. We can no longer afford to let this continue.

As I have stated, the Agricultural Committee has reported out legislation which will discourage the breaking out of highly erodible land and conversion of wetlands into cropland. Unless we also eliminate the tax incentives for sodbusting and swampbusting, we are not doing the entire job.

The bill we are introducing today is a first attempt at eliminating the tax incentives for sodbusting and swampbusting. It repeals deductions for drainage and land shaping as conservation benefits for land that is highly erodible. It disallows any deductions or tax credits, including depreciation deductions, used to cultivate highly erodible land owned or leased. Further, the bill does not give sodbusters or swampbusters preferential treatment on the taxation of income derived from the sale of such lands. As the farm bill passed by the Agriculture Committee provides, this bill will not be applicable if the cultivation of highly erodible land is done under an approved conservation system or if the land has been cultivated in the previous 5 years.

The bill language does not provide a definition of "highly erodible land" or of "wetlands" as it is currently drafted. We could have included the definition that was included in the farm bill for each of these, however, due to the fact that the House farm bill has different provisions, we felt it better to wait and see what is worked out in the conference on the farm bill. Once the farm bill is enacted, we can then include those defintions in this legislation.

The provisions of this bill will not restrict or limit a person's right to use property in any way. The bill does, however, remove all Government incentives to sodbusting and swampbusting. It does eliminate the present Government tax policy or encouraging the breaking out of highly erodible land.

Mr. President, this legislation is important if we are to complete the work the Senate Agriculture Committee has begun. I urge my colleagues to support this legislation.

I ask unanimous consent that the text of the bill be inserted in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1786

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Cultivation of Highly Erodible Lands and Wetlands Tax Act".

SEC. 2. LIMITATION ON CREDITS AND DEDUCTIONS ATTRIBUTABLE TO CULTIVATING HIGHLY ERODIBLE LAND AND WETLAND.

(a) IN GENERAL.—Part IX of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items not deductible) is amended by adding at the end thereof the following new section:

"SEC. 280H. LIMITATION ON CREDITS AND DEDUCTIONS ATTRIBUTABLE TO CULTIVATING HIGHLY ERODIBLE LAND AND WETLAND.

"(a) IN GENERAL.—No credit or deduction, including any depreciation deduction, shall be allowed with respect to any amount paid or incurred or any property used by a taxpayer in cultivating highly erodible land or wetland owned or leased by such taxpayer for the purpose of converting such land or wetland into cropland.

"(b) DEFINITIONS.—For purposes of this section—

"(1) HIGHLY ERODIBLE LAND.—The term 'highly erodible land' means land that has a potential for excessive erosion as the Secretary of Agriculture by regulations may determine.

"(2) WETLAND.—The term 'wetland' shall have the meaning given to such term by section 3 of the Water Bank Act (16 U.S.C. 1302).

"(3) CROPLAND.—The term 'cropland' means land which is used for the production of crops, fruits, or other agricultural products or for the sustenance of livestock.

"(c) EXCEPTIONS.—The provisions of this subsection shall not apply to the cultivation of any highly erodible land or wetland if—

"(1) such cultivation is in reliance upon the determination by the Soil Conservation Service that the land is not highly erodible land or wetland,

"(2) such cultivation is pursuant to and in compliance with a conservation system that—

"(i) is determined by the local conservation district to be in conformance with the technical standards set forth in the Soil Conservation Service technical guide for such conservation district, or

"(ii) if there is no local conservation district, as determined by the Soil Conservation Service to be adequate for the protection of such highly erodible land or wetland,

"(3) such highly erodible land or wetland is not the predominate class of land comprising the total farming unit of land associated with such highly erodible land or wetland, or

"(4) such highly erodible land or wetland has been previously cultivated within the 5-year period immediately preceding the date of enactment of the Cultivation of Highly Erodible Lands and Wetlands Tax Act.".

(b) CLERICAL AMENDMENT.—The table of sections for part IX of subchapter B of chapter 1 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new item:

"Sec. 280H. Limitation on credits and deductions attributable to cultivating highly erodible land and wetland.".

SEC. 3. GAIN FROM DISPOSITION OF HIGHLY ERODIBLE LAND AND WETLAND RECOGNIZED AS ORDINARY INCOME.

(a) IN GENERAL.—Section 1252 of the Internal Revenue Code of 1954 (relating to gain from disposition of farm land) is amended by redesignating subsection (b) as subsection (c) and inserting after subsection (a) the following new subsection:

"(b) HIGHLY ERODIBLE LAND AND WETLAND.—

"(1) ORDINARY INCOME.—If any taxpayer, after the date of enactment of the Cultivation of Highly Erodible Lands and Wetlands Tax Act, cultivates highly erodible land or wetland for the purpose of converting such land or wetland into cropland and such land or wetland is disposed of during a taxable year beginning after December 31, 1985, the excess of—

"(A) the amount realized (in the case of a sale, exchange, or involuntary conversion), or the fair market value of such land or wetland (in the case of any other disposition), over

"(B) the adjusted basis of such land or wetland, shall be treated as ordinary income. Such gain shall be recognized notwithstanding any other provision of this subtitle.

"(2) DEFINITIONS.—For the purposes of this section, the terms 'highly erodible land', 'wetland', and 'cropland' have the meaning given such terms by section 280H(b).

"(3) EXCEPTIONS.—The provisions of this subsection shall not apply to the disposition of any highly erodible land or wetland if—

"(A) the taxpayer cultivates the land in reliance upon the determination by the Soil Conservative Service that such land is not highly erodible land of wetland,

"(B) the cultivation of such land or wetland is pursuant to and in compliance with a conservation system that—

"(i) is determined by the local conservation district to be in conformance with the technical standards set forth in the Soil Conservation Service technical guide for such conservation district, or

"(ii) if there is no local conservation district, is determined by the Soil Conservation Service to be adequate for the protection of such highly erodible land or wetland,

"(C) such highly erodible land or wetland is not the predominate class of land comprising the total farming unit of land associated with such highly erodible land or wetland, or

"(D) such highly erodible land or wetland has been previously cultivated within the 5-year period immediately preceding the date of enactment of the Cultivation of Highly Erodible Lands and Wetlands Tax Act.".

(b) EXCHANGES IN KIND.—Paragraph (2) of section 1031(a) of such Code (relating to nonrecognition of gain or loss from exchanges solely in kind) is amended—

(1) by striking out "or" at the end of subparagraph (E),

(2) by striking out the period at the end of subparagraph (F) and inserting in lieu thereof ", or", and

(3) by adding at the end thereof the following new subparagraph:

"(G) highly erodible land or wetland to which the provisions of section 1252(b) apply.".

(c) CONFORMING AMENDMENTS.—

(1) Subsection (a) of section 1252 of such Code is amended by striking out "General Rule" and inserting in lieu thereof "Farm Land".

(2) The section heading of section 1252 of such Code is amended to read as follows:

"SEC. 1252. GAIN FROM DISPOSITION OF FARM LAND, HIGHLY ERODIBLE LAND, AND WETLAND.".

The table of sections for part IV of subchapter P of chapter 1 of such Code is amended by striking out the item relating to section 1252 and inserting in lieu thereof the following new item:

"Sec. 1252. Gain from disposition of farm land, highly erodible land, and wetland.".

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply to amounts paid or incurred, property used, and dispositions of property occurring in taxable years beginning after December 31, 1985.●

By Mr. RIEGLE (for himself, Mr. KENNEDY, Mr. BURDICK, Mr. HOLLINGS, Mr. NUNN, Mr. DOLE, and Mr. GORE):

S.J. Res. 226. Joint resolution to designate the week of April 6, 1986, through April 12, 1986, as "World Health Week", and to designate April 7, 1986, as "World Health Day"; to the Committee on the Judiciary.

WORLD HEALTH WEEK AND WORLD HEALTH DAY

● Mr. RIEGLE. Mr. President, today I am again privileged to introduce for myself, Senator KENNEDY, Senator BURDICK, Senator HOLLINGS, Senator NUNN, AND Senator DOLE, and Senator GORE Senate Joint Resolution 226 designating April 7, 1986, as "World Health Day" and the Week of April 6, 1986, as "World Health Week".

In the 99th Congress I introduced and the Senate passed Senate Joint Resolution 50, calling for the week of April 1, 1985, to be designated "World Health Week" and the day of April 7, 1985, "World Health Day." This year the American Association for World Health has again requested that we sponsor the week beginning April 6, 1986, as "World Health Week" culminating with "World Health Day" on April 7, 1986. Since 1949, April 7 has been designated "World Health Day" around the world. This day is to promote better health care for All people and to draw attention to the World Health Organization's goal of health for all by the year 2000. Good health is essential for all people to be able to lead socially and economically productive lives.

Mr. President, given the quality of life enjoyed by many of the people in this country, the call for a healthy world embodied in this resolution might easily be taken for granted. However, the plight of those in sub-Sahara Africa has drawn our attention back to those in need of life's basic necessities. In Ethiopia alone, it is estimated that the lives of more than 5 million people have been endangered by drought and famine. In the last year the delivery of essential services by groups in both public and private sectors improved the health status of millions of people in need. This joint resolution would remind many in our society about the hardships experienced by millions of people around the globe. The objectives are simple: The minimum requirement of safe water and adequate sanitary facilities; immunization against diptheria, tetanus, poliomyelitis, measles, mumps, rubella, tuberculosis; local health care within 1 hour's trave; and the availability of trained health practitioners for childbirth, prenatal care, and the care of children throughout infancy.

The World Health Organization continues to direct international health activities. The constant surveillance, control, and eradication of disease; the collaboration of research; and the collection, dissemination, and exchange of health care data are all directed and supported by the World Health Organization. In this country, the American Association of World Health serves to increase our awareness of these issues surrounding world health care needs and works with the World Health Organization to make our participation worthwhile. In declaring April 7, 1986, as "World Health Day," and the week of April 6, 1986, as "World Health Week," it is our hope that this resolution will heighten our awareness of what must be done to make ourselves and all other people in the world healthier. One cannot just wish for good health and hope that it happens. To help make health for all a reality by the year 2000, I urge my colleagues to join with me in cosponsoring this resolution.

Mr. President, I ask unanimous consent that this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 226

Whereas the health of a nation depends upon the health of its people;

Whereas improvement of the health of the people of our Nation contributes to world health, and world health contributes to the health or our Nation—a principle enunciated in the Constitution of the World Health Organization and accepted by the United States;

Whereas the United States is an active member of the World Health Organization and has both benefited from and contributed to the achievements of the Organization;

Whereas the countries of the world, acting through the World Health Organization, are committed to the goal of "Health for All by the Year 2000";

Whereas primary health care is recognized as a key to the attainment of "Health for All by the Year 2000";

Whereas health education and awareness, prevention, and treatment of common diseases and illnesses, basic sanitation, and adequate nutrition are essential elements of primary health care;

Whereas the World Health Organization has established April 7 of each year as World Health Day to call attention to what individuals and governments can do to further the health of human beings everywhere, and the American Association of World Health has sponsored and assisted in this endeavor; and

Whereas it has been the custom for the President to call attention to World Health Day each year in the form of a public message: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of April 6, 1986, through April 12, 1986, is designated as "World Health Week" and April 7, 1986, is designated as "World Health Day" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate programs, ceremonies, and activities.●

ADDITIONAL COSPONSORS

S. 865

At the request of Mr. MATHIAS, the names of the Senator from Georgia [Mr. MATTINGLY], and the Senator from Alaska [Mr. MURKOWSKI] were added as cosponsors of S. 865, a bill to award special congressional gold medals to Jan Scruggs, Robert Doubek, and Jack Wheeler.

S. 1093

At the request of Mr. MATHIAS, the names of the Senator from Oklahoma [Mr. NICKLES], and the Senator from Louisiana [Mr. JOHNSTON] were added as cosponsors of S. 1093, a bill to amend the patent law to restore the term of the patent grant in the case of certain products for the time of the regulatory review period preventing the marketing of the product claimed in a patent.

S. 1107

At the request of Mr. NUNN, the names of the Senator from Rhode Island [Mr. CHAFEE], and the Senator from Florida [Mr. CHILES] were added as cosponsors of S. 1107, a bill to authorize the Society of the Third Infantry Division to erect a Memorial in the District of Columbia or its environs.

S. 1446

At the request of Mr. ANDREWS, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 1446, a bill to amend title 38, United States Code, to improve veterans' benefits for former prisoners of wars.

S. 1526

At the request of Mr. MATHIAS, the name of the Senator from Nevada [Mr. HECHT] was added as a cosponsor of S. 1526, a bill to amend title 17, United States Code, to clarify the definition of the local service area of a primary transmitter in the case of a low power television station.

S. 1570

At the request of Mr. NICKLES, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 1570, a bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for other purposes.

S. 1601

At the request of Mr. LEAHY, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 1601, a bill entitled the "Rural Transportation Equity Act of 1985."

S. 1618

At the request of Mr. GORE, the names of the Senator from Ohio [Mr. METZENBAUM], and the Senator from Iowa [Mr. Grassley] were withdrawn as cosponsors of S. 1618, a bill to amend the Communications Act of 1934 to clarify policies regarding the right to view satellite-transmitted television programming, and for other purposes.

S. 1655

At the request of Mr. SPECTER, the name of the Senator from Wisconsin [Mr. KASTEN] was added as a cosponsor of S. 1655, a bill to amend the Unfair Competition Act of 1916 and Clayton Act to provide for private enforcement of the Unfair Competition statute in the event of unfair foreign competition, and to amend title 28 of the United States Code to provide for private enforcement of the Customs fraud statute.

SENATE JOINT RESOLUTION 74

At the request of Mr. THURMOND, the names of the Senator from Utah [Mr. HATCH] and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of Senate Joint Resolution 74, a joint resolution to provide for the designation of the month of February, 1986, as "National Black (Afro-American) History Month."

SENATE JOINT RESOLUTION 143

At the request of Mr. GORE, the names of the Senator from Ohio [Mr. METZENBAUM] and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of Senate Joint Resolution 143, a joint resolution to authorize the Black Revolutionary War Patriots Foundation to establish a memorial in the District of Columbia at an appropriate site in Constitution Gardens.

SENATE JOINT RESOLUTION 198

At the request of Mr. MATHIAS, the names of the Senator from Kansas [Mr. DOLE] and the Senator from North Dakota [Mr. BURDICK] were added as cosponsors of Senate Joint Resolution 198, a joint resolution to designate the year of 1986 as the "Sesquicentennial Year of the National Library of Medicine."

SENATE JOINT RESOLUTION 208

At the request of Mr. COCHRAN, the names of the Senator from Arkansas [Mr. BUMPERS], the Senator from Pennsylvania [Mr. HEINZ], the Senator from North Dakota [Mr. ANDREWS], the Senator from South Dakota [Mr. ABDNOR], and the Senator from Oregon [Mr. PACKWOOD] were added as cosponsors of Senate Joint Resolution 208, a joint resolution to designate the week of October 27, 1985, through November 2, 1985, as "National Alopecia Awareness Week."

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the names of the Senator from Iowa [Mr. HARKIN], the Senator from Kansas [Mrs. KASSEBAUM], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE JOINT RESOLUTION 222

At the request of Mr. D'AMATO, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of Senate Joint Resolution 222, a joint resolution concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists aboard the cruise ship *Achille Lauro,* because he did not submit to the demands of these terrorists.

SENATE CONCURRENT RESOLUTION 77

At the request of Mr. HATFIELD, the names of the Senator from New York [Mr. MOYNIHAN], the Senator from Rhode Island [Mr. PELL], the Senator from Illinois [Mr. SIMON], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Massachusetts [Mr. KERRY], and the Senator from Iowa [Mr. HARKIN] were added as cosponsors of Senate Concurrent Resolution 77, a concurrent resolution deploring the intention of the United States to withdraw from the compulsory jurisdiction of the International Court of Justice.

SENATE CONCURRENT RESOLUTION 78

At the request of Mr. BRADLEY, the names of the Senator from California [Mr. CRANSTON], the Senator from Kansas [Mrs. KASSEBAUM], and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of Senate Concurrent Resolution 78, a concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases.

AMENDMENT NO. 725

At the request of Mr. BAUCUS, the names of the Senator from Iowa [Mr. GRASSLEY], the Senator from Indiana [Mr. QUAYLE], and the Senator from Colorado [Mr. HART] were added as cosponsors of amendment No. 725 intended to be proposed to Senate Concurrent Resolution 77, a concurrent resolution to approve the "Compact of Free Association," and for other purposes.

SENATE CONCURRENT RESOLUTION 81—REQUESTING THE PRESIDENT TO BEGIN TALKS ON A UNITED STATES-SOVIET UNION STUDENT EXCHANGE FOR PEACE PROGRAM

Mr. SIMON (for himself and Mr. PELL) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations.

S. CON. RES. 81

Whereas the United States and the Soviet Union need to establish a peaceful and mutually beneficial relationship;

Whereas the absence of close ties and mutual trust between the two countries poses a threat to world peace;

Whereas ties of culture and friendship between the United States and the Soviet Union should be expanded;

Whereas young people are a nation's greatest resource and its most treasured asset; and

Whereas both nations have a mutual interest in closer ties and the prevention of a nuclear holocaust: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the President should immediately begin talks with the Government of the Soviet Union which have the objective of establishing a joint United States-Soviet Union student exchange for peace program to provide for an ongoing country-to-country exchange of qualified young people aged 15 through 20. Such program should—

(1) give qualified young people from each country an opportunity to go to the other country for one year to study, work, travel, talk with various political leaders, and live with a host family;

(2) be administered by a joint United States-Soviet Union Exchange for Peace Commission to be composed of civic, educational, and cultural leaders from both countries;

(3) be financed by both government and private contributions;

(4) recruit at least 2,000 qualified participants from each country, including children of civic, educational, cultural, and political leaders;

(5) ensure that program participants are spread throughout the host country; and

(6) be expanded as interest and resources permit.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President.

● Mr. SIMON. Mr. President, I am pleased to submit a resolution with Senator PELL calling for a United States-Soviet Student Exchange-for-Peace Program. This resolution was submitted, initially, by the distinguished ranking minority member of the Foreign Relations Committee 2 years ago, and Representative UDALL resubmitted it into the House this session. Last year the measure had 141 House cosponsors, including myself; this year it already has 115 cosponsors, and I expect it will soon overtake last year's response.

This resolution is aptly named, calling to mind another great venture in American diplomacy, the Food-for-Peace Public Law Program. That effort, pushed forward by one of our greatest legislators and statesmen, Hubert Humphrey, has played a vital role in feeding the poor and hungry throughout the developing world for 31 years. In a sense, this resolution will provide similar relief: Our information and attitudes about each other need to be nurtured, and it is not too dire to say that the situation is an emergency.

There is a lack of basic knowledge in our two societies when it comes to what we know about one another. The low level of exchanges is symptomatic of the deeper and more fundamental barriers to understanding that we have erected between ourselves. It is time the barriers were removed.

The United States-Soviet Student Exchange-for-Peace Commission, to be established under this measure following bilateral negotiations, would select 2,000 qualified youth ages 15 to 20 from each country to spend a significant period of time living, visiting, and studying in the United States and the U.S.S.R. The measure calls for a wide geographic dispersal of exchangees, an important provision if meaningful results are to be realized. Too often we give up on cooperative ventures like exchanges because we short-term payoffs. We need the patience also for long-term payoffs. The payoff is real and important. We should be fostering a better relationship with the next generation of Soviet leaders. And the Soviets should be doing the same with our next generation of leaders.●

SENATE CONCURRENT RESOLUTION 82—ORIGINAL CONCURRENT RESOLUTION REPORTED SUPPORTING CHILE'S NATIONAL ACCORD FOR THE TRANSITION TO FULL DEMOCRACY

Mr. LUGAR, from the Committee on Foreign Relations, reported the following original concurrent resolution; which was placed on the calendar:

S. CON. RES. 82

Whereas, on September 11, 1985, the people of Chile marked the twelfth anniversary of an authoritarian government characterized by restrictions on civil liberties, including suspension of all political activities;

Whereas, on August 25, 1985, Cardinal Juan Francisco Fresno announced the National Accord for the Transition to Full Democracy in Chile, an agreement endorsed by eleven political parties spanning a broad political spectrum which commits the signatories to concrete steps to achieve a peaceful evolution toward full and authentic democracy;

Whereas this National Accord, which includes the repudiation of violence, the restoration of full civil liberties, the legalization of political parties, the preservation of a mixed economy, including guarantees of private property, and the holding of elections by direct popular vote, represents an honest and prudent effort toward this necessary transition; and

Whereas the political parties, labor unions, professional organizations, and other groups supporting the accord reflect the overwhelming support of the Chilean people for a peaceful return to democratic rule: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress—

(1) supports the efforts of democratic forces in Chile to achieve a peaceful return to democratic government;

(2) expresses its view that the National Accord for the Transition to Full Democracy is an important first step toward this goal; and

(3) calls upon the Government of Chile and the leaders of all sectors of Chilean society to demonstrate their commitment to a genuine transition through a process of dialogue and negotiation aimed at securing a return to democratic rule.

SENATE RESOLUTION 243—AUTHORIZING THE REPRINTING OF SENATE DOCUMENT NUMBERED 87-64

Mr. DOLE (for Mr. GORTON, for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 243

Resolved, That Senate Document Numbered 87-64, entitled "History of the United States Senate from 1787 to 1801", be reprinted as a Senate document.

SEC. 2. There shall be printed, in addition to the usual number, such additional copies as are allowed subject to the limitations of section 703 of title 44, United States Code.

AMENDMENTS SUBMITTED

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATION, 1986

ANDREWS AMENDMENT NOS. 841 AND 842

Mr. ANDREWS proposed two amendments to the bill (H.R. 3244) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1986, and for other purposes; as follows:

AMENDMENT No. 841

On page 18, line 24, strike "13,250,000,000" and insert "12,750,000,000".

AMENDMENT No. 842

On page 29, line 10, delete the word "of" the second time it appears, and insert the word "or".

EAGLETON (AND OTHERS) AMENDMENT NO. 843

Mr. CHILES (for Mr. EAGLETON, for himself, Mr. DANFORTH, Mr. WILSON, and Mr. CRANSTON) proposed an amendment to the bill H.R. 3244, supra; as follows:

At an appropriate place in the bill add the following new section:

"SEC. —. The Congress disapproves the proposed deferral D86-21, pertaining to the Urban Mass Transportation Administration, as set forth in the message of October 1, 1985 which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act and the amount of the proposal deferral disapproved herein shall be made available for obligation."

LAUTENBERG AMENDMENT NO. 844

Mr. LAUTENBERG proposed an amendment to the bill (H.R. 3244), supra; as follows:

On page 54, insert between lines 8 and 9 the following new section:

SEC. 326. Section 201 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 711) is amended—

(1) in the first sentence of paragraph (2) of subsection (d) by inserting "freight" before "railroad"; and

(2) in the first sentence of subsection (e) by striking out "1985" and inserting in lieu thereof "1987".

ANDREWS AMENDMENT NO. 845

Mr. ANDREWS proposed an amendment to the bill (H.R. 3244), supra; as follows:

On page 50, line 20, strike all through page 51 line B.

ARMSTRONG (AND OTHERS) AMENDMENT NO. 846

Mr. ARMSTRONG (for himself, Mr. PROXMIRE, and Mr. WALLOP) proposed an amendment to the bill (H.R. 3244), supra; as follows:

Beginning on page 26, line 11, delete through page 28, line 15.

MITCHELL (AND OTHERS) AMENDMENT NO. 847

Mr. MITCHELL (for himself, Mr. HUMPHREY, and Mr. COHEN) proposed an amendment to the bill (H.R. 3244), supra; as follows:

On page 54 after line 8, insert:

SEC. . That the Act approved July 28, 1937 (50 Stat. 535), is amended by striking out in the first paragraph thereof, "and approaches thereto" and by inserting at the end thereof "The States of Maine and New Hampshire are authorized to assume all construction, maintenance, and operational authority over the approach roads and grade separation structures in their respective areas. As provided in Maine Private and Special Law, Chapter 38, 1985, and New Hampshire Statutes, Chapter 415, 1985, the respective States shall require the Authority to provide Authority funds for capital improvements.".

EVANS (AND LAUTENBERG) AMENDMENT NO. 848

Mr. EVANS (for himself and Mr. LAUTENBERG) proposed an amendment to the bill (H.R. 3244), supra; as follows:

At the appropriate place, insert the following:

Section 502(l)(1) of the Motor Vehicle Information and Cost Savings Act [15 U.S.C. 2002(l)(1)] is amended by inserting at the end thereof the following new paragraph:

"(F) Notwithstanding the provisions of subparagraph (B), no manufacturer shall be entitled to a credit for exceeding the fuel economy standard for any model year for which the Secretary has reduced the fuel economy standard to a level below the standard originally established by Congress for that year. *Provided*, That a manufacturer shall be entitled to a credit to the extent that the fleet average fuel economy of the manufacturer exceeds the standard that applied prior to modification by the Secretary."

PROXMIRE AMENDMENT NOS. 849 AND 850

Mr. PROXMIRE proposed two amendments to the bill H.R. 3244, supra; as follows:

On page 31, line 14, strike out "$2,100,000,000" and insert in lieu thereof "$1,230,000,000".

On page 31, line 14, before the period insert the following: ": *Provided*, That none of such funds may be available for operating, subsidies".

On page 4, beginning with line 1, strike out all through line 6.

DOMENICI (AND OTHERS) AMENDMENT NO. 851

Mr. DOMENICI (for himself, Mr. JOHNSTON, Mr. GORTON, Mr. THURMOND, Mr. BENTSEN, Mr. HOLLINGS, Mr. BINGAMAN, Mr. SYMMS, Mr. GRAMM, Mr. EVANS, and Mr. MCCLURE) proposed an amendment to the bill (H.R. 3244), supra; as follows:

On page 21, line 1, insert the following:

WASTE ISOLATION PILOT PROJECT ROADS

For necessary expenses in connection with the upgrading of certain highways for the transportation of nuclear waste generated during defense-related activities, not otherwise provided for, $16,260,000, to remain available until expended.

KASSEBAUM (AND OTHERS) AMENDMENT NO. 852

Mrs. KASSEBAUM (for herself, Mr. DOMENICI, Mr. CHILES, Mr. GORTON, Mr. MATSUNAGA, and Mr. NICKLES) proposed an amendment to the bill (H.R. 3244), supra; as follows:

At the end of the bill, add the following new section:

"SEC. Notwithstanding any other provision of this bill and except as otherwise provided in this section, each dollar amount contained in this act which is provided for non-defense discretionary programs and activities is hereby reduced 6.0 per centum: *Provided*, That this section shall not apply to the amounts on page 36, line 7, and page 37, line 10: *Provided further*, That for purposes of applying the 6.0 per centum reduction, the amount to be reduced on page 4, line 14 shall be considered to be $1,785,100,000, and the amount to be reduced on page 10, line 12 shall be considered to be $2,714,400,000, and the amount to be reduced on page 31, line 14 shall be considered to be $2,013,000,000: *Provided further*, That notwithstanding any other provision of law, the amount available for transit operating assistance, contained in this bill, in fiscal year 1986 shall not exceed $736,000,000."

SYMMS AMENDMENT NO. 853

Mr. SYMMS (for himself and Mr. BURDICK) proposed an amendment to amendment No. 852 proposed by Mrs. KASSEBAUM (and others) to the bill (H.R. 3244), supra; as follows:

Amendment No. 852 is amended by striking "6.0" and inserting in lieu thereof "7.9"; and by adding at the end thereof the following: "The obligation limitation for Federal-Aid Highways and Highway safety construction programs for Fiscal Year 1986 shall remain at $12,750,000,000."

DOMENICI (AND CHILES) AMENDMENT NO. 854

Mr. DOMENICI (for himself and Mr. CHILES) proposed an amendment to the bill (H.R. 3244), supra; as follows:

At the end of the bill, add the following new section:

"SEC. . Notwithstanding any other provision of this bill and except as otherwise provided in this section, each"

CHILES (AND OTHERS) AMENDMENT NO. 855

Mr. CHILES (for himself, Mrs. KASSEBAUM, Mr. DOMENICI, and Mr. GORTON) proposed an amendment to amendment No. 854 proposed by Mr.

DOMENICI (and Mr. CHILES) to the bill (H.R. 3244), supra; as follows:

At the end of the amendment, add the following: "dollar amount contained in this Act which is provided for non-defense discretionary programs and activities is hereby reduced 1.6 per centum: *Provided,* That this section shall not apply to the amounts on page 36, line 7, and page 37, line 10: *Provided further,* That notwithstanding any other provision of law, the amount available for transit operating assistance, contained in this bill, in fiscal year 1986 shall not exceed $856,000,000."

CONSOLIDATED OMNIBUS BUDGET RECONCILIATION ACT

DANFORTH AMENDMENT NO. 856

Mr. PACKWOOD (for Mr. DANFORTH) proposed an amendment to the bill (S. 1730) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, 99th Cong.); as follows:

On page 108, line 6, insert "(a)" immediately after "SEC. 402."; and insert the following immediately after line 13:

(b) Section 103(3) of the Rail Passenger Service Act (45 U.S.C. 502(3)) is amended—

(1) by inserting "used" immediately before "automobiles"; and

(2) by striking "and their occupants".

(c) Section 303(a)(1)(E) of the Rail Passenger Service Act (45 U.S.C. 543(a)(1)(E)) is amended by inserting "and shall serve until their successors have been appointed" immediately before the period at the end thereof.

(d) Section 303(d) of the Rail Passenger Service Act (45 U.S.C. 543(d)) is amended by striking the third sentence.

(e) Section 304(c) of the Rail Passenger Service Act (45 U.S.C. 544(c)) is amended by adding at the end thereof the following:

"(3) The preferred stock issued pursuant to paragraphs (1) and (2) of this subsection shall be deemed to have been issued as of the date of receipt by the Corporation of the funds for which such stock is issued.".

(f)(1) Section 305(1) of the Rail Passenger Service Act (45 U.S.C. 545(1)) is repealed.

(2) Section 305(m) of the Rail Passenger Service Act (45 U.S.C. 545(m)) is amended by striking "Center" each place it appears and inserting in lieu thereof "Corporation".

(3) Section 308(a) of the Rail Passenger Service Act (45 U.S.C. 548(a)) is amended to read as follows:

"(a) The Corporation shall submit to the Congress a report not later than February 15 of each year. The report shall include, for each route on which the Corporation operated intercity rail passenger service during the preceding fiscal year, data on ridership, short-term avoidable profit or loss per passenger mile, revenue-to-cost ratio, revenues, the Federal subsidy, the non-Federal subsidy, and on-time performance. Such report shall also specify significant operational problems which have been identified by the Corporation, together with proposals by the Corporation to resolve such problems.".

(g) Section 306(f) of the Rail Passenger Service Act (45 U.S.C. 546(f)) is amended by inserting at the end thereof the following: "The Corporation shall be permitted to participate in the contract air program administered by the General Services Administration in markets where service provided by the Corporation is competitive with regard to rates and total trip times.".

(h) Section 306(m) of the Rail Passenger Service Act (45 U.S.C. 546(m)) is amended by inserting "only" immediately after "citizen".

(i)(1) Section 403(d) of the Rail Passenger Service Act (45 U.S.C. 563(d)) is amended—

(A) by striking "criteria set forth in section 404(d)(2)(B)" and inserting in lieu thereof "criterion set forth in section 404(d)(2)"; and

(B) by inserting after the first sentence thereof the following: "Beginning October 1, 1986, if such service is not projected to meet such criterion, the Corporation may discontinue such service, unless the Corporation and a State (or States) enter into an agreement which ensures that the criterion will be met.".

(2) Section 404(c)(3)(B) of the Rail Passenger Service Act (45 U.S.C. 564(c)(3)(B)) is amended—

(A) by striking "60" and inserting in lieu thereof "120";

(B) by striking all after "submission" through "amendment"; and

(C) by adding at the end thereof the following: "For purposes of this subparagraph, continuity of session of the Congress is broken only by an adjournment sine die and the days on which either House is not in session because of adjournment of more than 3 days to a day certain are excluded in the computation of such 120-day period.".

(3) Section 404(c)(4)(B) of the Rail Passenger Service Act (45 U.S.C. 564(c)(4)(B)) is amended to read as follows:

"(B) The Corporation shall conduct an annual review of each route in the basic system to determine if such route is projected to meet the criterion appropriate to such route set forth in subsection (d), as adjusted to reflect constant 1979 dollars. If the Corporation determines on the basis of such review that such route will not meet such criterion, the Corporation shall discontinue, modify, or adjust the operation of rail passenger service over such route so that the criterion will be met.".

(4)(A) The first sentence of section 404(d)(1) of the Rail Passenger Service Act (45 U.S.C. 564(d)(1)) is amended—

(i) by striking "if—" and inserting in lieu thereof "if";

(ii) by striking "(A)"; and

(iii) by striking all after "mile" the second time it appears therein and inserting in lieu thereof a period.

(B) The second sentence of section 404(d)(1) of the Rail Passenger Service Act (45 U.S.C. 564(d)(1)) is amended by striking "and passenger mile per train mile".

(C) The last sentence of section 404(d)(1) of the Rail Passenger Service Act (45 U.S.C. 564(d)(1) is repealed.

(5) Section 404(d)(2) of the Rail Passenger Service Act (45 U.S.C. 564(d)(2)) is amended—

(A) by striking "if—" and inserting in lieu thereof "if";

(B) by striking "(A)"; and

(C) by striking all after "mile" the second time it appears therein and inserting in lieu thereof a period.

(6) Section 402 of the Rail Passenger Service Act (45 U.S.C. 562) is amended by adding at the end thereof the following:

"(i) Nothing in this section shall preclude parties from entering into an agreement, after the determination of the Commission or their initial agreement under this section, with respect to related costs described in this section.".

(7) The provisions of this subsection shall take effect on October 1, 1986.

(j) Title VII of the Rail Passenger Service Act (45 U.S.C. 621 et seq.) is repealed.

(k) Section 306(a)(3) of the Rail Passenger Service Act (45 U.S.C. 546(a)(3)) is amended by striking ", except as otherwise provided in this Act,".

(l) Section 306(k) of the Rail Passenger Service Act (45 U.S.C. 546(k)) is repealed.

(m) Section 402(g) of the Rail Passenger Service Act (45 U.S.C. 562(g)) is repealed.

(n) Section 405(a) of the Rail Passenger Service Act (45 U.S.C. 565(a)) is amended by adding at the end thereof the following: "For purposes of this section and any agreement designed to implement the provisions of this section, a 'discontinuance of intercity rail passenger service' shall not include any reduction in frequency, seasonal suspension or other service modification that does not result in elimination of all intercity rail passenger service on a route.".

(o)(1) The first sentence of section 805(2)(A) of the Rail Passenger Service Act (45 U.S.C. 644(2)(A)) is amended—

(A) by striking "shall" and inserting in lieu thereof "may"; and

(B) by striking "annually a".

(2) Section 805(2)(A) and (B) of the Rail Passenger Service Act (45 U.S.C. 644(2)(A) and (B)) is amended by striking "audit" wherever it appears and inserting in lieu thereof "audits".

(p) Section 806 of the Rail Passenger Service Act (45 U.S.C. 645) is repealed.

(q) Section 810 of the Rail Passenger Service Act (45 U.S.C. 649) is repealed.

(r) Section 811 of the Rail Passenger Service Act (45 U.S.C. 650) is repealed.

(s) Section 703(1)(D) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 853(1)(D)) is repealed.

(t)(1)(A) Section 1163 of the Northeast Rail Service Act of 1981 (45 U.S.C. 1111) is repealed.

(B) The item relating to section 1163 of the Northeast Rail Service Act of 1981 (45 U.S.C. 1111) is repealed.

(B) The item relating to section 1163 in the table of contents of the Northeast Rail Service Act of 1981 is amended to read as follows:

"Sec. 1163. Repealed.".

(C) Any decisions of the Interstate Commerce Commission before the date of enactment of this Act under section 1163 of the Northeast Rail Service act (45 U.S.C 1111) shall have no force and effect after the date of enactment of this Act.

(2) Section 402(a) of the Rail Passenger Service Act (45 U.S.C. 562(a)) is amended—

(A) by inserting "(1)" immediately after "(a)";

(B) by inserting "(2)" immediately before "Notwithstanding"; and

(C) by adding at the end of paragraph (2), as so designated by subparagraph (A) of this paragraph, the following: "The Commission, in making such a determination, shall assign to an entity obtaining services pursuant to this paragraph the costs incurred by the Corporation solely for the benefit of that entity, plus a proportionate share of all other costs of providing services covered by this paragraph that are incurred for the common benefit of more than one user of the rail properties covered by this paragraph. The proportionate share of such other costs assigned to a user shall be based on relative measures of volume of car or

train operations, passengers handled, tonnage, or other factors that reasonably reflect the relative use of the rail properties covered by this paragraph.".

(3) The compensation standard established by the amendment made by paragraph (2) of this subsection shall be effective in any proceeding instituted under section 402(a)(2) of the Rail Passenger Service Act (45 U.S.C. 562(a)(2)) after the date of enactment of this Act.

DECONCINI (AND HUMPHREY) AMENDMENT NO. 857

Mr. DECONCINI (for himself and Mr. HUMPHREY) proposed an amendment to the bill S. 1730, supra; as follows:

On page 454, after line 24, insert the following new part:

PART D—FEDERAL MOTOR VEHICLE EXPENDITURE CONTROL

MONITORING SYSTEM

SEC. 831. The head of each executive agency, including the Department of Defense, shall designate one office, officer, or employee of the agency to establish and operate a central monitoring system for, and provide oversight of, the motor vehicle operations of the agency, related activities, and related reporting requirements.

DATA COLLECTION

SEC. 832. (a) The head of each executive agency, including the Department of Defense, shall develop a system to identify, collect, and analyze data with respect to all costs incurred by the agency in the operation, maintenance, acquisition, and disposition of motor vehicles, including Government-owned vehicles, leased vehicles, and privately owned vehicles used for official purposes.

(b) The Administrator, in cooperation with the Comptroller General and the Director, shall promulgate standards governing the establishment and operation by executive agencies of the systems required by the subsection (a), including standards with respect to data concerning the costs and uses of motor vehicles and with respect to the uniform collection and submission of such data. Each executive agency, including the Department of Defense, shall comply with such standards.

AGENCY STATEMENTS WITH RESPECT TO MOTOR VEHICLE USE

SEC 833. (a) The head of each executive agency, including the Department of Defense, shall include with the appropriation request of such agency submitted under section 1108 of title 31, United States Code, for fiscal year 1987 and each succeeding fiscal year, a statement—

(1) specifying—

(A) the total motor vehicle acquisition, maintenance, leasing, operation, and disposal cost incurred by such agency in the most recently completed fiscal year; and

(B) an estimate of such cost for the fiscal year in which such request is submitted and for the succeeding fiscal year; and

(2) justifying why the existing and any new motor vehicle acquisition, maintenance, leasing, operation, or disposal requirements of the agency cannot be met through the Interagency Fleet Management System operated by the Administrator or through a qualified private fleet management firm or another private contractor.

(b) The head of each executive agency shall comply with the standards promulgated under section 832(b) in preparing each statement required under subsection (a).

PRESIDENTIAL REPORT

SEC. 834. The President shall include with the budget transmitted pursuant to section 1105 of title 31, United States Code, for fiscal year 1987 and each succeeding fiscal year, or in a separate written report to the Congress for each such fiscal year, a summary and analysis of the statements most recently submitted by the heads of executive agencies pursuant to section 833(a). Each such summary and analysis shall include a review of the potential cost savings that could be achieved in the acquisition, maintenance, leasing, operation, and disposal of motor vehicles by executive agencies through—

(1) the use of a qualified private fleet management firm or another private contractor;

(2) increased reliance by executive agencies on the Interagency Fleet Management System operated by the Administrator; or

(3) other existing motor vehicle management systems.

STUDY REQUIRED

SEC. 835. (a) The head of each executive agency, including the Department of Defense, shall conduct a comprehensive and detailed study of the costs, benefits, and feasibility of entering into a contract with a qualified fleet management firm or another private contractor to meet its motor vehicle operation, maintenance, leasing, acquisition, and disposal requirements. Such study shall compare the costs, benefits, and feasibility of such a contract to the costs and benefits of the agency's current motor vehicle operations and to the costs, benefits, and feasibility of the use of the Interagency Fleet Management System operated by the Administrator.

(b) Within 6 months after the date of enactment of this Act, the head of each executive agency shall submit a report concerning the study required under subsection (a) to the Director and the Comptroller General.

(c) Within one year after the date of enactment of this Act, the Comptroller General shall submit an analysis of the reports received under subsection (b) to the Congress.

INTERAGENCY CONSOLIDATION

SEC. 836. The Administrator shall review and identify interagency opportunities for the consolidation of motor vehicles, related equipment, and facilities, and of functions relating to the administration and management of such vehicles, equipment, and facilities, in order to reduce the size and cost of the Federal Government's motor vehicle fleet. Within one year after the date of enactment of this Act, the Administrator shall submit a report to the Congress specifiying the findings of the Administrator from the review conducted under the preceding sentence.

CONSOLIDATION OF FACILITIES

SEC. 837. The Administrator shall require the head of each executive agency, including the Department of Defense, to—

(1) review the motor pool, storage, maintenance, and other motor vehicle facilities within the agency;

(2) consolidate such facilities where feasible and cost effective; and

(3) submit to the Director a report identifying possible impediments to any such consolidation, including current accounting methods, budget processes, or organizational structures.

REDUCTION OF STORAGE AND DISPOSAL COSTS

SEC. 838. The Administrator shall take such actions as may be necessary to reduce motor vehicle storage and disposal costs, including actions to increase the frequency of motor vehicle sales by public auction, to reduce presale storage costs, and to improve the rate of return on motor vehicle sales through a program of vehicle reconditioning prior to sale.

SAVINGS

SEC. 839. (a) The President shall take such action as may be necessary to ensure that expenditures for the operation, maintenance, leasing, acquisition, and disposal of motor vehicles by executive agencies, including the Department of Defense, are reduced by fiscal year 1988, to an amount which is $225,000,000 less than the amount requested for such operation, maintenance, leasing, acquisition, and disposal requested by the President in the budget submitted under section 1105 of title 31, United States Code, for fiscal year 1986.

(b) The Director shall monitor compliance by executive agencies with directives of the President to carry out subsection (a) and shall report, within 6 months after the date of enactment of this Act and every 6 months thereafter, to the Committees on Appropriations of the House and Senate, the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House, with respect to the reductions in expenditures by executive agencies, including the Department of Defense, required under subsection (a).

COMPLIANCE

SEC. 840. (a) The Administrator shall comply with and be subject to the provisions of this part with regard to all motor vehicles that are used within the General Services Administration for official purposes.

(b) The provisions of this part with respect to motor vehicles from the Interagency Fleet Management System shall be complied with by the executive agencies to which such motor vehicles are assigned.

APPLICABILITY

SEC. 841. (a) The President shall apply the reductions in expenditures required by section 839(a) primarily to administrative motor vehicle fleets used at the headquarters and regional headquarters of executive agencies, rather than to motor vehicles used by line agency personnel working in agency field operations or activities.

(b) The President shall require the Administrator, in cooperation with the Director, to promulgate appropriate regulations, standards, and definitions that shall assure that executive agencies comply with and implement the reductions in expenditures required by section 839(a) in the manner prescribed by subsection (a).

COOPERATION

SEC. 842. The Director and the Administrator shall closely cooperate in the implementation of the provisions of this part, and shall report regularly to the Congress on the progress made in carrying out this part.

REPORTS

SEC. 843. Not later than 12 months after the date of enactment of this Act, the Comptroller General shall prepare and transmit a report to the Congress on the activities of the Director, the Administrator, and executive agencies in carrying out this part. After transmitting the report required by the preceding sentence, the Comptroller

General shall submit periodic reports to the Congress on such activities.

DEFINITIONS

SEC. 844. For purposes of this part—

(1) the term "executive agency" means—

(A) an executive agency (as such term is defined in section 105 of title 5, United States Code), which operates at least three hundred motor vehicles; and

(B) the Postal Service, the Postal Rate Commission, and the Tennessee Valley Authority;

(2) the term "Director" means the Director of the Office of Mangement and Budget;

(3) the term "Adminstrator" means the Administrator of General Services;

(4) the term "Comptroller General" means the Comptroller General of the United States; and

(5) the term "motor vehicle" means any vehicle self-propelled or drawn by mechanical power, except that such term does not include any vehicle designed or primarily used for military field training, combat, or tactical purposes.

BAUCUS (AND OTHERS) AMENDMENT NO. 858

Mr. BAUCUS (for himself, Mr. PACKWOOD, Mr. DURENBERGER, Mr. HEINZ, Mr. GLENN, Mr. MITCHELL, and Mr. MATSUNAGA) proposed an amendment to the bill S. 1730, supra; as follows:

On page 168, between lines 4 and 5, insert the following:

SEC. 716A. PROMULGATION OF INPATIENT HOSPITAL DEDUCTIBLE.

(a) CHANGE IN DEADLINE.—Section 1813(b)(2) of the Social Security Act is amended by striking out "October 1" and inserting in lieu thereof "September 15".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to calendar years after 1985.

DOMENICI AMENDMENT NO. 859

Mr. DOMENICI proposed an amendment to the bill (S. 1730), supra; as follows:

At the appropriate places in the bill, do the following:

On page 89, line 15, strike out "purpose" and insert in lieu thereof "purposes".

On page 94, line 13, strike out "paragraph (1)" and insert in lieu thereof "subsection (a)".

On page 99, after line 23, insert the following:

(2) by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; and"; and

On page 180, line 5, strike out "following" and insert in lieu thereof "following".

On page 215, line 18, insert ")" after "(e)".

On page 284, beginning with line 22, strike out all through page 285, line 7, and insert in lieu thereof the following:

(2) If—

(A) a document or ticket for transportation of a passenger into the customs territory of the United States is issued in a foreign country, and

(B) the fee charged under subsection (a)(6) is not collected at the time such document or ticket is issued, the person providing transportation to such passenger shall collect such fee at the time such passenger departs from the customs territory of the United States and shall provide such passenger a receipt for the payment of such fee.

On page 308, line 19, strike out "yeas" and insert in lieu thereof "years".

On page 308, line 20, strike out "of" and insert in lieu thereof "to".

On page 308, line 21, strike out "liue" and insert in lieu thereof "lieu".

On page 308, line 21, strike out "plans" and insert in lieu thereof "plan".

On page 309, line 6, insert a comma after "plan".

On page 310, line 13, strike out "Except" and insert in lieu thereof "Exception".

On page 311, line 3, strike out "(ii))" and insert in lieu thereof "(ii)".

On page 312, line 15, insert "for any group health plan maintained by an employer" after "employer".

On page 312 line 18, strike out "(B). Except" and insert in lieu thereof "(B) Exception".

On page 316, line 21, strike out "and" and insert in lieu thereof "any".

On page 320, line 2, strike out "amendment" and insert in lieu thereof "amendments".

On page 321, line 15, strike out "subsectioin" and insert in lieu thereof "subsection".

On page 322, line 16, strike out the second comma.

On page 323, line, 2, strike out "the" and insert in lieu thereof "an".

On page 323, line 8, strike out "section" and insert in lieu thereof "subsection".

On page 329, line 9, strike out "tax" and insert in lieu thereof "taxes".

On page 334, line 11, strike out the colon and insert in lieu thereof a semicolon.

On page 335, line 25, strike out "Setpember" and insert in lieu thereof "September".

On page 336, line 10, strike out "be" and insert in lieu thereof "by".

On page 342, line 24, strike out "If" and insert in lieu thereof "if".

On page 343, line 10, strike out "it is" and insert in lieu thereof "if it".

On page 343, line 14, strike out "manufactures" and insert in lieu thereof "manufacturers".

On page 343, line 14, strike out "follow" and insert in lieu thereof "follows".

On page 344, lines 2 and 3, strike out "manufacture" and insert in lieu thereof "manufacturer".

On page 344, line 15, insert "the" after "receiving".

On page 345, line 18, strike out "subparagraph" and insert in lieu thereof "subparagraphs".

On page 347, line 4, strike out "Upspent" and insert in lieu thereof "Unspent".

On page 349, in the matter after line 8, strike out "transaction" and insert in lieu thereof "transactions".

On page 352, lines 13 and 17, strike out the closing quotation marks.

On page 355, in the matter after line 1, strike out "depository" and insert in lieu thereof "depositary".

On page 357, in the matter after line 6, strike out "Definitons" and insert in lieu thereof "Definitions".

On page 362, line 2, strike out "Decembr" and insert in lieu thereof "December".

On page 367, in the matter after line 25, add at the end thereof a period.

On page 368, line 11, strike out "Hazadous" and insert in lieu thereof "Hazardous".

On page 368, line 13, strike out "refenence" and insert in lieu thereof "reference".

On page 368, line 18, strike out "Subchpater" and insert in lieu thereof "Subchapter".

On page 368, line 20, strike out "subchpater" and insert in lieu thereof "subchapters".

On page 369, line 11, strike out "Liabilty" and insert in lieu thereof "Liability".

On page 372, lines 9 and 10, strike out "October 1, 1985" and insert in lieu thereof "November 15, 1985".

On page 374, line 6, strike out "or" and insert in lieu thereof "of".

On page 380, line 8, strike out "growers" and insert in lieu thereof "producers".

On page 381, line 8, strike out "if" and insert in lieu thereof "is".

On page 386, strike out lines 1 through 3 and insert in lieu thereof the following:

(2) by inserting ", except in the case of Burley tobacco," after "*Provided*, That" in the fourth sentence of subsection (e).

On page 386, line 18, strike out "Year" and insert in lieu thereof "year".

On page 387, line 10, strike out "manfacturer" and insert in lieu thereof "manufacturer".

On page 394, line 20, strike out "fluecured" and insert in lieu thereof "Fluecured".

On page 395, line 12, strike out "associ-" and insert in lieu thereof "associa-".

On page 401, line 23, strike out "to" and insert in lieu thereof "the".

On page 407, line 3, strike out "stock of the Corporation" and insert in lieu thereof "stocks of the Corporation of".

On page 412, line 12, strike out "Subsection" and insert in lieu thereof "Subsections".

On page 415, line 17, strike out "relating" and insert in lieu thereof "(relating".

On page 422, line 17, strike out the single quotation marks and insert in lieu thereof double quotation marks.

On page 428, line 24, strike out "Payroll" and insert in lieu thereof "Taxes".

On page 430, line 13, strike out "period" and insert in lieu thereof "period)".

On page 478, line 24, strike out "'the Act'" and insert in lieu thereof "the 'Act'".

On page 517, between lines 13 and 14, insert the following:

PART H—GRADUATE MEDICAL EDUCATION

AMENDMENT TO THE PUBLIC HEALTH SERVICE ACT

On page 519, line 22, strike out "relevent" and insert in lieu thereof "relevant".

On page 536, line 8, strike out "99" and insert in lieu thereof "991".

On page 536, line 11, strike out "if:" and insert in lieu thereof "if—".

On page 536, line 20, insert "of 1954" after "Code".

On page 536, line 21, strike out "termintion" and insert in lieu thereof "termination".

On page 536, line 23, insert "of 1954" after "Code".

On page 537, line 5, strike out "Act" and insert in lieu thereof "Act)".

On page 537, line 17, strike out "organzation" and insert in lieu thereof "organization".

On page 538, line 9, strike out "notifiy" and insert in lieu thereof "notify".

On page 543, lines 20 and 21, strike out "section 4041(c)" and insert in lieu thereof "subsection (c)".

On page 544, line 18, strike out "'within" and insert in lieu thereof "(within".

On page 544, line 19, strike out "4042)'" and insert in lieu thereof "4042)".

On page 552, strike out lines 1 through 5 and insert in lieu thereof the following new subsection:

(b) CONFORMING AMENDMENTS.—Section 4041(e) (as redesignated by section 991(a)(2) of this Act is amended—

(1) by striking out "subsection (a)" and inserting in lieu thereof "this section"; and

(2) by inserting "in a standard termination" after "terminated".

On page 554, line 11, strike out "trhe" and insert in lieu thereof "the".

On page 555, line 9, insert a period after "4062".

On page 562, line 6, strike out "and".

On page 563, line 4, strike out "." and insert in lieu thereof "."; and".

On page 563, between lines 4 and 5, insert the following:

(3) by inserting after section 4065 (as added by clause (2)) the following:

"PART 2—ADMINISTRATION AND ENFORCEMENT".

On page 563, line 9, strike out "Act' " and insert in lieu thereof "Act)".

On page 563, line 17, strike out "terminatioin" and insert in lieu thereof "termination".

On page 563, line 18, strike out "plana" and insert in lieu thereof "plan".

On page 563, line 19, strike out "contribution" and insert in lieu thereof "contributing".

On page 563, line 21, strike out "contribution" and insert in lieu thereof "contributing".

On page 563, line 25, strike out "of the" and insert in lieu thereof "for the".

On page 564, line 10, strike out "996(c)(i)" and insert in lieu thereof "996(c)(1)".

On page 564, line 13, strike out "EFFECT" and insert in lieu thereof " "EFFECT".

On page 566, line 9, strike out "1306(a)(2)" and insert in lieu thereof "1306(a)(2))".

On page 567, line 24, insert "by" after "(ii)".

On page 569, strike out lines 18 and 19 and insert in lieu thereof the following:

inserting in lieu thereof "section 4041(c)"; and

On page 570, line 22, strike out "(a)—(aa)," and insert in lieu thereof "(a), (aa)".

On page 572, line 2, insert a comma after "(b)".

On page 572, line 9, strike out "(C)(2)(A)(i)" and insert in lieu thereof "(c)(2)(A)(i)".

On page 572, line 20, insert a comma after "(d)".

On page 574, line 15, strike out "(a)(1)" and insert in lieu thereof "(1)".

On page 575, line 11, strike out "and".

On page 576, strike out line 12 and insert in lieu thereof the following:

but it does not include mineral, oil, and gas royalty interests.

On page 579, line 1, strike out "(i)" and insert in lieu thereof " "(i)".

On page 579, strike out line 4 and insert in lieu thereof the following:

States, and

"(ii) any lien imposed under this section".

On page 579, line 8, strike out "109(c)(1)" and insert in lieu thereof "996(c)(1)".

On page 579, between lines 14 and 15, insert a period after "413A".

On page 580, before line 1, strike out "of" in the item relating to section 4072 and insert in lieu thereof "to".

On page 580, before line 1, strike out the item relating to section 4075 and insert in lieu thereof the following:

"Sec. 4075. Effect of corporate reorganization.".

On page 605, line 3, strike out "the" and insert in lieu thereof "this".

On page 609, line 3, strike out "of" the second place it appears and insert in lieu thereof "or".

DURENBERGER (AND OTHERS) AMENDMENT NO. 860

Mr. DURENBERGER (for himself, Mr. KENNEDY, Mr. DOLE, Mr. BAUCUS, Mr. HEINZ, Mr. PROXMIRE, Mr. BRADLEY, and Mr. RIEGLE) proposed an amendment to the bill S. 1730, supra; as follows:

Beginning on page 512, line 1, strike out through page 517, line 13.

On page 164, after line 25, insert the following:

SEC. 711A. RESPONSIBILITIES OF MEDICARE HOSPITALS IN EMERGENCY CASES

(a) REQUIREMENT OF MEDICARE HOSPITAL PROVIDER AGREEMENTS.—Section 1866(a)(1) of the Social Security Act is amended—

(1) by striking out "and" at the end of subparagraph (G);

(2) by striking out the period at the end of subparagraph (H) and inserting in lieu thereof ", and"; and

(3) by inserting after subparagraph (H) the following new subparagraph:

"(I) in the case of a hospital, to comply with the requirements of section 1867 to the extent applicable.".

(b) REQUIREMENTS.—Title XVIII of such Act is amended by inserting after section 1866 the following new section:

"EXAMINATION AND TREATMENT FOR EMERGENCY MEDICAL CONDITIONS AND WOMEN IN ACTIVE LABOR

"SEC. 1867. (a) MEDICAL SCREENING REQUIREMENT.—In the case of any hospital which has a hospital emergency department, if any individual (whether or not eligible for benefits under this title) comes to the emergency department and a request is made on the individual's behalf for examination or treatment for a medical condition, the hospital must provide for an appropriate medical screening examination within the capability of such hospital's emergency department to determine whether or not an emergency medical condition (within the meaning of subsection (e)(1)) exists or to determine if the individual is in active labor (within the meaning of subsection (e)(2)). The requirements of this subsection shall not apply if the provision of a medical screening examination would delay or otherwise be contrary to the prompt treatment of the individual's medical condition.

"(b) NECESSARY STABILIZING TREATMENT FOR EMERGENCY MEDICAL CONDITIONS AND ACTIVE LABOR.—If any individual (whether or not eligible for benefits under this title) comes to the hospital and the individual is determined (through the screening described in subsection (a) or otherwise) to have an emergency medical condition or to be in active labor, the hospital must provide either—

"(1) within the staff and facilities available at such hospital, for such further medical examination and such treatment as may be required to stabilize the medical condition or to provide for treatment of the labor, unless the examination or treatment is refused; or

"(2) for transfer of the patient to another medical facility in accordance with subsection (c), unless the transfer is refused.

"(c) RESTRICTING TRANSFERS UNITL PATIENT STABILIZED.—

"(1) GENERAL RULE.—If a patient at a hospital has an emergency medical condition which has not been stabilized (within the meaning of subsection (e)(3)(B)) or is in active labor, the hospital may not transfer the patient unless—

"(A)(i) the patient (or a member of the patient's family if the patient is an unemancipated minor or is unable to communicate) requests that a transfer be effected; or

"(ii) there has been a determination by a physician (within the meaning of section 1861(r)(1)), or by other qualified medical personnel when a physician is not available in the emergency department, that, based upon the reasonable risks and benefits to the patient, and based upon the information available at the time, the benefits obtained from the provision of appropriate medical treatment at another medical facility, taking into account the potential risks to the individual's medical condition involved in the transfer, outweigh the potential benefits to the individual's medical condition from not effecting the transfer; and

"(B) the transfer is an appropriate transfer (within the meaning of paragraph (2)) to that facility.

"(2) APPROPRIATE TRANSFER.—An appropriate transfer to a medical facility is a transfer—

"(A) in which the receiving facility—

"(i) has available space and qualified personnel for the treatment of the patient;

"(ii) has agreed to accept transfer of the patient and to provide appropriate medical treatment; and

"(iii) is being provided appropriate medical records (or copies thereof) of the examination and treatment furnished at the transferring facility, or, if the patient's medical condition is sufficiently serious to require an immediate transfer, is notified of the transfer as soon as practicable under the circumstances;

"(B) in which the transfer is effected through qualified personnel and transportation equipment, as required, including the use of necessary and medically appropriate life support measures during the transfer; and

"(C) which meets such other requirements as the Secretary may find necessary in the interest of the health and safety of patients transferred.

"(d) ENFORCEMENT.—If a hospital knowingly and willfully, or negligently, fails to meet the requirements of this section, such hospital shall be subject to—

"(1) termination of its provider agreement under this title in accordance with section 1866(b); or

"(2) at the option of the Secretary, suspension of such agreement for such period of time as the Secretary determines to be appropriate, upon reasonable notice to the provider and to the public.

"(e) DEFINITIONS.—For purposes of this section:

"(1) The term 'emergency medical condition' means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in—

"(A) placing the patient's health in serious jeopardy;

"(B) serious impairment to bodily functions; or

"(C) serious dysfunction of any bodily organ or part.

"(2) The term 'active labor' means labor at a time at which—

"(A) delivery is imminent; or

"(B) there is inadequate time to effect safe transfer to another hospital prior to delivery.

"(3)(A) The term 'to stabilize' means, with respect to an emergency medical condition, to provide such medical treatment of the condition as may be reasonably necessary under the circumstances and within the capability of the hospital—

"(i) so that the transfer of the individual will not, within reasonable medical probability, result in substantial risk of the death or serious impairment of the individual as a direct result of the transfer; or

"(ii) in order to determine that the benefits obtained from the provision of appropriate medical treatment at another medical facility, taking into account the potential risks to the individual's medical condition involved in the transfer, outweigh the potential benefits to the individual's medical condition from not effecting the transfer.

"(B) The term 'stabilized' means, with respect to an emergency medical condition, that such medical treatment of the condition has been provided as may be reasonably necessary under the circumstances and within the capability of the hospital—

"(i) so that the transfer of the individual will not, within reasonable medical probability, result in substantial risk of the death or serious impairment of the individual as a direct result of the transfer; or

"(ii) in order to determine that the benefits obtained from the provision of appropriate medical treatment at another medical facility, taking into aaccount the potential risks to the individual's medical condition involved in the transfer, outweigh the potential benefits to the individual's medical condition from not effecting the transfer.

"(4) The term 'transfer' means movement (including the discharge) of a patient outside a hospital's facilities at the direction of any person employed by, or affiliated or associated directly or indirectly with, the hospital, but does not include such a movement of a patient who had been declared dead or leaves the facility without the permission of any such person.

"(f) PREEMPTION.—The provisions of this section do not preempt any State or local law requirement except to the extent that the requirement directly conflicts with a requirement of this section.".

"(c) EFFECTIVE DATE.—The amendment made by this section shall become effective on April 1, 1986.

(d) GAO STUDY.—(1) The Comptroller General shall conduct a study of the problems created by hospitals which transfer patients without providing necessary emergency medical treatment. The study shall include—

(A) a survey and assessment of the extent of the problems;

(B) a survey of the available remedies to such problems, including State law and licensing requirements and the use of professional standard setting organizations, and an assessment of the frequency and effectiveness with which such remedies are utilized;

(C) an assessment of the effectiveness of the remedy provided under section 1867 of the Social Security Act; and

(D) recommendations for changes in Federal law, including changes in section 1867 of the Social Security Act, and the possible use of incentives under title XIX of such Act to encourage States to establish similar remedies.

(2) The Comptroller General shall report the results of the study to the Congress within 2 years after the date of the enactment of this Act.

(e) REGULATIONS.—The Secretary of Health and Human Services shall promulgate final regulations for implementing section 1867 of the Social Security Act within 180 days after the date of the enactment of this Act, and shall report to Congress on the methods to be used for monitoring and enforcing compliance with such section.

KENNEDY (AND WILSON) AMENDMENT NO. 861

Mr. KENNEDY (for himself and Mr. WILSON) proposed an amendment to the bill S. 1730, supra; as follows:

On page 89, beginning with line 17, strike out all down through line 7 on page 90 and insert in lieu thereof the following:

SEC. 203. COLLECTION BY THE UNITED STATES OF MEDICAL AND DENTAL COSTS INCURRED ON BEHALF OF CERTAIN PERSONS.

(a) IN GENERAL.—(1) Chapter 55 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1095. Collection from third-party payers of reasonable medical and dental care costs incurred on behalf of retirees and dependents

"(a)(1) In the case of a person who is covered by section 1074(b), 1076(a), or 1076(b) of this title, the United States shall have the right to collect from a third-party payer the reasonable costs of medical and dental care incurred by the United States on behalf of such person through a facility of the uniformed services to the extent that the person would be eligible to receive reimbursement or indemnification from the third-party payer if the person were to incur such costs on the person's own behalf. If the insurance, medical service, or health plan of that payer includes a requirement for a deductible or copayment by the beneficiary of the plan, then the amount that the United States may collect from the third-party payer is the reasonable cost of the care provided less the appropriate deductible or copayment amount.

"(2) A person covered by section 1074(b), 1076(a), or 1076(b) of this title may not be required to pay an additional amount to the United States for medical and dental care by reason of this section.

"(b) No provision of any insurance, medical service, or health plan contract or agreement having the effect of excluding from coverage or limiting payment of charges for certain care solely on the basis that such care is provided through a facility of the uniformed services shall operate to prevent collection by the United States under subsection (a)

"(c) Under regulations prescribed under subsection (f), records of the facility of the uniformed services that provided medical or dental care to a beneficiary of an insurance, medical service, of health plan of a third-party payer shall be made available for inspection and review by representatives of the payer from which collection by the United States is sought.

"(d) Notwithstanding subsections (a) and (b), collection may not be made under this section in the case of a plan administered under title XVIII or XIX of the Social Security Act (42 U.S.C. 1395 et seq.).

"(e)(1) The United States may institute and prosecute legal proceedings against a third-party payer to enforce a right of the United States under this section.

"(2) The administering Secretary may compromise, settle, or waive a claim of the United States under this section.

"(f) The Secretary of Defense, in consultation with the other administering Secretaries, shall prescribe regulations for the administration of this section. Such regulations shall provide for computation of the reasonable cost of medical and dental care. Computation of such reasonable cost may be based on—

"(1) per diem rates; or

"(2) such other method as may be appropriate. However, such regulations shall provide that in no event may the reasonable cost of care or services sought to be recovered or collected from a third-party payer exceed an amount equal to the prevailing rate that such third party payer can demonstrate to the satisfaction of the Secretary of Defense it would pay for the care or services provided in facilities (other than facilities of departments or agencies of the United States) in the same geographic area.

"(g) In this section, 'third-party payer' means an entity that provides an insurance, medical service, or health plan by contract or agreement.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1095. Collection from third-party payers of reasonable medical and dental care costs incurred on behalf of retirees and dependents."

(b) EFFECTIVE DATE.—Section 1095 of title 10, United States Code, as added by subsection (a), shall apply with respect to health care provided on or after the date of the enactment of this Act (but only with respect to an insurance, medical service, or health plan agreement entered into, amended, or renewed on or after that date).

(c) REPEAL PROVISION.—Section 1095 of title 10, United States Code, as added by subsection (a)(1), and the item in the table of sections at the beginning of chapter 55 of such title relating to section 1095, as added by subsection (a)(2), are repealed effective two years after the date of the enactment of this Act.

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs will hold a markup on October 30, 1985, in Senate Dirksen 138, beginning at 10 a.m., on the following bills:

S. 1684, a bill to declare that the United States holds certain Chilocco Indian School lands in trust for the Kaw, Otoe-Missouria, Pawnee, Ponca and Tonkawa Indian Tribes of Oklahoma;

S. 1728, a bill to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to 99 years;

S. 1298, a bill to coordinate and expand services for the prevention, identification and treatment of alcohol and drug abuse among Indian youth;

S. 1621, a bill to amend title 25, United States Code, relating to Indian education programs; and

S. 1396, a bill to settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation, to

remove clouds from the titles to certain lands, and for other purposes.

Those wishing additional information should contact the committee at 224-2251.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I wish to announce that the Committee on Agriculture, Nutrition, and Forestry has scheduled hearings to examine the financial condition of the Farm Credit System and to discuss possible legislative remedies.

The hearings will begin at 9:30 a.m. on Thursday, October 31, and Friday, November 1, 1985, in room 328-A Russell Senate Office Building.

For further information, please contact the committee staff at 224-2035.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources to consider Senate Joint Resolution 192, to authorize financial assistance for the Northern Mariana Islands, and for other purposes.

The hearing will take place Tuesday, November 19, 1985, 9:30 a.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

Those wishing to testify or who wish to submit written statements should write to the Committee on Energy and Natural Resources, U.S. Senate, room SD-358, Dirksen Senate Office Building, Washington, DC 20510. For further information, please contact Debbi Rice or Al Stayman at (202) 224-2366.

SUBCOMMITTEE ON ENERGY REGULATION AND CONSERVATION

Mr. NICKLES. Mr. President, I would like to announce for the information of the Senate and the public, that the Subcommittee on Energy Regulation and Conservation of the Committee on Energy and Natural Resources has scheduled an oversight hearing on Thursday, November 21, 1985, beginning at 9:30 a.m. in room SD-366 in the Senate Dirksen Office Building in Washington, DC.

The purpose of the hearing is to review the Federal Energy Regulatory Commission's Order No. 436, Final Rule and Notice Requesting Supplemental Comments on Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Docket No. RM85-1-000).

Those wishing to testify or submit written statements for the hearing record should write to the Subcommittee on Energy Regulation and Conservation, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC 20510.

For further information regarding this hearing, please contact Ms. Debbi Rice or Mr. Howard Useem 202-224-2366.

SUBCOMMITTEE ON PUBLIC LANDS, RESERVED WATER AND RESOURCE CONSERVATION

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public that the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources has added an additional resolution which the subcommittee will receive testimony on at its hearing scheduled for Tuesday, October 29, 1985, at 10 a.m. in room SD-366 of the Senate Dirksen Office Building, Washington, DC.

The additional bill is Senate Joint Resolution 156, to authorize a memorial to be erected in the District of Columbia or its environs. As previously announced, the subcommittee will also receive testimony on S. 1107, S. 1223, S. 1379, Senate Joint Resolution 143, and Senate Joint Resolution 184.

For further information regarding this hearing, please contact Tony Bevinetto or Patty Kennedy of the subcommittee staff at (202) 224-2878.

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INTELLIGENCE

Mr. ANDREWS. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, October 23, 1985, in closed executive session in order to conduct a hearing on phase II of the National Development Strategy.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON NUCLEAR REGULATION

Mr. ANDREWS. Mr. President, I ask unanimous consent that the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Wednesday, October 23, 1985, in order to conduct a hearing on the extension of the Price Anderson Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ANDREWS. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Wednesday, October 23, 1985, in order to conduct a hearing on the following nominations:

William Barton, to be Inspector General for the General Services Administration.

Julius Becton, to be Director of the Federal Emergency Management Agency.

James McNeill, to be Assistant Director of the Federal Emergency Management Agency.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. ANDREWS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, October 23, in order to receive testimony concerning the following nomination:

ASSISTANT ATTORNEY GENERAL

Charles J. Cooper, of Virginia, to be an Assistant Attorney General (Office of Legal Counsel).

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE NEED TO REFORM THE JOINT CHIEFS OF STAFF

● Mr. HART. Mr. President, last week the Senate witnessed an historic act: the release by Senator BARRY GOLDWATER and Senator SAM NUNN of the report, "Defense Organization: The Need for Change."

Senator GOLDWATER said of the reforms recommended in the report, "The reorganization of the Defense Department may be the most important thing Congress does in our lifetime. It will be the most important thing I do in mine." Coming from someone who has as many achievements to his credit as the Senator from Arizona, that is a statement that gets one's attention. But it is not an overstatement.

The work of Senator GOLDWATER and Senator NUNN, and the superbly capable members of the Senate Armed Services Committee staff who wrote the report, is of historic significance in two respects.

First, it establishes beyond any possible doubt that we have very serious problems in our defense decisionmaking system: in the Joint Chiefs of Staff, in the individual military departments, in the procurement process, and in the way the Congress approaches defense issues. These problems are sufficiently serious that in Senator GOLDWATER's words, "If we have to fight tomorrow * * * they will cause Americans to die unnecessarily. Even more, they may cause us to lose the fight."

There is no question that the committee's report will play a major role in bringing about changes in these problem areas. While some of the specific changes recommended in the report will be debated, as they should be, the Defense Department will no longer be able to stonewall reforms by saying, "There is nothing wrong with 'business as usual.' Don't change what is working well."

As Senator NUNN said here on the floor. "If we leave it up to the Pentagon, there will be no change." But the

committee report makes clear that many things are wrong—very seriously wrong. As both Senators said, "the current system is broke and we need to fix it."

The committee report is significant in a second and even greater respect. By forcefully opening the door to reform of the Joint Chiefs, the Office of the Secretary of Defense, and the other areas it addresses, the report also works indirectly but powerfully to open the door to futher reforms.

Even since the founding of the congressional military reform caucus in the summer of 1981, and in some individual cases before that, a small but growing group of Members of Congress from both Houses and both parties has been warning that basic defects in our military concepts, doctrines, force structures, and organization are leading us toward exactly what Senator GOLDWATER has warned of—unnecessary casualties in combat and, very possibly, defeat on some future battlefield. The areas of concern to these military reformers have included many of the areas addressed in this committee report, and I think it is safe to say that all members of the military reform caucus believe changes in these areas are needed.

But the concerns of the caucus and of the many military reformers outside the Congress, including those within the officer corps, also go beyond these issues. After all, the question is not "what is the most efficient Pentagon?" The question is "what is the most effective defense?"

For that reason, military reformers are concerned about additional problem areas such as:

TACTICS AND DOCTRINE

For over a century, the American way of war has relied on firepower and attrition—fighting like Grant against Lee around Richmond. Military reformers believe we need instead to adopt a maneuver style of warfare—and fight like the Israelis in their Sinai campaigns. Recently, to its great credit, the U.S. Army has made this change. Unfortunately, our other three services have not.

UNIT COHESION

It has been evident since the time of the Roman legions that effectiveness in combat demands cohesiveness within military units. The troops must know the people around them. Today, we have such a high rate of personnel rotation in our military—up to 25 percent per quarter in many combat units—that people do not get to know each other and the units are not cohesive. As in the case of doctrine, the Army, but only the Army, is moving to remedy this problem.

OFFICER EDUCATION AND PROMOTION

If a military is to be effective in combat, its officers must be taught how to think and the promotion system must favor the leader, the thinker, and the tactician. Instead, we largely teach our officers what to do and what to think, which leads to rigidity in combat, and we tend to promote the bureaucrat, the office politician and the courtier, especially in the higher ranks.

MILITARY EQUIPMENT

Today, we get neither quality nor quantity in most of our weapons. Most of them are too complex to work effectively in combat. Yet, because of their complexity, most weapons cost so much that we can only afford small numbers of them. We need to develop and buy weapons that are simple to operate, dependable, easy to repair under combat conditions, hard for an enemy to see, get kills quickly, and inexpensive enough that we can afford adequate numbers.

FORCE STRUCTURE

Today, our Navy is dependent on just 13 ships—our 13 big aircraft carriers. These carriers, with their escorts, aircraft, and support ships are each so expensive that we can afford only a handful of them. Worse, we have paid for them in part by building so few submarines that our principal opponent, the Soviet Union, outnumbers us 3 to 1 in submarines. The capital ship today is the submarine, not the aircraft carrier. For this Nation—which is by geography dependent on the sea—to allow itself to be outnumbered 3 to 1 in capital ships is extraordinarily dangerous.

In these areas and others, just as in the areas identified by the committee report, major reforms are needed. While the report does not address these other areas directly, it will do a great deal to prepared the way for reforming them. The report will help initiate the process of reform that many of us have been calling for these past years. Once underway, that process will grow and spread until we make the necessary changes in all defense areas, not just those covered by this report.

When that happens, Senator GOLDWATER and Senator NUNN will deserve a great deal of credit. They will have played a major role in moving the reform process forward. For that service, they deserve the thanks, the applause, and the active support of every citizen.

SENATE JOINT RESOLUTION 104, THE "TIME OF REMEMBRANCE"

● Mr. DENTON. Mr. President, we have recently witnessed several acts of terrorism that resulted in the death of American citizens.

In June, the bloody terrorist assault on an outdoor cafe in El Salvador left four U.S. marines and two other Americans dead.

Also in June, the hijacking of TWA flight 847 resulted in the death of Robert Dean Stethem, a member of the U.S. Navy.

Earlier this month, we heard of the murder of U.S. Diplomat William Buckley, one of the Americans held hostage in Lebanon.

Most recently, we learned of the despicable and cowardly slaying of Mr. Leon Klinghoffer onboard the *Achille Lauro*. We are continually reminded by events such as those that America and its citizens are the primary target of international terrorists.

I know that we can do nothing to bring back the brave people who have lost their lives to terrorism, nor can we mitigate the loss suffered by their loved ones. We can, however, take the time to remember and honor the victims of terrorism throughout the world, and to let their friends and loved ones know that our remembrance of the victims will serve to strengthen our resolve to fight terrorism with all of our strength.

Mr. President, I am confident that we will win the fight against terrorism. We will win because, as my good friend and colleague from Vermont, Mr. LEAHY, has said:

Our love and strength is greater than their hate.

My colleague made the statement on April 3, 1985, the day that he, I, and 35 other original cosponsors introduced Senate Joint Resolution 104, a joint resolution proclaiming today, October 23, 1985, as a "Time of Remembrance" for all victims of terrorism throughout the world. The first "Time of Remembrance" was observed exactly 1 year ago, on the first anniversary of the tragic death of 241 U.S. servicemen in the terrorist bombing of the Marine barracks in Beirut.

The originating and driving organization behind the effort is No Greater Love, a national, nonprofit, nonpol¹tical, humanitarian organization dedicated to providing programs of care and friendship to children whose parents have been killed while serving our country. During last year's "Time of Remembrance," No Greater Love sponsored a commemorative ceremony at Arlington National Cemetery.

The ceremony was of international significance and success. Letters of support and appreciation were received from diplomatic officials, Governors, private organizations, and individuals throughout the Nation and around the world. It was because of the tremendous response, and because of the continuing tragedy of worldwide terrorism, that we introduced Senate Joint Resolution 104 in an effort to make "A Time of Remembrance" an annual occurrence.

Senate Joint Resolution 104 proclaims October 23, 1985, as "A Time of Remembrance." It urges:

All Americans to take time to reflect on the sacrifices that have been made in the

pursuit of peace and freedom, and to promote active participation by the American people through the wearing of a purple ribbon, a symbol of patriotism, dignity, loyalty, and martyrdom.

It also requests the President to issue a proclamation:

Calling upon the departments and agencies of the United States and interested organizations, groups, and individuals to fly U.S. flags at half mast throughout the world in the hope that the desire for peace and freedom may take firm root in every person and every nation.

This year's program will focus on the sacrifices of journalists who have been killed in the line of duty by terrorists. The program will culminate in a ceremony held by No Greater Love, in cooperation with the Committee to Protect Journalists, at the National Press Club. During the ceremony, a plaque will be unveiled to honor the newsmen and newswomen who sacrificed their lives in the pursuit of truth.

Mr. President, I am pleased to see the effort come to fruition. I am very proud to have been the sponsor of the bill.●

S. 1771—DROPOUT RETENTION AND RECOVERY ACT OF 1985

● Mr. CHILES. Mr. President, on Thursday, I introduced S. 1771, the Dropout Retention and Recovery Act of 1985. I ask that a copy of the bill be printed in the RECORD.

The text of the bill follows:

S. 1771

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Elementary and Secondary Education Act of 1965 is amended by redesignating title X as title XI, by redesignating the sections of such title as sections 1101 to 1106, and by inserting the following new title after title IX:

"TITLE X—THE DROPOUT RETENTION AND RECOVERY PROGRAM

"SHORT TITLE

"SEC. 1001. This title may be cited as the 'Dropout Retention and Recovery Act of 1985'.

"PURPOSE

"SEC. 1002. The purpose of this title is to reduce the number of children who do not complete their elementary and secondary education by conducting a national school dropout study and by providing grants to local educational agencies to establish and demonstrate—

(1) model systems for collecting and reporting information to State and local school officials on the number, ages, and grade levels of the children not completing their elementary and secondary education and the reasons why such children have dropped out of school;

(2) effective programs to identify potential dropouts, prevent them from dropping out and help them succeed in school; and

(3) effective programs to identify and encourage children who have already dropped out to reenter the educational system and successfully complete their elementary and secondary education through a comprehensive range of educational and social services and alternative programs to meet their special needs.

"GRANTS AUTHORIZED

"SEC. 1003. (a) ALLOCATION TO LOCAL EDUCATIONAL AGENCIES.—(1) From the amount appropriated under section 1010 for any fiscal year, the Secretary shall allocate grants in each such fiscal year so that two-thirds of the grants awarded in any such fiscal year are made to local educational agencies serving urban areas and one-third of the grants in any such fiscal year to local educational agencies serving rural areas. In carrying out the provisions in the previous sentence, the Secretary shall—

"(A) assure an equitable distribution of grants among regional areas of the United States; and

"(B) give priority to local educational agencies with the most severe dropout problem, as measured in the number of students and proportion of students, and having applications showing the greatest potential for success.

"(2) A State educational agency may apply for a grant under this title if the State educational agency determines that no local educational agency is likely to qualify for a grant under this title or that the State educational agency can best serve the needs of students in the remote area of the State.

"(3) One or more local educational agencies may jointly apply for a grant under this title.

"(b) AWARD OF GRANT.—From the amount allotted for any fiscal year under subsection (a), the Secretary shall award as many grants as practicable to local educational agencies whose applications have been approved by the Secretary for such fiscal year under section 1006 and whose applications propose a program of sufficient size and scope to be of value as a demonstration. The grants shall be made under such terms and conditions as the Secretary shall prescribe.

"(c) MAXIMUM NUMBER OF GRANTS.—A local educational agency or, where appropriate, a State educational agency, may receive no more than one grant in each of three fiscal years under this title.

"(d) AMOUNT.—The amount of a grant awarded under this section to a local educational agency for any fiscal year, to the extent practicable, shall be proportionate to the extent and severity of the local dropout problem, except that the amount of the grant shall not exceed 90 percent of the total cost of a project during the project's first fiscal year, 75 percent of such cost during the project's second fiscal year, and 50 percent of such cost during the project's third fiscal year.

"NATIONAL SCHOOL DROPOUT STUDY

"SEC. 1004. (a) IN GENERAL.—From the amounts appropriated for the fiscal year 1986 and for each succeeding fiscal year ending prior to October 1, 1989, the Secretary shall reserve an amount not to exceed $2,000,000 in each fiscal year to conduct a study in accordance with the provisions of this section of the nature and extent of the dropout problem in the United States and to carry out the activities of the planning process described in section 1005(a). In conducting the study, the Secretary shall—

"(1) during the first year for which funds are appropriated for this title—

"(A) establish a model standard definition of a school dropout;

"(B) develop a standard list of reasons why children are dropping out of school, including major factors that contribute to children dropping out;

"(2) during the second year for which funds are appropriated for this title—

"(A) develop a model dropout information collection and reporting system;

"(B) develop minimum reporting system requirements;

"(3) during the third year for which funds are appropriated for this title—

"(A) identify the numbers of children and the general reasons for their dropping out of school among population groups with particularly high dropout rates;

"(B) identify the characteristics of children who appear to be at risk of dropping out of school;

"(C) identify the factors or policies which may attract children who have dropped out to reenter school or continue and complete the equivalent of elementary and secondary education through alternative programs;

"(D) identify methods and techniques being used successfully to reduce the number of school dropouts; and

"(E) provide recommendations for activities and policies which can be implemented at each level of government and in communities to ameliorate the dropout problem.

"(b) OTHER REQUIREMENTS.—(1) The study conducted under this section shall be conducted through the Office of Educational Research and Improvement.

"(2) Recipients of grants under this title shall cooperate with the Secretary in carrying out the study under subsection (a) by providing data and information on the nature and extent of the dropout problem and the effectiveness of techniques used to address the problem.

"(c) STATE DATA ANALYSIS ACTIVITIES.—(1) Each State educational agency desiring to have a grant made to a local educational agency within the State under this title shall, from funds reserved pursuant to subsection (a), carry out the data analysis activities required by this subsection.

"(2) From the funds appropriated for each fiscal year for this title and reserved under subsection (a) of this section, the Secretary shall allot not less than $10,000, nor more than $25,000, according to relative school-age population to each State educational agency in order to provide information on the nature and extent of the dropout problem in such State.

"(3) The data required by this section shall include information on how drop-outs are commonly defined by the local educational agency and an analysis of State enrollment data to identify the high risk populations and factors that are relevant to dropping out of school.

"(4) Each State desiring to participate under this section shall appoint an advisory panel of not less than 10 members, nor more than 15 members. Members of the advisory panel shall be individuals with expertise in the problems of students who drop out of school or representatives of agencies, organizations, and institutions serving high risk populations of student dropouts. The panel shall be appointed so that one-third of the members are educators, one-third of the members are representatives of job training programs and community-based organizations that serve high risk individuals; and at least 1 representative of business, a member of the State legislature, and individuals with expertise in vocational education, career education, guidance and counseling, and compensatory education.

"(5) The State educational agency, with the advice of the advisory panel, shall make recommendations to the Secretary concerning the standard definition of a student

dropout and State and local needs for a model information and dissemination network within the first year for which funds are appropriated under this title. For the second year for which funds are appropriated for this title, the State educational agency shall examine the impact of educational reform and excellence efforts in the State to reduce the dropout rate.

"(6) The Secretary shall disseminate the results of the study and evaluate the success of projects assisted under this title.

"PLANNING PROCESS AND REQUIREMENTS

"SEC. 1005. (a) PLANNING PROCESS.—Each local educational agency, and where appropriate, each State educational agency shall conduct a planning process under which the agency will—

"(1) identify the high-risk populations of students to be served as well as the factors and characteristics which cause the populations to drop out;

"(2) describe the interventions to be used to prevent these populations from dropping out or to facilitate their re-entry into the education system or alternative programs, and justify how these interventions can be expected to be successful;

"(3) set annual goals for implementation of the project and its expected results; and

"(4) describe the procedures and methodologies of which will be used to annually evaluate the effectiveness, and where possible, the cost-benefit of particular drop-out prevention and re-entry methods, according to criteria established by the Secretary.

"(b) PLAN REQUIREMENTS.—Each local educational agency, and where appropriate, each State educational agency shall develop a plan for the implementation of a project under this title which will—

"(1) implement comprehensive early identification, prevention, outreach, and reentry programs for dropouts and potential dropouts,

"(2) address the special needs of pregnant minors and school-age parents, Indians, migrants, and other identified high risk populations;

"(3) disseminate information to students, parents, and the community related to the dropout problem, its prevention, and opportunities available for student dropouts to continue their education;

"(4) provide coordinated activities involving the feeder junior or middle schools and elementary schools for the high schools to be included in the project;

"(5) establish annual procedures for (i) evaluating the effectiveness of the project, and (ii) where possible, determining the cost-effectiveness of the particular dropout prevention and reentry methods used and the potential for reproducing such methods in other areas of the country, according to guidelines established by the Secretary;

"(6) establish an advisory council which is broadly representative of the entire community and the dropout populations to be served, including job training organizations, community based organizations, and public and private agencies serving such populations;

"(7) provide assurances that a copy of the application will be furnished to the appropriate State educational agency and State advisory panel; and

"(8) use the resources of the community and parents to help develop and implement solutions to the local dropout problem.

"APPLICATION

"SEC. 1006. (a) IN GENERAL.—A grant under this title may be made only to a local educational agency or a State educational agency, where appropriate, which submits an application to the Secretary containing such information as may be required by the Secretary by regulation. Such application shall—

"(1) provide documentation of (A) the number of children formerly enrolled in the applicant's schools who have not completed their elementary or secondary education, and (B) the percentage that such number of children is of the total school-age population in the applicant's schools, including a statement of the methodology used to develop the data;

"(2) include a plant for the development and implementation of a dropout information collection and reporting system for documenting the extent and nature of the dropout problem, in accordance with standards established by the national school dropout study under section 1004;

"(3) include a plan for the development and implementation of a project which will meet the requirements of section 1005 relating to planning process and planning requirements; and

"(4) contain such other information as the Secretary considers necessary to determine the nature of the local needs, the quality of the proposed project, and the capability of the applicant to carry out the project.

"(b) CONSIDERATIONS FOR APPROVAL OF APPLICATIONS.—In considering applications for approval under this title, the Secretary shall follow the requirements of paragraph (1) of section 1003(a).

"(c) REVIEW OF PROJECTS.—In any application from a local educational agency for a grant to continue a project for the second or third fiscal year following the first fiscal year in which a grant was awarded to such local educational agency, the Secretary shall review the progress being made toward meeting the objectives of the project. The Secretary may refuse to award a grant if he finds that sufficient progress has not been made toward meeting such objectives, but only after affording the applicant notice and an opportunity for a hearing.

"AUTHORIZED ACTIVITIES

"SEC. 1007. Funds under this title shall be used under this title for activities described in applications approved under section 1006 and which are consistent with the planning process and planning requirements contained in section 1005. In addition, grants may be used for the following activities:

"(1) to establish systemwide or school-level policies, procedures, and plans for dropout prevention or school reentry, or both;

"(2) to provide career education, guidance and counseling services, including peer interaction activities;

"(3) to provide ombudsman or mentor services;

"(4) to develop and implement activities, including extended day or summer programs to address poor achievement, language deficiencies, or cource failures, in order to assist students at risk of dropping out of school and students reentering school;

"(5) to establish or expand work-study, apprentice, or internship programs;

"(6) to improve vocational education as a means of retraining potential dropouts and enable them to learn and apply basic academic skills;

"(7) to use the resources of the community, including contracting with public or private entities or community-based organizations, to provide services to the grant recipient or the target population;

"(8) to develop programs in collaboration with business and industry and institutions of higher education, including community colleges, to provide incentives for high risk populations to stay in, or reenter, school;

"(9) to evaluate and revise program placement of students at risk;

"(10) to review and improve curriculum, including the development of self-paced, competency-based curricula;

"(11) to implement activities which will improve student motivation and the school learning environment, including, the use of extracurricular activities to involve and retain the students;

"(12) to provide training for school staff on strategies and techniques to identify children at risk of dropping out, to intervene in the instructional program with support and remedial services, to develop realistic expectations for student performance, and to improve student-staff interactions; and

"(13) to provide other services and implement other activities which directly relate to the purpose of this title.

"GENERAL PROVISIONS

"SEC. 1008. (a) WITHHOLDING PAYMENTS.—Whenever the Secretary, after reasonable notice and opportunity for a hearing to any local educational agency, finds that the local educational agency has failed to comply substantially with the provisions set forth in its application approved under section 1006, the Secretary shall withhold payments under this title until the Secretary is satisfied that there is no longer any failure to comply.

"(b) ANNUAL REPORT.—The Secretary shall prepare and submit to Congress an annual report on January 1 on the activities assisted under this title during the preceding fiscal year.

"(c) AUDIT.—The Comptroller General shall have access for the purpose of audit and examination to any books, documents, papers, and records of any local educational agency receiving assistance under this title that are pertinent to the sums received and disbursed under this title.

"(d) GRANTS MUST SUPPLEMENT OTHER FUNDS.—A local educational agency receiving funds under this title shall use the Federal funds only to supplement the funds that would, in the absence of such Federal funds, he made available from non-Federal sources for activities to prevent students from dropping out of elementary and secondary school and to persuade dropouts to reenter school and complete their education.

"DEFINITIONS

"SEC. 1009. As used in this title—

"(1) the term 'community-based organization' has the same meaning given that term by section 4(5) of the Job Training Partnership Act.

"(2) the term 'Secretary' means the Secretary of Education; and

"(3) the terms 'State educational agency', 'local educational agency', 'elementary school', and 'secondary school' have the same meanings given those terms in section 198 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 3381).

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1010. There are authorized to be appropriated to carry out this title $50,000,000 for fiscal year 1987 and such sums as may be

necessary for each of the fiscal years 1988, 1989, and 1990.".

CAROLE GOSHORN—A SPECIAL TEACHER

● Mr. LUGAR. Mr. President, today I should like to pay tribute to an outstanding educator in Indiana—Carole Goshorn. Her hard work in science education and the support of the Columbus, IN, school system have produced a science program noted for excellence. I am very proud of these achievements in education in Indiana.

I ask that an article about Carole Goshorn and education be printed in the RECORD.

The article follows:

A SPECIAL (SCIENCE) TEACHER

(By David S. Broder)

COLUMBUS, IND.—Carole R. Goshorn is special—one of 104 high-school science and mathematics teachers who are in Washington this week to receive presidential awards for their excellence in the classroom.

Although she does not look it, the 34-year-old mother of two is one of the front-line fighters in America's battle for survival in the increasingly tough international economic competition. Study after study has shown the United States is doing a worse job on science and math education—the building blocks for tomorrow's technology and industry—than Germany, Japan and other competitor nations.

Despite recent moves in many states to require more and tougher science and math courses in high schools, close to one-third of those classes are taught by people with minimal or no qualifications in those subjects. And the proportion is growing.

Science and math majors can double their teaching salaries by moving into industry. Science-minded college undergraduates tend to shun teaching degrees. Colleges complain that high schools are sending them fewer students with good preparation for science, math and engineering courses. And industry says it cannot find the trained technical and scientific people it needs.

Two years ago, after a wave of reports highlighted these problems, the administration reversed course. After reducing to one-tenth the National Science Foundation programs for math and science education in his first two years, Reagan endorsed an expanded program of scholarships and training for teachers in those fields. The annual presidential awards for two top math and science teachers in each state are the public relations frosting on that cake.

They are also a measure of how far most communities in this nation have to go if they are to provide students with the education that results when a gifted teacher such as Carole Goshorn works in a well-equipped school in a community as supportive of education as Columbus, Ind.

Columbus is the international headquarters of Cummins Engine Company, whose management has made this city of 31,000 a showcase of distinguished architecture and a remarkably comfortable place to live. Along with Arvin Industries and other local firms, the Cummins people have spurred the development of high-quality local schools, needed to attract top managers to central Indiana and to educate a skilled work force.

East High, where Goshorn teaches, was designed and built 13 years ago to accommodate and foster team teaching and highly individualized instruction. In the science wing, there are large lecture halls with sophisticated audiovisual equipment, where several classes can get basic instruction at one time. Individual classrooms are very small, holding not more than 20 pupils, so teachers can supervise problem solving and answer questions on a one-on-one basis. A large, modern lab serves several courses, with a fulltime lab attendant and at least one teacher on duty at all times. Between the lab and the classrooms, a science library has desks for individual study.

The 1,600-student school draws from an industrial city and a farm county; it is not elitist, but its standards are tough. The other day, Goshorn, wearing a white lab coat with a button reading "Chemists Have Solutions" on her lapel, and her teaching partner, Jack Young, took perhaps 120 beginning chemistry students through a fast-paced workout on calculating molecular weights of compounds. Her analogies were down-home—"10 to the 23rd power is about as many leaves as you'd find on all the trees in Bartholomew County"—but the equations flashed on the screen click-click-click. No one had time to daydream.

With a master's degree in biology from Indiana University, Goshorn could probably double her mid-$20,000s salary in industry. But she and her husband, an administrator at North High, have a commitment to education and welcome the chance to work in a community that has demonstrated its dedication to its schools. Despite its small size, Columbus has just hired a superintendent away from a swanky Minneapolis suburb by offering him the second-highest education salary in Indiana and a $100,000 "excellence in education" fund, raised from local business and available for projects he picks.

The recommendations for Goshorn's award, which brings a $5,000 federal grant to her school, noted not only her work on statewide science curriculum development but her skill as a student adviser, her role-model status for young women considering science or other professional careers and her enthusiasm for teaching.

"It's wonderful to work in a school and community like this," she said. It is wonderful to watch her in her superb public school. But you have to remember she stands out as special. America will have to clone her—and the commitment to education her school and community represent—many times over to meet the challenges ahead.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annexes referred to in two of the covering letters are available to Senators in the office of the Foreign Relations Committee, SD-423.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, October 21, 1985.

In reply refer to: I-13521/85 ct.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of section 36(b) of the Arms Export Control Act, we are forwarding herewith transmittals Nos. 86-05A and 86-05B and under separate cover the classified annexes thereto. These transmittals concern the Departments of the Air Force and Army proposed Letters of Offer to Jordan for defense articles and services estimated to cost up to $1.81 billion. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portions of these Transmittals.

You will also find attached a certification as required by section 130(c) of Public Law 99-83, approved on August 8, 1985, concerning Jordan's public commitment to the recognition of Israel and to negotiate promptly and directly with Israel under the basic tenets of United Nations Security Council Resolutions 242 and 338.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 86-05A]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Jordan.

(ii) Total estimated value: Up to $1.1 billion.

(iii) Description of articles or services offered: Two squadrons of advanced air defense fighter aircraft (F-20 or F-16 Air Defense Variant) totalling 40 aircraft, aircraft spares, support equipment, training, and 300 AIM-9P4 air-to-air missiles.

(iv) Military department: Air Force (SFA).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annexes under separate cover.

(vii) Section 28 report: Case not included in section 28 report.

(viii) Date report delivered to Congress: October 21, 1985.

POLICY JUSTIFICATION

JORDAN—ADVANCED AIR DEFENSE FIGHTER AIRCRAFT (F-20 OR F-16 AIR DEFENSE VARIANT) AND AIM-9P4 MISSILES

The Government of Jordan has requested the purchase of two squadrons (40) of advanced air defense fighter aircraft (F-20 or F-16 Air Defense Variant), aircraft spares, support equipment, training, and 300 AIM-9P4 air-to-air missiles. The estimated cost is up to $1.1 billion.

The proposed sale is in the best interest of both the United States and Jordan because it meets Jordan's legitimate security requirements and furthers our mutual objectives of fostering a just and lasting peace in the region. Jordan recently announced intentions to move this year to negotiations among the parties in a non-belligerent envi-

ronment on the basis of U.N. Security Council Resolutions 242 and 338. Without the political and military support of the U.S., it would prove difficult for a small and vulnerable state such as Jordan to conclude and help enforce a binding peace agreement.

The sale of 40 advanced air defense fighter aircraft will provide two squadrons, with four attrition aircraft, to replace portions of Jordan's aging interceptor fleet of F-5s and Mirage F-1s and maintain its capability to deter and counter present and projected regional threats to Jordanian airspace, principally from Soviet-armed Syria. The AIM-9P4 air-to-air missiles will provide the necessary armament for these aircraft. Jordan will have no difficulty absorbing these aircraft and missiles into its armed forces.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractors are: F-20 aircraft-Northrop Corporation of Hawthorne, California; F-16 Air Defense Variant aircraft-General Dynamics Corporation of Fort Worth, Texas; and AIM-9P4 missile-Ford Aerospace and Communications Corporation of Newport Beach, California.

Implementation of this sale of advanced air defense fighter aircraft and air-to-air missiles could require the assignment of 20 additional U.S. Government personnel and 25 contractor representatives in Jordan for two years.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

[Transmittal No. 86-05B]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Jordan.

(ii) Total estimated value:

	Million
Major defense equipment [1]	$116
Other	594
Total	710

[1] As defined in section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Twelve improved Hawk air defense missile assault fire units, two AN/TSQ-73 missile minder systems, 222 I-Hawk missiles, 14 improved platoon command posts, 14 improved continuous wave acquisition radars, all in a PIP III configuration; 224 vehicles, 72 basic Stinger weapons and 36 missile reload rounds, concurrent spare parts, training and technical assistance.

(iv) Military Department: Army (VLI, VLJ, JFR, OBU and OBY).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annexes under separate cover.

(vii) Section 28 report: Case not included in section 28 report.

(viii) Date report delivered to Congress: 21 October 1985.

POLICY JUSTIFICATION

JORDAN—I-HAWK MISSILES AND BASIC STINGER MISSILE SYSTEMS

The Government of Jordan has requested the purchase of 12 Improved HAWK air defense missile Assault Fire Units, two AN/TSQ-73 Missile Minder Systems, 222 I-HAWK missiles, 14 Improved Platoon Command Posts, 14 Improved Continuous Wave Acquisition Radars, all in a PIP III configuration; 224 vehicles, 72 Basic STINGER Weapons and 36 missile reload rounds, concurrent spare parts, training and technical assistance. The estimated cost is $710 million.

The proposed sale is in the best interests of both the United States and Jordan because it meets Jordan's legitimate security requirements and furthers our mutual objectives of fostering a just and lasting peace in the region. Jordan recently announced intentions to move this year to negotiations among the parties in a non-belligerent environment on the basis of U.S. Security Council Resolutions 242 and 338. Without the political and military support of the U.S., it would prove difficult for a small and vulnerable state such as Jordan to conclude and help enforce a binding peace agreement.

The new I-HAWK Assault Fire Units and additional I-HAWK missiles will go far in redressing longstanding deficiencies in Jordan's ground air defense capability and permit employment of missile defenses with some degree of mobility to afford umbrella protection to ground forces. The additional Platoon Command Posts and vehicles will provide assault fire unit capability for one of two firing elements of Jordan's currently immobilized I-HAWK batteries. Modification kits for 14 High Power Illuminators coupled with the 14 Platoon Command Posts and Continuous Wave Acquisition Radars will provide the same capabilities as the 12 new I-HAWK Assault Fire Units. The PIP III configuration is expected to be U.S. Army Standard at time of production. The small quantity of the Basic STINGER manportable air defense missile system will modernize Jordan's existing point defense capabilities (VULCAN guns and REDEYE missiles). With an all-aspect capability, Basic STINGER provides Jordan the ability to counter intruding aircraft that succeed in penetrating the interceptor force and I-HAWK missile batteries. Special security precautions will be imposed as a condition of sale to ensure the STINGER technology is not compromised and that the weapons remain in authorized hands. Jordan will have no difficulty absorbing these I-HAWK Fire Units, additional I-HAWK missiles and STINGER missiles into its armed forces.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor for the I-HAWK systems will be the Raytheon Company of West Andover, Massachusetts. The prime contractor for the STINGER missile systems will be the General Dynamics Corporation of Pomona, California.

Implementation of this sale will require the assignment in Jordan of six additional U.S. Government personnel and ten contractor representatives for three years.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

THE WHITE HOUSE,
Washington, DC, October 21, 1985.

Presidential Certification No. 86-01

Memorandum for the Secretary of State.

Subject: Certification on Jordan.

Pursuant to section 130(c) of the International Security and Development Cooperation Act of 1985 (P.L. 99-83), I hereby certify that Jordan is publicly committed to the recognition of Israel and to negotiate promptly and directly with Israel under the basic tenets of United Nations Security Council Resolutions 242 and 338.

You are authorized and directed to report this certification, together with the justification therefor, to the Speaker of the House of Representatives and the Chairman of the Senate Foreign Relations Committee.

This certification, together with the justification therefor, shall be published in the Federal Register.

RONALD REAGAN.

JUSTIFICATION FOR CERTIFICATION

Section 130(c) of the International Security and Development Cooperation Act of 1985 (P.L. 99-83) provides:

CERTIFICATION.—Any notification made pursuant to section 36(b) of the Arms Export Control Act with respect to a proposed sale to Jordan of United States advance aircraft, new air defense systems, or other new advanced military weapons, shall be accompanied by a Presidential certification of Jordan's public commitment to the recognition of Israel and to negotiate promptly and directly with Israel under the basic tenets of United Nations Security Council Resolutions 242 and 338.

As demonstrated below, Jordan clearly meets the condition set forth in section 130(c). Moreover, the sale of a limited quantity of defensive arms to Jordan will greatly contribute to Jordan's ability to implement these commitments.

When this certification requirement was first adopted, I placed on record my belief that the requirement was unnecessary and inappropriate in light of King Hussein's public statements and courageous actions. In my letter of September 27 informing the Congress that an informal notification of an arms sale to Jordan would be transmitted, I restated my firm conviction that Jordan's commitment to the recognition of Israel and to negotiate promptly and directly with Israel under the basic tenets of UNSC Resolutions 242 and 338 were clearly evidenced by King Hussein's public statements and bold steps toward peace. The King's statements and actions since that time have continued to manifest Jordan's commitment to the principles set forth in section 130(c).

Jordan's commitment to the recognition of Israel and to negotiate promptly and directly with Israel based on 242 and 338 is a matter of public record. In 1982, for example, following the emergence of my September peace initiative, the King stated, "I have recognized Israel since I helped in formulating Security Council Resolution 242 and accepted it." This year, King Hussein reaffirmed his acceptance of 242 and 338, as well as his acknowledgement of Israel's right to exist. During his May visit to the United States, he also expressed his desire to move toward direct negotiations with Israel before the end of 1985. Before the September session of the United Nations General Assembly, King Hussein clearly and publicly reiterated his position that "we are prepared to negotiate under the appropriate auspices with the Government of Israel promptly and directly under the basic tenets of Resolutions 242 and 338." The King repeated this position in his subsequent statements in Washington, as well as his conviction that negotiations with Israel would take place in an environment free of belligerent or hostile acts.

King Hussein has not, however, merely expressed in words his commitment to a peaceful settlement. Last year, Jordan restored diplomatic relations with Egypt, asserting that no state should be isolated for making peace with Israel. In November, in defiance of Syrian opposition, Jordan hosted the Palestine National Council and

challenged the Palestinian community to join with him in seeking a negotiated settlement with Israel on the basis of Resolution 242. Most recently, Jordanian officials forthrightly attended a meeting with the British Foreign Minister, even though PLO representatives proved unable to abide by previously agreed ground rules. Finally, Jordan has given ample, and recent, evidence that it eschews violence as the answer to the Arab-Israeli conflict. It has done its part for many years to maintain quiet along its frontier with Israel, and it was quick to condemn publicly the murder of the three Israelis in Larnaca.

I am fully aware of the conviction of the Congress that U.S. arms transfers in the Middle East should facilitate our efforts to bring about a just and lasting peace in the region. I share that conviction without reservation, and I am convinced that this sale promotes our shared objective. Progress toward peace in the Middle East requires another Arab state willing to negotiate with Israel. Jordan has indicated its willingness to do so.

Jordan, however, is a small and vulnerable state with legitimate security concerns; these concerns are heightened because of its interest in peace with Israel. King Hussein's bold moves toward the negotiating table have provoked repeated overt threats to his regime and associates from those who are determined to prevent a settlement with Israel. Because the sale to Jordan of a limited quantity of defensive arms will enhance Jordan's confidence and self-defense capabilities against such threats, it will enable Jordan more effectively to implement its commitment to peace. Moreover, the sale will convey to King Hussein a clear signal of our political support for his peace initiatives and our refusal to allow acts of terrorism to deter us from pursuit of the peace process. It is, therefore, in the context of our desire to move forward in the peace process that the Administration has notified Congress of our intent to sell to Jordan a limited quantity of defensive arms.

CLASSIFIED ANNEX ITEM NO. VI

(vi) Sensitivity of technology: (Deleted).

1. (U) The F-16 Air Defense Variant (ADV) weapon system is confidential and contains state-of-the-art technology. (Deleted).

3. (U) Classified elements of the F-16 ADV include:

a. (U) Software associated with the ALR-69 RWR, ALQ-131, and APG-66 radar.

b. (U) The radar element of the OFT due to hardware and software features, particularly the terrain and system mapping algorithms.

c. (U) Six Line Replaceable Units (LRU) and the Operational Flight Program (OFP) of the AN/ALR-69.

d. (U) Fifteen of ninety LRUs and Interface Test Adapter programs used on the AIS relating to the radar and AN/ALR-69.

e. (U) The OFP of the Fire Control Computer (FCC).

f. (U) Approximately fifteen operating manuals and maintenance technical orders containing performance information, operating and test procedures, weapons delivery information, repair procedures, and other information related to support operation and repair at the organizational and intermediate levels. The hardware, software, and data identified are classified to protect vulnerabilities, design and performance parameters, munitions related data, and similar critical information.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, October 21, 1985.

In reply refer to: I-13724/85ct.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of section 36(b) of the Arms Export Control Act, we are forwarding herewith transmittal No. 86-06 and under separate cover the classified annex thereto. This transmittal concerns the Department of the Army's proposed Letters of Offer to Jordan for defense articles and services estimated to cost $75 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portions of this Transmittal.

You will also find attached a certification as required by section 130(c) of Public Law 99-83, approved on August 8, 1985, concerning Jordan's public commitment to the recognition of Israel and to negotiate promptly and directly with Israel under the basic tenets of United Nations Security Council Resolutions 242 and 338.

Sincerely,

PHILIP C. GAST,
Director.

POLICY JUSTIFICATION

JORDAN—BRADLEY M3 CAVALRY FIGHTING VEHICLES

The Government of Jordan has requested the purchase of 32 BRADLEY M3 cavalry fighting vehicles, support equipment, concurrent spare parts, publications, training, training equipment and technical assistance. The estimated cost is $75 million.

The proposed sale is in the best interests of both the United States and Jordan because it meets Jordan's legitimate security requirements and furthers our mutual objectives of fostering a just and lasting peace in the region. Jordan recently announced intentions to move this year to negotiations among the parties in a non-belligerent environment on the basis of U.N. Security Council Resolutions 242 and 338. Without the political and military support of the U.S., it would prove difficult for a small and vulnerable state such as Jordan to conclude and help enforce a binding peace agreement.

This sale of BRADLEY M3 vehicles will provide Jordan's scout and armored cavalry units with a full-tracked, lightly armored fighting vehicle for their reconnaissance and security missions. Jordan will have no difficulty absorbing these BRADLEY M3 cavalry fighting vehicles into its armed forces.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the FMC corporation of San Jose, California.

Implementation of this sale will require the assignment to Jordan of twenty one additional U.S. Government personnel for 4-6 months and 15 contractor representatives for one year.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

BUSINESS PEOPLE, INC.

● Mr. BOSCHWITZ. Mr. President, in observance of October as National High-Tech Month, special recognition is being given to those who have made outstanding contributions in the area of scientific research and technical development. I am pleased to report that an honorable mention certificate was presented to Business People, Inc., of Minneapolis, MN, for its leadership in pioneering career development techniques via satellite. BPI was instrumental in creating a method through which individuals may apply for employment positions throughout the United States via satellite communications.

While not an employment agency, BPI has made it possible for thousands of job seekers throughout America to locate new career opportunities. New methods—such as tech fairs and satellite career network teleconfer-

ences—better enable corporate recruiters to locate technical professionals and technical college graduates. In a special program held on October 8, 22 college campuses across the country were linked via satellite with representatives of major private industry and governmental high-tech organizations.

The Congressional Caucus for Science and Technology sponsors the high-tech awards to salute outstanding scientists and notable achievements in high technology. National High-Tech Month provides a special opportunity to increase our awareness of the importance of scientific and technological advances.

For its efforts in increasing awareness of career opportunities for the young through high-tech communications, BPI is to be commended for this special recognition.●

HUNGARIAN FREEDOM FIGHTERS DAY

● Mr. RIEGLE. Mr. President, today marks the 29th anniversary of the Hungarian uprising in which courageous Hungarians sought to regain freedoms and liberties stripped off them by the Soviet Union in the aftermath of World War II.

In order to demonstrate support for past and present efforts of Hungarians for self-determination, Congress in 1981, declared October 23 Hungarian Freedom Fighters Day. This day of recognition provides us an opportunity to reaffirm our own commitment to the ideals of liberty and democracy and to offer encouragement and support to movements for self-determination in Hungary and throughout the world.

Commemoration of Hungarian Freedom Fighters Day gives us occasion to reflect on a world much changed by the effects of World War II. Hungary is but one of the many countries which fell prey to Soviet domination, imprisoned behind an iron curtain which has divided Europe—east and west.

In October 1956, months of vocal criticism of the Hungarian regime gave way to demonstrations by students and intellectuals in the streets of Budapest. On October 23, university students in that city, inspired by a Polish move toward greater independence, staged a demonstration calling for greater independence in their own country. On that day, the spirited, but peaceful march ended at the Radio Building, where students sought to express their opposition to 11 years of Communist control through a radio broadcast. Minutes later, police opened fire on the crowd, killing and wounding many.

The next day, the Hungarian Politburo, consenting to student demands, reelected former Hungarian Premier, Imre Nagy. On November 1, 1956, by popular demand, Premier Nagy announced Hungary's neutrality, its withdrawal from the Warsaw Pact, and the intention to hold free, multiparty elections. Within 48 hours, however, these initiatives were crushed by Soviet troops.

In the aftermath of the uprising, an economic system was adopted offering increased economic opportunities and the chance to achieve a higher standard of living for Hungarians. But the dream of political liberty which inspired the uprising was not realized.

While the Hungarian uprising was easily squashed by the Soviets, the spirit of those who sacrificed their lives in that effort continues to burn in the hearts of those still striving for liberty. Today's remembrance serves as a reminder to Americans of how precious our freedoms are, and encourages us to remember and support the efforts of those for whom the struggle continues today.●

CARGO PREFERENCE AND THE GREAT LAKES

● Mr. QUAYLE. Mr. President, during the consideration of the Agriculture appropriations bill, I announced my intention to call up an amendment to prohibit the practice of diverting cargoes from the Great Lakes ports in order to meet cargo preference targets. The manager of the bill persuaded me that such an amendment more properly belonged on the farm bill in which the whole issue of cargo preference and agricultural shipments will be dealt with.

I accepted that argument and did not offer my amendment. However, I want to make the record clear that it is still my intention to deal with this diversion issue. I also want to put on notice all those who are attempting to come up with a compromise on the cargo preference issue that any compromise that does not effectively prohibit cargo diversions will not be acceptable to this Senator.

I know that there is great concern in this body over the diversion of Public Law 480, title II cargoes away from Great Lakes ports. These diversions create great controversy and have major detrimental economic effects on the region. The Public Law 480, title II cargoes are the magnet that attracts ships to the Great Lakes which then seek additional commercial cargo in the region.

In Indiana last year, 76.3 percent of all man-hours worked at the Port of Burns International Harbor was associated with title II commodities, according to the port director. Other Great Lakes ports have an even higher percentage of export activity associated with title II cargoes. In Milwaukee, 92.5 percent of all man-hours is related to title II; in Duluth and Green Bay, the figure is approximately 90 percent.

As chairman of the Senate Subcommittee on Employment and Productivity, I believe we need to note how these cargoes translate into jobs. Longshoremen, railroad workers, grain elevator and grain mill employees, and vessel maintenance personnel in the Great Lakes region are dependent on the Public Law 480, title II program. The International Longshoremen's Association estimates that each ton of Public Law 480 cargo generates 1½ man-hours of work.

With these facts in mind, I was prepared to offer a revised amendment to the Agriculture appropriations bill which prohibits USDA from using funds for any cargo diversions from one coastal range to another in its implementation of the Public Law 480, title II program. In August and September of this year, USDA diverted 50,000 tons of title II cargo away from Great Lakes ports after negotiating the lowest landed cost bid. This diversion also represented a loss of Great Lakes ports of 75,000 man-hours and yet when my Great Lakes colleagues and I demanded an explanation from USDA, we were advised that these diversions were directed in order to meet cargo preference requirements.

Clearly, these diversions of cargo away from one coastal range to another are unwarranted, all the more so because of the additional costs involved. In order to divert these cargoes, USDA was forced to pay both higher costs to transport them by rail to other coastal ranges, as well as the higher shipping costs for U.S.-flag service.

These diversions are inconsistent with the policy that the Agency for International Development [AID] has repeatedly stated in regard to cargo diversions: No cargo diversions will occur away from the Great Lakes in order to meet cargo preference requirements. USDA simply acts as a purchasing agent for AID, yet on these recent occasions, USDA has arbitrarily decided to divert cargoes away from the Great Lakes to other ranges, in conflict with AID policy.

I should also point out to my colleagues that the Code of Federal Regulations governing cargo perference states that, in seeking available ocean transportation, "maximum compliance with the stated AID policy" will prevail. Clearly, this has not occurred, and the revised amendment I am offering will serve to prevent any further breaches in the AID policy governing Public Law 480, title II shipments.

I submit to my colleagues that cargo diversions are disruptive to ports, shippers, longshoremen, railroad workers, grain mill operators, and countless others. The Congress must exercise its

oversight of the title II program, and my amendment seeks to extend the benefits of the program to a wider range of beneficiaries, both abroad and here at home.

Until I discussed this modified amendment with the senior Senator from Alaska, I was prepared to offer the amendment which I introduced to this body on September 30. In essence, that proposal would have required that food for peace shipments under the Public Law 480, title II program be shipped at the lowest landed cost. Since the title II program is the only agriculture export program in which the U.S. Government pays for the commodities and their transportation to overseas destinations, I believed that my original amendment would bring about substantial savings to USDA and spread more evenly the employment and economic benefits resulting from these shipments.

I believe that my lowest landed cost proposal was completely consistent with the traditional administration of our cargo preference laws. Until 2 years ago, USDA did not pay any incentive payments to transport title II cargoes on U.S.-flag ships. But in 1984, USDA paid over $20 million to transport title II cargoes on U.S.-flag ships, and this year USDA will spend an estimated $55 million. Given the size of the title II budget of $650 million, I believe that $55 million in excess payments to U.S.-flag ships is unnecessary. My original amendment allowed U.S.-flag ships to carry title II cargoes, but at the lowest landed cost bid negotiated by USDA.

HELSINKI MONITORS

● Mr. WALLOP. Mr. President, the fate of the Ukrainian citizens who formed a group back in 1976 to monitor Soviet compliance with the Helsinki Accords is a subject which concerns us all. It appears that all but 2 of the 36 Ukrainians have been, at one time or another, persecuted for the exercise of rights promised to them under the Helsinki Accords.

This kind of outrageous Soviet noncompliance with the principles they agreed to at Helsinki makes a mockery of the Helsinki CSCE agreements and all they stand for. This record should stand clear for all the world to see.

I request, therefore, that the article from the Washington Times of September 23, 1985 be printed in the RECORD.

The article follows:

PANEL DOCUMENTS END OF HELSINKI MONITORS

(By Lou Marano)

Of the 36 members of the Ukrainian group formed in 1976 to monitor Soviet compliance with the 1975 Helsinki accords, all but two have at one time or another been imprisoned, banished to internal exile or forcibly confined to psychiatric hospitals, said Orest Deychak, of the congressional Commission on Security and Cooperation in Europe.

One of the two committed suicide in 1979 "because of continuous KGB persecution," said Mr. Deychak, who said the Ukrainian group of Helsinki monitors "was the largest and hardest-hit in the U.S.S.R."

Twenty-one are still political prisoners and three have died in labor camps within the past 18 months, said Myron Wasylyk, director of the Ukrainian National Information Service. Of the 12 others, most have either escaped to the West or died of old age, Mr. Wasylyk said.

Amnesty International called on Soviet authorities last week to publish a full report on the prison deaths of three Helsinki monitors and a Ukrainian journalist.

The fates of the four were detailed for The Washington Times last week by Mr. Wasylyk. He said Oleksa Tykhy, a teacher; Vasyl Stus, a poet and human-rights activist, and Valeriy Marchenko, a journalist, have died in the gulag from medical neglect.

Helsinki monitor Yuriy Lytvyn, a writer, committed suicide in prison camp, Mr. Wasylyk said.

The Amnesty International statement reported the four deaths, all of which have occurred since May 1984, took place at Colony VS 389-31-1 near Perm, 750 miles east of Moscow.

LOUISVILLE'S ENTERPRISE ZONE

● Mr. McCONNELL. Mr. President, I call the attention of this body to a relatively new economic development approach sweeping this Nation—enterprise zones. Something we have looked at here in Washington has been adopted by 26 States across America.

The Commonwealth of Kentucky enacted enterprise zone legislation back in 1983. In June 1983, Kentucky picked its first two zones in Louisville and the town of Hickman on the Mississippi River. As of October 1985, almost 2 years since the first enterprise zone jobs were certified by the Commonwealth, in November 1983, activity in zone businesses has created or retained 2,293 jobs. A total of 683 so-called certified jobs going to zone residents, persons unemployed for at least a year, and those receiving public assistance; and 1,519 of the jobs are new.

Louisville's zone has created 828 new jobs and retained 374 jobs, mostly in small businesses. Over 380 of those were certified jobs. The success of Louisville's zone was recently written up in the September 1985 issue "Enterprise Zone Notes," an occasional publication of the U.S. Department of Housing and Urban Development. I ask that the article be printed in the RECORD at the conclusion of my remarks.

I am also pleased to note that Mr. Ron Lewis, executive vice president of Lanham Lumber & Dry Klin Co., Louisville's first enterprise zone certified business, will have the honor of being a guest panelist at an enterprise zone workshop as part of the seventh national conference for State and local officials on small business in Boston on October 23-25, 1985.

The article follows:

LOUISVILLE'S ZONE TARGETS PEOPLE

(By Sara Bell)

Cooperation is the number one reason for the success of the Louisville Enterprise Zone. That cooperation has become a tradition since the General Assembly created Kentucky's Enterprise Zone program in 1982.

Similar to other state Enterprise Zone programs, Kentucky offers various benefits and incentives including tax and regulatory relief as well as training program advantages for businesses locating and expanding in designated economically depressed areas.

Beyond the financial or administrative benefits, many of Kentucky's Enterprise Zones have intrinsic advantages. Their location is often strategic in regard to transportation, suppliers, and the rest of the city. Older buildings, adaptable to modern needs are often available; underdeveloped land suitable for industry is likewise available.

The requirements that a business must meet in order to capitalize on the advantages of a Kentucky Enterprise Zone are not difficult or complicated. In addition to the business being located in an Enterprise Zone, the other two basic requirements are: 50 percent of the company must perform substantially all their services within the zone; and 25 percent of the company employees must be either residents of the zone, persons who have been unemployed for one year, or persons who have received public assistance benefits for a year or more.

With all the talk of tax benefits and incentives for businesses, it's easy to overlook one of the most important features of Enterprise Zones: helping people.

Some companies are not willing to hire the hard-core unemployed, even for tax benefits. But, an example of a company that has, and is reaping monetary, as well as social benefits, is Lanham Lumber and Dry Kiln Company.

Lanham Lumber was Louisville's first Enterprise Zone certified business. President Turner Lanham and Executive Vice President Ron Lewis have been very pleased with the quality of people who have come to work at the company. More than 12,000 people applied for new job openings at the lumber yard, according to the City's Economic Development Cabinet. The state Bureau of Manpower Services screened applicants before sending them for interviews to determine if they met zone criteria.

One successful applicant was 34 year-old Mustafa Mustafa. Mustafa, an ex-convict, is now working towards a degree in criminology at the University of Louisville.

"You have to take steps toward helping yourself. But without this job, it would be very hard to make ends meet," says Mustafa. "The Enterprise Zone allowed Lanham to hire more people, and for that I'm very grateful."

Developer Joe Rey-Barreau has initiated a success story of a different kind. Through the impetus of the Kentucky Housing Corporation's cluster loan program, Rey-Barreau and two other developers built 12 market-rate houses in Louisville's west-end California neighborhood.

"I think people's priorities are sometimes misplaced," said Rey-Barreau. "The current belief seems to be good housing will bring good jobs. In reality, good jobs will bring good housing. Needless to say, I'm excited about the possibilities of the Enterprise Zone in Louisville."

The California neighborhood is located in the Enterprise Zone and has been a prime objective of the city's Neighborhood Development Cabinet for redevelopment. In the past several years in the California neighborhood, more than $813,000 in grants and over $726,000 in Section 312 loans have been spent to rehabilitate 116 housing units. In addition, $359,317 has been allocated to nonprofit corporations for rehabilitation and new construction of housing. One of the non-profit corporations, New Directions, has undertaken some new construction without special government funding.

An apartment for the elderly and apartment units for families utilizing Section 8 funds have been built in the overlap area. Ten new units of public housing were built outside the zone.

Another significant ongoing housing project in the California neighborhood is Adopt-A-Neighborhood. This project is a cooperative effort of Preservation Alliance, Brown-Forman Distillers, and New Directions to rehabilitate homes around an industrial core surrounding Brown-Forman, Philip Morris, and Schenley. Some new construction is also targeted in the area.

Recently, under the coordination of the Greater Louisville Clean Community Program, 150 painters armed with 50 gallons of paint, 30 electricians, plumbers, pipefitters, carpenters, and sheet-metal workers performed a whirlwind renovation of a 10-house block in the California neighborhood. The Community involvement project was a joint effort by labor and management; a Union member from the Labor/Management Cooperation Committee (LAMACO) and Painters Local 118 provided the workers and the Louisville Paint and Coatings Association (representing eleven major paint companies) donated the materials. Thanks to the residents themselves, in preparation of the spruce-up, 464 tons of debris were picked up from the block.

And finally, the authorization of Neighborhood Enterprise Zone Associations by the Kentucky Enterprise Zone Authority will allow greater participation of zone residents in the planning of the zone. City Economic Development Cabinet Executive Director, Charles H. Buddeke, stated "The city of Louisville has committed its support to the Neighborhood Enterprise Zone Association and we forsee that such an association can be used effectively as a lobbyist for all the residents of the Enterprise Zone."

The areas in which the City plans to provide its support will be in: land-banking of the Enterprise Zone surplus properties which can be used for future residential projects; placing residents into training programs offered by the local Private Industry Council under the Job Training Partnership Act, by the Chamber of Commerce and by the universities; identifying potential investors in residential projects which will produce income for the association; and identifying residents for the Department of Employment Services for available jobs in the Enterprise Zone.

Perhaps the most unique example of fostering cooperation within the Louisville Enterprise Zone program is the twenty-year no strike agreement on construction acceded to by the building trades unions for work done in the zone. The city's Mayor, Harvey I. Sloane, especially proud when the agreement was signed in June 1984, declared "it demonstrates a very friendly and progressive attitude of labor as a partner in business and job growth."

Cooperation is the number one reason for making the Louisville Enterprise Zone so successful. The community supports the Enterprise Zone through private investment, marketing, job training, and voluntary aesthetic improvements. The Louisville Enterprise Zone is a Public/Private Partnership. Mayor Sloane put it best when he noted, "It's the 'look what we can do' attitude that fosters economic development and growth in Louisville."●

TREASURY PROPOSAL TO CHANGE INVESTMENT PROCEDURES FOR THE SOCIAL SECURITY TRUST FUNDS

● Mr. MOYNIHAN. Mr. President, may I shed some light on the announcement yesterday by the Secretary of the Treasury, James A. Baker III, about the Treasury's plan to pursue so-called disinvestment of some of the Federal securities held by the Social Security trust funds? This procedure is essentially proper, may well prove necessary, and does not differ significantly from normal Treasury procedures.

Such disinvestment refers to an ordinary practice of cashing in a certain amount of the special Federal securities held by the Social Security trust funds to finance the monthly payout of benefits. For the checks due to be issued on November 1, this should come to some $15 billion. The new procedures announced by the Treasury Secretary are really very close to the normal investment and accounting procedures followed by Social Security's managing trustee—which is to say, the Treasury Secretary.

Each month the managing trustee cashes in some of the trust fund assets held in Federal securities, in order to be able to meet benefit obligations. This practice is normally stretched out over a 4- to 5-day period, beginning the day Social Security checks are issued. Stretching out this disinvestment of assets enables the trust funds to keep as much of its assets as possible invested and earning interest for as long as possible. Cashing in securities held by the trust funds ordinarily does not have to coincide precisely with the presentation of the checks by recipients, because the Treasury usually has sufficient cash on hand to insure that cash will be available whenever Social Security checks are presented.

By November 1, without passage of the debt limit bill, the Treasury will have no spare cash on hand and will be unable to issue new Treasury securities to the public to raise that cash. And that is why the Social Security trust funds will have to cash in some securities at an earlier-than-usual date, to raise virtually the full $15 billion for November benefit payments. The cash to honor Social Security checks will be there; but as a result, the trust funds may have to forfeit some 4 days' interest which would have been earned had all its assets remained invested.

Can we not, then, assure the public that the money is there in the trust funds to back up their Social Security checks? The most recent actuarial report indicates that at the close of the last fiscal year—September 30, 1985—the combined Social Security trust funds [old-age, survivors, disability, and hospital insurance] hold assets of some $60 billion. By the end of the current fiscal year 1986 the surplus assets will reach nearly $80 billion; by the close of fiscal year 1990 some $286 billion.

Let me also make clear that should the Treasury try to cash in assets held by the Social Security trust funds in order to finance general—non-Social Security—Government operations—as some news accounts have implied—such would be quite illegal. The Social Security Act protects the trust funds from such illicit use; indeed, the act explicitly prohibits such. Section 201(d) of the Social Security Act reads:

> It shall be the duty of the Managing Trustee to invest such portion of the Trust Funds as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States.

Mr. President, public faith in the security and sanctity of the Social Security trust funds can be fragile. If the Treasury does use its revised procedures for the occasion, let us remind the public that the Social Security trust funds are in excellent financial shape and, furthermore, safeguarded against any misuse of its funds. The moneys to pay Social Security benefits on time are there, and will be well into the next century.

Mr. President, I ask that a table in connection with this matter be printed in the RECORD.

The table follows:

TABLE 2.—ESTIMATED OPERATIONS OF THE OASI, DI, AND HI TRUST FUNDS, UNDER PRESENT LAW, ON THE BASIS OF THE ASSUMPTIONS UNDERLYING THE MID-SESSION REVIEW OF THE FISCAL YEAR 1986 BUDGET, CALENDAR YEARS 1984–90

[Amounts in billions]

Calendar year	Income					Outgo				Interfund borrowing transfers [1]			
	OASI	DI	OASDI	HI	Total	OASI	DI	HI	Total	OASI	DI	HI	
1984	$169.3	$17.3	$186.6	$46.7	$233.4	$161.9	$18.5	$180.4	$43.9	$224.3

TIME LIMITATION AGREEMENT— JORDAN ARMS SALE

Mr. DOLE. Mr. President, I ask unanimous consent that at 12 noon on Thursday, October 24, 1985, the Senate temporarily lay aside the pending business and turn to the consideration of the joint resolution offered by the majority and minority leaders and Senators LUGAR, PELL, and others, dealing with the sale of arms to Jordan and that it be considered under the following time agreement: 1 hour on the resolution equally divided in the usual form, that no amendments be in order to the joint resolution, that no motions to commit with instructions be in order, and that the agreement be in the usual form.

I ask unanimous consent that no intervening motion be in order prior to passage.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. I ask unanimous consent that it may be in order at this time to order the yeas and nays on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

PRINTING OF SENATE DOCUMENT, SENATE RESOLUTION 243

Mr. DOLE. Mr. President, I send a resolution to the desk on behalf of Senator GORTON and Senator BYRD and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A Senate resolution (S. Res. 243) to authorize the reprinting of Senate document numbered 87–64.

Mr. GORTON. Mr. President, I wish to introduce a resolution, for myself and for Senator BYRD, calling for the reprinting of Senate Document 87–64, the study entitled "History of the United States Senate from 1787 to 1801."

This scholarly work, compiled by Roy Swanstrom, professor emeritus of history at Seattle Pacific University, was first ordered to be printed by this body on September 25, 1961. George Galloway of the Library of Congress praised this book as a complete and exhaustive work, and as a valuable and lasting contribution to the literature on Congress.

On July 4, 1976, when our country celebrated its Bicentennial, the occasion was marked not only by festivities and fireworks, but also by a revisiting of our past. Through the eyes of historians, we were able to experience events which transpired 200 years ago when 56 Americans came together to cast their votes for a declaration of independence. As it happened, this document did little more than proclaim the source of individuals' rights and the purpose of government, for it did not describe how this purpose might be accomplished, or outline the type of government that should be established.

It was for this reason that on November 15, 1777, Congress adopted the Articles of Confederation. There were, however, tragic flaws in the government set up under the Articles of Confederation. There was no executive and there was no judiciary. By itself the Confederate Congress could not tax and it could not regulate trade except with the Indians. It was State and local agencies which governed the American people and it was they that chose who would serve in Congress. By the end of the war it was clear that the Articles of Confederation were inadequate, and that something had to be done.

With this baggage, 57 men, representatives of the people and the States, serving as delegates, came together in May 1787 at Philadelphia to develop a more suitable form of government. As Dr. Swanstrom's study so thoroughly describes, the work of the Constitutional Convention was only a beginning. The process of erecting a government from this blueprint, our Constitution, was a laborious and difficult task, accompanied by problems and dangers as critical as those faced at Philadelphia in 1787.

Mr. President, among those builders were Americans who served as Members of this body and played a vital role in the erecting of this new government. On April 6, 1989, we will celebrate the Bicentennial of the U.S. Senate—for on that date in 1789, Richard Henry Lee, from Virginia, arrived, completing a quorum of the first session of the first Senate of the United States. As the bicentennial of this body grows near, its history will be the subject of much study and celebration by academics across the Nation. I be-

lieve Dr. Swanstrom's study will serve as a valuable resource to these academics, as well as to the Members of this body, their staffs and the general public.

Mr. President, I urge my colleagues to join me in this effort and cosponsor my resolution calling for the reprinting of Senate Document 87-64.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 243) was agreed to, as follows:

S. RES. 243

Resolved, That Senate Document Numbered 87-64, entitled "History of the United States Senate from 1787 to 1801", be reprinted as a Senate document.

SEC. 2. There shall be printed, in addition to the usual number, such additional copies as are allowed subject to the limitations of section 703 of title 44, United States Code.

Mr. DOLE. I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR THURSDAY

RECESS UNTIL 9 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9 a.m. on Thursday, October 24, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. I ask unanimous consent that following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business not to extend beyond the hour of 9:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE TOMORROW

Mr. DOLE. Following routine morning business, it is the intention of the majority leader to begin consideration of H.R. 2965, the State-Justice-Commerce appropriations bill. Votes are expected in relation thereto prior to 12 noon. As I indicated, at 12 noon, if it is not completed, we shall set that bill aside and move to the Jordan resolution, on which a time agreement was previously agreed to, and following the vote on that, whether or not we have disposed of the appropriations bill, turn to the reconciliation bill, S. 1730, which should come around 1:15 or 1:30 in the afternoon.

If it is possible to complete the reconciliation bill at a fairly early hour in the evening, it may be that we could turn to the Compact of Free Association and possibly hear opening statements on the 1985 farm bill. It is fair to say we can expect votes throughout the day on Thursday and probably into the evening.

RECESS UNTIL 9 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move we stand in recess until 9 a.m. Thursday, October 24, 1985.

The motion was agreed to; and, at 7:12 p.m., the Senate recessed until Thursday, October 24, 1985, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate October 23, 1985:

THE JUDICIARY

Frank X. Altimari, of New York, to be U.S. circuit judge for the second circuit, vice Ellsworth A. VanGraafeiland, retired.

Jefferson B. Sessions III, of Alabama, to be U.S. district judge for the southern district of Alabama vice a new position created by Public Law 98-353, approved July 10, 1984.

Morris S. Arnold, of Arkansas, to be U.S. district judge for the western district of Arkansas vice a new position created by Public Law 98-353, approved July 10, 1984.

Robert L. Miller, Jr., of Indiana, to be U.S. district judge for the northern district of Indiana vice a new position created by Public Law 98-353, approved July 10, 1984.

Garrett E. Brown, Jr., of New Jersey, to be U.S. district judge for the district of New Jersey vice a new position created by Public Law 98-353, approved July 10, 1984.

DEPARTMENT OF JUSTICE

Stanley A. Twardy, Jr., of Connecticut, to be U.S. attorney for the district of Connecticut for the term of 4 years vice Alan H. Nevas.

William C. Carpenter, Jr., of Delaware, to be U.S. attorney for the district of Delaware for the term of 4 years vice Joseph J. Farnan, Jr., resigned.

Benjamin L. Burgess, Jr., of Kansas, to be U.S. attorney for the district of Kansas for the term of 4 years vice Jim J. Marquez, resigned.

Marvin Collins, of Texas, to be U.S. attorney for the northern district of Texas for the term of 4 years vice James A. Rolfe, resigned.

HOUSE OF REPRESENTATIVES—*Wednesday, October 23, 1985*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

I will lift up my eyes to the hills, from whence does my help come? My help comes from the Lord, who made heaven and earth.—Psalm 121:1, 2.

Help us, gracious God, to focus not only on the immediate things of daily life, but through our communion with You, to meditate on those things that make us Your people, that allow us to be human. Enable us to sense our destiny and our place in Your providence, to recognize our relationship with You. May we through our prayers see You more clearly, love You more dearly, follow You more nearly, day by day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. KOLBE. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. KOLBE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 273, nays 117, answered "present" 1, not voting 43, as follows:

Mr. PASHAYAN changed his vote from "present" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 407. Joint resolution designating the 12-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3424. An act making appropriations for the Departments of Labor, Health and

Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3424) "An act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. WEICKER, Mr. HATFIELD, Mr. STEVENS, Mr. ANDREWS, Mr. RUDMAN, Mr. SPECTER, Mr. MCCLURE, Mr. DOMENICI, Mr. PROXMIRE, Mr. BYRD, Mr. HOLLINGS, Mr. CHILES, Mr. BURDICK, Mr. INOUYE, Mr. HARKIN, and Mr. STENNIS to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 71. Concurrent resolution to commemorate the accomplishments of Public Law 94-142, the Education for All Handicapped Children Act on the 10th anniversary of its enactment.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 2942, LEGISLATIVE BRANCH APPROPRIATIONS ACT, 1986

Mr. FAZIO. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 2942) making appropriations for the legislative branch for the fiscal year ending September 30, 1986, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING SECRETARY OF THE INTERIOR TO CONVEY CERTAIN LAND IN MARYLAND TO MARYLAND-NATIONAL CAPITAL PARK AND PLANNING COMMISSION

Mr. VENTO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3003) to authorize the Secretary of the Interior to convey certain land located in the State of Maryland to the Maryland National Capital Park and Planning Commission, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, I do so to ask the gentleman from Minnesota to explain the bill.

Mr. VENTO. Mr. Speaker, this measure is a measure that transfers a small land parcel to the Maryland-National Capital Park and Planning Commission, which has been introduced by our distinguished colleagues, the gentleman from Maryland [Mr. HOYER] and the gentlewoman from Maryland [Mrs. HOLT].

It is a small bill of local interest that will facilitate the development and use of a private parcel and the use of some land that reverted from the old roads department to the Park Service.

At the desk is an amendment in the nature of a substitute to the measure. I think, though, the bill is really of little controversy and a good measure. I want to commend the gentlewoman and the gentleman from Maryland for their work. They have done an outstanding job on this measure, and I would hope we could act on it today.

Mr. LAGOMARSINO. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. I thank the gentleman from California for yielding.

Mr. Speaker, I want to very briefly thank Mr. VENTO and Mr. LAGOMARSINO and their staffs for their excellent work on this bill and their inclination to bring H.R. 3003 to the floor in an expeditious manner.

This legislation, which transfers Federal property located in Prince Georges County to the Maryland-National Capital Park and Planning Commission, is a first step in a process that will bring a beautiful, environmentally sound, and economically stimulating development to the shores of the Potomac River.

Mrs. HOLT, the bill's other sponsor and I have worked closely with Mr. Jim Lewis, the developer of Port America, the Federal Government, and most important, the members of the National Parks and Recreation Subcommittee in developing this bipartisan legislation.

There is no cost to this legislation and, in fact, the development itself will be a considerable revenue raiser for Prince Georges County due to the thousands of individuals who will be employed by and pay visits to Port America.

I again thank the chairman and ranking member for their willingness to move this legislation and I look forward to the day when I can invite my colleagues to the shores of the Potomac for the opening of Port America.

Mr. LAGOMARSINO. Mr. Speaker, I strongly support the measure and I urge its passage.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The Clerk read the bill, as follows:

H.R. 3003

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) notwithstanding any other provision of law, the Secretary of the Interior is authorized to convey, without consideration, to the Maryland National Capital Park and Planning Commission all right, title, and interest of the United States to a parcel of land comprising approximately fifty-five acres located in Prince Georges County, Maryland.

(2) Except as provided in subsection (b), the land conveyed pursuant to paragraph (1) shall be used solely for park and waterfront recreation purposes in accordance with a land use plan for the property prepared by the Maryland National Capital Park and Planning Commission and submitted to the National Capital Planning Commission for review and comment. The instrument for conveyance for real property conveyed pursuant to subsection (a) shall set forth all terms and conditions on the conveyance and the grant of access provided in this Act. Such instrument shall further provide that all right, title, and interest conveyed to the Maryland National Capital Park and Planning Commission pursuant to such instrument, except such access as is authorized by subsection (b)(1), shall revert to the United States if such land is used for any purpose other than as stated in this paragraph.

(3) As soon as practicable after the date of enactment of this Act, the Secretary shall file a map and legal description of the area designated under paragraph (1) with the Committee on Interior and Insular Affairs, United States House of Representatives, and with the Committee on Energy and Natural Resources of the United States Senate. Such map and description shall have the same force and effect as if included in this Act, except that the correction of clerical and typographical errors in such legal description and map may be made. Such map and legal description shall be on file in the office of the regional director, National Park Service and the National Capital Park Region.

(b)(1) Subject to the provisions of paragraphs (2) and (3), the Maryland-National Capital Park and Planning Commission may grant access to the real property conveyed pursuant to subsection (a) to the owner of any proposed property development adjacent to such real property.

(2) The grant of access authorized by paragraph (1) shall be contingent upon—

(A) the submission by the owner of the real property seeking such access of a land use and development plan, incorporating the provisions of the memorandum of understanding entered into between the owner of the adjacent property and the National Capital Planning Commission on May 7, 1985, to the National Capital Planning Commission for review and comment;

(B) the approval of the terms and conditions of the memorandum of understanding of May 7, 1985, by the Prince Georges County Council; and

(C) compliance by the owner of real property seeking access with the terms and conditions of the memorandum of understanding of May 7, 1985, referred to in clause (A), except that after approval of a proposed amendment by both of the parties to the memorandum, the proposed amendment shall be published in the Federal Register and concurrently submitted to the appropriate congressional committees for comment.

The amendment shall not be effective until sixty (60) calendar days after it has been transmitted to the Congress. The compliance required by the owner of real property seeking such access shall be determined on or before the date of the grant of access referred to in subsection (a)(1).

(3) The National Capital Planning Commission and the Maryland National Capital Park and Planning Commission shall make a copy of the memorandum of understanding of May 7, 1985, referred to in paragraph (2)(A) available for public inspection in the offices of each commission during business hours.

(c) Prior to the granting of access across the real property conveyed pursuant to subsection (a), as authorized by paragraph (1) of subsection (b), the owner of real property adjacent to thereto receiving said grant of access shall convey to the National Capital Planning Commission an easement in perpetuity, which shall run with the land, and which shall incorporate the restrictions on development contained in the memorandum of understanding of May 7, 1985, referred to in subsection (b)(2)(A), and which shall incorporate any other land restrictions imposed by Prince Georges County.

COMMITTEE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The SPEAKER. The Clerk will report the committee amendment in the nature of a substitute.

The Clerk read as follows:

Committee amendment in the nature of a substitute: strike all after the enacting clause and insert the following in lieu thereof:

That (a)(1) notwithstanding any other provision of law, the Secretary of the Interior is authorized to convey, without monetary consideration, to the Maryland-National Capital Park and Planning Commission all right, title, and interest of the United States to a parcel of land comprising approximately fifty-five acres located in Prince Georges County, Maryland.

(2) Except as provided in subsection (b), the land conveyed pursuant to paragraph (1) shall be used solely for park and outdoor recreation purposes in accordance with a land use plan for the property prepared by the Maryland-National Capital Park and Planning Commission and submitted to the National Capital Planning Commission for review and comment. The instrument for conveyance for the real property conveyed pursuant to subsection (a) shall set forth all terms and conditions of the conveyance. Such instrument shall further provide that all right, title, and interest conveyed to the Maryland-National Capital Park and Planning Commission pursuant to such instrument, except such access as is authorized by subsection (b)(1), shall revert to the United States if such land is used for any purpose other than as stated in this paragraph.

(3) As soon as practicable after the date of enactment of this Act, the Secretary shall file a map and legal description of the area designated under paragraph (1) with the Committee on Interior and Insular Affairs, United States House of Representatives, and with the Committee on Energy and Natural Resources of the United States Senate. Such map and description shall have the same force and effect as if included in this Act, except that the correction of clerical and typographical errors in such legal description and map may be made. Such map and legal description shall be on file in the office of the regional director, National Park Service and the National Capital Park Region.

(4) The Maryland-National Capital Park and Planning Commission shall reimburse the Secretary of the Interior for the costs of the land conveyance described in paragraph (1).

(b)(1) Subject to the provisions of paragraphs (2) and (3), the Maryland-National Capital Park and Planning Commission may grant access across the real property conveyed pursuant to subsection (a) to the owner of any proposed property development adjacent to such real property.

(2) The grant of access authorized by paragraph (1) shall be contingent upon each of the following:

(A) Submission by the owner of the real property seeking such access of a land use and development plan, incorporating the provisions of the memorandum of May 7, 1985, to the National Capital Planning Commission for review and comment.

(B) Approval of the terms and conditions of the memorandum of May 7, 1985, by the Prince Georges County Council.

(C) Compliance by the owner of real property seeking such access with the terms and conditions of the memorandum of May 7, 1985, as determined by the National Capital Planning Commission.

(D) Conveyance by the owner of real property seeking such access to the National Capital Planning Commission of an easement in perpetuity. The easement shall run with the land and shall incorporate the restrictions on development contained in the memorandum of May 7, 1985. The easement shall also incorporate any other land restrictions imposed by Prince Georges County.

(3)(A) The National Capital Planning Commission and the Maryland-National Capital Park and Planning Commission shall make a copy of the memorandum of May 7, 1985, available for public inspection in the offices of each commission during business hours.

(B) Upon approval of a proposed amendment by both of the parties to the memorandum of May 7, 1985, the proposed amendment shall be published in the Federal Register and concurrently submitted to the congressional committees referred to in subsection (a)(3) for comment. The amendment shall not be effective until 60 calendar days after it has been transmitted to the Congress.

(c) For purposes of this section, the term "memorandum of May 7, 1985" means the memorandum of understanding entered into on May 7, 1985, between the National Capital Planning Commission and the owner of the real property adjacent to the land to be conveyed pursuant to subsection (a)(1).

Mr. VENTO (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER. The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONGRESSMAN CHARLES E. BENNETT CASTS 15,000TH ROLLCALL VOTE IN HOUSE OF REPRESENTATIVES

(Mr. BENNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENNETT. Mr. Speaker, it is wonderful to serve in this great body and to be able to cast votes with my colleagues on important issues. I have just cast my 15,000th rollcall vote here in the House of Representatives. The people who worked this up for me advise me that this is more votes than any other Member of Congress in history.

I have cast every rollcall vote on the passage, defeat, or amendment of legislation since June 5, 1951. That means that for more than 34 years I have not missed a single legislative vote on any rollcall in the House; and that I know is a record on legislative votes.

My record started accidentally, having missed some votes early in my career due to a broken leg. After I recovered, not missing a vote became a habit for me. I believe that voting is the cutting edge of a Member's responsibility to his or her constituents. I am proud to serve in the House and I thank my constituents and my colleagues for this opportunity.

FEDERAL HOUSING POLICY

(Mr. McCANDLESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCANDLESS. Mr. Speaker, today we will have an opportunity to make certain that one of the Federal Government's largest programs—one that reaches into nearly every city and county in the Nation—will receive the full and open consideration it deserves. For, not-so-neatly tucked-away in the budget reconciliation package, is the entire Federal housing authorization bill.

This is not the bill on which the Housing Subcommittee and the full Banking Committee spent 20 legislative days in hearings and markup. This is a bill that has been significantly altered and one on which the alterations were made by just a few Members of this House.

Having actively participated in most of the 150 hours of hearings and markup, I am both frustrated and alarmed by this attempt to circumvent the regular legislative process. Unless we adopt the Latta amendment today, most of us will have absolutely no say on this massive piece of legislation. Therefore, I urge you to join me in

supporting the Latta amendment so that Federal housing policy gets the scrutiny that we give to every other major authorization.

NICARAGUA

(Mr. YATRON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. YATRON. Mr. Speaker, as the chairman of the Subcommittee on Human Rights and International Organizations and as a Member who opposes U.S. assistance to the Contras, I find the recent announcement by Daniel Ortega that the Sandinistas are suspending a wide range of civil and political rights to be further evidence that the revolution in Nicaragua has been betrayed.

The Sandinistas are using the threat of the Contras as a convenient excuse to impose what a recent Washington Post editorial characterized as "Cuban-type police-state rules". There is no room for playing an apologist role for the Sandinistas. Their form of governing violates many international human rights agreements to which they are signatories including the universal declaration of human rights.

Mr. Speaker, whether it is atrocities committed by the Pinochet regime in Chile, or the persecution of Jews in the Soviet Union, we must keep in mind that human rights belong to individuals not governments. The new restrictions imposed by the Nicaraguan Government demonstrate that anyone who speaks out or opposes the Sandinistas, including the leaders of the Catholic Church in Managua, will suffer the consequences.

Mr. Speaker, Daniel Ortega has called on President Reagan to make peace with Nicaragua. I certainly hope that the President will take this opportunity to commit his administration, at the highest levels, to reaching an accommodation with the Sandinistas. But at the same time let us make it clear to Mr. Ortega that the Congress and the American people reject his assertion that everything wrong in Nicaragua is the fault of the United States. Responsibility for the repressive measures implemented in Nicaragua today fall squarely on Daniel Ortega's shoulders.

□ 1030

THE TRUE NATURE OF THE COMMUNIST REGIME IN NICARAGUA

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, the Tuesday night massacre of human rights and civil liberties imposed by Communist leader Daniel Ortega leave no doubt about the true nature of the Communist regime in Nicaragua.

Ortega blames imperialist aggression for the brutally repressive measures his regime has instituted. His actions, however, only reinforce what has been happening in that nation for the last 6 years: The erosion of freedom of expression, the right to assembly, the right to collective bargaining, freedom of religion and the basic principles of human rights.

Ortega blames these actions as reaction for the imperialist aggression of the United States and those opposing his regime internally. However, as the AFL–CIO clearly states in its views on the El Salvador and Nicaragua controversy, "the sequence is not that the 'Contras' led to repression. The Sandinista restrictions on and violations of human and trade union rights began long before the 'Contras' became a significant problem for the FSLN * * *. The actual sequence, based on the historical record, was that FSLN repression produced the 'Contras' (and voluntary exile for countless others)."

DECIDE FOR YOURSELF WHERE THE TRUTH LIES

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, as every Member of this body knows, what you read ain't always so. In an editorial in today's Washington Post there is a prime example of what ain't so.

The Post time and again has made perfectly clear where it stands on gun legislation. I, time and again, have made it clear where I stand on gun legislation. We just do not agree. But the Post has stooped to the level of not telling the truth to sway Members of this body to their side. They are using deliberate lies.

The Post says S. 49 would undercut State handgun laws. That is not true. The Post says this legislation would undercut State gun registration laws. That is not true. The Post says this legislation would undercut States' waiting periods. That is not true. The Post says this legislation would affect States' criminal background checks. That is not true. The Post says this legislation would undercut States' gun licensing laws, and that is also not true.

What the Post is saying in today's editorial is just simply not true; it is that simple. This bill does not change these local or State laws. Look at my legislation, there are nearly 160 cosponsors, and you decide for yourself where the truth lies. When you see the truth, I urge all of the Members to sign Petition No. 4 to discharge this legislation so that we can discuss it on the floor. Then we will surely see where the truth lies.

SOME MORE FANCY FOOTWORK

(Mr. McMILLAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McMILLAN. Mr. Speaker, I thought when we took up the budget reconciliation bill today we might begin to redeem this House from the laughingstock it has become on reducing the deficit. Now we've got some more fancy footwork. The majority is again asking us to follow that Biblical admonition: "Let not the right know what the left doeth." This budget reconciliation bill will give us a number of new programs. These new programs, along with some major changes in existing ones, are included in title II, which is H.R. 1, the entire Federal housing authorization bill.

The bill that the majority leadership had decided was its key legislation, worthy of the H.R. 1 designation, has been slipped in here so very neatly and we will have to vote it up or down. Why not just consider all 227 pages and $16 billion of H.R. 1 as a separate issue. For those of you who want to examine this huge piece of legislation, I urge my colleagues to join me in supporting the amendment of the gentleman from Ohio [Mr. LATTA], which would require consideration of the housing bill in full under regular order.

VOTE "NO" ON THE RULE ON RECONCILIATION

(Mr. SHARP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHARP. Mr. Speaker, if we are as serious as most Members in the House claim we are on reducing the deficit, our first step today will be to vote "no" on the rule on reconciliation. The Rules Committee, by a very narrow vote of 7 to 6, has prevented us from voting on a critical, long-term issue that will make a difference in Federal financing in the future. That issue is how we will divvy up Outer Continental Shelf revenues which belong to the Federal Government.

Going way beyond what was envisioned in the budget resolution, the provision in reconciliation will give away far more dollars in the future than it claims to save in Federal deficit reduction today. We will have bigger deficits in the future to get a claimed paper savings in the present.

If we are serious about deficit reduction, we must stop this and stop it now. It is against what the administration wants; it is against what the Democratic chairman of the Interior

Committee wants; it is against good, sound fiscal policy.

DO AWAY WITH FISCAL INSANITY—ABOLISH SYNFUELS

(Mr. FRANKLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRANKLIN. Mr. Speaker, as we consider the Omnibus Reconciliation Act today, I would like to bring your attention to that part of this legislation which abolishes the Synthetic Fuels Corporation.

With the soaring national debt, we, in Congress, have attempted to effect austerity measures and in July, the House, during consideration of the fiscal year 1986 Interior appropriations bill, voted to close down Synfuels. Our colleagues, Messrs. WOLPE and SYNAR, among others, are to be congratulated for their efforts in this regard.

However, since that time, it is my understanding that the Chairman of Synfuels has announced plans to sign several billion dollars worth of contracts for new production. Upon hearing this, I immediately voiced my strong opposition to the President of the Synfuel Corporation about this inappropriate expenditure.

The House voted to strip the Synfuels Corporation of most of its $7.9 billion budget and the Senate is presently considering similar plans. Clearly, the mood in Congress is to abolish Synfuels.

Mr. Speaker, I personally think it is unconscionable to disburse such an exorbitant sum of money after the House has issued a vote of no-confidence. We have already voted to cut $7.9 billion and they are about to spend $3.8 billion on contracting. Let's do away with this fiscal insanity here and now.

ARMS SALES TO JORDAN

(Mr. AUCOIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AUCOIN. Mr. Speaker, in the name of peace, the White house has asked Congress to approve a $2 billion weapons sale for Jordan.

Secretary Shultz claims that the sale, which includes highly sophisticated aircraft and missiles, will "encourage" King Hussein to negotiate with Israel.

How much encouragement does Hussein need? Just 4 short months ago, Congress approved $250 million in emergency economic aid to Jordan. No negotiations occurred. Weeks later, another $120 million was passed. Still, there were no talks.

Though Hussein has made a series of conciliatory remarks in recent days, he has not yet recognized Israel's right to exist. Nor has the King made a clear commitment to direct, bilateral negotiations with Israel.

Congress must not approve this arms sale. Swapping real weapons for phantom peace proposals is no bargain for the United States—and no help for the Middle East.

□ 1040

A BLUEPRINT FOR CONGRESSIONAL ACCOUNTABILITY

(Mr. DIOGUARDI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DIOGUARDI. Mr. Speaker, Congress now has a unique opportunity to dispel the notion that it does not care for the long-term health of the Nation and is more worried about offending special interests than balancing the budget. The Gramm-Rudman/Mack-Cheney proposal is a blueprint for congressional accountability, and I believe that is what concerns my reluctant colleagues. Congress cannot borrow forever without having to pay the bills. We must only spend as much money as we raise through taxes. That means that tough decisions will have to be made. I am prepared to make those decisions, but I believe that we, in Congress, need the discipline this process will bring about if we are to balance the budget. There is a great deal of talk about the willingness to balance the budget around here; now we have a chance to make good on that promise.

Many Members have raised the dire prospect of having Congress surrender some of its prerogatives if this legislation is passed. What I doubt here is that this proposal offers an avenue to avoid that problem. Instead of surrounding our prerogatives, we can start exercising them. If Congress took the necessary steps to eliminate the horrendous deficit, none of the provisions of this bill would ever be brought into effect. If this is bitter medicine to swallow, perhaps it is time to ask how we got so sick in the first place. The answer is clear—we, in Congress, have failed in our job as stewards of the public trust.

The question we must address is whether this Congress will make the hard decisions that will lead to a balanced budget. If not, let's stop kidding the American public. Let's stop giving lip service to deficit reduction. Our constituents are saying: Stop talking about it and do it.

Mr. Speaker, the American public wants action now. The American Public wants Gramm-Mack.

TV COMMENTATOR'S APOLOGY TO ORTEGA IN BAD TASTE

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, Phil Donahue does not, I repeat, does not offer a public apology on behalf of this Congressman or his constituents for trying to contain communism and promote freedom in Central America.

In one of the worst ever displays of journalism and bad taste, the television commentator played host and sympathizer yesterday to Daniel Ortega, the Marxist dictator of Nicaragua, and his wife. He provided Ortega with a forum on national television, a friendly defense of the policies of his repressive regime, and proceeded to apologize for America's efforts to support the freedom fighters and contain Ortega's aggressive rule over Nicaragua.

Mr. Speaker, my constituents were outraged and immediately on the telephone to me and my office to express their indignation, Mr. Donahue does not represent my views, nor those of the people of Arizona's Fourth Congressional District. We do not apologize to Daniel Ortega nor shrink from supporting American policy in Central America.

MEMBERS URGED TO OPPOSE DISCHARGE PETITION ON GUN DECONTROL BILL

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, there is nothing that invokes more emotionalism in this Chamber than does the subject of guns. Members have been asked to sign a discharge petition on S. 49. I would ask the Members not to do that. That would be a serious error.

The Subcommittee on Crime, which I chair, will begin hearings next Monday on a whole host of bills, including the so-called McClure-Volkmer bill. My colleague, the gentleman from Missouri, suggests to us that the bill does not have the flaws alluded to by the Washington Post. I say, read the bill. Read S. 49.

Last year, we passed a major crime initiative. One of the provisions in that was a provision requiring a mandatory 5-year prison term for those using a handgun in the commission of a violent crime. S. 49, as presently written, would undermine that law and make it more difficult to establish that particular offense. In addition, it does undercut State licensing laws and would make it more difficult to prosecute those who have committed crimes by the use of a handgun.

We are going to develop consensus legislation. It is my hope that we can have a balanced bill, one that would balance the rights of the legitimate handgun owner, the sportsman, and the rest of society, one that will in fact give our police the tools they need to prosecute those who commit violent crime by the use of a handgun.

WE NEED TO PRESERVE JOBS BY PASSING MIXED CREDITS BILL

(Mrs. JOHNSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON. Mr. Speaker, it is high time we began taking specific constructive actions necessary to protect American jobs against unfair competition.

Mr. Speaker, I am pleased to see that an initiative I proposed last year to counter foreign financial subsidies is being seriously considered and will be enacted into law before the end of this session.

After years of unsuccessful negotiations to end mixed credit financing and despite the establishment in 1983 of a program to counter unfair export subsidies, mixed credits continue to be "the most significant remaining loophole" in our negotiated export credit guidelines with the OECD.

We are losing major contracts and major follow-on business, and we are faced with long-term erosion of our market position worldwide.

The President's recent recognition of the mixed credit problem and his willingness to commit resources to correct it provides a welcome new impetus toward relief for our exporters who face this competition.

The threat to U.S. jobs posed by foreign mixed credits is recognized in both the Republican trade package and the Democratic trade package. I hope the Members will join me in cosponsoring H.R. 3296 to insure the success of this reform.

NOBEL PRIZEWINNER HONORED, BUFFALO SHARES SPOTLIGHT

(Mr. NOWAK asked and was given permission to address the House for 1 minute.)

Mr. NOWAK. Mr. Speaker, we in western New York are proud that one of our fellow citizens, Dr. Herbert A. Hauptman, has been selected cowinner of this year's Nobel Prize in Chemistry.

Dr. Hauptman is executive vice president and research director of the Medical Foundation of Buffalo Research Laboratories, in Buffalo, NY. He and Dr. Jerome Karle of the Naval Research Laboratory in Washington, DC, were honored for work they did in the 1950's to develop a mathematical approach to solving the structure of crystals.

Clearly this is a moment of great personal satisfaction and professional pride for Dr. Hauptman. But it also is a moment of great pride for us who reside in the Buffalo area—as Dr. Hauptman has since 1970.

As the Buffalo News noted in its editorial, Dr. Hauptman's selection "has won instant worldwide recognition for himself and for Buffalo * * *. It's an indication of the excellence of Buffalo's academic and research facilities that a researcher of Hauptman's caliber should come here to contribute the work he began in Washington. This recognition he has brought to Buffalo should have the practical result of boosting Buffalo's image as a research center * * *."

We in the Buffalo area indeed are proud of our community's contributions to research, via institutions like the Medical Foundation of Buffalo, the State University of New York at Buffalo, and Roswell Park Memorial Institute.

Dr. Hauptman's Nobel Prize has added luster to our city's reputation. We wish him continued success.

HALLOWEEN AND RECONCILIATION MAY LEAD TO A HAUNTED HOUSE

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, assuming a rule is adopted, we will consider the budget reconciliation bill today and it's probably fitting as we near Halloween, but the Members should be aware that there's a ghoulie lurking in the language of this bill. Title II of the reconciliation bill is the entire 227 page contents of the Federal housing authorization bill, which adds five brand new programs totaling $235 million and increases seven existing programs by $574 million over the bill reported last year by the Banking Committee.

More spooky yet, these reconciliation changes were approved in the dark by a closed caucus of only the majority Members.

There is no reason for this complicated and controversial housing bill to be cloaked in the disguise of reconciliation and to be considered under the mask of cutting the deficit.

While this complex bill certainly represents a treat for some beneficiaries, the trick is to find out how it would affect your own district, something you'll have a hard time doing under this closed rule.

I urge my colleagues to support the Latta amendment which would provide for regular order consideration of the housing bill. Some daylight consideration of this massive bill will, I guarantee you, prevent a House haunted later.

□ 1050

VUCANOVICH SUPPORTS YOUTH EMPLOYMENT OPPORTUNITY ACT

(Mrs. VUCANOVICH asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. VUCANOVICH. Mr. Speaker, today I rise to support H.R. 1811, the Youth Employment Opportunity Wage Act. This legislation provides for a temporary program allowing employers to hire a person under age 20 and pay a subminimum wage of $2.50 an hour for work during the summer months.

H.R. 1811 contains provisions prohibiting the firing, transferring, or demoting of adults and youth already employed, as well as prohibiting the lowering of wages during that period of time for those youth already employed. The penalty is a fine of up to $10,000, imprisonment up to 6 months, and payment of back wages.

Youth employment can cause serious problems later on for some individuals as they reach adulthood. All youth, but particularly disadvantaged youth, are in dire need of the work experience that this bill would provide. For many of them, it has not been a choice of a job paying between $3.35 per hour and $2.50 per hour, but between a lower minimum wage or no job at all.

This proposed legislation has bipartisan support, and has been endorsed by numerous businesses and minority organizations. It is estimated that this bill would create up to 400,000 new jobs. In addition, such jobs provide the opportunity for unskilled, inexperienced young people to earn experience necessary for later employment.

Billions of taxpayer dollars have been spent on Government spending programs for youth, but the unemployment rate continues to increase for young people. This bill contains no cost to the taxpayer.

I strongly support this measure and urge the House to enact this bill.

PERSONAL EXPLANATION

Mr. CONTE. Mr. Speaker, yesterday, during the vote on rollcall 365, I was at a meeting at the White House with the President and members of the Appropriations Committee.

As a prime sponsor of H.R. 2095, and as one who strongly supports extension of daylight saving time, I would have certainly voted "yes" on this measure had I not been off the Hill at this important meeting.

Fortunately, Mr. Speaker, Mr. MOORHEAD was kind enough to let me

make a statement in strong support of this legislation before I left for my meeting, and I am just sorry that I was not able to couple my statement with a strong vote for this important and beneficial legislation.

PROVIDING FOR CONSIDERATION OF H.R. 3500, OMNIBUS BUDGET RECONCILIATION ACT OF 1985

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 296 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 296

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3500) to provide for reconciliation pursuant to section 2 of the First Concurrent Resolution on the Budget for the fiscal year 1986, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill are hereby waived, all points of order for failure to comply with the provisions of clause 5(b) of rule XXI are hereby waived against subtitle C of title III of the bill beginning on page 267, line 19 through page 351, line 15, and all points of order against the bill for failure to comply with the provisions of clause 5(a) of rule XXI are hereby waived except against section 4110 of the bill, beginning on page 379, line 20 through page 380, line 17. After general debate, which shall be confined to the bill and shall continue not to exceed four hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Budget, the bill shall be considered as having been read for amendment under the five-minute rule. The following amendment shall be considered as having been adopted in the House and in the Committee of the Whole: on page 15, strike out lines 8 through 10 and insert in lieu thereof the following: "which become available during fiscal year 1986, the Secretary shall, to the extent approved in appropriations Acts, reserve authority to enter into obligations aggregating—". No other amendment to the bill shall be in order in the House or in the Committee of the Whole except the following amendments, which shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole, and which shall be in order any rule of the House to the contrary notwithstanding:

(1) a motion, if offered by Representative Fazio of California, to strike subtitle B of title VIII of the bill beginning on page 481, line 1 through page 486, line 6, and said amendment shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Fazio and a Member opposed thereto;

(2) an amendment printed in the Congressional Record of October 17, 1985, by, and if offered by, Representative Latta of Ohio, and said amendment shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Latta and a Member opposed thereto; and

(3) an amendment printed in the Congressional Record of October 17, 1985, by, and if offered by, Representative Florio of New Jersey, and said amendment shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Florio and a Member opposed thereto. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from South Carolina [Mr. DERRICK] is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, I yield the customary 30 minutes, for the purpose of debate only, to the gentleman from Ohio [Mr. LATTA], and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 296 is a modified closed rule providing for consideration of H.R. 3500, the Omnibus Budget Reconciliation Act of 1985.

The rule provides 4 hours of general debate on H.R. 3500, to be equally divided between the chairman and ranking minority member of the Committee on the Budget.

House Resolution 296 waives all points of order against consideration of the bill, and waives points of order for failure to comply with clause 5(b) of rule XXI against subtitle C of title III of the bill. Clause 5(b) of rule XXI prohibits the inclusion of tax or tariff measures in bills or resolutions reported from committees not having jurisdiction to report tax and tariff measures.

Title III of this 10-title bill contains the reconciliation recommendations reported from the Committee on Education and Labor. Subtitle C of this title, which deals with amendments to the single-employer termination insurance system, contains provisions which may represent a violation of clause 5(b) of rule XXI. Therefore, this resolution waives points of order for failure to comply with this rule of the House.

This rule also waives points of order against the provisions of the bill for failure to comply with clause 5(a) of rule XXI, except for those provisions in section 4110 of the bill. These provisions, found in title IV of the bill, the Energy and Commerce Committee's title, include a rescission of all but $500 million of previously appropriated funds for the energy security reserve, the Synthetic Fuels Program, as well as an appropriation of $500 million for a scaled-down synfuels program.

Mr. Speaker, as our colleagues are aware, the House overwhelmingly approved a rescission of funds for the Synthetic Fuels Program during consideration of H.R. 3011, the Interior and Related Agencies Appropriation Act for fiscal year 1986. That bill, which passed the House on July 31, is awaiting action by the other Chamber.

In light of the action taken on the Interior appropriations bill, the Committee on Appropriations objected to the inclusion of this language as part of the reconciliation package reported by the Committee on Energy and Commerce. Therefore, this rule does not protect this language from a point of order.

This rule provides that no amendments to H.R. 3500 are in order except the four amendments referenced in the rule. The first amendment made in order amends language on lines 8 through 10 of page 15 in title II, the Banking Finance and Urban Affairs Committee's title.

This amendment, which will be considered as adopted in the House and in the Committee of the Whole upon adoption of this rule, seeks to ensure that funding earmarks contained in this section are subject to future appropriations acts. This amendment is primarily technical and clarifying in nature. The amendment is agreeable to both the Committees on Appropriations and Banking.

Next, this rule makes in order a motion, by, and if offered by, Mr. FAZIO of California. The motion would strike subtitle B of title VIII, the Public Works and Transportation Committee's title of H.R. 3500. This amendment is debatable for 30 minutes, with the time being equally divided and controlled by Mr. FAZIO and a Member opposed thereto.

Mr. Speaker, the Fazio amendment would delete those provisions in title VIII which remove certain trust funds from the unified budget. Numerous Members, including myself, have considerable concern over the impact of removing these trust funds from the budget, and the precedent such action will have for future reconciliation bills. Moreover, it is the view of the proponent of this amendment and others that a reconciliation bill is not the appropriate vehicle to address this substantive budget policy issue.

This rule, therefore, will give the membership of the House an up-or-down vote on this issue. I should also note, Mr. Speaker, that the Committee on Appropriations strongly opposes the removal of these trust funds from the unified budget.

An amendment is also made in order, by, and if offered by, Mr. LATTA of Ohio. This amendment, which was required to have been printed in the CONGRESSIONAL RECORD of October 17, 1985, is debatable for 1 hour, with time being equally divided and controlled by Mr. LATTA and a Member opposed thereto.

The Latta amendment seeks to delete from H.R. 3500 all new authorizations or so-called add-ons in the bill.

This amendment would delete authorizations for housing programs in title II; authorizations for coastal zone management and a Coastal Resources Block Grant Program in title VI; provisions removing the highway and airport trust funds from the unified budget in title VIII; and authorizations for two studies of the veteran population in title X. The Latta amendment would also amend authorizations for Federal pay adjustments contained in title VII of the bill.

Finally, Mr. Speaker, the rule makes in order an amendment by, and if offered by, Mr. FLORIO of New Jersey. This amendment is debatable for 30 minutes, with time being equally divided and controlled by Mr. FLORIO and a Member opposed thereto. The Florio amendment contains a 1-year reauthorization of Amtrak. As our colleagues are aware, this authorization was approved by the House on September 19, 1985, on a vote of 290 to 128. I would also note that the other Chamber has included an Amtrak reauthorization measure in S. 1730, the Consolidated Omnibus Budget Reconciliation Act of 1985.

Mr. Speaker, as chairman of the Budget Committee task force on the budget process and reconciliation, as well as being the sponsor of H.R. 3500, I can tell you that the process of putting together a reconciliation bill is never an easy one.

This bill contains the reconciliation recommendations of 10 committees of the House of Representatives. The additional reconciliation recommendations of several other committees are carried in separate legislation.

During general debate, there will be a full discussion of the savings achieved in H.R. 3500 versus the reconciliation instructions contained in the first concurrent resolution on the budget. I am pleased to note, however, that the savings achieved by the 10 committees whose recommendations are contained in H.R. 3500 are 6 percent above the instructions contained in the first budget resolution.

Mr. Speaker, the Rules Committee has recommended a modified closed rule for consideration of H.R. 3500. The rule permits a very limited number of amendments: an amendment to resolve an unintended drafting problem in the banking title; an amendment on a budget policy issue in the public works title; a comprehensive amendment, offered by the minority, to delete various authorizations in the bill; and an amendment to add a 1-year authorization for Amtrak in order to have a House position on this issue in conference on the reconciliation bill.

I believe this is a good rule. The Committee on Rules heard testimony for some 6 hours from over 40 witnesses. While every request for amendments to H.R. 3500 was not made in order under this resolution, the rule does make in order several major policy questions while keeping the integrity of the reconciliation package intact.

The reality of the reconciliation process is that it is a somewhat painful process. If considered under an open rule, this package simply could not be passed, and the savings we must achieve would not be realized.

Mr. Speaker, I urge adoption of the rule, and subsequently, adoption of H.R. 3500.

□ 1105

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. LATTA. Mr. Speaker, let me say I agree with the statements just made by the gentleman from South Carolina about this rule, and I do not want to rehash the provisions of the rule other than to say something about the reconciliation process that I think ought to be said.

Certainly before we become too involved in the details on this, we ought to step back 1 minute and consider the overall purpose of budget reconciliation. The purpose of budget reconciliation is to make the reductions in spending or changes in revenue directed by the House in its budget resolution. As Members recall, we passed that resolution in this body and in the other body in August.

The budget resolution for fiscal year 1986 directed 14 committees to take steps to reduce the deficit, and yet, Mr. Speaker, H.R. 3500 as we have it today, made in order by this rule, does include a number of provisions which do not reduce the deficit but, in fact, will bring on new spending.

In one title of this budget reconciliation bill, the Committee on Banking, Finance, and Urban Affairs tacked on the provisions of a major—and I repeat major—authorization bill, H.R. 1. This has been hanging around for quite some time. It has been in the Committee on Rules since the forepart of August and no movement has been made on that bill, but we find it now being included in reconciliation.

Let me also say that the Budget Act does not give the Committee on the Budget any authority to change any of the recommendations under reconciliation after they are submitted by the committees, meaning all we do in the Committee on the Budget is bundle up all of these committee recommendations and present them to the Committee on Rules and subsequently, then, to the floor. So the only way we can make changes is on the floor of the House. That is the reason we have made several amendments in order, and I might say some of the amendments that were not made in order I could support, and I am referring to the Udall amendment, for example. I am very sorry that the Committee on Rules did not see fit to make that particular amendment in order.

Mr. Speaker, using the budget reconciliation bill as a vehicle for deficit add-ons or as a vehicle for major authorization legislation is contrary to the purpose of reconciliation. In order to correct this abuse of the process, I have drafted an amendment, which has been made in order to eliminate the deficit add-ons and the provisions of the housing authorization bill itself.

Let me make clear, Mr. Speaker, that I am not opposed to the consideration of these bills per se. I am just opposed to the way they are being brought forth; that is, in the reconciliation bill. If it is given a rule by the Committee on Rules, I think H.R. 1 should be debated and amended on the floor of the House and not be brought forward in this manner.

Let me say, Mr. Speaker, that my amendment would retain all of the actual reconciliation measures which are in this bill, but we would be eliminating the add-ons, which would result in a total savings of $3.5 billion. Let me repeat that. My amendment would amount to savings of $3.5 billion in add-ons over the next 3 years, and this does not include another $1 billion in savings which could be achieved later by eliminating deficit add-ons in a separate reconciliation bill, H.R. 3128, under consideration by the Committee on Rules from the Committee on Ways and Means.

Mr. Speaker, the rule before us today provides a reasonable procedure for the consideration of the Budget Reconciliation Act. First, there will be 4 hours of general debate. Then the rule provides for separate consideration of three specified amendments which are not amendable.

The first amendment listed in this rule is to be offered by the gentleman from California [Mr. FAZIO], and it will strike the provision in the bill which takes the highway and airport trust funds off budget, and this will be debated for 30 minutes.

Let me pause at this point to lay aside some of the arguments that are being used as to whether or not this trust fund should be on or off budget. I have heard people say in this Chamber that if we do not make these highway trust funds off budget, they are going to lose some projects in their districts or in their States. That is ridiculous. Those projects will move through this Congress just the same as they do now, whether they are on budget or off budget. It is a bookkeeping matter, and by taking them off budget, we are going to add $580 million to the deficit in 1 single year.

If, for example, we were to take Social Security off budget, the figure of $60 billion in new deficits would be added to our total debt in one swoop,

and I do not know too many people who want to do that.

The second amendment listed is my amendment which would eliminate the deficit add-ons in H.R. 1. This will be debated for 1 hour.

There is a third amendment listed, to be offered by the gentleman from New Jersey [Mr. FLORIO]. The Florio amendment would add—and I want to emphasize this—would add the authorization for Amtrak to this budget reconciliation bill. This amendment will be debated for 30 minutes.

Mr. Speaker, the rule waives all points of order to protect certain parts of the bill, naturally. During the Committee on Rules hearings on this rule, 37 Members of Congress testified, seeking to have various amendments made in order. Many of these dealt with problems or conflicts between committees, which can be more easily resolved in conference than on the House floor.

Let me also say, Mr. Speaker, and to emphasize that if I had had my way in the Committee on Rules, which I did not have on all of these questions, certainly I would have made some of these amendments that Members sought to have made in order, made in order. But the votes were not there and they were not made in order. But I think we have the best rule we could possibly get out of the Committee on Rules on a very complicated matter.

Mr. Speaker, I support the passage of this rule so that the House may proceed to deal with the budget reconciliation bill, and I cannot emphasize too much how important this reconciliation bill is to deficit reduction. Deficit reduction in this Congress is most dependent upon the passage of a budget reconciliation bill like we have before us today.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Louisiana [Mr. BREAUX].

Mr. BREAUX. I thank the gentleman for yielding this time to me.

Mr. Speaker, I thank the chairman for allowing me to address one particular issue. I support the rule. I think it is a good rule.

The issue I would like to speak to very briefly is the issue of the so-called 8(g) settlement. I think it is a fair settlement. It gives to the States 27 percent of the bonuses, the rents, and the royalties that come from Federal lands. Interior States get 50 percent of the same bonuses and rents and royalties from Federal lands within their area.

Three committees in Congress have looked at this problem. All three of them have come back and reported legislation which handles the problem basically in the same way. I think the committee process has worked. It should be protected. I think it is a fair settlement to the Federal Treasury and that it gives to the Federal Government somewhere between $4.3 billion and $4.48 billion to help reduce the deficit to the Federal Government, with the States getting 27 percent. The States originally fought for 50 percent, so a 27-percent settlement, I think, is fair, it is certainly equitable. It is substantially less than what interior States already get from Federal lands and I cannot believe that anyone would think that coastal States should somehow be treated less fairly than the interior States of the United States.

I think this is a good settlement and we should not open it up. The rule is a good rule and I strongly support it.

□ 1115

Mr. LATTA. Mr. Speaker, I yield 3 minutes to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. Mr. Speaker, I rise in support of this rule. It was a very finely crafted rule. It is not perfect, but it was a difficult issue because you have a lot of conflict between a lot of committees around here.

It is getting to where the Rules Committee is getting to be a constant battleground between this committee, that committee, jurisdiction, turf, and sooner or later, we have to vote. We have to try to find a way to get a rule to the floor that is fundamentally, basically fair, even though some committee or the other feels like they have been abused. That is not the intent. We wanted to try to get a rule here that would bring this issue to the floor for consideration, for a vote, that would give everybody a crack on the issue.

Now speaking to our side of the aisle, the Latta amendment was made in order. There may be a point or two that you do not like in the Latta amendment. But remember this: If you do not get an opportunity to pass the Latta amendment, this is not going to be a reconciliation bill. This is going to be a shell game again.

Are we going for a reconciliation bill that allows for raising of spending and for putting housing authorization legislation in it? I mean, let us put everything in the reconciliation bill. Are we serious or not?

We are over there in conference meetings right now on the debt ceiling and Gramm-Rudman-Mack budget balancing procedure. We are talking about trying to come up with a new budget process. Do you want to know why we are doing that? Exhibit A. This bill as I said last week, if we cannot make reconciliation work, if we do not stop using it as a train to pull everybody through town that week, it is going to collapse.

So on the Latta amendment, it is an opportunity to try to make this a reconciliation bill instead of an omnibus catch-all bill.

Let me tell my colleagues on my side of the aisle that if we do not pass this rule, and if the Republicans do not vote for this rule, we do not have any guarantees when we go back to the Rules Committee about what we are going to get. We may not get Latta. We may not get anything.

And those of you on the other side of the aisle who think, well, I will vote against this rule and I will get something that suits me better, that involves maybe the offshore oil question one way or another, or involves ways and means and the tax issues, well you do not have any guarantees. We may not even have another rule. We may not even have reconciliation.

Let me tell my colleagues there are a lot of people on the floor of this House that would like to have no reconciliation. They do not like it, because reconciliation tries to make us comply with the budget resolution we have already passed.

So we will fight over the Fazio amendment and we will debate the Latta amendment. But for God's sake, let us pass a rule.

Are we going to be sitting here with nothing? What would we do? You know, we have already got it stretched out over 2 days. All we are going to do today is have one measly vote on the rule, and then the general debate, and then we are going to pass for the day and go over to tomorrow. We will fight another day, and that "another day" will be tomorrow.

We could not even dredge up some kind of cat or dog that we could consider tomorrow, so we have stretched this bill out over 2 days.

So if we do not have a rule, well, maybe you would want to do that. We can all go home tonight and explain why we cannot pass a measly rule on a reconciliation bill.

I had prepared remarks and I did not refer to them very much. But I urge my colleagues to vote for this rule because what you get as an alternative may be nothing.

Mr. Speaker, I think it's fair to say that there's no one in this House who is completely enamored with this rule or the bill it makes in order. But that's the nature of the reconciliation process today. It's filled with pains and games. There are pains for everyone who is forced to make cutbacks in favorite programs in his or her committee and district, and there are always pains involved for those who bear the brunt of these cuts.

But there are games involved in reconciliation too—games that have been going on since reconciliation was first used back in 1980. Some committees see this as a convenient vehicle for attaching their favorite reauthorization bills and even some new goodies. The bill is not subject to the same scrutiny and amendment as bills brought up individually. These tend to be relatively closed rules, and relatively veto-proof bills.

So the temptation is there to catch a free-ride.

Now I realize that there are other pains involved in this year's reconciliation process that have strained the process and relations between various committees. We have several provisions in this legislation that step on the toes of other committees. This is not the fault of reconciliation; it's the way our jumbled and overlapping committee jurisdictions are set up under House rule 10. You don't hear that much squawking when committees are able to share in the glory of a joint legislative venture. But when you are in a no-glory, deficit reduction effort, turf becomes a much more sensitive situation. And I sympathize with those committees who feel their turf has been evaded.

And finally there are the games played with numbers and how much is really being saved. In a conversation with the new OMB Director yesterday, I was informed that this legislation is actually $17 billion short of its 3-year savings target, even though the Budget Committee says it's on target.

Now that's a pretty significant difference in scorekeeping, and one might be tempted to say that OMB is playing some kind of game. But, consider the fact that a big part of that $17 billion difference is credit to the Government Operations Committee for saving $8.4 billion by terminating revenue sharing. The fact is, though, that revenue sharing is terminating any way. There is no reconciliation legislation producing those savings. Other so-called savings by other committees are subject to similar games and manipulation.

But despite all the pains and games, we must get on with this process because it is so critical to our short-term and long-term deficit reduction effort. This rule does make in order the amendment by the gentleman from Ohio [Mr. LATTA] to eliminate most of the extraneous add-ons, totaling some $3.5 billion over the next 3 years. I hope it passes. That will eliminate one of the major problems with this bill, especially the inclusion of H.R. 1, the omnibus housing bill. That has no place in this!

Mr. Speaker, I am privileged to be a conferee on the debt limit bill and the provisions of the Gramm-Rudman balanced budget and emergency deficit reduction amendment. Our sessions have been interesting to date, if not terribly productive. But I was amazed and almost encouraged by what I was hearing from my House majority colleagues yesterday. "Let's get tougher than Gramm-Rudman and reduce the deficit in greater amounts sooner," they were saying. I said I was almost encouraged, because I've heard this kind of talk before, and when push comes to shove in the nitty-gritty world of spending decisions, we cop out. That's why we are now considering the type of action-forcing mechanism presented by Gramm-Rudman-Hollings: an across-the-board cut in COLA's and controllables that would be so onerous and fraught with problems that we just might do our job right before it gets to that.

But to my brave, tough talking friends, let me invite you to put your savings where your mouth is. Vote for the Latta amendment. Then let's squarely face what more needs to be done.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes and 15 seconds to the gentleman from Arizona [Mr. UDALL], chairman of the Committee on Interior and Insular Affairs.

Mr. UDALL. Mr. Speaker, I rise in strong opposition to the rule on the budget reconciliation bill. I urge my colleagues to join me in defeating this rule and sending it back to committee so we can get a fair and equitable rule to operate under.

I am opposed to this rule for many reasons, but what is especially troubling to me are provisions in both the Merchant Marine and Interior titles that just hand over to seven coastal States more than $6 billion in Federal offshore oil and gas revenues. At a time when this Congress voted to phase out is justifiably obsessed with the deadly threat of massive budget deficits it is embarrassing and inexplicable to this Member how the House would not only approve this outrageous giveaway but even worse would not even give us the chance to vote on it. And that is what the Rules Committee did on a 7-to-6 vote.

I do not have the time to give the House a full explanation of this situation, because the rule does not permit it. But in simple terms here is what has happened: In 1953, the Congress overturned a Supreme Court ruling that all offshore waters belong to the United States and we gave the first 3 miles of coastal waters to the respective States. Since then, the Gulf and Pacific States have enjoyed 100 percent of the very enormous oil and gas benefits that generous decision conferred on them.

In 1978, Congress overhauled the oil and gas leasing system in Federal waters beyond the 3-mile boundary. A relatively minor provision called section 8(g) set up a process whereby States would be made whole whenever a Federal lessee in the first 3 miles of Federal waters—in other words, 3 to 6 miles from shore—drained State oil and gas from reservoir lying under both State and Federal waters. When and only when the Secretary of the Interior and a Governor determined such a reservoir was being drained, they were to enter into negotiations for a fair and equitable distribution of the bonuses, rents, and royalties.

But the States of Louisiana, Texas, California, Alaska, Mississippi, Alabama, and Florida have managed in this bill this limited provision into a general revenue sharing mechanism of staggering proportions. They appropriate unto themselves $1.5 billion in old bonuses and rents immediately and $54 million in old royalties immediately. In the future, they generously grant themselves 27 percent of all future Federal bonuses and rents from leases in the 8(g) zone whether or not those leases result in the production of any oil, much less State oil. Even worse, they also grab 27 percent of all future Federal royalties on oil that is produced, even if it is purely Federal oil. This royalty provision alone will cost the Treasury $4 to $6 billion. They also have appropriated unto themselves an additional $477 million to be financed in future years by diverting an additional 10 percent of 8(g) revenues into a new fund to directly pay these States.

None of this money will ever be appropriated by the Congress because it goes directly to these seven States. But it is spending all the same—massive spending that buys absolutely nothing for the Federal Government and its beleagured taxpayers and the Rules Committee won't let you vote on it. Next year and the year after that and the year after that you will have to cut a worthwhile program or raise somebody's taxes or borrow some more money and ask our children to pay the interest on it, in order to pay for this. Go home to explain this to your constituents.

Mr. Speaker, we hear a lot of talk around here right now about how the Congress can't discipline itself on spending and so we need some grandiose budget balancing proposal to force discipline on ourselves. What we have here is a glaring and perfect example of that. Now I can understand the temptations of the Members from those seven lucky States to get all this money for the folks back home. But I don't understand why the Members from the other 43 States have to go along with it. I don't understand how we will explain to our constituents that we are going to start getting really serious about balancing the budget next year, but this year we gave away more than $6 billion to seven coastal States. I don't understand why the House cannot take an hour of its time to talk about this very significant policy and budget issue.

Please, vote down this rule and help me to put a stop to this embarrassing episode.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Tennessee [Mr. DUNCAN].

Mr. DUNCAN. Mr. Speaker, I thank the gentleman for yielding me this time.

I rise in opposition to this rule because it has become, I think, ironically a vehicle for avoiding jurisdictional rules of the House involving not only the committee upon which I serve, the Ways and Means Committee, but other committees of the House.

This is the first time that I have ever been opposed to a rule from the Rules Committee, but I think this is the most irresponsible request for a

rule that has been my experience to see since I have been in the House of Representatives for 21 years.

For example, parts of H.R. 3500 clearly are within the jurisdiction of the Ways and Means Committee. Yet when our committee asked the Committee on Rules to make it in order under the rule, either as an amendment to strike the language in question, or substitute preferred language, we were turned down. That, of course, is the prerogative of the Rules Committee. But I submit to you, Mr. Speaker, that it was not a decision in keeping with the spirit of the rules of this House. It particularly runs counter to the rights of other legislative committees as well as our own to have some control over their own jurisdictional areas.

I want to emphasize that my objections in this matter are more procedural than substantive. In cases where committees have inserted revenue items or other items not within their jurisdiction, arguments on merits should be conducted on another plane.

Each of these items, Mr. Speaker, are very important. But if this rule were to pass, I think many committees in this House could say good-bye to their jurisdiction in the very near future.

So I say this is one of the most dangerous things that we have ever voted on, and I urge my colleagues to vote no.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Louisiana [Mr. HUCKABY].

Mr. HUCKABY. I thank the gentleman for yielding me this time.

I rise also in strong support of this rule and would like to address briefly the offshore oil and gas settlement.

In 1978, Congress said that the Federal Government should share with the States in a fair and equitable manner all revenues derived from the so-called 8(g) zone. The States thought fair and equitable was 50 percent, because this is what the Federal Government shares on its onshore property with the States as well as all its mineral leases.

This money, billions of dollars, has been held in escrow since 1978. This year, as part of this budget reconciliation, Congress agreed with the States, and the States agreed to accept 27 percent.

The gentleman from Arizona [Mr. UDALL] said that the States will receive some $6 billion over future years. In order to reach this number, one has to project out 30 years, and one has to assume that production is 20 times greater than what it is today in this offshore zone. I think that is totally unrealistic. No one can reach to those numbers.

This is a fair and equitable settlement and I would urge adoption of the rule.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, I rise in vigorous objection to the rule and urge that all Members vote no on this rule.

The gentleman from Arizona [Mr. UDALL] has told us that unless you vote "no," you are going to see $4 billion or $5 billion go out of the Federal Treasury into direct payouts to a select handful of States.

You have also found that the Appropriations Committee is going to lose jurisdiction over spending out of the trust fund, so that there will be a direct dip out of certain of our Federal trust funds under the jurisdiction of only one committee.

My problem with this rule is it sets a precedent which allows every committee of the House to sweep out its broom closet of pet projects which it cannot pass in the normal run of legislative affairs. And it will then attach them to the reconciliation bill which those committees know must ultimately pass.

The Rules Committee is meant to be the guardian of these jurisdictional disputes. It has failed its responsibility in that regard.

The Ways and Means Committee has a series of objections. The most important one is that the Rules Committee has invaded our jurisdiction and given a pension matter exclusively to the Education and Labor Committee.

This matter of law that the Ways and Means Committee has shared since 1974 is ERISA. At that time, we passed a complicated law knowing we would lose thousands and thousands of pension systems, but at least we knew what was going to happen. Now we have a complicated new law presented by the Education and Labor Committee attached to the reconciliation bill, not germane, in my judgment, to reconciliation at all, which will probably cost many more pension programs. They will go out of business or they will never start in the first place.

Education and Labor is justly interested in protecting the PBGC, and so it has given us some amendments which help large, well-funded pension funds and the employees of those funds. It, however, causes a heavy reliance on other private pension sources because we are certain to lose new companies and shaky employers from the pension system, and thereby place heavier pressure on Social Security.

I urge a vote against the rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the distinguished gentleman from New Jersey [Mr. HOWARD], chairman of the Committee on Public Works and Transportation.

Mr. HOWARD. Mr. Speaker, I rise in opposition to the rule on H.R. 3500.

In part, that rule makes in order two amendments to strike language in the Public Works and Transportation Committee's title of the bill removing self-financed, deficit proof transportation trust funds from the unified budget. I believe inclusion of this language as part of the reconciliation bill is appropriate for a number of reasons.

First, taking the self-financed transportation trust funds off-budget is consistent with the primary purpose of the first concurrent resolution on the budget for fiscal year 1986.

This year's resolution has at its centerpiece a plan for deficit reduction and control of Federal spending. In projecting deficits for fiscal years 1986–88 at approximately $172, $155 and $113 billion, the budget assumes corresponding 3-year savings or deficit reductions of $75 billion. The purpose of the reconciliation bill is to implement those savings which will achieve deficit reductions.

According to the Congressional Budget Office, taking the self-financed transportation trust funds off-budget would decrease the deficit by $80 million in fiscal year 1989 and by $230 million in 1990. Arguably, these could be even higher since CBO's estimate is based upon budget resolution assumptions and not what the actual spending might be for those years.

More importantly, taking these trust funds off-budget would provide for a clearer, more accurate picture of Federal spending in future years. Decisionmaking in the budget process, as we know it today, would no longer be distorted as self-financed transportation trust funds would not be pitted against other Federal programs which must compete for scarce general revenues.

Second, there is precedent for taking programs off-budget in the reconciliation bill.

In the Omnibus Budget Reconciliation Act of 1981, both House and Senate Energy Committees recommended, the Congress approved and the President signed into law language taking the strategic petroleum reserve off-budget.

Third, taking the self-financed transportation trust funds off-budget in reconciliation is germane to both the instructions given the Public Works and Transportation Committee and the recommendations submitted by it.

The reconciliation instruction to our committee assumed enactment of the 3-year highway obligation ceilings at the levels contained in the budget resolution.

As part of its package, the committee recommended those assumptions.

In addition, it proposed an $800 million cut in the basic Federal-aid highway program for fiscal year 1986, reflecting a concern for the current status of the highway trust fund. A logical extension of both actions is the inclusion of this off-budget language which goes to the very issue of future year highway spending.

In addition, inclusion of this language does not authorize or provide new budget or spending authority.

Most importantly, it does not authorize a new program as others have done in this reconciliation bill.

Last, taking the self-financed transportation trust funds off-budget is consistent with the procedural exemptions of the Budget Act.

Mr. Speaker, next year will mark the 30th anniversary of the creation of the first self-financed transportation trust fund. Beginning July 1, 1956, receipts from various road taxes were placed in the highway trust fund rather than the general fund of the Treasury to support highway construction. With the addition of the airport and airway trust fund in 1970 and the mass transit trust fund in 1982, we have witnessed over the past three decades the evolution of a national transportation program which has contributed greatly not only to the quality of life of all our citizens and the choices open to them, but to the industrial development, investment and productivity of this great Nation.

As a financing concept, the self-financed transportation trust funds are second to none. They have a demonstrated track record of fiscal soundness, efficient management and prudent investment.

Unfortunately, the rule which is before us today does not take into account these factors. Rather, it unjustly singles out an issue which rightly deserves the protection of the reconciliation process.

I recognize that for various reasons—none of which go to the merits of the trust fund proposal—certain Members of the House cannot support my opposition to the rule.

However, should this rule not be defeated, I do welcome your support in opposing the Fazio-Latta amendments. I do so, not as chairman of the Public Works and Transportation Committee, but as one concerned about an issue of utmost importance to all Americans.

Mr. Speaker, I urge a "no" vote on the rule.

□ 1130

Mr. LATTA. Mr. Speaker, I yield myself 30 seconds.

Let me say I listened intently to the statement just made by my good friend from New Jersey [Mr. HOWARD]. Let me emphasize that he stated in so many words that we are not going to have more or less money based on whether or not the highway trust funds remain on budget.

As I stated earlier, it is a bookkeeping question concerning whether or not they are going to be on budget or off budget, and whether or not we are going to pick up $580 million in fiscal year 1987 of additional deficits. That is what the question is; there is no question concerning whether or not we are going to get more highways in our districts or in our States, or more bridges. It is just a bookkeeping question whether they are going to have $580 million.

Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. WYLIE].

Mr. WYLIE. I thank the gentleman for yielding.

Mr. Speaker, I support the rule, which would allow the House to vote on an amendment to be offered by the gentleman from Ohio [Mr. LATTA] which would strike all budget add-ons to existing programs along with all new program language.

As a member of the Banking Committee, I would like to point out that this reconciliation bill, which we will be asked to consider, contains the entire authorization bill of the Department of Housing and Urban Development, all 227 pages of a bill which was finalized essentially by the majority members of the House Banking Committee.

It is substantially different from the bill we approved in the full Committee on Banking and the funding levels on many programs were changed in the closed caucus.

This is a bill, I might add, which took 3 days for staff to explain before the actual 8 days of markup. I believe the House deserves to have full debate on this complex housing bill and adoption of the Latta amendment would ensure that we would take this legislation up under regular order, not under what is essentially a closed rule as it applies to the housing programs authorizing over $20 billion—as I said, in 227 pages.

I think this is not a fair procedure, Mr. Speaker. We should support the rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the distinguished chairman of the Committee on Ways and Means, the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. Mr. Speaker, I rise in opposition to House Resolution 296.

It is clear that H.R. 3500 to which this rule will apply has been used for many purpose other than budget reconciliation.

H.R. 3500 contains several provisions that have been placed there by other committees with the purpose of avoiding the jurisdiction of the Committee on Ways and Means.

On October 16, 1985, I appeared before the Committee on Rules to protest the use of the reconciliation process as a vehicle by which one committee could circumvent the jurisdiction of another. At that time, I requested that the Committee on Rules strike from H.R. 3500 those provisions that would have been jointly or sequentially referred to the Committee on Ways and Means, had the normal legislative referral process been followed. In addition, I requested that the Committee on Rules make in order an amendment that was approved by the Committee on Ways and Means to the single employer pension plan provisions contained in title III of H.R. 3500.

However, the Committee on Rules denied both requests. As a result, House Resolution 296 does not strike any provisions that violate the jurisdictional rights and responsibilities of any committee. In addition, House Resolution 296 does not allow the Committee on Ways and Means to offer its substitute to the single employer pension plan termination provisions of title III. In fact, under the proposed rule, the Committee on Ways and Means may not even raise a point of order against these plan termination provisions.

While I object to this proposed rule on all these points, I particularly object with regard to the plan termination provisions of title III.

In the first place, jurisdictional interest of the Committee on Ways and Means in this matter is clear, and has been affirmed by the House Parliamentarian. Title III increases employers' liability to their defined benefit pension plans, and to the Pension Benefit Guaranty Corporation [PBGC].

Amounts to satisfy this liability are deductible from taxable income. Therefore, any increase in this liability increases allowable deductions from taxable income, and is thus a revenue measure within the jurisdiction of the Committee on Ways and Means.

It is clear that my transmitting these provisions to the Budget Committee, rather than reporting them to the House of Representatives, the Committee on Education and Labor chose to avoid the normal sequential referral process for these tax and pension issues.

I served with many of you on the committee that developed the budget process. It was never our intent nor the Congress to allow budget reconciliation to become the means of avoiding the normal legislative procedures of the House, and I object to this rule which would allow this very alarming trend to go unchecked.

In addition, I would like to say that I am very concerned about the results of title III, not only on the reconciliation process, but on substantive pension policy as well. First, these amend-

ments greatly expand the liability of employers who have set up defined benefit pension plans, well beyond what we originally envisioned when we wrote ERISA.

Second, title III would vastly expand the liability of employers for terminated plans, even after they have sold the subsidiaries with the pension plans in question. An irresponsible measure of this kind could poison legitimate corporate mergers and acquisitions, and goes far beyond the needs of the abusive situations it is meant to address.

And finally, I am concerned that title III contains a host of smaller provisions, which together add up to tremendously increase the risk and expense of establishing a defined benefit plan. Like the two measures I have already discussed, these go far beyond the immediate need of ensuring the solvency of the PBGC. And like those other two measures, these provisions will have incalculable—but certainly vast—effects on all sorts of legitimate transactions undertaken in the ordinary course of business.

We must remember that defined benefit pension plans are strictly voluntary; employers are not required to establish defined benefit plans and if they have already established such plans, they don't have to keep them.

It is my concern that, rather than face the increased risk and expense imposed by these provisions, employers will terminate defined benefit plans while they are still able to do it. In the long run, I am concerned that the retirement income of employees will be less secure as a result of these provisions, rather than more secure.

We must not allow the Congress to be rushed into endorsing sweeping changes of this kind merely because the Committee on Education and Labor, with the collaberation of the Committee on Rules, has been able to railroad these provisions through the legislative process, and thus avoid the procedures that normally would ensure these provisions received greater scrutiny.

To sum up my reasons for opposing this measure, House Resolution 296 allows the reconciliation process to become a vehicle for abusing with impunity the normal legislative procedures of the House. In addition, House Resolution 296, would allow major pension plan provisions to become enacted into law even though they have not been subject to needed scrutiny by the Committee of jurisdiction. For this reason, I ask my colleagues to join with me in opposing House Resolution 296, and ensuring that H.R. 3500 receive a rule that ensures the procedural and substantive integrity of the House jurisdictional rules and allows sufficient study of major and potentially damaging pension law changes.

Mr. Speaker, I urge my colleagues to vote against House Resolution 296.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from Florida.

Mr. GIBBONS. Mr. Speaker, since we are only going to go through the rule today, there is no reason in the world why we cannot defeat this rule, send it back to the Rules Committee with the instructions and understanding that they get all the garbage out of this rule. This is a garbage grab bag.

We heard the distinguished chairman from the Committee on Interior describe it like some States are making off like highway bandits with oil lease money. My State is one of them, but we should not just vote on the basis of greed.

There is no reason we cannot take these things up under some other kind of rule other than the one we have got here. The rule should be defeated; the Rules Committee should go back and take the garbage out and then give us a chance to vote.

Mr. LATTA. Mr. Speaker, I yield 2½ minutes to the gentleman from Arizona [Mr. MCCAIN].

Mr. MCCAIN. Mr. Speaker, I thank the gentleman from Ohio [Mr. LATTA] for this time, and I appreciate very much the remarks of the gentleman from Florida [Mr. GIBBONS], who is right on target here.

I yield to my colleague from Indiana [Mr. SHARP].

Mr. SHARP. I thank the gentleman, and I join my colleague, who has worked on this 8(g) or Outer Continental Shelf deal, and would just hope that our colleagues would recognize that it is both complicated and expensive, and deserves more time than it can possibly get if we follow the procedures of the House here.

One little item: In case we think that everybody thinks this is a good deal from the States that are going to be affected, we have a cartoon from a Baton Rouge newspaper which describes this as the 8(g) sweepstakes, and suggests that this is like the clearinghouse for magazines, and you might win it all and be able to use this money in incredible ways.

So I hope my colleagues will take very seriously what my colleague from Arizona is about to say about giving us a chance to seriously consider something that is of major consequences on the Federal deficit and major consequences in terms of national policy.

Mr. MCCAIN. Mr. Speaker, today we will consider the Omnibus Budget Reconciliation Act of 1985. This is one of the tools Congress is supposed to be using to solve our deficit crisis. Sadly, we are not using it in that fashion. Instead, for the sake of a $4 billion credit today, we are giving away $6 billion tomorrow. Because of this shortsighted action, the House must defeat this rule and send it back to the Rules Committee so that Congress may have the opportunity to correct this farce.

I am speaking about action by the Interior Committee which goes against the intent of the reconciliation process. The Interior Committee's action boils down to one question, How much Federal Outer Continental Shelf [OCS] leasing revenue will be distributed to a few coastal States and how much will be retained by the Federal Treasury to meet the needs of all Americans?

The provision currently in the Budget Reconciliation measure could eventually cost the American taxpayer over $6 billion. In the short term, this measure will provide the Federal Treasury with $4.4 billion, but only through some creative bookkeeping since the money is already being used by the Federal Treasury. However, in the long term, this measure would wind up costing the Government one and one-half times the supposed savings. This hardly seems like an accomplishment envisioned by the reconciliation process. This is a rip-off!

Congressman UDALL, Congressman SHARP, and I, had hoped to offer an amendment which would remove the offending provisions from the reconciliation package. The proponents of the provision would still have a chance to achieve their desired outcome through the normal legislative process, not by warping the budget process in this fashion. Unfortunately, the Rules Committee did not allow this, despite an initial 20-to-20 tie in the Interior Committee on the provision. I believe the House has not only the right, even the duty, to consider and vote on this abuse of the taxpayer.

Mr. Speaker, I am convinced that the agruments used to support the Interior Committee's outcome will not stand up on the floor of the House. I believe it is vital that the House defeat this rule. We must prevent this outrageous distortion of the budget process and unjustified loss to the Federal Treasury. I urge all of my colleagues to vote against the rule so that I may have the opportunity, together with my colleagues Mr. UDALL and Mr. SHARP, to offer an amendment correcting this disaster.

Let me quote to you, if I may, from the New York Times' editorial which says:

> A handful of States with offshore oil wells greedily propose an accounting trick that will give away as much as $6 billion.

Mr. HUCKABY. Would the gentleman yield on that point?

Could the gentleman explain to us where the $6 billion comes from?

Mr. MCCAIN. Indeed. From the Outer Continental Shelf revenues, as the gentleman knows full well, and many of those revenues are outside the 6-mile limit.

Mr. Speaker, I would like to respond to the gentleman from Louisiana [Mr. HUCKABY], I hope that we will defeat this rule, allow an amendment so that we can have ample time to debate this very serious issue.

That is the intent of Congressman UDALL, Congressman SHARP and my reason for being here, so that we will have ample time rather than an additional 30 seconds.

We are convinced that the arguments used to support the Committee on Interior's action will not stand up on the floor of the House if we are able to debate it.

I urge all my colleagues to vote against the rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Missouri [Mr. CLAY].

Mr. CLAY. Mr. Speaker, I rise in support of House Resolution 296, the rule on H.R. 3500. This legislation contains provisions designed to shore up the financial status of the Pension Benefit Guaranty Corporation [PBGC], the Federal agency which was established in 1974 under title IV of ERISA to ensure workers' pensions.

Since May 1982, the administration has been asking Congress to take action to restore the PBGC plan termination insurance program to solvency. First, the premium paid by plans to finance the insurance program needs to be raised. Second, the single-employer pension plan termination insurance program itself needs to be reformed to close certain loopholes in the law. It is the committee's conviction that the premium and the reforms are inextricably linked and that each is needed to put the PBGC on a sound financial footing.

This year the Committee on Education and Labor was directed in the budget resolution to raise substantial revenues by enacting an increase in the premium paid to PBGC. When the committee marked up our portion of the reconciliation bill, we unanimously reported both the premium increase and the programmatic reforms necessary to meet our reconciliation targets. Those same provisions had been unanimously reported by our committee only 10 days before as separate legislation. We believe that both the reforms and the premium increase are germane to the bill before us and need to be adopted in the context of this budget reconciliation bill.

I support the rule on H.R. 3500 because it leaves these provisions intact and does not subject them to amendment. The Rules Committee was asked to make in order an amendment by the Committee on Ways and Means to strike the Education and Labor Provisions and substitute a Ways and Means amendment which had been adopted only the day before in their committee. The Committee on Ways and Means argued that the Committee on Education and Labor had no right to proceed on the reforms because the Ways and Means Committee had not considered them. We opposed their request on two grounds: Jurisdiction and substance.

Our colleagues on the Ways and Means continue to assert that they have joint jurisdiction over the programmatic aspects of the title IV plan termination insurance provisions. This is simply untrue. It is clear that ERISA itself envisions joint jurisdiction over a premium increase accomplished through a concurrent resolution, since the statute mandates joint referral of such a resolution. On the question of the jurisdiction over the reforms, however, we believe the legislative history is clear. The plan termination insurance provisions were developed sole by the Committee on Education and Labor and were orginally part of title I of H.R. 2, which became ERISA. Members of the Committee on Education and Labor were sole conferees with respect to those provisions.

In the past, the Ways and Means Committee has tried to argue that the procedure under which the House considered the multiemployer Pension Plan Amendments Act of 1980, the last major amendment to the title IV program, shows that joint jurisdiction exists over title IV. That argument overlooks one significant fact: The specific advance agreement of the two committees that we would work together on the multiemployer legislation, notwithstanding whatever the jurisdictional situation might be. That agreement was confirmed in a colloquy on this floor between Congressman FRANK THOMPSON, on behalf of Education and Labor, and Congressman DAN ROSTENKOWSKI, on behalf of Ways and Means, and clearly confined to the legislation at hand in 1980. Therefore, Ways and Means cannot use the procedural arrangement agreed to in 1980 as a means to bootstrap jurisdiction when none previously existed.

This bill is an entirely different matter. No such prior agreement for joint consideration exists. As a matter of fact, as early as May 1982, the former chairman of the Subcommittee on Labor-Management Relations, the late Phillip Burton, met with Chairman ROSTENKOWSKI on the need for structural reforms. The purpose of the meeting was twofold: To tell him that the Education and Labor intended to take up the reform issue and the premium increase request and to determine whether an jurisdictional arrangement similar to that of 1980 would be feasible. At least two additional meetings that I can recall have taken place since I became chairman of the subcommittee in 1983. In each of these meetings, we have been quite forthcoming about the legislative intention of our committee with respect to the single-employer program and have requested that the Ways and Means expeditiously consider the issues within its jurisdiction. Over the years, the Committee on Education and Labor continued to move ahead. Although we have no desire to antagonize our colleagues and we have to be willing to be accommodating in the past, we are convinced that we have the jurisdiction to move forward in the manner we have done.

Each committee has made its case to the Parliamentarian who will ultimately decide the jurisdictional issue. We have consulted at length with him about the nature of the jurisdiction over the specific provisions in subtitle C of title III of this bill. Although our committee remains convinced that the nonpremium portions of title IV are solely within the jurisdiction of the Committee on Education and Labor, one this is clear. To the extent that the Committee on Ways and Means has any jurisdiction at all over these issues, that jurisdiction is narrow and limited in scope and in no way rises to the level of joint jurisdiction.

In addition, the substance of their amendment was flawed. Instead of shoring up the financial condition of the PBGC by closing the loopholes that all agree exist, the Ways and Means amendment failed to deal with most of the major loopholes and, in addition, would have put the PBGC in a worse position than it is under current law. Currently when an underfunded single-employer plan terminates, the PBGC is entitled to claim up to 30 percent of an employer's net worth immediately to offset the liability it will pick up to guarantee benefits under the plan. PBGC may agree to alternative terms and conditions to collect this amount but it has the statutory right to claim the 30 percent in a lump sum when the plan terminates. The Ways and Means amendment would have created an absolute right in the employer to payment terms under which the liability would be amortized over 5 or 15 years. Thus in those cases, the PBGC could be in a worse position than it is now to collect a portion of the liability immediately.

Therefore, I support the action of the Rules Committee in refusing to make in order an amendment in the nature of a substitute offered by the Committee on Ways and Means to the Education and Labor title of H.R. 3500.

I urge your support of the rule on H.R. 3500. It is fair. It is reasonable. Most importantly, however, its enactment will assure that the substantial deficit of the PBGC, which is contributing to our overall national deficit, is reduced.

□ 1140

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Alaska [Mr. YOUNG].

Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of the rule to accompany the Budget Reconciliation Act.

It is never easy to craft a rule on such an important and complex bill as the budget reconciliation resolution. In this case, I believe the Rules Committee has struck the right balance. By providing for a comprehensive amendment by the gentleman from Ohio [Mr. LATTA] the rule does provide an opportunity to vote on many of the programs which have been characterized as spending add-ons. At the same time, the rule does recognize the value of preserving the actions taken by the committees.

Mr. Speaker, I am a believer in the committee process. I believe the actions taken by committees, after consideration, after Members have had a full opportunity to vote, should be respected. We should not lightly cast aside those decisions. For this reason, I strongly support the rule adopted by the Rules Committee as the fairest means of dealing with the hard choices we always must make in the committees to meet the reconciliation instructions.

In particular, I support the actions taken by the committee of which I am the ranking member, the Interior Committee. I believe the committee met its budget reconciliation instruction in the only manner which could have resolved the OCS dispute.

If we are going to impose a settlement on the States, we owe it to them to apply a formula which is fair and consistent. It seems fair and logical to divide revenues with 73 percent going to the Federal Government and 27 percent to the States for all revenues in the 8(g) zone. Since the language of 8(g) applies to "revenues" in that zone, it is not logical to apply the 27 percent to bonuses and rents, but not royalties.

It is worth remembering that the States had requested 50 percent of revenues and did ask to have this issue withdrawn from the courts to be made a part of the congressional budget process. We need to settle these suits with the States in a way that addresses at least some of their concerns.

A bipartisan majority of the Interior Committee refused to exclude royalties from the settlements. For these reasons, I urge my colleagues to support the rule reported by the committee.

I would be glad to yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

I would like to follow up on the point of the $6 billion going to the offshore States. It is going to take 30 years for that amount of money to go to the offshore States, and then you have to assume production is 20 times greater for the next 30 years.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the distinguished chairman of the Committee on Education and Labor, the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Speaker, I rise in support of House Resolution 296, the rule on H.R. 3500.

If adopted, the effect of this rule would be to assure that the provisions relating to the Single-Employer Pension Plan Termination Insurance Program established under title IV of ERISA will be considered by the House.

As the chairman of the Education and Labor Committee, I am gratified that the Committee on Rules has recognized how critical it is that these provisions be placed before the House in their present form. The provisions do two things: Subtitle B prospectively increases the premium under single-employer pension plans from $2.60 per participant per year to $8.50. Subtitle C contains major structural reforms to the insurance system itself. Both of these subtitles have been developed over the past 4 years on a bipartisan basis and passed our committee unanimously twice: Once as separate legislation and again in the context of our budget reconciliation package. They are strongly supported by both the administration and organized labor and generally not opposed by business.

I urge support of the rule and ultimate passage of H.R. 3500. It is critical that these provisions are enacted this year in order to put the PBGC back on a sound financial footing and thus reaffirm to pension plan participants that their pension benefits are secure even when their company may be in financial trouble.

Mr. Speaker, I urge support of the rule.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. FIELDS].

Mr. FIELDS. Mr. Speaker, I come today to address really one provision. Several speakers have talked about it already. It is the 8(g) provision. I thought what I would do would be to turn to the law that was passed on September 18, 1978, by this Congress. It says,

> Notwithstanding any other provision of this act, the Secretary shall deposit in a separate account in the Treasury of the United States all bonuses, royalties, and other revenues attributable to oil and gas pools underlying both the Outer Continental Shelf and submerged lands subject to the jurisdiction of any coastal State until such time as the Secretary and Governor of such coastal State agree on,

which they never have,

> or if the Secretary and the Governor of such coastal State cannot agree, as a district court of the United States determines, the fair and equitable disposition of such revenues and any interest which has accrued and the proper rate of payments to be deposited in the treasuries of the Federal Government and such coastal State.

What we are resolving today is that question. The Merchant Marine and Fisheries Committee, the Interior Committee, have decided how those should be disposed of. We are talking about royalties, and royalties we talked about on September 18, 1978, when that particular piece of legislation was passed.

Mr. MILLER of California. Mr. Speaker, will the gentleman yield?

Mr. FIELDS. I yield to the gentleman from California.

Mr. MILLER of California. I thank the gentleman for yielding.

That is exactly the issue here. I happen to be the person who wrote that language in 1978. It says all revenues including royalties from future activities. The point is, the States have been waiting now almost a decade to receive this money that has been put into trust funds. They were promised money from future activities. What this legislation does is simply deliver on that promise. It was passed overwhelmingly on a bipartisan basis in this Congress in 1978. I think the gentleman has made a very, very important point, that this is simply the settlement-up of an agreement made many years ago.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Indiana [Mr. SHARP].

Mr. SHARP. Mr. Speaker, I urge my colleagues to vote "no" on this rule. It ought to be evident to everyone by now that the OCS issue deserves fuller attention.

Ladies and gentlemen, the OCS deal here goes well beyond anything intended in the 1978 act. if we had time, we could show you how it covers oil that is beyond the 3-mile 8(g) zone.

Second, Mr. Speaker, this goes beyond the deal agreed to in the budget resolution and agreed to by the House of Representatives. We think it goes beyond it by $4 billion to $6 billion, and so does OMB, and so does the Department of Interior.

Third, this is clearly opposed by this administration, which has been very favorable and very kind to States like Louisiana, Texas, and California.

Ladies and gentlemen, this deal is going to be very costly to the Federal taxpayer in the future.

Mr. Speaker, it reminds me a little bit, as we try to get it in under the guise of deficit reduction, of a country-western song that talked about teenage passion which goes like this: "Calling it love is no excuse for what we are doing."

Ladies and gentlemen, vote "no" on this rule.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. REGULA].

Mr. REGULA. Mr. Speaker, I rise in opposition to the rule.

Before I go into my reasons for opposing this rule, I want to begin by commending everyone involved in bringing this budget reconciliation package this far. As a former member of the Budget Committee I know how difficult the reconciliation process can be. However, I strongly believe it is an essential part of the budget process if we are truly serious about controlling spending.

There are a number of provisions in the reconciliation package before us, however, which concern me. The bill before us creates new programs, moves programs off-budget, and generally uses the reconciliation process to achieve policy aims unrelated to budget-savings items. I am going to address my comments today to one provision which I find particularly onerous, however, and which under the rule before us is not subject to amendment.

The provision I am referring to is title V, the Committee on Interior and Insular Affairs chapter and would substantially alter the balance between State and Federal interests in the Outer Continental Shelf Leasing Program.

The provision, could put a halt to the the entire OCS Leasing Program.

Section 5105 of the reconciliation bill would amend section 19 of the Outer Continental Shelf Lands Act. It would effectively give States a veto over leasing on the OCS. I strongly object to the States having veto power over a question of national policy. Furthermore, adoption of the policy embodied in this provision, would set a bad precedent.

The 1978 Outer Continental Shelf Lands Act amendments termed the OCS a "vital national resource reserve held by the Federal Government of the Public, which should be made available for expeditious and orderly development. * * *" Adoption of this provision would not only subvert the national interest, but would insure that we never achieve an expeditious and orderly development of these resources as mandated by Congress in 1978.

The absence of an energy crisis today does not lessen the national interest in the OCS Program. The resources of the Outer Continental Shelf belong to all the people of this Nation, and as such the exploration and development of those resources must be managed in the national interest. The national interest in the OCS program must not be subordinated to narrower State and local interests, which this provision would do.

Current law already provides for enormous input from and consultation with affected coastal States. The Secretary of Interior must accept a Governor's recommendation if it provides for a "reasonable balance between the national interest and the well-being of the citizens of the affected State."

Under this new proposal a Governor would be able to halt a sale unless the Secretary could prove that to do so would "significantly impair the national interest."

By allowing a State to effectively veto leasing off its coast, we would also be insuring that the Department could never be in compliance with section 18 of the OCS Lands Act Amendments of 1978 which mandated "an equitable sharing of developmental benefits and environmental risks among the various regions." Should the Miller amendment become law, States such as Louisiana and Texas, which have traditionally viewed leasing favorably, would be required to continue to bear the whole responsibility for supplying the majority of our Nation's future domestic offshore oil and gas.

Continuing the current imbalance—to date more than 95 percent of the wells drilled in Federal OCS have been drilled in the Gulf of Mexico while 85 percent of the California OCS is under moratorium—could result in the Gulf States too turning an unfavorable eye toward leasing, moving us even further from our national goal of energy security.

Further, this provision could have a serious effect on the standard of judicial review. Currently, if the Secretary determines that the Governor's recommendations do not provide a reasonable balance between Federal and State interests, a court may reverse the Secretary if his decision is "found to be arbitrary or capricious." The reconciliation bill would repeal the existing standard by requiring instead that the Secretary's decision be based on "substantial evidence."

Traditionally the substantial evidence standard has been used by courts to review findings of fact. At the lease sale stage, however, the Secretary's decisions necessarily are based to a large degree on judgments. There simply can be no cold hard facts on the likelihood of an energy emergency or whether oil and gas prices will rise or fall.

Opponents of OCS leasing could use the "substantial evidence" standard to impose a requirement of proof which could be impossible in the case of things as intangible and unknown as the Outer Continental Shelf and the world energy situation. In short the Miller amendment would create an enormously difficult standard for the Secretary to meet and for the courts to adjudicate.

Current law already provides the States ample opportunity for input into each step of the OCS process—from the initial preparation of the 5-year plan through the preparation of the final environmental impact statement. This cooperative, consultative process has worked well as is demonstrated by the deletion of numerous tracts offshore California and Alaska in past lease sales.

In short, adoption of this provision in the reconciliation bill would fly in the face of the very principles on which our system of Government is based. Our Founding Fathers recognized the importance of the distinction between the rights of the individual States and those of the united Federal Government. John Jay in the Federalist papers notes that ". . . the prosperity of America depended on its Union. . . ." The American people, Jay goes on to point out have long realized the "importance of their continuing firmly united under one Federal Government, vested with sufficient powers for all general and national purposes."

I think Mr. Jay would have agreed that the management of the Outer Continental Shelf Leasing Program and the broader issue of national energy policy are examples of the kinds of national purposes the Founding Fathers had in mind. We cannot and must not let this or any other issue of national policy be determined by the necessarily more narrow interests of the individual State government's.

To subject the management of the OCS Program to the wishes of each and every coastal State is to turn the program into chaos and to insure that it cannot be managed in the national interest. We will be abandoning the foundations of our great system of Government and subjecting our children and grandchildren to an uncertain energy future.

We must also look beyond the OCS issue and think of the precedent this legislation would set. What is to prevent the States from assuming the right to veto the location of a military base on Federal lands within their boundaries?

What is to keep the States from prohibiting onshore mineral leasing or perhaps in some States allowing exploration and drilling currently prohibited by Federal law? What of grazing rights on Federal lands? The possibilities are endless and frightening. We simply cannot abrogate the Federal Government's rights and responsibilities for managing the Federal lands and the resources those lands hold.

In addition to the federalism issue, this provision does not belong in a reconciliation measure, the aim of which is to contribute to deficit reduction, not increase it. Under the current leasing moratorium off the coast of California, the Government is estimated to be losing a potential of between $7 and $30 billion in Federal bonus and royalty income. I am convinced that if the Miller amendment became law

there would be no leasing off the coast of California thus eliminating any potential for bonus and royalty revenues from contributing to much needed deficit reduction.

I might point out to those of my colleagues involved in the controversies over dividing the so-called 8(g) revenues, that if this provision is allowed to become law the 8(g) dispute will be immaterial. Whether you include or don't include future royalties in the formula, 27 percent of nothing is nothing and that is what the States and the Federal Treasury can expect to receive if this provision is adopted.

As the ranking Republican on the Interior Appropriations Subcommittee, I have been dealing with the OCS issue for some time. Revenue from OCS receipts is used in part to fund the land and water conservation fund which provides both Federal and State land acquisition moneys for park and recreation facilities. If these revenues are sharply reduced or eliminated funding for these programs in all of our districts could be in jeopardy.

I would urge defeat of this rule so that reconciliation may be considered under a more open rule giving Members an opportunity to express themselves on this and other questionable provisions in the reconciliation bill.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield such time as she may consume to the gentlewoman from Ohio [Ms. KAPTUR].

Ms. KAPTUR. I thank the gentleman for yielding time to me.

As a member of the Committee on Banking, Finance and Urban Affairs and the Subcommittee on Housing and Community Development and as a member of the Committee on Veterans' Affairs, I rise in strong opposition to the rule.

Mr. Speaker, I rise in opposition to the rule because it is thoughtless. The sponsors of this amendment fail to recognize that the programs they seek to delete are well under the deficit reduction targets of the budget resolution and, in fact, some require no new spending authority at all.

One program in particular, contained in the veterans health-care section of H.R. 3500, would clarify the intent of a previous law mandating studies on the effects of agent orange on Vietnam veterans. This section merely calls on the VA to survey these effects in women Vietnam veterans who were included under the original authorizing legislation but excluded when the studies were implemented. This does not create a new program but corrects an omission in an old law. Furthermore, these provisions call for no new budget authority. In fact, it was made very clear in the Veterans' Affairs Committee markup on the original bill that the VA was to use for this study previously appropriated funds that were to have been used for another, now canceled, study. Further, in the instructions to report by our Veterans' Committee, it were specifically stated that no new budget authority was required.

In addition, I would like to point out that title II of H.R. 3500 contains total authorizations for housing that are less than what was permitted in the budget reconciliation instructions. In other words, it not only conforms to the budget reconciliation, it is less than that reconciliation and clearly demonstrates less expensive means to achieve the ends of existing programs.

Mr. DERRICK. Mr. Speaker, for purposes of debate only I yield 1 minute to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. I thank the manager of the rule for yielding.

Mr. Speaker, I congratulate the gentleman for the work he did both as a member of the Budget Committee and as a member of the Rules Committee to bring to this floor a reconciliation bill that accomplishes the purposes we are here to talk about.

We are getting deviated into turf battles here. We are talking about issues that really are resolvable in the committee process. What we have to keep in mind is that our purpose for bringing the reconciliation bill to the floor is to reduce the deficit by $61 billion over the next 3 years. This bill does it and more. It cuts $3.3 billion more than was required by the budget resolution over that timeframe.

Nine of the eleven committees have met or exceeded their targets. We need to show the American people that we are serious about deficit reduction. Let us not get tied down in parochial debates. Let us show that we are proceeding here along a course of action that will allow us to have the freedom to keep the prerogatives of the legislative branch as we move forward on Gramm-Rudman.

Let us make sure that we fulfill our requirements under the Budget Act. Let us not get tied down in parochial committee debate here on the floor.

The SPEAKER pro tempore. The Chair will advise that the gentleman from Ohio [Mr. LATTA] has 5 minutes remaining and the gentleman from South Carolina [Mr. DERRICK] has 8½ minutes remaining.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 45 seconds to the gentleman from New York, [Mr. SCHUMER].

Mr. SCHUMER. I thank the gentleman for the time.

Mr. Speaker, I simply would like to make a brief point: This rule is Janus-faced, it is unfair, it smiles on certain interests, OCS and oil, and then isolates housing and poor people's interests, and lets an up or down vote go on those alone. What is good for the goose is good for the gander. If you want to eliminate all authorizing, eliminate all authorizing. Do not eliminate authorizing that hurts poor people's programs like housing but keep authorizing that allows oil States to get lots of money. It is an unfair rule. I urge it to be voted down.

Mr. Speaker, I yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Florida [Mr. MACKAY].

Mr. MACKAY. Mr. Speaker, there are a lot of Members who are not involved in these controversies. I am not involved in any of these. My concern, as a member of the Budget Committee, is the impact of these controversies on the underlying issue—the effort to strengthen the budget process.

My belief and the belief that I urged to the Rules Committee is that we should strip all of these new and expended programs off of reconciliation so that reconciliation could be enforcement and enforcement only.

The Rules Committee heard from 37 Members. They did the best they could with the various viewpoints. The result is not only totally satisfactory, but I think it is the best rule we are going to have. I think the overriding issue facing the Congress today is the need for reconciliation so that we can show we are serious about our budget resolution that we have passed. The other body is doing that today. If the House does not do it, we are going to be, I think, greatly discredited.

Mr. Speaker, I urge support of this rule, and I urge the House to show, in the best way we can, that we are committed to a strong budget process and to reconciliation.

□ 1155

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Louisiana [Mr. LIVINGSTON].

Mr. LIVINGSTON. Mr. Speaker, I rise in support of this rule allowing for consideration of H.R. 3500, the Omnibus Reconciliation Act of 1985.

I normally do not support modified closed rules that prohibit Members from exercising their legislative will. However, it is critical to the passage of any omnibus reconciliation bill to limit the number of amendments that can be offered. To reopen this omnibus bill to any and all amendments would severly jeopardize an already fragile reconciliation process.

More importantly, I am supporting this rule because it will protect the budget savings provisions reported by both the Interior and Merchant Marine and Fisheries Committees dealing with the disposition of revenues under section 8(g) of the Outer Continental Shelf Lands Act; 8(g) revenues are those derived from Federal offshore oil and gas leases within 3 miles of State boundaries.

In meeting the reconciliation savings required under this year's budget resolution, both the Interior and Mer-

chant Marine and Fisheries Committees have finally and equitably resolved how the Federal Government and seven coastal States should share the $6.1 to $7.9 billion in estimated 8(g) revenues.

Some Members have criticized the distribution formula in this bill as a bail out and Federal windfall for only seven coastal States, but I would reply:

Over the years, billions of dollars in revenue have been collected by the Federal Government from oil, gas, and other mineral development on Federal onshore lands. This onshore mineral development occurs primarily in States west of the Mississippi where over 90 percent of our Federal lands exist. These Western States have always split the billions and billions in revenues from onshore development with the Federal Government on a 50-50 basis.

The Federal-State split for the offshore revenues provided in this reconciliation package will be 73-percent for the Federal Government and only 27-percent for the States.

This 73-percent Federal share means over $4.3 billion in immediate revenues to the U.S. Treasury and billions more in the outyears.

The distribution formula in H.R. 3500 is the only equitable formula that addresses coastal State concerns regarding the existing 8(g) escrow account, future 8(g) revenues, royalty payments, and the recoupment of 8(g) revenues collected since 1978 that were not placed in escrow.

The 27-percent State share of all these 8(g) revenues are desperately needed by my State of Louisiana where unemployment rates are still well above the national average and where the environmental impacts from intense offshore development have never been adequately addressed.

By approving the 8(g) revenue distribution formula in this reconciliation package, the Federal Government gets the best deal and we have for the first time our best chance to resolve a complex Federal-State dispute that began in the Carter administration and that has been debated in the Interior and Merchant Marine and Fisheries Committees since 1977.

Mr. Speaker, I urge the adoption of this rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Pennsylvania [Mr. GRAY], the distinguished chairman of the Committee on the Budget.

Mr. GRAY of Pennsylvania. Mr. Speaker, today we have an opportunity to live up to a commitment we made on August 1, a commitment that would put us on a course of reducing the tremendous deficits that are cutting off economic growth, opportunity, and jobs in this country. And today we have the opportunity to take the first step toward implementation of the budget recommendations by passing the reconciliation portion of the budget that calls for 75 billion dollars' worth of reconciled spending cuts. That is what we are about today. That is what this rule is about. It provides us the opportunity to begin the implementation of deficit reduction.

I know that there are those who often use the reconciliation process for the passage of legislation authorization, terminations, et cetera. We know that from 1981 in Gramm-Latta 1, where we had over 200 of those. However, I hope, despite how you may feel about any of these jurisdictional questions, authorization questions, that we will not lose sight that this is the opportunity for the House of Representatives to work its will on deficit reduction and begin to implement what we said we were going to do on August 1.

Therefore, I urge the Members, if they are serious about deficit reduction, to pass this rule, and that the Rules Committee has provided an opportunity for the House to work its will. Failure to pass this rule means that the House will be at a disadvantage in terms of meeting its reconciliation targets and achieving deficit reduction and implementing strong measures to reduce the sea of red ink that is drowning this Nation.

Therefore, I urge the support and the passage of the rule so that we can get on with the important business of reducing our deficits, drying up the sea of red ink and therefore we can move forward.

Mr. LATTA. Mr. Speaker, I yield such time as she may consume to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. Mr. Speaker, I rise in support of the rule on H.R. 3500 (H. Res. 296), especially as it relates to the ERISA provisions approved by the Committee on Education and Labor as contained under subtitles B, C, and D of title III.

I support the rule in order to expedite the consideration and passage of the ERISA single employer termination insurance reforms which are absolutely crucial to the Pension Benefit Guaranty Corporation [PBGC], if it is to avoid a $1 billion funding crisis.

In granting the rule that they did, the members of the Rules Committee obviously understood that the need for the subtitle C single employer provision was both immediate and compelling. They understood, as this body now must also, that prompt action is necessary if we are to avoid the sort of future funding crisis under ERISA that this Congress faced under Social Security only a few short years ago.

To avoid this sort of crisis the Committee on Education and Labor reforms discourage sham transactions and the unwarranted dumping of pension liabilities onto the PBGC, practices which in the past have imposed responsible plan sponsors the additional obligation of funding the liabilities of others.

The budget implications of these reforms can be substantial. Using a Congressional Budget Office example, if the reforms are successful in avoiding or delaying even one large plan termination, that would otherwise result in the unwarranted dumping of pension liabilities, the annual outlay reductions could average around $50 million over the 1986-88 period. In the long run, of course, many millions or even $1 billion can be saved by preventing even a single large plan termination.

In addition to the reforms contained under subtitle C, the provisions of subtitle B increase the single employer premium, thus enabling the PBGC to amortize its one-half billion-dollar deficit. This also results in a $666 million savings in budget outlays over the 1986-88, 3 fiscal year period.

It is important to stress that these provisions of H.R. 3500 are the product of 5 long years of obtaining a consensual approach to a problem which all affected parties agree must be addressed immediately. While these provisions do not contain the wish list of any single group, it enjoys the support of labor and the administration. The Secretary of Labor, William Brock, has expressed his strong support for this package, and it is also supported by the Pension Benefit Guaranty Corporation, which administers the program. The business community, which will be affected by the premium increase and the reforms, has raised no objections to our committee with respect to this package and there has been no opposition expressed from any other quarter. Most importantly, it enjoys the unanimous, bipartisan support of the members of our Committee on Education and Labor.

Therefore I urge this body to support the rule, House Resolution 296, in order that these ERISA title IV provisions be retained in their entirety under the omnibus budget reconciliation bill.

Mr. LATTA. Mr. Speaker, I yield such time as he may consume to the gentleman from Alabama [Mr. CALLAHAN].

Mr. CALLAHAN. Mr. Speaker, I rise in support of the rule, as I feel it represents the only manner under which the House can debate a bill on reconciliation with the many technical funding issues it contains.

I am particularly interested in titles V and VI which contain amendments to section 8(g) of the Outer Continental Shelf Lands Act. Section 8(g) deals with the equitable sharing of revenues by States and the Federal Government resulting from oil and gas leasing on OCS lands within 3 miles of a State's seaward boundary. I am not

going to go into any detail concerning the particulars of this issue as this has been discussed by others who have had more experience with the issue than I. I will, however, point out that the House Budget Committee has stated that the Merchant Marine and Fisheries Committee has fully met its reconciliation requirements as has the Committee on Interior and Insular Affairs. In both instances, both committees, because they have joint jurisdiction over this issue, have reported resolutions dealing almost identically with section 8(g) of the Outer Continental Shelf Lands Act, and have done so by significant votes.

The 8(g) issue is not new. It is one that has been dealt with for many years by both State governments, the executive branch of the Federal Government, the Federal courts, and the committees of Congress. This is a complicated issue as are the other issues contained in title 6 of H.R. 3500, all of which are designed to reduce the Federal deficit as directed by the budget reconciliation resolution. To allow these sections to be reopened, no matter how well-intentioned the effort for change, can only serve to undercut the reconciliation process.

Again, Mr. Speaker, I urge the adoption of the rule and hope that it is overwhelmingly supported by my colleagues.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Speaker, I rise in strong support of this rule, especially as it affects the reforms to be recommended in title III of H.R. 3500 by the Education and Labor Committee to prevent further losses in our single employer pension insurance program. The Ways and Means Committee has raised objections because it claims jurisdiction. Ways and Means does not have joint jurisdiction over ERISA title IV programmatic aspects. It only has joint jurisdiction with the Education and Labor Committee over the premium increase.

Why do we need this bill immediately rather than next month or next year or yet another 5 years? Because right now the Pension Benefit Guaranty Corporation has an unfunded liability of one-half billion dollars and will soon have a liability of $1 billion if we do not act. This $1 billion will quickly multiply in the coming years unless these reforms are put in place.

The rule adopted by this body should in no manner permit changes to these urgently needed reforms or allow a delay in their adoption. The Secretary of Labor, Bill Brock, has written to urge us to act on the reforms as quickly as possible inasmuch as they are crucial to the financial health of the Pension Benefit Guaranty Corporation [PBGC].

These ERISA title IV changes, included in H.R. 3500 as subtitles B and C, were unanimously adopted in committee as being necessary to fulfill our committee's total deficit reduction target of $2.265 billion.

In meeting this target, the program reforms under subtitle C are inextricably intertwined with the single employer premium increase under subtitle B. As one observer put it, trying to fix the PBGC through a premium increase alone is like trying to fix a leaky bathtub by turning up the faucet.

The PBGC estimates that approximately 20 percent of its claims to date have resulted from abuses of the sort which the subtitle C reforms are designed to reduce or eliminate. The administration informs us that without the reforms, abusive claims will probably increase in the future as a result of recent financial activities, including takeovers, mergers, and leveraged buyouts.

The truth of this fact should be clearly understood. In the words of Secretary Brock, if reforms to restrain outlays are not adopted, the necessary PBGC premium will obviously need to be higher than already requested to meet the increased Federal expenditures. More to the point, we will be making what might be termed "the billion dollar mistake" if we do not act favorably on the single employer reforms immediately. Both business and labor organizations have also testified that reforms are needed to avoid larger claims and yet higher premiums.

In summary, the ERISA title IV changes in H.R. 3500 are necessary to carry out the instructions of the budget resolution, are necessary to reduce the Federal deficit, are necessary to keep the PBGC from becoming a fiscal basket case leading to a massive Federal bailout, and are necessary to help assure this Nation's workers and retirees that they will receive their full earned benefits in the event of plan termination.

They are the product of the extensive research, debate, and compromise that has taken place over the past few years among the interested parties in Government and the employee benefits community. The reforms and the premium increase are needed now.

I urge the Members to adopt these provisions which are supported by the administration, by business and by the labor unions, in hopes of trying to stave off the further undermining of the Pension Guaranty Corporation's ability to carry out its role.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the distinguished gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Speaker, I rise in support of the rule.

There is one great mandate before this House today.

And that is the challenge to make substantial reductions in the $200 billion a year deficit which jeopardizes the economic security of this Nation.

For the last 2 weeks, we have been debating a proposal by the Senate to force massive spending reductions to achieve that deficit reduction.

That proposal promises to achieve a miracle in the next 5 years.

But the reconciliation bill we have before us today gives us each the opportunity to do something to reduce spending and cut the deficit right here, right now.

This legislation will cut $61 billion over the next 3 years.

We have not just made good on our promise to cut spending in the budget resolution.

We have exceeded the target we set for cuts by an additional $3.3 billion.

These are not illusory or symbolic cuts. They are real. They deserve our support.

Now, we are going to hear all sorts of complaints about why this rule is poorly crafted and why we should send it back to the Rules Committee.

Let's not kid ourselves.

The public, and the press, will interpret our vote on this rule, and on this bill, in one way, and one way only.

They will not care about jurisdictional quibbling.

They will not care about the intricacies of the budget process.

They will not care about the technicalities of the rule.

They are going to want to know one thing, and one thing only:

When you had a chance to vote for $61 billion in deficit reductions today, how did you vote?

Some cynically say we haven't made tough decisions. We haven't made deep cuts.

This resolution cuts over $4 billion in rural housing.

It cuts $10 billion in Medicare.

It cuts $2.5 billion from education and wage protection programs.

It saves over $12 billion from pay freezes and health benefits cuts.

It reduces highway spending by $2 billion.

It slashes veterans' health and compensation benefits by over $1 billion.

These are real cuts. They are going to cause some real hardships. But given the size of our deficit, they must be made.

Let us send a clear signal to the American people today that we are going to make these cuts stick.

Let's not delude ourselves. Parliamentary posturing on this rule is going to send only one message: that the Congress has no backbone when it comes to cutting.

And that would be disastrous.

So I urge an "aye" vote for the rule, and in support of H.R. 3500.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Texas [Mr. FROST].

Mr. FROST. I thank the gentleman for yielding.

Mr. Speaker, I would echo the sentiments of the chairman of our Budget Committee that it is time to get on with this process. This has been a lengthy and difficult process. We now have a reconciliation bill that will make a difference on the deficit. Not to proceed with this today will send absolutely the wrong sentiment to the country, the wrong message to the country.

I would also like to make one passing comment on the matter raised by the chairman of the Committee on the Interior. My good friend, the gentleman from Arizona [Mr. UDALL], lost that fight in his committee. He lost that fight in the Committee on Merchant Marine and Fisheries. The two committees have original jurisdiction over this particular matter. Both are in agreement. And now we are asking that there be a third consideration of a matter when there was no disagreement, no difference of opinion between the two committees that considered it. The Rules Committee acted exactly proper in not permitting a third bite at that particular apple.

I urge adoption of the rule.

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. FROST. I yield to the gentleman from Texas.

Mr. PICKLE. Mr. Speaker, as the gentleman knows, I am not happy at all with action on the ERISA question that the Rules Committee made. They took the jurisdiction of the Ways and Means Committee. But I think this rule is a fair rule because it fulfills a commitment made to certain States 6 years ago. The rule ought to be adopted in fairness and on the basis of commitment.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Louisiana [Mr. ROEMER].

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Speaker, I would like to echo the comments that the chairman of the Committee on the Budget, the gentleman from Pennsylvania [Mr. GRAY], said when he asked us to support this rule. I plan to do so. It is not perfect. There are legitimate questions of jurisdiction, legitimate questions as to the right degree of sharing between the States and the Nation on offshore oil, legitimate questions as to housing money, legitimate questions as to on-budget and off-budget. But there is a larger question here that the gentleman from Pennsylvania [Mr. GRAY] has stated. It is a question in this country if this House is going to begin this day to do something about the deficit. This bill, if we pass the rule, will allow us to reduce the deficit by more than $61 billion in the next few years, $3 billion greater than the budget called for. That is the question. I think we ought to begin today by passing the rule and debating the points of contention within the framework of this imperfect but reasonable rule.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Louisiana [Mr. MOORE].

Mr. MOORE. Mr. Speaker, I support the rule. I have watched as some of my colleagues have come to the well and attacked the rule on the specific point of the settlement of the offshore revenues. I would just like to answer that, for a minute, if I could. There are three parts to that. The administration has told me and others it is willing to settle on bonuses and rents. The point that is in conflict is royalties. And they say, "We will pay you those royalties, Louisiana, Texas, and the other States, on a drainage basis."

My reply to them is, "Why, since 1978, haven't they done that?" This has been the law since 1978 and we have not received the first check. So why haven't they? They tell us they are going to pay it. Defeat this rule, they say, pass an amendment to the bill that would prevent it from being settled, and they would pay it to us in the future. And I say, "Why haven't you done it in the past?"

The reason they have not is that each time they tendered that check, they have asked the States to sign on the bottom line that they waive any further claims to anything in the trust fund. That is not right. You would not advise your client or your family friend to do that. We cannot do that to the States.

This bill finally settles that issue that has been festering since 1978 and settles it in a fair way. So this rule ought to be voted for.

Mr. DERRICK. Mr. Speaker, for the purpose of debate only, I yield 30 seconds to the gentleman from Rhode Island [Mr. ST GERMAIN], the distinguished chairman of the Committee on Banking, Finance and Urban Affairs.

Mr. ST GERMAIN. Mr. Speaker, it is with regret that I have to rise in opposition to the rule. Unfortunately, the rule, if adopted in its present form, would, I am afraid, jeopardize a great deal of work that was done by the Committee on Banking, particularly the Subcommittee on Housing.

We have some new programs in that particular section, but we are within the reconciliation figures. I believe it is $20.6 billion. And if we do not get a housing bill in reconciliation, Mr. Speaker, I predict that the prospect for a housing bill are just about nil because of the fact that the Senate will not act.

I urge the defeat of the rule.

Mr. LATTA. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. BARTON].

Mr. BARTON of Texas. Mr. Speaker, I rise in strong support of the rule on H.R. 3500, the Budget Reconciliation Act. Some Members have spoken on the House floor today against what they characterize as a "giveaway" of Federal revenues from offshore oil and gas revenues to coastal States, otherwise known as the 8(g) settlement. I would like to shed a little light on this heated discussion. As a member of the Interior Committee I have worked on the 8(g) settlement for months now.

In 1978, Congress passed the Outer Continental Shelf Lands Act amendments that provided for compensation to coastal States from the impact of offshore oil and gas development. The language of the 1978 act is crystal clear:

Notwithstanding any other provision of this subchapter, the Secretary shall deposit in a separate account in the Treasury of the United States all bonuses, royalties, and other revenues * * * until such time as the Secretary and the Governor of such coastal State agree on, or if the Secretary and the Governor of such coastal State cannot agree, as a district court of the United States determines, the fair and equitable disposition of such revenues and any interest which has accrued and the proper rate of payments to be deposited in the treasuries of the Federal Government and such coastal State.

The 8(g) check was written back in 1978. Seven years later, when it is time to go to the bank, some Members are trying to put a stop on the check. The 8(g) settlement developed by the Interior Committee would share 27 percent of the 8(g) revenues with coastal States. I would like to remind my colleagues that inland States receive 50 percent of the revenues from onshore minerals leasing.

Coastal States did not seek a legislative solution to the 8(g) dispute because they felt that they were on sound legal grounds to demand 50 percent of all revenues from offshore development in the 8(g) zone. A legislative solution was foisted upon them by the House Budget Committee in order to free up $4 billion from the escrow account for the fiscal year 1986 budget.

The reconciliation resolution reported by the Interior Committee enjoyed the support of the majority of the committee. I would like to point out that the Members from affected coastal States constitute a slim minority of the committee membership. The Interior Committee has one Texan, one Louisianan, one Alaskan, and five Californians; for a total of eight votes. Since there were 22 votes for the reconciliation resolution it is apparent that most of the support came from inland States. I should note that many of my Republican colleagues from Western States voted for the resolution. These Members are not in the habit of handing out billions of dollars.

The Interior Committee was instructed by the Budget Committee to report a resolution that would make available $4 billion for the fiscal year 1986 budget. The resolution reported by the committee does exactly that. The 8(g) settlement will reduce the Federal budget deficit next year, and in following years.

There has been a good deal of discussion over the future cost of the 8(g) settlement. During markup of the resolution in the Interior Committee, the Interior Department estimated that the settlement would share $4 billion in additional revenues with the coastal States than the settlement proposed by Chairman UDALL. Some opponents of the settlement claim that it will share an additional $12 billion to $20 billion with coastal States. These estimates are not worth the paper they are written on.

Actually, the 8(g) settlement would share much less with coastal States. The Congressional Budget Office [CBO] estimated that sharing 50 percent of all 8(g) revenues with the States, which they assumed was fair and equitable, would result in an additional $4 billion of revenues for the coastal States. Since the 8(g) settlement shares only 27 percent of revenues with the coastal States, it appears that the cost of the settlement will be $2 billion over 30 years. I would like to point out that the Federal revenues from offshore oil and gas development exceed $76 billion. The State share is small in comparison.

In conclusion, I would like to encourage the House to support the rule on H.R. 3500, the Omnibus Budget Reconciliation Act. Otherwise, I foresee that the 8(g) settlement will be disrupted, and the future distribution of 8(g) revenues will be blocked by interminable litigation. The settlement ensures that revenues will be smoothly distributed to Federal and State governments.

Mr. LATTA. Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado [Mr. STRANG].

Mr. STRANG. Mr. Speaker, I rise in support of House Resolution 296, the rule to provide for consideration of the bill H.R. 3500, the Omnibus Budget Reconciliation Act.

Mr. Speaker, as has been pointed out by others on the floor today, this is not a perfect rule. But the fact is we need reconciliation, we need to balance the Federal budget, and we need to reduce the budget deficit.

To be sure, there are provisions of this rule, and provisions in the bill itself, that bear serious consequences for our future as a nation. For example, the bill guts our national synthetic fuels program and even provides for the abrogation of existing contracts signed after July 31. I believe that is a wrong course of action to take in terms of long-term national energy security. Second, the bill proposes to remove the highway trust fund account from the unified Federal budget. Efforts to dismantle the unified budget at a time when we are making efforts to balance the budget are unwise. Third, the bill provides billions of dollars to reauthorize and in some create new housing programs. While some of these housing programs may be vital, the fact is these issues have not been subjected to scrutiny through the regular committee process.

The point is, Mr. Speaker, these issues need to be debated and voted on by this body. We can accomplish that only by accepting an admittedly imperfect rule, and getting on with a full discussion of these important issues.

Thank you.

Mr. LATTA. Mr. Speaker, I yield myself the remainder of my time.

Mr. Speaker, I cannot urge too strongly the Members of the House to support the rule. Somebody just said it is an imperfect rule. It is an imperfect rule in some people's eyes. Certainly, in my eyes it is an imperfect rule. But it is the best rule we could get. We would like to have made all of these things in order. We would like to have solved all of the questions of jurisdiction between the committees all in one swoop. We cannot do that. But we can reduce the deficit if we adopt this rule and pass a reconciliation bill.

We cannot lose sight of that fact.

I was surprised that the chairman of the Committee on Banking, Currency and Urban Affairs said he was going to oppose the rule. The gentleman is already in with his bill. What he is opposing is the House's opportunity to vote on that proposition. Now, I think the House ought to have an opportunity to vote on that proposition. I would have thought that he would have been supportive of the rule.

I support the position of the chairman of the Committee on Interior and Insular Affairs, the gentleman from Arizona [Mr. UDALL], but it is not in the rule. I cannot vote against the rule just because I support his position and it is not in the rule. We have got bigger things to do, and we also have a conference committee where we could resolve some of these problems.

Mr. DERRICK. Mr. Speaker, I yield myself the balance of my time.

The SPEAKER pro tempore. The gentleman from South Carolina [Mr. DERRICK] is recognized for 1½ minutes.

Mr. DERRICK. Mr. Speaker, this is payday. The Members can vote for all of the balanced budget amendments that they want, they can vote for Gramm-Rudman, they can vote for all of that stuff, and it does not make a bit of difference. But this vote does. This vote is like borrowing money from the bank, and when it comes due, if you do not pay it, that means that you do not want to vote for this rule.

These are obligations that we have solemnly made in the budget process that we were going to reconcile. For those of you who may not understand it, reconciliation is the enforcement process of the Budget Committee. The budget process means nothing without reconciliation. This is when we made ourselves do what we said we were going to do.

So I suggest to the Members that if in all these speeches we have made back home over the years we mean we are going to be fiscally responsible, that they vote for this rule and let us get ahead with the business of reconciliation.

Just one short remark about the distinguished chairman of the Banking Committee. The rule has not taken a thing away from him. What he needs to be doing is to argue about the fact that we gave this House an opportunity to vote the only time that they will ever get to vote on what was put in there by his committee. It is a fair rule. It merely does what we said we were going to do and what we led the American people to believe that we must do.

I ask the Members to vote for the rule.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

RECORDED VOTE

Mr. GIBBONS. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 230, noes 190, not voting 14, as follows:

[Roll No. 367]

□ 1220

Messrs. NIELSON of Utah, BEREUTER, OBERSTAR, REID, KOLTER, GILMAN, TOWNS, BIAGGI, RINALDO, and BOEHLERT changed their votes from "aye" to "no."

Messrs. DREIER of California, YOUNG of Missouri, and SKELTON changed their votes from "no" to "aye."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1230

CONFERENCE REPORT ON H.R. 2409, HEALTH RESEARCH EXTENSION ACT OF 1985

Mr. WAXMAN. Mr. Speaker, I call up the conference report on the bill (H.R. 2409) to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and National Research Institutes, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the provisions of clause 2, rule XXVIII, the conference report is considered as having been read.

(For conference report and statement, see proceeding of the House of October 11, 1985.)

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 30 minutes and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report presently under consideration.

The SPEAKER pro tempore (Mr. MINETA). Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to announce that the conferees on H.R. 2409, the Health Research Extension Act of 1985, have resolved their differences and reported a conference report to extend the research authorities of the National Institutes of Health.

The provisions of the House and Senate legislation were similar in many respects. Our negotiations were productive and guided by a bipartisan commitment to strengthen the Nation's support of biomedical research.

At this time I want to acknowledge and express my appreciation for the able assistance and contribution of the distinguished committee chairman, Mr. DINGELL, and the ranking minority member, Mr. MADIGAN, to the successful completion of conference.

The conference report is different from the original House passed bill in two major respects. First, as requested by the administration, the authorization of appropriations for expiring NIH authorities is extended for 3 fiscal years.

Second, the legislation does not create a National Institute of Nursing Research as originally proposed in the House bill. Instead, the conferees agreed to establish a center at NIH which will integrate nursing and patient care research into the mainstream of NIH activities. Establishment of a nursing center is intended to be substantially less disruptive than creation of a new national research institute which would have required greater resources.

Mr. Speaker, the National Institutes of Health is a national treasure. It deserves the stature and affirmation of public support that is embodied by this legislation.

Passage of H.R. 2409 properly establishes health research among the highest priorities of the 99th Congress.

I urge each Member's support for this important legislation.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of this conference report that reauthorizes the expiring authorities of the National Institutes of Health.

This conference report reauthorizes for 3 years the research authorities of the National Cancer Institute and the National Heart, Lung, and Blood Institute, the National Research Service Awards and the Medical Library Assistance Act. This legislation is virtually identical to S. 540, the conference report which received unanimous support of both the House and Senate during the final days of the 98th Congress.

Many of the management directives and line-item authorizations contained in previous NIH bills which were criticized have been removed from this leg-

islation. Additionally, the authority of the Secretary of Health and Human Services contained in section 301 of the Public Health Service Act to conduct biomedical research has been strengthened. I should also note that consensus language from last year's conference report dealing with the sensitive issues of fetal research and the use and care of animals in research is maintained in this conference report.

This conference report also provides for establishment of the National Institute of Arthritis and Musculoskeletal and Skin Disease, a proposal which has been a part of NIH reauthorizing legislation for the past 4 years.

Finally, I am especially heartened that the conference agreement includes a provision that establishes a national center for nursing research at the National Institutes of Health. It is my expectation that this center will be an enormous asset in contributing to the basic biomedical research conducted at NIH.

Mr. Speaker, I yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I yield 5 minutes to my colleague, the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I would like to take this opportunity to commend the chairman of the Health and Environment Subcommittee, Mr. WAXMAN and all the conferees for one title in the conference report that provides for research on lupus erythematosus. As many Members of this House know, I have long been concerned with this disease and have been working to provide research funding and coordination in the search for a cure for lupus.

The conference report will establish a lupus erythematosus coordinating committee to plan, develop, coordinate and implement comprehensive Federal initiatives in research on lupus erythematosus. This committee will meet at least four times a year and will submit a report on their activity no later than 18 months after the date of the enactment of this conference report. I believe that this coordinating committee will provide tremendous leadership in the fight against lupus.

I urge my colleagues to join me in supporting this conference report which provides vital funding for research on lupus and other serious health problems confronting Americans.

Mr. WAXMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Alabama [Mr. SHELBY], who as a member of the subcommittee has played a most constructive role in bridging the differences that we have had in the subcommittee, in the full committee, in the House and in the conference.

I want to commend the gentleman for the very important role he played in this legislation.

Mr. SHELBY. Mr. Speaker, I rise in support of the conference report and want to praise its sponsors for achieving a balanced compromise reauthorizing our important biomedical research programs.

I am pleased to know that conferees reached agreement on a substantial portion of a bipartisan bill approved by the House Energy and Commerce Committee. This bipartisan consensus evolved after several months of negotiations by members of the Health and the Environment Subcommittee both last Congress and this Congress.

The NIH deserves this vote of confidence for their excellent track record in biomedical research. The work of the NIH is a source of tremendous national pride. The scientific research and advances in the prevention and treatment of disease generated at NIH are unrivaled throughout the world.

This legislation will provide the necessary encouragement to the scientific and medical professionals at NIH who are working hard to prevent and conquer serious disease.

I urge my colleagues to support the conference report.

Mr. FORD of Tennessee. Mr. Speaker, today, we are discussing the conference report on health research extension bill H.R. 2409. Frankly, I believe this is an excellent bill in many respects.

Health research is an item which to my mind is clearly underfunded. Total health care costs in the United States are estimated at $45.6 billion, Federal investment in medical research is only 1.2 percent of this figure.

The annual expenditure on health care in the United States is $2,000 per person.

The annual investment in medical research is only $25 per person.

In 1980 the Nation spent over $37.3 billion on medical and social cost of cancer treatment, while the Federal Government spent only a fraction of a percent of this amount on cancer research.

Statistics show that the rate of return on every $1 invested in medical research is $13.

I believe in spending money up front for research. It is a practical and prudent investment of taxpayer dollars, and one that clearly benefits the people of America.

However, I must seriously question if Americans in all sections of our country benefit from this investment to the same degree. Frankly, I think not. In fact, I know they don't.

The mid-South area is one of the last remaining major geographic and population bases within the Nation whose people do not have ready access to a comprehensive cancer research and treatment center.

All other ingredients for the complete spectrum of medical services already exist in the Memphis Medical Center. A children's comprehensive cancer center, St. Jude Children's Research Hospital, is fully operational in Memphis and will help bring in outstanding biomedical scientists and clinical investigators to the Memphis medical center. The University of Tennessee Center for the Health Sciences is in a phase of rapid growth and special emphasis is being given to the basic medical sciences.

We have the will, the people, the human resources, what we lack are the buildings and the funds.

What I sincerely hope is that when funds are applied for under this act, given that it does become law, that it is clear to those individuals approving grants that it is the intention of this body to have all Americans share, to the extent possible, fairly in the fruits those funds will provide; that those sections of the country which currently lack adult treatment and research centers be provided special consideration; that a sincere effort will be made to see to it that all Americans are given a chance to defeat this dread disease.

In order to bring a Memphis comprehensive cancer center into being, we need money for brick, mortar and equipment. There is a legitimate need for more cancer research and treatment facilities, if we hope to come anywhere near the goal of the National Cancer Institute to reduce cancer mortalities by 50 percent by the year 2000.

There are legitimate and compelling reasons to locate such a center in Memphis to service the mid-South region and hopefully, when they are requested there will be funds available to insure that the mid-South region can share fully in the fight to conquer this dread disease.

Mr. O'BRIEN. Mr. Speaker, I rise in support of the bill, H.R. 2409, the Health Research Extension Act of 1986 which contains authorization for our Nation's first line of defense against disease, the National Institutes of Health.

I wish to commend the conferees of both Houses on reaching the agreement on the multifaceted issues embodied in the reauthorization for 3 years of the several Institutes. I particularly wish to commend the conferees and all the members of the House Energy and Commerce Committee and the Senate Education and Labor Committee for bringing into existence, the new National Center for Nursing Research.

A national focus for research into nursing has been a particular concern of mine for several years. In the bill, H.R. 2409, the new Center will be comprised of the nursing research and research training activities supported by the current Division of Nursing in the Health Resources and Services Administration.

I share the conferee's view that the new Center will lead to significant long-term savings in health care costs through improved patient care, patient education, and health promotion that will follow from a concentration of research into nursing and nurse-related functions within the total health care delivery system.

The creation of the Center is a long overdue recognition of the nursing profession as a significant and integral part of the Na-

tion's health care delivery system. I am convinced that the new Center will pay for itself many times over as the new organization concentrates its efforts into improving patient care and upgrading the nursing profession.

Mr. WAXMAN. Mr. Speaker, I yield back the balance of our time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WAXMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 395, nays 10, not voting 29, as follows:

Mr. TAUKE changed his vote from "yea" to "nay."

Ms. KAPTUR and Mr. DENNY SMITH changed their votes from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CORRECTING ENROLLMENT OF H.R. 2409, HEALTH RESEARCH EXTENSION ACT OF 1985

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 79) correcting the enrollment of the bill (H.R. 2409) to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and National Research Institutes, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the bill (H.R. 2409) to amend the Public Health Service Act to revise and extend the authorities under that Act relating to the National Institutes of Health and National Research Institutes, and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

(1) In the proposed section 406(a)(3)(B), strike out "disease" and insert in lieu thereof "diseases".

(2) In the proposed section 408(a)(2)(B), strike out "$90,000 for fiscal year 1987, and $98,000" and insert in lieu thereof "90,000,000 for fiscal year 1987, and $98,000,000".

(3) In the proposed section 436(b)(2), insert a comma after "rehabilitation".

(4) Redesignate the proposed section entitled "STUDIES RESPECTING BIOMEDICAL AND BEHAVIORAL RESEARCH PERSONNEL" as section 489.

(5) In the proposed section 495(c), insert "of" after "date of enactment".

(6) In the proposed section 497, strike out "or national" and insert in lieu thereof "or a national".

(7) In the proposed section 442(f), strike out "Advi- sory" and insert in lieu thereof "Advisory".

(8) In the proposed section 487(c)(4)(A), $A=\phi(t-s/t)$ and insert in lieu thereof

$$\text{"}A=\phi\left(\frac{(t-s)}{t}\right)\text{"}.$$

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. McCANDLESS. Mr. Speaker, on rollcall 367, my card did not show my vote. I would like the record to show my vote would have been "yea."

APPOINTMENT OF CONFEREES ON H.R. 2419, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1986

Mr. HAMILTON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2419) to authorize appropriations for fiscal year 1986 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disabilty System, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana? The Chair hears none, and, without objection, appoints the following conferees: Messrs. HAMILTON, STOKES, McCURDY, BEILENSON, KASTENMEIER, DANIEL, ROE, BROWN of California, McHUGH, DWYER of New Jersey, STUMP, IRELAND, HYDE, CHENEY, LIVINGSTON, and McEWEN.

And, for matters within the jurisdiction of the Committee on the Judiciary under clause 1(m) of House rule X, Mr. MAZZOLI.

There was no objection.

PERSONAL EXPLANATION

Mr. FAZIO. Mr. Speaker, I regret that I was unavoidably detained yesterday at the White House during rollcall 365 when the House adopted H.R. 2095, the Daylight Saving Extension Act. I wish it to be known that had I been here, I would have voted in favor of this measure.

PERSONAL EXPLANATION

Mr. MILLER of Washington. Mr. Speaker, I was unavoidably absent earlier today during rollcall 367.

Had I been present, I would have voted "aye."

PERSONAL EXPLANATION

Mr. EARLY. Mr. Speaker, I regret that I was unavoidably detained yesterday at the White House during rollcall No. 365 when the House adopted H.R. 2095, the Daylight Saving Extension Act.

I wish it to be known that had I been here, I would have voted in favor of this measure.

PERSONAL EXPLANATION

Mr. ROTH. Mr. Speaker, on the last rollcall, I was unavoidably detained. Had I been here on rollcall 368, I would have voted "aye."

OMNIBUS BUDGET RECONCILIATION ACT OF 1986

The SPEAKER pro tempore. Pursuant to House Resolution 296 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3500.

The Chair designates the gentleman for Texas [Mr. DE LA GARZA] as Chairman of the Committee of the Whole and requests the gentleman from California [Mr. TORRES] to assume the chair temporarily.

□ 1303

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3500), to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for the fiscal year 1986, with Mr. TORRES (Chairman pro tempore), in the chair.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Pennsylvania [Mr. GRAY] will be recognized for 2 hours and the gentlewoman from Illinois [Mrs. MARTIN] will be recognized for 2 hours.

The Chair recognizes the gentleman from Pennsylvania [Mr. GRAY].

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, you have before you today the cooperative efforts of 10 House committees to produce savings of over $61 billion over a 3-year period in the Omnibus Budget Reconciliation Act of 1985.

This was not an easy task. Many of the committees made reforms which were very difficult for them in order to meet the common goal of deficit reduction. This package may include some elements which all of us would prefer to see done a little differently. But our House committees generally acted in good faith to meet their reconciliation directives. Some committees went back more than once to come up with sufficient savings. And the end result represents the collective wisdom of our House committees on how to best meet their reconciliation target.

As you know, two committees have moved their reconciliation legislation separately from this omnibus package. The Agriculture Committee has made 3-year savings of $7.913 billion in the Food Security Act of 1985 which passed the House by 282 to 141 on October 8. Chairman DE LA GARZA has indicated to me that he will seek an immediate conference on this bill and will make every effort to ensure that the legislation meets the needed reductions after conference with the Senate. The Ways and Means Committee has also reported separate legislation, H.R. 3128, containing Medicare provisions as well as IRS and Customs provisions. The Energy and Commerce health provisions are also moving separately in H.R. 3128.

This is not an unusual procedure. In the past, the reconciliation directive has been met both by inclusion of savings in an omnibus reconciliation package and by the enactment of separate reconciliation legislation.

If you add the Agriculture Committee savings and Ways and Means Committee legislation to the omnibus proposal before you today, the 3-year total will be $77.119 billion which exceeds the 3-year reconciliation directive of $75.535 billion by almost $2 billion.

I urge you to support this package.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we begin debate today on the reconciliation package. There is no question that many of the committees have put in difficult amounts of time and work to achieve what they felt were budget savings.

Regrettably, there is some disagreement on how accurate the savings claimed are in reality. Indeed, one of the other groups that judges how we are truly sticking to reconciliation guidelines indicates that this bill is over $15 billion shy of what the original House goal was and the goal from the conference committee.

Too often in this reconciliation bill, we are seeing committees putting on whole sets of new legislative priorities that could no more pass their committee or pass the Rules Committee than you or I could walk the Potomac.

□ 1310

This is not the purpose of the reconciliation process. When we reach the amendment stage, we will be hearing from the ranking member of the Committee on the Budget, DEL LATTA, with an amendment that was made in order by the Rules Committee, that will strip at least some of these extraneous spending initiatives from the reconciliation document.

One does not fault the chairman of the Budget Committee, but one must fault this Congress again for its ability

to make speeches concerning cutting the deficit and its absolute inability to make those difficult judgments necessary to truly cut spending and to truly lower the deficit.

Without the Latta amendment, this is not an efficient deficit reduction package; indeed, it does not achieve the goals that each Member of this House should want to achieve in a deficit reduction package. It adds housing bills, it adds changes in State revenues, it, in category after category, ignores the voice of the American people to cut back, to conserve. Rather it indulges in an orgy of spending by using the reconciliation bill, the very bill that was to hold down spending.

Therefore, Mr. Chairman, regrettably this is not the reconciliation package that all of us wish. We would hope that this House would carefully listen to the amendments to at least make the bill more marginally acceptable to more of our Members.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 10 minutes to the gentleman from Mississippi, the distinguished chairman of the Committee on Veterans' Affairs, the gentleman from Mississippi [Mr. MONTGOMERY] and I ask unanimous consent that he be permitted to yield time.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. MONTGOMERY. Mr. Chairman, I will first take up the Armed Services Committee report on reconciliation, and I yield myself such time as I may consume.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Chairman, the House Armed Services Committee has complied with its reconciliation instructions by reporting legislation to authorize the Secretary of Defense to bill private insurers for the reasonable cost of medical and dental care provided in military medical facilities to nonactive-duty beneficiaries—that is, dependents and retirees—who are eligible for such care and who are also covered by health insurance plans. Many individuals eligible for care on a space-available basis in military medical facilities are also covered by private health insurance policies. For example, retirees generally seek second-career employment which often includes an attractive package of benefits, such as retirement plans, profit-sharing plans, and life and health insurance programs. Many military retirees prefer to seek medical care for themselves and their families from private physicians and hospitals under their new employer-sponsored health insurance. Others, however, continue to seek care from military medical facilities, particularly since there is virtually no cost sharing—in contrast to private sector health plans.

Despite the fact that many of their patients have private insurance coverage, military medical facilities do not seek reimbursement from the insurer for the cost of care provided to such covered individuals. This legislation would remedy that situation by authorizing the United States, through the Secretary of Defense, to collect from a third-party payer the reasonable cost of medical care provided to dependents of active duty personnel, retirees, their dependents, and survivors. Third-party payer includes both insurance underwriters and private employers who offer self-insured or partially self-insured/partially underwritten health insurance plans.

The Government could collect only for benefits covered by the insurance plan—subject to the terms and conditions of that plan. Thus, if the insurance plan did not cover psychiatric care or covered only outpatient care, then the Government would not have the authority to collect the expenses for an inpatient psychiatric admission. In addition, to the extent that insurance contracts have provisions that require, for example, preadmission screening and second opinions before surgery, the Department of Defense would be expected to comply in order to collect under those contracts.

The legislation would have no financial impact on dependents and retirees who use military hospitals: Their costs would remain the same—dependents pay $7.10 per day; retired officers, $3.80 per day; and retired enlisted, nothing. Retirees and dependents would not be liable for any deductible and copayment included in the plan.

CBO estimates of savings—for both budget authority and outlays—over the next 3 fiscal years are as follows:

	Millions
Fiscal year:	
1986	$125
1987	266
1988	284

Collection from third-party payers has been endorsed in three recent studies of Federal hospital programs. In its task force report on Federal hospital management, the President's Private Sector Survey on Cost Control, commonly known as the Grace Commission, called for collecting from third-party payers the cost of care provided in Government medical facilities, asserting that private insurers were receiving a windfall. Such collection efforts have subsequently been endorsed by the Congressional Budget Office in its March 1984 report, entitled "Options for Change in Military Medical Care," and by the General Accounting Office in its February 1985 report, entitled "Legislation to Authorize VA Recoveries From Private Health Insurance Would Result in Substantial Savings."

Mr. Chairman, at this time I would like to move right into title X of the bill relating to the Committee on Veterans' Affairs.

If there are no objections, I will cover title X, and after that, Mr. HAMMERSCHMIDT will comment on the title X provisions and Mr. HILLIS will cover title I for the House Armed Services Committee.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. MONTGOMERY. Mr. Chairman, the agreement reached by the House and Senate on the first concurrent resolution on the budget instructed the Committees on Veterans' Affairs to report changes in laws within their jurisdiction sufficient to reduce budget authority and outlays by $300 million in fiscal year 1986, $400 million in fiscal year 1987 and $450 million in fiscal year 1988. Our committee target is $1.15 billion for the 3-year period.

The Committee on Veterans' Affairs has met its targets. According to the Congressional Budget Office [CBO], should title X be enacted, we would exceed the mandated targets by $142 million in budget authority and $127 million in outlays. Our own committee estimate—which includes cost estimates from VA—is about $60 million higher.

Our committee has met the savings targets by adjusting the cost-of-living increase for certain veterans, reforming the eligibility requirements for health care in VA facilities, and authorizing third-party reimbursement for care and treatment in VA facilities.

Part A of title X would provide a cost-of-living adjustment [COLA] of 3.7 percent for veterans receiving compensation for service-related disabilities and for eligible survivors and dependents receiving dependency and indemnity [DIC] benefits from the Veterans' Administration. The increase would become effective December 1, 1985. The baseline contained in the conference agreement would have provided an increase of 4.1 percent.

Part B of this title would reform and improve eligibility for veterans' health care in VA facilities. Under current law health care for all veterans is discretionary. If a bed is not available on a given day, any veteran may be denied needed care. Service-connected veterans are not usually turned away since these veterans are given priority by the Veterans' Administration.

Part B identifies categories of veterans to whom VA would be required to provide inpatient and outpatient health care when determined by the Administrator to be medically necessary. Included are: Service-connected veterans, former POW's, veterans exposed to certain herbicides and ionizing radiation, World War I veterans,

veterans drawing pension from the VA, and any veteran with one dependent whose income does not exceed $25,000—or $19,000 for a single veteran.

Any non-service-connected veteran with income above these limits may receive care provided: First, space and resources are available, and second, the veteran agrees to pay the initial deductible he or she would be required to pay under Medicare—estimated to be $492 for inpatient care in fiscal year 1986. Unlike the Medicare Program, the veteran would not be required to pay more than $492 for inpatient and outpatient care during a 12-month period.

In making a determination whether the veteran would be required to pay the deductible, the Veterans' Administration would be required to use the same criteria and procedure that is now used in determining annual income and net worth for pension purposes.

Part B would repeal the current provision of law that allows a veteran over the age of 65 to receive care in VA facilities regardless of his or her inability to defray the cost of necessary health care.

All of the provisions that would affect eligibility for health care would expire on September 30, 1988.

The bill authorizes the Veterans' Administration to recover from health insurers the reasonable costs of care furnished in VA facilities to insured veterans who have non-service-connected disabilities. Most of the savings in title X would be realized through this provision of the bill. Most health insurance plans and contracts contain exclusionary clauses which bar reimbursement to the United States for care provided in Federal health-care facilities. The bill would effectively nullify any contract provision agreed to after the date of enactment of this measure which seeks to bar recovery in connection with care furnished in VA facilities. This makes the VA similar to private hospitals for insurance purposes.

The bill would authorize VA to require non-Federal health care providers that furnish hospital care and services to veterans to accept the same payment from VA for such services that is now accepted for Medicare purposes.

Part C of this title would establish an advisory committee on American Indian veterans. In addition, the Administrator of Veterans' Affairs would be required to conduct an epidemiological study of long-term adverse health effects, if any, in females who served in the Armed Forces of the United States in the Republic of Vietnam and who were exposed to herbicides containing dioxin during such service.

The reform proposal contained in this bill is fair to veterans. It is easy to administer. It sets out our commitment to take care of service-connected disabled veterans and the non-service-connected veteran most in need. The committee proposal does not bar any veteran from the health care system and, if implemented, will force the agency to better plan to meet the future needs of our Nation's veterans.

Our committee has met its targets and I urge my colleagues to support the bill.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 5 minutes to the gentleman from Indiana [Mr. HILLIS], the ranking member of the Committee on Armed Services, and I ask unanimous consent that he be permitted to yield time.

The CHAIRMAN pro tempore. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Mr. HILLIS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in order to achieve the $600 million in savings assigned by the first concurrent resolution on the budget for fiscal year 1986, the House Armed Services Committee has reported legislation to bill third-party payers for the reasonable cost of medical and dental care provided in military medical facilities. The gentleman from Mississippi [Mr. MONTGOMERY], the ranking member of the Subcommittee on Military Personnel and Compensation, as well as the distinguished chairman of the Committee on Veterans' Affairs, has already explained the thrust of the legislation. I would like to highlight several points.

Representatives of private insurance companies have expressed concern that this legislation could impede their current cost-containment efforts. That is not the intent.

Clearly, the private sector has made great strides in recent years in the area of medical care cost containment and been in the forefront of innovative ways to moderate the rapidly escalating cost of medical care. As a part of that cost-containment effort, third-party payers routinely audit provider records for appropriateness of care, length of stay, and similar utilization indicators.

The Committee on Armed Services endorses such cost-containment initiatives.

This legislation would, therefore, afford third-party payers a similar opportunity to inspect and review military medical treatment facility records for those cases for which collection is sought.

Under this legislation, the Secretary of Defense would prescribe regulations for computing the reasonable cost of medical and dental care for which collection could be made. Although these regulations could utilize the per-diem charges currently used for collection under the Medical Care Recovery Act—$441 per inpatient day and $58 per outpatient visit for fiscal year 1986—other methods of determining reasonable costs would be equally appropriate.

To the maximum extent possible, the method of reimbursement should complement the cost-containment objectives of the third-party payer within that geographic area.

Thus, reimbursement might be based on the average rate—usual and customary fee for service, fee schedule, or other fee mechanism—that the third-party payer can demonstrate it would pay under valid contractual arrangements with other facilities or providers within the same geographic area for similar service or services.

The use of prospective payment or diagnostic related groups [DRG's] is becoming widespread as a method of reimbursement within the civilian medical community.

In view of the work already underway within the Department of Defense on the potential utilization of DRG's as an internal budgetary tool, the Department of Defense should carefully consider DRG's as a means of reimbursement for third-party payers under this title.

To facilitate claims processing, Department of Defense medical facilities may wish to negotiate reasonable cost through contractual arrangements with third-party payers within their geographic areas.

□ 1320

Mr. Chairman, I yield back the balance of my time.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas [Mr. HAMMERSCHMIDT], the ranking minority member of the Committee on Veterans' Affairs, and I ask unanimous consent that he be permitted to yield time.

The CHAIRMAN pro tempore. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Mr. HAMMERSCHMIDT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of title X of H.R. 3500, the Omnibus Budget Reconciliation Act of 1985. Title X pertains to Veterans' Affairs and is the result of a bipartisan effort of which we can all be proud. The joint budget resolution calls upon the Veterans' Affairs Committee to achieve $300 million in savings. With title X, we can do that.

Mr. MONTGOMERY, the distinguished chairman of the Veterans' Affairs Committee, and I, the ranking member, believe that we have developed a proposal for fiscal year 1986 budget savings which is responsible and which would enable the Nation to

keep its commitment to provide medical care for veterans who were disabled in the line of duty or who are truly in need, regardless of age.

Also, title X would provide a 3.7-percent cost-of-living increase for disability compensation and for dependency and indemnity compensation. It has been customary, and it is a matter of fairness, to treat COLA's for veterans' programs on the same basis as COLA's for other Federal programs.

America's veterans, who have already sacrificed for their country by military service, have always stood ready to sacrifice again if called upon. Veterans rightly ask only that the sacrifices be shared equitably and that particular groups not be exempt.

Many disabled veterans live on fixed compensation incomes and face the same hardships as all other such persons, if the buying power of the dollar declines. Yet veterans are willing to do their part in helping to win the crucial battle against the deficit.

The Veterans' Affairs Committee is proposing a historic reform of veterans' health care eligibility. My good friend, Mr. MONTGOMERY, has already provided many of the details of the proposal. The eligibility reform consists of a stronger commitment to provide hospital and outpatient care to a universe of veterans defined by specific income and asset criteria or by service-related categories.

Many veterans are surprised to learn that the VA today has no firm obligation under the law to give medical care to any veteran, whether service-connected or not. Through administrative prioritizing or resources, veterans in fact have received medical care for service-connected conditions, but if VA resources become inadequate, care could actually be denied to a service-connected veteran.

We have here an opportunity to do something for veterans which has never been done before. We can take the step, which many people thought had already been taken, to give service-connected and needy veterans the Government's assurance that the VA will provide them hospital and outpatient care.

About two-thirds of the savings would be accomplished by the third-party reimbursement provision. It would generally make private health insurance coverage for VA treatment the same as for private treatment in the case of non-service-connected veterans. Instead of cutting budget dollars, we have found insurance dollars to pay some of the medical bills. Third-party reimbursement would have a mninimal effect on policy premiums while ending what amounts to a subsidy for health care insurance companies.

The Veterans' Affairs Committee has studied carefully the whole range of options available to it for achieving $300 million in savings. The committee has sought out the views and suggestions of veterans' groups and concerned citizens, and I am satisfied that there is no better way to save the money, given the necessity to do it. The committee heard no alternatives from any quarter, and nearly all veterans' groups have accepted the approach which title X takes.

I want to make one thing very clear about the proposed means test. The committee would not be recommending it if it were not for the need to save money and to head off a means test which the VA already has the administrative authority to impose.

Therefore, a 3-year sunset provision has been included as a part of the proposal, and the VA would be required to report to the Congress on its experience with the means test. After 3 years, if the means test has not worked out, the VA would revert to the current health care eligibility criteria.

Mr. Chairman, title X's provisions can enhance VA health care for service-connected and needy veterans. It is an opportunity for achieving the savings mandated for veterans' programs while continuing to meet the Nation's basic commitment to its veterans.

Mr. Chairman, I yield 1 minute to the distinguished gentleman from Pennsylvania [Mr. RIDGE] a member of our committee.

Mr. RIDGE. Mr. Chairman, I thank the gentleman for yielding me time.

First of all, I would like to commend our chairman and the gentleman in the well for carefully crafting the compromise which was necessary to meet the fiscal responsibility with which we are faced.

However, I have a variety of reasons why I am opposed in principle to the means test.

Mr. Chairman, I rise in opposition to the means test for veterans as proposed in H.R. 3500, and ask permission to revise and extend my remarks.

Mr. Chairman, most everyone in this Chamber agrees that Government spending must be brought under control. Indeed, my colleagues on the House Veterans' Affairs Committee worked diligently to produce the best alternative to achieve reductions in the VA budget, and they must be commended for their efforts.

I rise in opposition not to this particular proposal, Mr. Chairman, but to a means test for veterans in principal. Long ago we made a commitment to our Nation's servicemen and women that the sacrifices they made would not go unrewarded. We promised, among other things, that their medical needs would be compensated for, in recognition of their service to their country.

I ask then, what kind of message are we sending to young men and women today, who are considering a commitment to serve in our Armed Forces? If we are to break the faith with those who have already served by proposing a means test, what assurance are we giving our young people that we, as their elected representatives, will not tamper with other rewards and benefits we committed to long ago.

Moreover, as a member of the House Veterans' Affairs Committee, I have become acutely aware of the health care problems facing our rapidly aging veterans population. Health care costs are rising exponentially, with no real relief in sight. I believe we have a responsibility to find ways to improve the quality of health care for our Nation's veterans—not find ways to make it less accessible and more burdensome. A means test is a bad idea and a bad precedent. Let's show yesterday's veterans that we have not forgotten them and tomorrow's veterans that their future is secure.

Mr. HAMMERSCHMIDT. Mr. Chairman, I yield such time as he may consume to the gentleman from Connecticut [Mr. ROWLAND] another member of our committee.

Mr. ROWLAND of Connecticut. I thank the gentleman for yielding.

Mr. Chairman, I had hoped to be arguing today for an amendment to delete third party reimbursement and the means test without disturbing the veterans' compensation cost-of-living adjustment.

The health care consequences of the means test and third party reimbursement are sweeping. The vote by the Veterans' Affairs Committee of 14 to 12 demonstrates that the choices being made by the two are serious.

There are at least two questions that, as of yet, have not been adequately addressed. First, would the requirement of a non-service-connected veteran to pay a $492 copayment create a legal obligation on the part of the Veterans' Administration to require it to pay for all of the veterans' health care for a full year irrespective of VA space availability limitations? In the case of Medicare beneficiaries, who also pay a $476 copayment, there is no question that care is provided for the whole year.

Second, the means test creates an entitlement for all non-service-connected veterans whose income is below the threshold. Given the current resource limitation leading to over 20,000 non-service-connected veterans being turned away yearly, where will the resources come from to pay for the care of the veterans who are said to be entitled?

Mr. Chairman, I rise in opposition to the means test because it creates an entitlement program for the first time for veterans using the VA health system. The veteran has always had the security of knowing that such care would be available. A means test changes the rule. While it is being introduced as a 3-year pilot, I feel that it will become a permanent feature and open the door to lower and lower income levels, not to mention the pos-

sibility of applying it to service-related disability.

The CBO has estimated that the means test will require $20 million to administer, which will significantly erode the expected savings of nearly $50 million. In my opinion, the means test will sacrifice medical care dollars for paperwork dollars. Veterans who served their country in wartime have already made sufficient sacrifices. No one was concerned about the income of our servicemen before they entered the service, and we should not start now.

Mr. Chairman, I think the means test sends the wrong message to our veterans across this Nation.

I thank the gentleman for yielding.

Mr. HAMMERSCHMIDT. Mr. Chairman, I thank the gentleman for his statement.

Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Florida [Mr. BILIRAKIS] a member of our committee.

Mr. BILIRAKIS. I thank the gentleman for yielding.

Mr. Chairman, I would just like to take a few minutes of the Committee's time to enter into a colloquy with the ranking member of the Committee on Veterans' Affairs, the gentleman from Arkansas [Mr. HAMMERSCHMIDT].

Mr. Chairman, I have just a few questions on the sections in the bill which relate to the provision of outpatient medical services to veterans. I think it is vital that the intentions of the Committee regarding this matter be made absolutely clear, both for the benefit of the Members and for those who will be administering the changes, and I know this is your intention as well.

Does the bill guarantee outpatient care to the eight categories of veterans listed on pages 518 and 519 of the bill, including those non-service-connected veterans who, under the income limitations established in the bill, are unable to defray the cost of care?

Mr. HAMMERSCHMIDT. If the gentleman will yield, the gentleman is correct.

Mr. BILIRAKIS. In other words, the VA will be required to furnish such care?

Mr. HAMMERSCHMIDT. The gentleman is correct.

Mr. BILIRAKIS. Will the VA be able to refuse to provide outpatient care to an eligble veteran because the resources are not available in that area?

Mr. HAMMERSCHMIDT. Yes. The bill does not guarantee the veteran that he or she will get care in a specific hospital on a particular given day. The bill would require the VA to provide care at the particular facility or at another facility within a reasonable distance.

Mr. BILIRAKIS. So the VA will be expected to take whatever action is necessary to provide care to eligible veterans? Specifically, the VA will be required to transfer resources to areas where the demand for outpatient care by eligible veterans is unmet, such as in the State of Florida.

Mr. HAMMERSCHMIDT. The VA would be required to manage its resources and allocate funds to take care of the demand in areas throughout the country.

Mr. BILIRAKIS. Does this guarantee of outpatient care extend only to cases in which such services are necessary in preparation for, or to obviate the need of, hospital admission, or as a necessary followup to the hosptialization? Or will eligible veterans be able to get treatment for any necessary medical problem?

Mr. HAMMERSCHMIDT. Mr. Chairman, service-connected disabled veterans would be eligible to get outpatient treatment of any kind for his or her service-connected disability. For most of the non-service-connected cases, the veteran would get outpatient treatment to obviate care or for posthospital care. A veteran rated 50 percent or more would also be able to get outpatient care for any condition. The gentleman is correct. Certain categories would get treatment for anything.

Mr. BILIRAKIS. I thank the gentleman for his comments.

Mr. Chairman, I would hope that possibly in this last particular area, if we have the opportunity available to us in our report language we might get it to be a little more specific in that regard rather than keep things in such a hazy area that it might result in problems later on.

Mr. HAMMERSCHMIDT. I am sure we will be working in the committee to do that, and with the leadership of the gentleman from Florida I am sure we can strengthen it.

Mr. BILIRAKIS. I thank the gentleman.

Mr. MONTGOMERY. I would like to reclaim my time and make a few brief comments.

First, I would like to thank the gentleman from Arkansas [Mr. HAMMERSCHMIDT], the ranking minority member of our Committee on Veterans' Affairs, for his work and cooperation with the chairman pertaining to reconciliation.

I would also like to thank Mr. HILLIS, who is on the Committee on Veterans' Affairs as well as the Committee on Armed Services, for his help and support.

And to the distinguished chairman of the Committee on the Budget, Mr. GRAY of Pennsylvania, I will say it has been a pleasure working with him. He has been very cooperative. It has been, in effect, an enjoyable experience working with the gentleman and the other committee members, including Mr. LATTA and Mrs. MARTIN. I also appreciate the cooperation we have received from the Budget Committee staff.

Mr. Chairman, I yield such time as he may consume to the gentleman from New Mexico [Mr. RICHARDSON].

Mr. RICHARDSON. I thank the gentleman for yielding time to me.

Mr. Chairman, I commend the chairman of the Committee on Veterans' Affairs and its ranking minority member.

Mr. Chairman, I would like to commend the efforts of my colleague, Mr. MONTGOMERY, for his fine work on title X of the Omnibus Budget Reconciliaton Act of 1985. One section of this act is of particular significance to my constituents. Section 10031 of this act would establish an advisory Committee on American Indians by the Administrator of Veterans' Affairs. I rise in strong support of this section. This advisory committee is desperately needed—there has been no major scientific study of veterans which has examined Indians as a specific group—their particular needs and readjustment problems have neither been identified nor addressed.

American Indians have made major contributions to the defense of our country. They have played prominent roles in the military history of the United States since its inception. During the Revolutionary War, George Washington utilized their scouting abilities; in the Civil War, Indian regiments fought in both the Union and Confederate armies. Following the Civil War, Indians officially became part of the enlisted ranks of the U.S. Army—previously they had been hired as auxiliaries. On August 1, 1866, the Indian scouts were established by order of the War Department. As regular enlisted men of the Army, the Indian scouts now received the same pay and allowance as their fellow service members.

Throughout this century many Indians have served valiantly and with distinction in the Army and other Armed Services in World Wars I and II, the Korean conflict and during the Vietnam era. According to the 1980 census, 44,500 American Indians served during World War II, 29,700 during the Korean war and 73,681 during the Vietnam era. These people did not serve without sacrifice—their traditional ways of life were distrupted, leaving problems above and beyond the problems experienced by other American veterans.

The proposed advisory committee would fill an important role in indentifying particular needs which Indian veterans have. They have willingly served this country in its times of need—we now have an opportunity to ensure that their needs, created by their willingness to sacrifice for their country, are also met.

I am very proud of the contributions to our national defense made by American Indians. Their tradition continues—there is currently a Marine platoon made up entirely of Navajo Indians, for example. There is however, a tragic lack of recongnition for the willingness of the Indians in our country to lay their lives on the line when called upon to defend the United States. In spite of their long and prominent history of participation in our Nation's military, no major recognition has been shown to these veterans. I believe that Congress needs to recognize their contributions. I will, therefore, be introducing legislation in the near future to establish a memorial to symbolize our acknowledgement of the involvement of these native Americans in our Nation's military.

I hope that all of my colleagues will support the Ominibus Budget Reconciliation Act of 1985 and other legislation aimed at addressing these unmet needs.

Mr. MONTGOMERY. I thank the gentleman for his comments. I know he and Mr. DASCHLE of South Dakota had a great deal to do with getting this amendment in the Reconciliation Act.

I thank the gentleman.

Mr. Chairman, I have no requests for time, and I yield back the balance of my time.

□ 1335

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 20 minutes to the gentleman from Ohio [Mr. WYLIE], the ranking minority Member on the Committee on Banking, Finance and Urban Affairs, and, Mr. Chairman, I ask unanimous consent that the gentleman from Ohio [Mr. WYLIE] be permitted to yield time.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Mr. WYLIE. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, later on we will be considering the Latta amendment which would strike from H.R. 3500 all new programs, all budget add-ons to existing programs, and all legislative language that is not germane to reconciliation. This last point is especially important to the Banking Committee portion which is contained in title II.

Let me just say a few words about striking the new programs and reducing the add-ons. Included in title II are five new programs that would fall under the jurisdiction of the Banking Committee. These programs total $235 million in new budget authority. In committee, when H.R. 1, the Housing Authorization Act of 1985, was being considered, I argued that this was the worst possible time to be creating new programs and I offered an amendment to strike all such programs. Although it was defeated, our minority views on H.R. 1 clearly indicated that the minority expected to pursue a similar course of action when the bill reached the House floor. Adoption of the Latta amendment will provide us with an opportunity to fulfill that pledge.

Mr. Chairman, unless there was an extremely strong case to be made for them, I felt very strongly about authorizing new programs in H.R. 1. I feel even stronger about authorizing new programs in what is supposed to be a deficit reducing bill. I feel the same way about add-ons. We are either going to freeze programs or we're not. By wiping out all the nongermane language, the Latta amendment necessarily takes care of these two problems.

Now to the question of placing the entire housing authorization bill in H.R. 3500 and then protecting it with what amounts to a closed rule. Mr. Chairman, unless the Latta amendment is adopted, we will effectively disenfranchise 405 Members of the House from having any say-so in determining priorities for our housing and community development programs this year.

While it is true the Banking Committee did mark up and report H.R. 1, the 1985 housing authorization bill, the particulars of that bill—especially as they relate to individual funding levels—are not the same as those contained in the reconciliation bill. In 25 instances, the funding levels have been changed. In seven instances, albeit minor ones, legislative language has been added or changed. These changes have never been subjected to a formal debate or vote and unless the Latta amendment is approved they never will be.

When the first concurrent resolution on the budget was adopted and the Banking Committee was placed under reconciliation instructions, the majority on the committee decided not to hold a formal session of the committee to determine how to meet these instructions. Instead they held a caucus of the majority members. Only 30 members were eligible to attend that meeting. They made the decisions as to how to split up a somewhat smaller pie.

Unless we approve Latta, the Members of the House will have no alternative but to either ratify these decisions or reject them completely. The House's position on the relative priority of various programs and indeed the structure of the programs themselves will have been determined by only 30 Members.

Mr. Chairman, H.R. 1 was a controversial bill in both subcommittee and committee. It was the object of 125 amendments, 86 of which were adopted and it contains 227 pages. I have it marked here in red. Over one-third of this bill pertains to housing legislation. But, it is still by no means a good piece of legislation.

It is clear to me the fairest procedure is to strip the nongermane legislative provisions from the reconciliation resolution and handle the housing authorization bill in regular order. The amendment by Mr. LATTA would accomplish this. This perfecting amendment would include language as it relates to title II that would provide only those provisions necessary to comply with the instructions for the Banking Committee contained in the first concurrent resolution.

Adoption of the Latta amendment would be beneficial for the final passage of H.R. 3500. Without it, I fear the conference on reconciliation will get bogged down by the housing title and this necessary deficit reduction measure will be needlessly delayed. In support of this proposition the chairman of the Senate Banking Committee has sent a letter to Chairman ST GERMAIN and me.

Similarly, adoption of the amendment would increase chances of enacting a housing authorization bill this year. It would allow the House to promptly take up H.R. 1, which I am willing to do. We still have time to complete action. What I fear, however, is that practically nothing will be decided in the conference on reconciliation and we will lose irreplaceable time before we can focus on a full-blown housing bill.

In summary, Mr. Chairman, the only fair thing to do regarding title II is to approve the Latta amendment. This would not jeopardize the prompt consideration of H.R. 3500, but just as important it would not disenfranchise 405 Members of the House when it comes to establishing Federal housing policy.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 15 minutes to the distinguished gentleman from Texas [Mr. GONZALEZ], and Mr. Chairman, I ask unanimous consent that the gentleman from Texas [Mr. GONZALEZ] be permitted to yield time.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GONZALEZ. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, of course, I voted for the rule on this H.R. 3500, the Omnibus—some people say the ominous—Budget Reconciliation Act. The reason is that under the procedures that were initiated in 1981, we have no recourse. For me, it was a very difficult decision this time. I had no problem in voting negatively in 1981. This year, given the nature of the crisis that confronts the Nation with respect to housing, shelter, and the general community development situation, we are living at

a time when a President and an administration have turned their backs on a 44-year commitment on a national basis to providing a safe, decent affordable house or housing or home for an American family or an American who wishes to so possess the ownership of a home.

Today we are back where we were in 1929. About 6 percent of the Americans in the country today are able to afford a new single-family dwelling unit. This was exactly the picture in 1929, which then, before the October crash, boasted prosperity.

The reason is very simple. For 4½ years we have had a steady assault on all of the programs that have been erected over a 44-year period to provide housing opportunities. Coincident with that has been the collapse of the financial structural base work or foundation that made it possible to construct homes at affordable prices for American families.

It is difficult for me to fold into this compelling process because I was 1 of 10 who voted against the so-called Budget Reform Act of 1974, for that very reason, that I felt and feared at the time that the net impact would be to cause the Congress to abdicate the solemn constitutional mandate to control the purse strings of this Nation's Government.

In effect, the process since 1981 has been to yield this constitutional grant to the executive branch and, therefore, a very, very serious cleavage in this tripartite form of government we have.

Today I rise in support of this Reconciliation Act because it affords the only opportunity we will have to have housing legislation as envisioned in what we called H.R. 1, the Housing and Community Development Authorization Act for 1985.

This bill in the committee and subcommittee took the longest time to be considered in leisurely and calm and dispassionate manner. We made history because we had a total of 96 amendments offered during the course of what we call markup, so that there is no question but what the authorization legislation was seriously, soberly, methodically compared and considered.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. If the gentleman will hold off for just 1 minute, I want to complete my thought, which will not take long, and then I will be delighted to yield to my very distinguished colleague on the subcommittee.

We had, really, more than 100 amendments. Finally, when we ended the markup, the subcommittee passed the measure out unanimously on a voice vote. It was again passed in full committee unanimously by a voice vote. The big issue was, from the beginning, due to the budgetary exigencies, we felt, after comprehensive hearings throughout the country and here in Washington, that there are substantial and growing needs to meet the burgeoning needs and be responsive to those needs in shelter and housing. The country is in a housing crisis.

We visited the teeming, dense metropolitan areas of this country. We visited the rural areas of this country. We found the existence of a crisis. So we tried to respond minimally under the prevailing dictum of the moment a few months ago of a freeze, that is, we would freeze all expenditures, all authorizations, all appropriations, at a level not 1 penny above that which the prior fiscal year had entailed.

Well, then came the reconciliation process, and under that, we were obligated to reduce the freeze by $20 billion we are under; so that when I hear voices that seem to speak as if they are knowledgeable contending that what is enclosed in H.R. 1 here today in the reconciliation process is in excess in any amount, that is absolutely an untruth, I resent it very much, because we feel that we have really sacrificed the recognizable, sincere need, basic minimal needs of the country, in order to reach the reduction of $20 billion under.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. In just a minute.

The total funding level authorized by this title is within the total established by the budget resolution for the community development and housing programs operated by HUD and the Farmers Home Administration. And even though we have what has been variously called new programs, these are in effect new variations of existing programs that have been in place, statutorily authorized, for some time, but always in the expenditure levels that represent a $20-billion cut below the budget that had been approved by the House.

So I want to say, to sum up, that I urge a favorable vote for this resolution at this time. I think that it is so important and so vital for anyone who is even minimally cognizant of the minimal needs in the way of shelter of this country.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I will be glad to yield, momentarily, to the gentleman who first requested, and I promised I would, so I do.

Mr. ROTH. I thank my chairman for yielding. First of all, I want to say that I thank the gentleman for being eminently fair with us in committee. There is no Member in this Congress who works harder than the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. I thank the gentleman.

Mr. ROTH. As the gentleman mentioned, there are 96 amendments that we considered to this legislation, so there is no unanimity on this bill. This is one of the most important pieces of legislation, H.R. 1, to come before this Congress. That is why it is entitled H.R. 1. It is a flagship. But it is wrong to throw this important bill into the hodgepodge of reconciliation. This bill should stand on its own merits. I do not believe that a powerful Member like the gentleman in the well would go to the Speaker and could not get this bill up on its own merits. We owe that to this body and to this country to do that.

□ 1350

Mr. GONZALEZ. I will reclaim my time and say that as I said earlier during another debate, I always accept these compliments, but in no way do they deceive me as to the extent of my inherent power in this body. I am still a VIP, a very important peon.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman.

Mr. VENTO. I want to commend the gentleman for his statement. We are her today because this is the process that has been set up.

Mr. Chairman, those who worship process, they ought to love this reconciliation process, like they loved it in 1981 when they passed the hodgepodge of things that cut the guts out of every social program in this Nation. The same thing is occurring here. We bring forth some proposals within the context of reconciliation legislation that wants to do a little bit for the low-income people of this country; wants to do a little bit for housing; wants to do something for the homeless; wants to deal with housing discrimination at the request of Secretary Samuel Pierce, then we are told it is not the right time. It is not the right time to deal with the homeless when we are below budget.

You know, we have 10 dozen budget experts up here that are telling us what the budget was. We got the lowest common denominator in terms of housing programs, in terms of H.R. 1 in this bill, but it is still not the right time.

I tell you what, I think that I question the support of those individuals that raise that and that try to sacrifice housing community development programs on the altar of process. In other words, they are making a fetish out of this particular issue and I think it is wrong. I think that this bill and this measure is here at the right time because it is necessary. Because we want to house people in this Nation, and because we want to meet their needs. That is why we are here, because the homeless this Thanksgiving ought to

have some hope. We have passed these bills before, they are not new, and we ought not to deceive ourselves. This proposal is here because it is necessary.

We are following the process; this is the reconciliation process. It is within the rules, and I hope we will defeat the Latta amendment. Support the initiatives of your Secretary Samuel Pierce in terms of housing discrimination. Support housing for the poor people in this Nation through this measure. Defeat the Latta amendment so that the needs of the homeless are addressed. That is what we have to do. That is what we should be about here in the people's Congress.

Mr. GONZALEZ. I say to my kind friend, the gentleman from Minnesota, let me explain that we have limited time, I have been so advised by the controlling Member. But if I have time, I would be delighted to yield. I appreciate the gentleman's generosity.

Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. I thank the gentleman for yielding.

Mr. Chairman, I compliment the gentleman and I would like to address myself to the remarks made by my good friend, the gentleman from Wisconsin [Mr. ROTH].

First of all, there is a pitch that there should be no new programs. That implies to many people, particularly on that side of the aisle, that it means more money. Let us make one thing clear, and I would ask my good friend, the gentleman from Ohio, the ranking minority member who I have worked with, my friend from Texas, my friend from Wisconsin, when they get up and make a pitch that there should be no new programs, they should at least make it clear that the Housing Committee has lived within its budget.

When we have allocated $50 million in reconciliation for a new program, we have taken an existing $50 million; we have $50 million out of an existing program so that we come out equal. So let one thing be 100-percent clear to every Member of this body: New programs live within the budget; they have been paid for by other programs, and let me give the gentleman a reason for that and why some of us feel so strongly about this bill.

Many people, Democrat, Republican, have said the old housing programs do not work. We have conceded that. Many of them do not work. They are extremely expensive and house very few people. So we have attempted to come up with some new programs, some cost-efficient programs, some programs that are much better, that learn from the mistakes of the past.

We have tried to authorize those programs. H.R. 1 has reached the floor in this body and passed it before. But let me remind the gentleman from Wisconsin and my good friends what has happened in the other body. Just this session in the other body, the Housing Subcommittee of the other body passed two of the new programs because two gentlemen from the other body, from that side of the aisle, agreed that there ought to be new programs and they voted against their chairman. Lo and behold, the Housing Subcommittee of the other body ratified those two new programs. What did the chairman of the Housing Authorizing Committee in the other body do? He withdrew a bill.

We are whistling into the wind.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman.

Mr. WYLIE. This is precisely why we need more debate on this 227-page, $20 biliion bill. There is a difference of opinion as to whether we came within the cap of budget reconciliation. I happen to think that we did not. The Office of Management and Budget thinks we did not. The Congressional Budget Office thinks we did not. So I think that what we should do is bring it up on the House floor and debate it.

Mr. SCHUMER. No. 1, just to correct my friend, the Congressional Budget Office, which is the one truly nonpartisan group of all he has mentioned, said we did live within the budget. OMB may have said not, but CBO said we did.

To say let us have H.R. 1 on the floor, is to say, let us have nothing. If the other body had actually put a housing bill on the floor, on its floor, we would not be in reconciliation. The gentleman from Ohio knows, the gentleman from Texas knows, the gentleman from Wisconsin knows, that even if we were to pass H.R. 1 here, nothing would happen. And as the good gentleman from Texas has said, the needs of millions of people in this country would not be addressed.

The CHAIRMAN pro tempore. The time of the gentleman from Texas [Mr. GONZALEZ] has expired.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 5 additional minutes to the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. I thank the gentleman for his generosity and time.

Mr. Chairman, as every one of the gentleman who is arguing against this knows, No. 1, we will get nothing if we go through H.R. 1, through the authorization process. We have been through that route 3 of the last 4 years. There will not be a bill from the other body, so you are telling us to whistle in the dark and not have an authorizing process.

No. 2, that we have indeed by the Budget Committee, and more importantly CBO, we have lived within the budget. Certainly when the new programs were started, because I was there at the negotiations, money was taken out of existing programs to try these itty-bitty new programs. I would appeal to the gentleman: Be fair. We are not trying to spend more money than we are supposed to; we are not trying to get around the mechanisms of this body, but what has happened is, we have been pushed against the wall, time and time and time again. We are trying to do something that is fair and trying to do something that is right: No. 1, without breaking the budget; No. 2, without violating the processes of this House, and the gentleman from Ohio's amendment, aided by some of my good colleagues who I know care about this issue, will simply push us back to where we started from.

Mr. GONZALEZ. Reclaiming my time, Mr. Chairman, I now yield time to the other distinguished gentleman from New York, who also has quite a bit of expertise on the question of homelessness. He chairs a subcommittee of the Committee on Government Operations. I am delighted the gentleman is here, and I now yield such time as he may consume to the gentleman from New York [Mr. WEISS].

Mr. WEISS. I thank my distinguished friend and colleague from Texas for yielding to me.

Mr. Chairman, I simply want to say a word about the hearings which my subcommittee conducted around this country. It should come as no surprise to any Member of this body, indeed to any American living in any kind of urban setting that there are up to 2 million homeless people in our country who do not know, from day to day, where they are going to live. Most of them live outside without any shelter whatsoever. Many of them live in improvised shelters which in many instances are almost as bad as living outside.

This piece of legislation contains, because of the efforts of the gentleman from Texas, the gentleman from Minnesota, a demonstration program which for the first time attempts to address the problem of providing through local and through charitable organizations a handle on providing some housing for Americans who are otherwise sleeping out in the elements in the worst kind of weather.

I commend the gentleman for his efforts in that regard. I would think that every Member of this body would want to be supportive of efforts to provide some decent minimal amount of shelter for Americans who do not have that shelter right now.

Mr. GONZALEZ. I thank the gentleman.

Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I think the RECORD ought to reflect that the gentleman's colleague sitting there next to him, Mr. VENTO, was the very first that really pushed hard after witnessing what he saw, the situation back in the State of Minnesota, and he ought to get credit. I do give him credit.

Then we went in and we did what we could and we were the subcommittee that first brought the question of homelessness before the Nation. The gentleman's subcommittee, and Government Operations, Mr. WEISS', did a masterful job in accumulating the data, and in going throughout the country and reaffirming what we knew 3 years ago was a real emerging problem.

□ 1400

Mr. LEVIN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Michigan.

Mr. LEVIN of Michigan. Mr. Chairman, I appreciate the distinguished chairman of the subcommittee yielding.

Mr Chairman, I simply would like to rise to support the gentleman's position and to support it heartily, making three quick points.

No. 1, it is ironic that the proponents of the amendment that would take housing components out of this bill are of the same party as those who control the other House, and if you could get a guarantee from the other House that a housing bill would go through that House——

Mr. WYLIE. Mr. Chairman, would the gentleman yield to me?

Mr. GONZALEZ. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I have talked to Senator GARN, and he indicated to me that the best procedure for getting a housing bill would be to do it separately, that if it comes over in the budget——

Mr. LEVIN of Michigan. That would be what?

Mr. WYLIE. That would be to do it separately and to debate a housing bill on the House floor; that if we pass a housing bill by this process in H.R. 3500, where we have over 227 pages and 20 billion dollars' worth of authorizations that will never be debated on the House floor, Chairman GARN is going to try to get H.R. 1 out in conference.

Mr. LEVIN of Michigan. Mr. Chairman, reclaiming the time that was yielded to me, let me say that we need more than a statement from the honorable Member of the other body as to what is the best procedure here. What we need is a written commitment supported by the leadership of the Senate with a firm commitment that a housing bill will be passed in the Senate and put into conference.

The CHAIRMAN. The time of the gentleman from Texas [Mr. GONZALES] has expired.

Mr. WYLIE. Mr. Chairman, I yield 2 minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. Mr. Chairman, I thank the gentleman from Ohio [Mr. WYLIE].

Mr. Chairman, I rise today in strong support of the Latta amendment and in opposition to the inclusion of H.R. 1 in the reconciliation bill.

What we have before us today is a bill authorizing new spending totaling over $3.5 billion over the next 3 years. Of this total, approximately $1 billion is in increased housing authorizations contained in title II. Now, as a member of the Subcommittee on Housing, I sat through literally months of subcommittee and full committee hearings and markup sessions of H.R. 1, the housing authorization bill. And while I may not agree with all of the provisions in H.R. 1, I do strongly believe that it is important for this House to consider a major housing bill this year. But my friends, this is not the same housing bill that the Banking Committee reported in June. In 25 instances, legislative language has been added or changed. These changes have never been subjected to a formal debate or vote. Nor is this reconciliation bill the proper forum for considering such a major piece of authorizing legislation. I ask you, what right do we have to bring a major authorization bill to the floor without the ability to amend it?

When the first concurrent resolution on the budget was adopted and the Banking Committee was charged with reconciliation instructions, the majority on the committee decided not to hold a formal session of the committee to determine how to meet these instructions. Instead there was only a caucus of the majority members. Only 30 members were eligible to attend that meeting. Thus, if the Latta amendment is not adopted today, it means that 405 Members of the House will have been effectively disenfranchised in determining priorities for our housing and community development programs this year.

During markup, I was strongly opposed to authorizing new programs in this time of necessary fiscal constraint and, consequently, I supported an amendment offered by Mr. WYLIE to strike new programs from the bill. Today, I am even more strongly opposed to authorizing new programs and new spending in what is supposed to be a deficit reduction bill. The Latta amendment gives us the real chance to save money today. And this I must stress for my colleagues concerned with the deficit.

The reconciliation process contains the only enforceable spending cuts agreed to this year. While I support the Gramm-Rudman amendment that is now in conference, I would remind the Members of this body that Gramm-Rudman is a long-range plan requiring future years of budgetary restraint. What we have before us today is the opportunity to exercise fiscal responsibility this year. The time to start deficit reduction is now.

In title II alone, the Latta amendment will strip out new programs and increases in existing programs totaling $809 million. While the revised H.R. 1 that is in title II meets budget authority and outlay targets of the budget resolution of fiscal year 1986, it does not meet the outlay targets for fiscal year 1987 and 1988. The Latta amendment will also strike legislative language containing other hidden costs.

Mr. Chairman, H.R. 1 was a controversial bill in both subcommittee and committee. It was the object of 125 amendments, 86 of which were adopted. I agree with the chairman of my committee and the ranking minority member that there is a great need to pass a substantive housing bill this year. But I am vehemently opposed to the process by which this body will be adopting housing legislation using this omnibus reconciliation bill as the vehicle. We should bring H.R. 1 to the floor. The chairman should seek a rule from the Rules Committee, bring the bill to the floor on its own, and allow the Members to work their will by offering proper amendments. I urge my colleagues to support Latta for deficit reduction and bring a separate housing bill to the floor so that we can all have the opportunity to consider the legislation on its merits.

Mr. WYLIE. Mr. Chairman, I thank the gentlewoman from New Jersey [Mrs. ROUKEMA] for her contribution, and she is right.

Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. Mr. Chairman, I thank my friend, the gentleman from Ohio, for yielding the time, but in 1 minute, it takes that long to read the title of this legislation.

First of all, Members on this side have said, "Let's be fair." I say, yes, let us be fair, and let us be honest.

This is $20 billion—not $20 million but $20 billion. That is 10 percent of our total budget; that is the amount of dollars we are dealing with here.

I am opposed to this bill coming up in this fashion for two reasons: No. 1, this Reconciliation Act is not the proper vehicle to consider this substantive and controversial legislation. As the chairman of our committee pointed out, we had some 95 to 97 substantive amendments that were debated in committee on this legislation.

With this reconciliation we have had no markup, we have had no real committee deliberations, and it just is not fair to the taxpayers.

We have a document here that is over 200 pages, with 146 sections in the bill, and we are asked to pass this legislation in the Reconciliation Act.

The CHAIRMAN. The time of the gentleman from Wisconsin [Mr. ROTH] has expired.

Mr. ROTH. Mr. Chairman, I ask the gentleman from Ohio [Mr. WYLIE] for an additional 10 minutes.

Mr. WYLIE. I am sorry, but I do not have it. I do not have 10 minutes to yield, Mr. Chairman, but I do yield 30 additional seconds to the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. Mr. Chairman, I appreciate the generosity of the gentleman from Ohio.

This essentially is a very ineffective way to legislate. We have an obligation here to the American taxpayer. How can we say we are going to be fair to the American taxpayer when we have H.R. 1, the most important piece of legislation, according to that side of the aisle—that is why it has the number, H.R. 1—and we are going to pass it in the reconciliation bill? This is being totally unfair, totally dishonest.

The other thing is that we are not being fair to the committee members. We worked day after day, day after day on this legislation, and now just to take all this work and throw it in the wastepaper basket and say we are going to pass it in this manner, it is totally unfair not only to the American taxpayer but to the Members who worked so very hard on this committee.

Mr. WYLIE. Mr. Chairman, I thank the gentleman from Wisconsin [Mr. ROTH] for his contribution.

Mr. Chairman, I yield 1 minute to the gentleman from Indiana [Mr. HILER].

Mr. HILER. Mr. Chairman, I rise to voice my support for the Latta amendment to delete H.R. 1 from the provisions of this bill.

There are many aspects of H.R. 1 that I support, amendments that I voted for. I supported the amendment offered by the gentleman from Texas [Mr. BARTLETT] in committee to bring enterprise zones into play, something that many of us have wanted to see on this floor for a very, very long time. I supported the revised formula for UDAG, which clearly will be a better formula than what exists today. I think there could be a better formula devised, but the formula in the bill for UDAG will be better than existing law. We expand the use of vouchers in H.R. 1, and I am supportive of that.

But there is no reason in the world why the rest of my colleagues in the House of Representatives should not have the opportunity to offer amendments and to debate H.R. 1.

The CHAIRMAN. The time of the gentleman from Indiana [Mr. HILER] has expired.

Mr. WYLIE. Mr. Chairman, I yield 30 additional seconds to the gentleman from Indiana [Mr. HILER].

Mr. HILER. Mr. Chairman, to have H.R. 1 get 20 minutes of debate during the general debate on the reconciliation bill and only another 5 or 10 minutes or so when we are actually debating the Latta amendment is not conscionable. We should not be considering substantive legislation that will reathorize all the housing programs and urban development programs that we have in a reconciliation bill.

The Members can support merits of H.R. 1, but they should support the Latta amendment which will strike H.R. 1 from this bill so we could treat it like every other substantive piece of legislation in this body on the floor of the House and take up nothing but H.R. 1.

The CHAIRMAN. The time of the gentleman from Indiana [Mr. HILER] has expired.

Mr. WYLIE. Mr. Chairman, I yield 2 minutes to the ranking minority member of the Subcommittee on Housing and Community Development, the gentleman from Connecticut [Mr. MCKINNEY].

Mr. MCKINNEY. Mr. Chairman, let us face it, this is no way to take up this legislation, and reconciliation is no way to do anything, but we will not throw the housing bill into the trashcan, as my good friend suggested earlier. The Senate of the United States has thrown it into the trashcan, as my good friend suggested earlier. The Senate of the United States has thrown it into the trashcan, and we have got to do something in housing for America.

I hear a lot about how much it is going to cost. My goodness gracious, believe it or not, the total authorized in title II is under what we appropriated for HUD. Is that some kind of major sin?

It is a very strange thing, but everyone says, "New, new, new." Is there something wrong with "new"? I thought we were sent here to legislate. I really did. I thought we were sent here to turn things around and say that maybe the Nehemiah program would be better than section 8. We know this House is not quite operating on a straight track and I agree. We took up the appropriation before the authorization.

We agree on that, but then we have my friends and colleagues from the other body that I cannot discuss, who have a chairman who says, "I don't like going out of the regular order." But we have several other Members of that body who belong to my political party—and I hope the Senator from New York is one of them—who say, "Do it."

□ 1410

This is our chance. This Nation is built on housing. It is built on owning your own home. This particular H.R. 1 is under the appropriation level. It authorizes exactly what the budget figure that Chairman GRAY and his committee agreed on says. It has new and innovative programs. It improves the UDAG formula. It does a great many things that need to be done. To sit here and say new is bad shows that maybe we need a new Congress.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. MCKINNEY. Yes.

Mr. VENTO. Mr. Chairman, I want to commend the gentleman for his statement. I would point out that we had lengthy hearings, over a month of hearings and markup in the committee and subcommittee and that should be a strength to this bill and a reason not to rehash everything done in the committee on this floor.

Mr. WYLIE. Mr. Chairman, what is the situation on time?

The CHAIRMAN. The gentleman from Ohio [Mr. WYLIE] has 8 minutes remaining, and the gentleman from Texas [Mr. GONZALEZ] has no time remaining.

PARLIAMENTARY INQUIRY

Mr. GRAY of Pennsylvania. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. GRAY of Pennsylvania. Mr. Chairman, it is my understanding that we do have additional time that we can allocate, even though this gentleman only asked for 15 minutes originally and yielded another 5, which therefore was 20 minutes to this section on banking.

I now see that the distinguished chairman of the Banking Committee is on the floor, as well as one of the ranking members, who would like to have an opportunity to speak; so I do plan out of the total allotment of our time to yield additional time to the distinguished chairman of the Banking Committee, the gentleman from Rhode Island [Mr. ST GERMAIN], and also to the gentleman from Maryland [Mr. MITCHELL] and 1 additional minute to the gentleman from New York [Mr. SCHUMER].

The CHAIRMAN. The gentleman has stated it correctly, that he has additional time that he may allocate.

For the present, the time of the gentleman from Texas has expired.

The gentleman from Ohio [Mr. WYLIE] has 8 minutes remaining.

Mr. WYLIE. Mr. Chairman, I yield 2 minutes to the gentleman from Florida [Mr. MCCOLLUM].

Mr. McCOLLUM. Mr. Chairman, this is absolutely incredible. We are here taking a $20 billion bill, this huge size of our budget, and being asked to swallow it on the House floor in a reconciliation package with no chance at all for the Members to vote on amendments.

This is an incredible amount of money, a $20 billion plus package; no chance for amendments. It is ridiculous.

In all the time that I have been here, I have never seen anything more ridiculous than this. We are talking about something that ought to take 3 days of solid debate on the floor of this House.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. McCOLLUM. Not now.

Mr. SCHUMER. I would like to know how the gentleman voted on Gramm-Latta for $300 billion.

Mr. McCOLLUM. We are talking about something that ought to take 3 days of solid debate on the floor of this House to cover 100 amendments that will probably be offered.

Let me give you one example. I offered an amendment in committee that I think ought to be considered on the floor of this House that I think we could probably pass if we had that chance. There is $150 million in this particular housing bill that would go toward HODAG for new construction of housing for low-income folks. The problem is that 80 cents of the dollar goes to developers and only 20 cents goes to the low-income people. If we had adopted an amendment of mine, instead of having 3,000 units for low-income housing amongst that money for $150 million, we could have had 27,000 units of low-income housing through a Rehab Program.

We have not had an opportunity and we will not have one under this reconciliation proposal to have the full House consider numerous ways that we could give better housing to low-income Americans to get a better bang for the dollar, to give the Members and the taxpayers of this country a chance to get some truly workable housing programs at reduced cost, and that is what it is all about.

We are trying to save money and passing a balanced budget proposal is part of the debt ceiling this time, while we on the other side of the coin are slapping the taxpayers in the face by saying, "OK, we are going to pass without even really considering it, no amendments allowed, $20 billion in a new housing bill."

I call on my colleagues to vote for the Latta amendment to strike the housing bill from this particular reconciliation proposal and put some sense back into what we are doing.

Mr. WYLIE. Mr. Chairman, I yield 4 minutes to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. Mr. Chairman, I thank the gentleman for yielding.

This is an extraordinarily serious amendment that will be on the floor, the Latta amendment, and I rise as many have in strong support.

I would say on the matter of fairness that we have heard today, I listened to the chairman of the subcommittee, whom I respect a great deal, and he said that he wanted to bring the housing bill up.

I will go to the Rules Committee with the chairman tomorrow, Friday, Monday, to bring the housing bill to the floor under regular order. Let us go to the Rules Committee. Let us get a rule. Let us bring it to the floor and let us legislate.

Given the nature of this debate, 20 minutes to a side, for a 227-page piece of legislation, larger in terms of pages, H.R. 3500, than the rest of the reconciliation package.

This is a single legislative item that consumed days, weeks, months of hearings; 125 amendments offered in committee, many of those amendments were accepted or rejected on the narrowest of rollcall votes.

I think that this floor, this Congress, needs to consider those housing issues, those reform issues.

Now, can we bring the housing bill to the floor and get a vote on it and consider it and make it a matter of legislative policy? You bet we can.

Can we get housing issues considered by both bodies? You bet we can, but we cannot do it through a budget process that is separate, that allocates 20 minutes for the debate.

In fact, we have a letter from the chairman of the committee of the other body, who says bring it in the regular legislative process and we will go to committee and we will go to conference.

Mr. LEVIN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. Rather than yield to the gentleman from Michigan, I would read it into the RECORD.

Mr. LEVIN of Michigan. I would like to have it read.

Mr. BARTLETT. I would read into the RECORD a letter dated today, signed by Senator JAKE GARN, the committee chairman in the other body:

> If the House passes a separate housing bill under the normal procedures, I am sure that the Senate will go to a conference and consider substantive housing law changes.

The fact of the matter is, housing is too big an issue to do in 20 minutes. The status quo of housing, as we have heard from both sides of the aisle, is not worth coming to the floor and defending and simply reauthorizing.

Does H.R. 1 contain some positive changes? Yes; it does.

Does H.R. 1 go far enough in terms of reforms of home ownership, of tenant management, of making those decisions to repair the dilapidated units that we have, rather than to build now units, those decisions of security and livability? No; it does not.

But the floor of this Congress can make those decisions. The floor of this Congress was asked under the appropriations guidelines to shortcircuit the process and the floor of the Congress decided under appropriations not to do so, decided to say, "Wait a minute," by two separate votes bring back the authorization legislation back to the floor and then we can legislate.

The House has already decided this issue once under appropriations. This is not the first time that an end run has been tried to shortcircuit the process.

I say, bring the housing bill back to this floor. Bring it tomorrow. Bring it Friday. Bring it next Monday or next Tuesday. Let us debate it. Let us reform it. Let us amend it. Let us let it pass or fail on its own weight. Let us give it the priority that it deserves. I thank everyone on this side of the aisle and on both sides of the aisle would agree with that. I think in that way we can make those reform issues, those decisions.

One other point, Mr. Chairman, and I thank the gentleman for yielding me so much time. There are funding priority issues to be made which have not been resolved by this House in the past, including that this country has 80,000 vacant units of public housing. We should be taking the $300 million in H.R. 1 from the new unit construction and using that $300 million and other funds to repair the units that are dilapidated and in need of repair that we already have. The House has never been called upon to make that decision and cannot unless the Latta amendment passes.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Maryland [Mr. MITCHELL], who is the ranking member of the Committee on Banking, Finance, and Urban Affairs.

Mr. MITCHELL. Mr. Chairman, I have heard the word incredible used about this process, and for me that is almost hypocritical use. In the wee hours of the night a few years ago we rammed through this House a monstrosity that made no sense to anybody, that was one of the most costly monstrosities that we have ever moved. That was the infamous Gramm-Latta legislation, we rammed it through, we did not know what was in it, we could not even read it. The ink was not dry on it. There were notes scribbled in pencil on it.

A whole lot of folks were screaming about the incredible vote for that monstrosity.

Now, what is all the hue and cry about this bill? H.R. 1 is in reconcilia-

tion where it belongs. Why? Because there are some new programs?

What do you intend to do about the homeless in this Nation, let them continue to sleep in the street? Is that what America is about?

What do you intend to do about those being forced to do workfare now, who need day care for their children? Are we going to send their children out on the streets so that they can become juvenile delinquents?

It is incredible that the sense of humanity that was once so high in this Nation with regard to the commitment to provide safe, sanitary and decent housing for our citizens who cannot afford it, that that commitment has eroded to the point where now we are talking about some procedural debate in order to try to cut even further into this Nation's need, really, to meet the housing problems of our Nation.

Vote it down. You had your shot under Gramm-Latta a few years ago. You almost destroyed the housing program. The little that is left now you want to destroy that, too, and I do not think we should do it.

Vote the Latta amendment down. It does not make any sense. H.R. 1 belongs in reconciliation. That is where it should be and anybody who argues in another direction is arguing only for the opportunity to once again show their contempt and their callousness toward those who are disadvantaged in this Nation.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 1 minute to the gentleman from New York [Mr. SCHUMER], who is a member of the Committee on Banking, Finance and Urban Affairs.

Mr. SCHUMER. Mr. Chairman, I thank the Chairman. I will be very brief.

I just would wish to refer all Members to a letter to Hon. FERNAND ST GERMAIN, copy to the ranking minority Member, the gentleman from Ohio [Mr. WYLIE], from the Congressional Budget Office that says that this reconciliation is within budget, dated October 2, 1985. The letter is available.

I yield to the good gentleman from California [Mr. TORRES].

Mr. TORRES. Mr. Chairman, I thank the gentleman.

Mr. McKINNEY. Mr. Chairman, will the gentleman yield?

Mr. TORRES. Certainly, I yield to the gentleman from Connecticut.

Mr. McKINNEY. Mr. Chairman, would the gentleman from California engage the gentleman from Connecticut in a brief colloquy?

Mr. TORRES. I would be happy to do that.

Mr. McKINNEY. We have included a provision in H.R. 3500 that provides for timely payment of subcontractors. This provision, section 2365, states:

It is the policy of the United States that each prime contractor of the Department of Housing and Urban Development should establish procedures to ensure the timely payment of amounts due pursuant to the terms of the subcontracts of such prime contractor.

I wonder whether the gentleman from California could provide some clarification here. I am concerned that this language will be interpreted to require general or prime contractors to pay their subcontractors regardless of whether they have received payment from the owner through HUD. Such an interpretation, whether by a court or HUD through regulations, would be contrary to the general industry practice that the subcontractor is paid by the prime contractor after the prime contractor is paid by the owner.

Mr. TORRES. As the author of this provision, I assure the gentleman from Connecticut that it is not my intent to require general or prime contractors to pay their subcontractors regardless of whether they have received payment from the owner through HUD. The intent of the provision is to ensure that prime contractors pay their subcontractors in a timely manner once they have received payment from the owner.

Mr. McKINNEY. I thank the gentleman from California for that clarification.

Mr. WYLIE. Mr. Chairman, how much time do I have left?

The CHAIRMAN. The gentleman for Ohio [Mr. WYLIE] has 2 minutes remaining.

Mr. WYLIE. And how much does the other side have?

The CHAIRMAN. The gentleman from Pennsylvania [Mr. GRAY], has 1 hour and 25 minutes remaining.

Mr. GRAY of Pennsylvania. Mr. Chairman, I would inform the gentleman that I intend to yield 2 minutes to the distinguished chairman of the Committee on Banking, Finance and Urban Affairs, following the closing remarks of the gentleman on the other side of the aisle.

Mr. WYLIE. Mr. Chairman, I yield myself the remaining 2 minutes.

Mr. Chairman, we have heard a very spirited and I think very informative debate here on whether H.R. 1 should be included in the budget reconciliation bill, H.R. 3500.

I think the debate points up the fact that we really do need more time.

Now, the gentleman from New York says that this is within the budget figures. I say that our figures show from the Congressional Budget Office that in the out years there is $300 million at least over the budget in the fiscal year 1987 and fiscal year 1988.

□ 1425

But the point I want to make is that it does include some new programs which were the subject of debate in the Banking Committee, and these new programs, I think, deserve an airing here on the House floor so that all 435 Members of the House can decide which new programs, if we are going to have new programs, should be put in H.R. 1.

I do think, as someone mentioned, we do not follow necessarily the 1981 reconciliation bill. As a matter of fact, we are reversing some of the procedures which were followed in the budget reconciliation bill in 1981, and I am not necessarily defending that procedure, but we did make some caps and we did some things in that bill which would be repealed in essence by this bill, and I would like an opportunity to debate that point.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I would be glad to yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding.

Mr. Chairman, in the remaining few seconds, which demonstrates the difficulty of this debate, I would just put on record some but not all of the issues that remain to be resolved.

This House needs to resolve the HODAG Program, which has been $77,000 per unit for low-income housing. We need to resolve whether we should be building 5,000 more units of new housing or repairing the some 200,000 units of housing that are in need of repair. We need to resolve and have for the first time a vote on the UDAG formula, which at the present time skewered most of the funds.

Mr. WYLIE. Mr. Chairman, I urge the Members to vote for the Latta amendment, which would eliminate all extraneous provisions in the bill pertaining to housing.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 2 minutes to the distinguished chairman of the Committee on Banking, Finance and Urban Affairs, the gentleman from Rhode Island [Mr. ST GERMAIN].

Mr. ST GERMAIN. I thank the gentleman for yielding this time to me.

Mr. Chairman, I think this is, frankly, a very sad situation. I think in Texas and in Florida they have Indians, and Indians in the old days used to use the expression, "White man speak with forked tongue," meaning out of both sides of his or her mouth. Are we ever hearing it now.

The very people who shoved Gramm-Latta down the throats, not our throats, down the throats of the American people, brought that monstrosity up here, insisted on a vote, and did us in, did the American people in, without anyone knowing what was in it. As I recall it, there were some notes in there about who was going to go out and get the coffee, but sadly, more sadly than anything, things like saying to the blind and to the disabled, "You can no longer sell magazines and newspapers in Federal buildings."

That is what is called legislating with heart, with compassion. Mr. Chairman, in this reconciliation we asked and have had included H.R. 1. What does H.R. 1 do? Yes, it has some new programs in it. Out of $20.3 billion or $20.6 billion, the new programs amount to $500 million. Frankly, the section 8 program that we are all concerned about because of its cost, for those who are new arrivals, let me tell you where it came from. It came from that side of the aisle.

The CHAIRMAN. The time of the gentleman from Rhode Island [Mr. ST GERMAIN] has expired.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 1 additional minute to the gentleman from Rhode Island [Mr. ST GERMAIN].

Mr. ST GERMAIN. I thank the gentleman for yielding this additional time to me.

Mr. Chairman, in this legislation we have projects like Nehemiah. Why is Nehemiah named Nehemiah? Because it is demonstrated already. It is an actuality. We are not talking about a fiction. It is an actuality.

We have programs in here that are not new programs; they are people programs to help out public housing and low-income housing.

Ladies and gentlemen of the House, we may well lose, but I have news here: We will be back. We will be back, and I am going to take a close look at requests to send hundreds of millions and billions of dollars to foreign countries if we cannot have compassion for our people here. If you want to play hard ball, we are going to play hard ball, ladies and gentlemen. Rest assured to that.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding. I appreciate it.

Mr. Chairman, I think we should bring a housing bill out.

The CHAIRMAN. The time of the gentleman from Rhode Island [Mr. ST GERMAIN] has expired.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 30 seconds to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise to support the position of the House Budget Committee, which labored long and hard to achieve savings on the civil service side of the budget process without further destroying the morale of the Federal workforce.

The proposal offered by the Budget Committee would save more than $3 billion in fiscal year 1986 and more than $12.5 billion in the 3 fiscal years 1986–88 in civil service and postal areas.

It would achieve the savings by:

Freezing Federal civilian pay for 1986 and providing a 5-percent increase in 1987 and another 5-percent hike in 1988 and extending for another 3 years the "2,087 hour" pay computation factor.

Requiring the Office of Personnel Management to determine the minimum level of necessary reserves which should be held by FEHBP insurance carriers and requiring each carrier to refund to the FEHBP fund any excess reserves.

Authorizing only $749 million in fiscal year 1986 for the revenue foregone appropriation—an amount $83 million below the Congressional Budget Office baseline.

These are big savings. And they are real. They are the result of hard work and long hours on the part of members of the Committee on Post Office and Civil Service, which approved the recommendations 17 to 0. In direct and indirect savings they more than meet the committee's reconciliation instructions.

I would say this was a significant achievement. But to some, sadly, it is not enough. Despite all the Budget Committee and the Post Office and Civil Service Committee have done, there are those who want more.

In the Latta substitute there is an attempt to replace a sound and thoughtful solution with a proposal that is unwise, unfair, and grossly inaccurate in its savings assumptions.

Mr. LATTA wants to pick and choose. In my committee's jurisdiction he wants to eliminate the 5-percent pay increases in 1987 and 1988, without requiring agencies to absorb any of the increase, and reimpose the 75-percent FEHBP cap.

He does all this on the pretense that it will save more money. This is a claim without foundation.

The pay-increase provisions of the Latta substitute do not achieve more savings than recommendations proposed by the Post Office and Civil Service Committee [POCS]. According to the Congressional Budget Office, the Latta substitute saves $19 million less than POCS proposed over the next 3 years.

The Latta pay provisions are identical to the Senate reconciliation pay provisions and are based on the same assumptions. Both the Senate and the Latta provisions assume full funding of a 3.8-percent pay increase in fiscal year 1987 and a 4.7-percent increase in fiscal year 1988. We, on the other hand, mandate a 5-percent increase in both fiscal 1987 and 1988 and require agencies to absorb one-third of the cost.

Any claim that the Latta substitute saves more in this area simply cannot be supported.

In addition to using exaggerated and questionable savings figures, the proposed substitute undermines the entire committee process. Of what value is thoughtful, careful deliberation that can be blithely pushed aside in a moment of recklessness?

Are we simply to ignore the fact that members of the Post Office and Civil Service Committee voted 17 to 0 after countless hours of studying the issues? If this is what we want to do, we might just as weil scrap the committee system.

We have here a situation where knowledgeable members of a committee worked hard and made tough decisions to reach a difficult objective. Are we to say their work and expertise counts for nothing?

After all is said and done, however, the most important reason for voting against the Latta substitute is that it does just the opposite of what it purports to do: it costs money instead of saving it—to the tune of $19 million.

What's more—and this is hard to figure—Federal workers get less even though it costs the people more.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 22 minutes to the chairman of the Committee on Education and Labor, the gentleman from California [Mr. HAWKINS], and I ask unanimous consent that the gentleman be permitted to yield time.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. HAWKINS. Mr. Chairman, I yield myself such time as I may consume.

I thank the chairman of the Committee on the Budget for his generous allotment of this time to the majority members of the Committee on Education and Labor.

Mr. Chairman, the budget resolution for fiscal year 1986 required the Committee on Education and Labor to achieve savings of $2.6 billion in budget authority and $2.6 billion in outlays between fiscal year 1986–88. The committee's actions resulted in savings of $68 million more than the resolution required. The committee made changes in the Guaranteed Student Loan Program, raised the premium for the Pension Benefit Guarantee Corporation, and, in the context of the authorization for the Department of Defense reluctantly accepted changes in the overtime provisions included in the Walsh-Healey Act.

There has, however, been a lack of symmetry in the budget process which is very troublesome. The budget resolution, passed by both Houses, with unusual bipartisan support, assumed that the poor would be held harmless from additional efforts at deficit reduction. The Congress and members of both parties agreed that the poor had suffered enough. Yet, by the time the House acted on the Labor-HHS appropriations bill for fiscal year 1986, this

consensus had disappeared. The priorities included in the budget resolution were absent from the appropriations bill.

This simple fact raises several questions about the process.

If the budget resolution can be so easily ignored, why should we spend 7 months struggling with it? If the Appropriations Committee can substitute its own spending ceilings and priorities for those in the budget resolution, why do we need a budget process? If the Budget Committee, and the House, will not defend its priorities, why should we support its resolutions and comply with its reconciliation instructions?

The treatment of the disadvantaged also raises questions about us.

There has been no dramatic improvement in the economy since March that renders these programs less vital. If anything, the economic situation has become more precarious. We need these programs every bit as much as we did in March and as we did in August when the resolution passed. We gather here to bemoan our lack of competitiveness, our inability to respond creatively to dislocations caused by the trade imbalance, the chronic unemployment of our youth, exploding health care costs, and so forth. What happens? We freeze the very education programs we all know we need to lead the world into the 21st century, we rely on an imperfect market to find jobs for our unemployed, we write off our kids, and we underfund the WIC Program which we know conclusively saves $3 for every $1 we invest in it. Our focus on the bottom line is myopic.

It should be clear to everybody that the budget process only affects direct spending. While we freeze programs for the poor, we let tax expenditures grow. Twenty-seven years ago, we had $37 billion worth of tax preferences in the Code. Today we have $370 billion. Half the income in the country is not subject to the income tax because of legal preferences in the Tax Code. Further, between 1981 and 1983, 65 of this Nation's most profitable corporations paid no income tax at all.

It is also appropriate to note that unemployment is still at unacceptably high levels in historical terms. If we focused our efforts on creating growth rather than imposing austerity we could reduce the deficit constructively rather than destructively. Even a 1-percent drop in joblessness would reduce the deficit by some $30 billion. Full employment would certainly render the deficit controllable as well as lay the foundation for the future that we must have if we are to remain great.

This reconciliation bill jeopardizes the budget process because it exposes its flaws for all to see.

Instead of cutting programs that work; instead of continuing the misguided attempts of the last 5 years to reduce the deficit on the backs of the poor; instead of putting our fate in the hands of unelected officials of the Federal Reserve; and instead of focusing only on the spending portion of the budget, we ought to apply our wisdom and experience to the issue of insuring stable, noninflationary economic growth. This means monetary as well as fiscal policy and revenues as well as spending.

I reserve the balance of my time.

□ 1435

The CHAIRMAN. The gentleman from California [Mr. HAWKINS] has consumed 7 minutes.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 13 minutes to the gentleman from Vermont [Mr. JEFFORDS], the ranking minority member of the Committee on Education and Labor, and I ask unanimous consent that he be allowed to yield time.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Mr. JEFFORDS. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding.

While this is not exactly on the topic that the gentleman is about to discuss, I think it is important to put on the record, just for the information of the membership, and so that there can be no doubt about some of the information that will be going into Members' districts in the next few days, if you vote for this bill and you do not vote for the Latta amendment, you are voting for a congressional pay raise. The Latta amendment is the only alternative on the floor that gives us a chance to knock out the congressional pay raise that has been put into this bill.

I just want the Members to be aware of that because we often hear out in the country after one of these bills passes, "Oh, I didn't know that was in there." "Oh, that comes as great news to me." They are going back to their districts and telling their constituents that somehow this congressional pay raise slipped by them.

Well, I am telling them right now, in this bill is a $7,500 pay raise for Members of Congress over the next 2 years. It is a 5-percent-a-year increase. It will raise congressional pay to over $82,000 in the next 2 years.

It is in there. If you do not vote for the Latta amendment, you are, in effect, voting for a congressional pay increase, and you had better be prepared to answer for it in your districts.

Again, I thank the gentleman for yielding.

Mr. JEFFORDS. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania [Mr. GOODLING].

Mr. GOODLING. I thank the gentleman for yielding me this time.

First of all, I want to congratulate the chairman of our committee, the gentleman from California [Mr. HAWKINS], and the chairman of my subcommittee, the gentleman from Michigan [Mr. FORD], and the ranking member, the gentleman from Vermont [Mr. JEFFORDS], as well as the gentleman from Missouri [Mr. COLEMAN].

Basically we brought to the Budget Committee reconciliation in the way it should be brought, almost, in that as a matter of fact, we did meet our financial obligations in relationship to the budget. My concern as a new Budget Committee member is the fact that we did do some things that did not cost any additional money; we did do some things that should have been done, but my concern is that they were done in this process rather than through the authorization process in such areas as the discounting of income from foreclosures or bankruptcies, Sallie Mae holdings, insurance premiums, lenders of last resort.

These are very minor things in relationship to what has happened in reconciliation. My concern is that every Member of Congress, as a matter of fact, not only has the right to vote on any new program, any additional program, any changes in programs, but they have a responsibility to do it individually.

What we do in reconciliation is take that opportunity away from individual Members because you get one opportunity, you vote up or down on reconciliation. You do not get an opportunity then to vote on authorizations as you should do or changes in programs. That is my concern.

Ours are very minor, they are needed, but nevertheless we could have gone through the proper process in order to do that. I think it is dangerous to be doing that, and it does not matter whether it is 1981, whether either side has a 2-to-1 majority at that time, or whether it is 1982 and either side has a 2-to-1 majority, or 1983, 1984 or 1985. It does not matter which year it is. The fact is, if we are going to do reconciliation correctly, and it has any impact on trying to do anything in relationship to the budget, then we should try to steer clear, and we as a Budget Committee should make sure, as a matter of fact, that you cannot authorize, you cannot change programs, that you cannot add new programs, and that you cannot add additional money through the reconciliation process.

I again compliment our committee for at least doing what some others have not done. We have hit the budget figure. We have hit the budget target,

whether it is in child nutrition, whether it is school lunch, whether it is higher education, whatever it is. And I particularly compliment those responsible for the higher education part of our bill, because it is they who had to make the cuts in order to bring it down to meet the budget.

So again, we did well. But I think in reconciliation we have to make very, very sure that everybody has the opportunity to continue to register their individual votes on individual programs.

Mr. JEFFORDS. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. Mr. Chairman, I rise to point out that the Education and Labor Committee has more than done its job in dealing with this reconciliation process. I think special commendations are in order for both the chairman and the ranking member of the full committee and the chairman and ranking member of our Subcommittee on Postsecondary Education in particular.

The Education and Labor Committee was instructed to come up with savings over 3 years of $2.6 billion in authority and $2.57 billion in outlays. The fact is, we came up with $2,630 million in authority and $252,580 million in budget outlays over that 3-year period. We exceeded our overall targets assigned to us by the Budget Committee.

I would point out also that the numbers from the Education and Labor Committee are real numbers. There are no accusations that we are dealing with smoke and mirrors.

In particular, I want to focus, however, on the postsecondary area, the student loan area. We had a target of $800 million. We came up with savings over 3 years of $868 million.

In addition to that, I think we made a couple of noncost items that are very important. The most important that I would bring to the attention of my colleagues, from a rural perspective, is a provision offered by my colleague from Iowa, Mr. TAUKE, which would, in calculating eligibility for Pell grants and guaranteed student loans, allow for an exclusion from income the proceeds from the sale of a farm under bankruptcy foreclosure or forfeiture. This is a very real problem in the Midwest during our agricultural crisis, and I think an important addition that does not have any, or at least any significant cost savings, if any at all.

Above and beyond that, I want to assure the student community across this country that the savings achieved in reconciliation in the higher education area are savings which will not eliminate any eligible student from the Guaranteed Student Loan Program. We do require that every student, not just those coming from families above $30,000 income, must go through the financial needs test. But that again will not eliminate eligibility for any student who is truly needy.

Above and beyond that, one of our major savings areas is the area of requiring multiple disbursement of guaranteed student loans. Rather than giving all of the money up front, give the money periodically, by semester, quarter, whatever the case might be, so if a student drops out in the first or second week, they do not get all of the money. That alone over 3 years will save some $225 million.

In addition, we do such things as recalling $50 million in State agency advances in fiscal year 1988. We are giving the States a couple of years to deal with that area and come up with a process where we can withdraw that money from those States which have programs which are more than financially solvent.

Mr. JEFFORDS. Mr. Chairman, I yield 2 minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. Mr. Chairman, I rise to support the ERISA single employer termination insurance provisions contained under title III.

Our Committee on Education and Labor has taken the lead in calling for a national retirement income policy which is responsive to the present and future needs of our Nation's retirees. The ERISA title IV Termination Insurance Program is certainly a cornerstone of this policy, and the efforts today to shore up the single employer fund will help assure that the ERISA foundation remains a solid one.

Mr. Chairman, I want to commend the chairman, Mr. CLAY of Missouri and the other members of our committee who have worked on a bipartisan basis over the past 4 years to design legislation which addresses the complex problems facing the Pension Benefit Guaranty Corporation [PBGC] in its financing of employee and retiree benefits under terminated single employer pension plans. Additionally I commend the Secretary of Labor, Bill Brock, the new Executive Director of the PBGC, Kathy Utgoff, and the other administration officials who met untiringly, who remain convinced of the need for legislation, and who kept an open mind about the specific language of the reforms until a workable compromise could be fashioned. I am satisfied at this point that the reform package is reasonable, responsible, and will prove workable in helping reduce PBGC financing needs in the future.

The provisions adopted by the Committee on Education and Labor which are contained in subtitles B and C of title III strengthen the Single-Employer Termination Insurance Program in three ways: First, by placing the PBGC back on a sound financial footing by increasing the premium paid by covered plans; second, by restructuring the system to limit access to PBGC assistance to only those cases in which workers' pensions are jeopardized because their employers are in genuine financial difficulty; and third, by assuring that, to the greatest extent possible, workers receive their full earned benefits when plans terminate.

The actuarial deficit of the PBGC is fast approaching $1 billion and, without further action, will reach $6 billion by the end of this century. To meet these demands, as well as the directives of the Committee on Education and Labor in the House budget resolution, the legislation increases the premium for the Single-Employer Termination Insurance Program from its present $2.60 per capita to $8.50 for plan years beginning in 1986.

But to merely enact a premium increase is not enough. After nearly a half-decade of study and debate it has been clearly demonstrated that there is a pressing need for reforms as well, to ensure that access to the insurance program is limited to companies which are faced with genuine hardships. As a result the legislation includes features that will discourage the dumping of pension liabilities onto the PBGC.

This bill closes the loopholes that have permitted unjustified drains on the insurance program.

Therefore one provision of subtitle C divides all plan terminations into two new categories called either a standard termination or distress termination. A standard termination proceeds with minimal PBGC involvement when plan assets are sufficient to cover all plan vested benefits. A distress termination proceeds as under current law with the PBGC playing a major role, except that to avoid a dumping of liability on the PBGC by ongoing employers, an employer would have to meet one of four financial distress tests in order to terminate. A 60-day notice of termination would be required.

Another provision increases the chances that the PBGC be made whole in the event of a distress termination by requiring that an additional 10-percent pretax profits interest be paid to the PBGC for up to 10 years to cover any funding shortfall in the event the current law employer liability limit of 30 percent of net worth is insufficient. A related 5-percent pretax profits interest for up to 10 years, payable to a termination trust, would also be triggered if plan assets are insufficient to pay all plan vested benefits; that is, benefits in excess of those guaranteed by the PBGC.

A provision, designed to protect the PBGC, allows the IRS to obtain security for the plan in the event a waiver of the minimum funding standard is granted. The IRS must request PBGC's views and consider them in obtaining such security.

To close another loophole, the measure authorizes the PBGC to assess liability on persons who have undertaken transactions for the purpose of evading liability. This authority is limited to transactions taken within 5 years prior to a plan termination.

Finally, the measure contains a provision which codifies the present law right of employers to freeze plan benefits—except that vesting based on future service continues—thus allowing them to fix their benefit liabilities and fund for them over time and assure that workers receive their full earned benefits when plans terminate.

While these provisions of the single-employer reform package are only protective in nature, it is intended that their application help avoid the kind of future program funding crisis that faced Social Security only a few years ago. In summary the case for the enactment of these single employer termination insurance reforms is a compelling one.

The Committee on Education and Labor title also contains subtitle D—continuation coverage under group health plans. These provisions amend title I of ERISA to require group health care plans to include a 5-year continuation option for widowed, divorced, and Medicare ineligible spouses and dependent children. Plans could require such persons to pay the cost of such coverage. These ERISA provisions, although solely within the jurisdiction of the Committee on Education and Labor, were added to the bill under exceptional circumstances and are deserving of further scrutiny during conference, since they did not have the benefit of hearings at either the subcommittee or full committee level.

Mr. JEFFORDS. Mr. Chairman, I yield myself the balance of my time.

The CHAIRMAN. The gentleman from Vermont [Mr. JEFFORDS] is recognized for 4 minutes.

□ 1450

Mr. JEFFORDS. Mr. Chairman, I would like to talk about the provisions in reconciliation which are under the jurisdiction of the Committee on Education and Labor.

First of all, the higher education provisions and second, the pension reform provisions. As we all know, this country's education system has been labeled "at risk," and in the view of our committee it is important that we do nothing to make things worse. Hopefully we will make things better.

First of all with respect to the higher education provisions, I think it is important for everyone to recognize that, notwithstanding many of the statements that were made earlier, that severe problems may result this year with respect to the availability of loans and grants to our college students. Such is not the case with respect to our actions in reconciliation.

What we have done is met our commitment. We have done what is responsible and necessary to bring our provisions within budget. There are only two provisions which do affect students to any significant degree: multiple disbursement and tighter loan collection provisions.

Specifically, this package of recommendations meets and may even exceed the targets established by the Budget Committee. In addition, I am pleased to note that the committee adopted the Coleman loan default prevention bill which will provide $48 million in savings over the 3-year period—fiscal years 1986–88—by reducing the default rate in the Guaranteed Student Loan Program. It is also true that the Coleman proposal, which has the blessing of the administration, will enhance the integrity of the GSL Program.

Briefly, the proposed savings are as follows:

First, multiple disbursement: Loans are to be multiply disbursed to students on the basis of their academic terms; that is, semester, quarter, and so forth; lenders receive subsidies only on the disbursed portion of the loan; the origination fee is charged proportionately on each disbursement; the effective date is July 1, 1986.

Savings: Zero in fiscal year 1986; $100 million in fiscal year 1987; $115 million in fiscal year 1988.

Second, recall of advances: $50 million in advances are to be recalled in fiscal year 1988; agencies less than 5 years old at the time of recall are exempt; the Secretary must take into consideration the solvency and maturity of the insurance and reserve funds of the agencies, as determined by the Comptroller General, in determining how much of their advances to recall.

Savings: $50 million in fiscal year 1988.

Third, extension of State agency collection period: State guaranty agencies may not submit defaulted loans to the Secretary for reinsurance until at least 210 days after the loan becomes delinquent. Agencies are required to continue collection efforts on the loans during the 210-day period.

Savings: $160 million in fiscal year 1986; $15 million in fiscal year 1987; $15 million in fiscal year 1988.

Fourth, preclaims assistance: Lenders and guaranty agencies may be reimbursed through the Federal reinsurance for use of collection agencies in reinstating delinquent loans in repayment status. The maximum allowable reimbursement is lesser of $100 or 2 percent of the loan value.

Savings: $19 million in fiscal year 1986; $18 million in fiscal year 1987; $7 million in fiscal year 1988.

Fifth, tightened collection efforts: Collection efforts are to be enhanced by the use of credit bureaus, stiffer penalties for late payments, increased auditing of State agencies; disbursement of GSL through postsecondary education institutions; a standard Federal statute of limitations on collection efforts.

Savings: $11 million in fiscal year 1986; $17 million in fiscal year 1987; $20 million in fiscal year 1988.

Sixth, student eligibility requirements: Students must demonstrate need in order to be eligible for a GSL and must have a determination of their Pell grant eligibility or ineligibility before applying.

Savings: $10 million in fiscal year 1986; $105 million in fiscal year 1987; $220 million in fiscal year 1988.

There is no cost implication to the Pell grant eligibility requirement.

The members of the committee, and in particular Postsecondary Education Subcommittee Chairman BILL FORD and ranking Republican TOM COLEMAN, are to be complimented on both the process by which the recommendations were achieved as well as for the substantive results that were produced.

Although I have elsewhere expressed some concerns over the addition of certain policy changes, unrelated to the budget which are contained in the committee's recommendations, I must reinforce my support for the overall package. Despite my misgivings over the impact of one budget savings provision regarding an across-the-board needs analysis on the independent students, I am confident that such details can be remedied in conference without derailing the overall goals of the Education and Labor Committee's action.

I am convinced that these recommendations represent a good faith effort on the part of our committee to comply with the targets established in the budget reconciliation instructions for our authorizing committee. In fact, the recommendations exceed the budget target by $68 million over the life of the 3-year proposal. This set of proposals represents a difficult task that was handled extremely well through bipartisan cooperation.

Next, I would like to talk about the ERISA provisions. We have heard some complaints, primarily of a jurisdictional nature, expressed by others that perhaps this should not be in this bill, or at least it ought to be amended. I would say that after some 5 years of going over very carefully the needs for revisions and for closing of loopholes in our ERISA provisions; that is, dealing with pension programs, that this provision has the backing of the administration, the backing of business groups, and the backing of labor unions. It also is supported by those who agree that what we must do is to prevent those that would take advantage of the present law to dump onto PBGC liabilities which ought not to be there. This bill will protect against that, and will save in the long run billions of dollars to the taxpayers and also to those that have a genuine right to a good benefit under their pension programs.

Before proceeding with an explanation of the intent behind the ERISA changes contained under subtitles B, C, and D of title III, I would like to make several points in

connection with the development of this legislation.

First, the ERISA single employer termination insurance revisions in subtitles B and C are the product of nearly 5 years of effort by the members of the Committee on Education and Labor to fashion a workable compromise acceptable to the administration and other groups representing retirees, organized labor, and the business community. That these diverse interests can now agree on the need for and the general parameters of the reform package provides strong evidence that the proper balance has been struck in the legislation to restore the long-term solvency of the PBGC while maintaining the critical support of the termination insurance program by those who must ultimately pay its costs. Appropriate credit must be given to my chairman, GUS HAWKINS, and particularly to MARGE ROUKEMA and BILL CLAY, the ranking member and chairman, respectively, of the Subcommittee on Labor-Management Relations who together with their other subcommittee members worked so diligently to carefully craft a reform package that addresses the complex problems in an effective manner.

Second, it is to the credit of this body, collectively, that rather than slow down the consideration of these single employer reforms over an unfortunate and untimely jurisdictional dispute, the mounting financial problems of the PBGC were recognized and the reforms permitted to be favorably acted on at this time. In this connection, I would like to personally thank the Secretary of Labor, Bill Brock, for his extensive efforts to educate the Members of this House to the urgent need to put into place the new design for the single employer program.

Third, there should be no mistaking the relevancy that the ERISA changes have to the deficit reduction under H.R. 3500. The PBGC Single Employer Program had a $462 million deficit as of September 30, 1984, and a negative cash-flow. The deficit continues to grow, especially when the roughly $160 million unfunded liability of one large plan that was recently terminated is taken into account. If recent news accounts of the finances of certain companies can be believed, absent the enactment of the reforms contained in subtitle C the PBGC deficit could easily be expected to triple in size to over one and one-half billion dollars. As described by Secretary Brock, the reforms will have a direct and substantial effect on the Federal deficit and thus, are clearly germane to the budget process.

They are inextricably intertwined with the premium rate proposal; and their adoption would lead to a significant decrease in payments from the PBGC's revolving fund (and, hence, to reduced outlays in the Federal budget). The PBGC estimates that approximately twenty percent of its claims to date have resulted from abuses of the sort addressed by the reforms. The present value of these claims is about $300 million, representing outlays averaging $35 million per year over the next 20 years. Without the proposed reforms, abusive claims will continue in the future and will probably increase as a result of recent financial activities, including takeovers, mergers, and leveraged buy-outs.

The premium increase to $8.50 contained in subtitle B and the reforms in subtitle C, when considered together, are estimated by the Congressional Budget Office to result in a reduction in Federal outlays of about $666 million over the next 3 fiscal years—1986–88.

Fourth, the other body has also included similar ERISA title IV single employer changes in its reconciliation bill. Given the foreknowledge of the number of differences between the two measures and the inherent complexity of ERISA, perhaps it is not an overstatement to observe that an exceptional level of cooperation and care will be required in conference, if the final product is to stand the test of time and not contain inadvertent oversights. In this connection I would encourage the Pension Benefit Guaranty Corporation to offer the conferees its close cooperation and expertise toward this end.

Finally, I have this observation to make in connection with the provisions of subtitle D—continuation coverage under group health plans. However, meritorious the provisions of this amendment to title I of ERISA may be, they were added in committee without the benefit of hearings or the usual perfecting legislative process which has proven so beneficial to improving other ERISA legislation. Again I would encourage my colleagues to exercise extreme care in the conference committee to fashion a workable regulatory structure and one with which plan sponsors have become accustomed under ERISA and the Internal Revenue Code. In this connection. I would also encourage the Department of Labor to offer the conferees its close cooperation and expertise.

Consistent with the goals originally proposed to the Congress by the Pension Benefit Guaranty Corporation, the single employer termination insurance provisions under title III are intended to address the following problems. First the increase in the per capita premium from $2.60 to $8.50 per annum beginning in 1986 is designed to amortize the current PBGC deficit over a reasonable period of about 15 years. The level is set to also meet the rising level of claims projected to be incurred over the foreseeable future. Together with the program reforms the increased premium income is expected to place the PBGC on a more sound financial footing, alleviating the present threat to the continued payment of guaranteed benefits at current levels. Second, the reform package is intended to deal with three major abuses that exist under the present program. At present, it is possible for an employer to receive a minimum funding waiver without providing any security to secure repayment of a waived contribution. The revisions permit the IRS to impose security conditions in connection with such waivers after actively taking into account any comments or concerns the PBGC may have.

Also, at present a company can, in certain circumstances, dump unfunded pension benefits on the PBGC and continue in business with little or no liability for those benefits. The revisions require an employer to meet one of four statutory distress tests before being able to terminate an underfunded plan. The employer would also be subject to a 10-percent pretax profits interest to the PBGC in the event the employer's liability exceeds 30 percent of net worth.

Currently a controlled group of corporations can spin off a financially distressed affiliate with large unfunded pension benefits and escape any responsibility for any subsequent claim against the PBGC. The reforms clarify that an employer remains liable if there is an evasion of liability.

Finally, the reforms require a plan sponsor to fully fund for vested benefits if the plan is to be terminated other than in a distress situation. This enhances the protection of employee vested benefits in cases in which the sponsor can afford to meet the promised level of benefits. In the case of a distress termination, vested but nonguaranteed benefits would be protected by means of an additional 5-percent employer pretax profits interest payable to a termination trust.

Mr. CLAY. Mr. Chairman, I rise in support of H.R. 3500. Title III would make necessary changes in the pension plan termination insurance program created in 1974 by the Employee Retirement Income Security Act [ERISA]. Currently more than 30 million American workers and retirees are covered under single-employer defined benefit plans. The PBGC Insurance Program was designed to provide a safety net for those workers when their pension plans terminated without enough assets to pay benefits.

The PBGC is currently in financial trouble. Unlike many other Federal programs, the Termination Insurance Program is funded entirely by the private sector through annual premiums paid by covered plans based on the number of participants in the pension plan. Since May 1982, the administration has been seeking a premium increase from the current $2.60 per participant per year to $8.10. The current premium falls far short of what is needed to fund the program. At the end of fiscal 1984, PBGC's deficit was $462 million and climbing. We are told that its current deficit is closer to $600 million.

Subtitle B of title III authorizes a premium of $8.50. The Education and Labor Committee believes that the administration's $8.10 request is not adequate to deal with the current financial condition of the PBGC, because it was based on data nearly a year old. Since that time, the PBGC has had to assume significant additional amounts of liability. Raising the premium to $8.50 effective January 1, 1986, as the bill authorizes, would amortize the PBGC deficit over 15 years. I personal-

ly doubt that $8.50 is enough, particularly in light of the pending termination of the Wheeling-Pittsburgh Steel Corp. plan, which may add as much as $425 million to the PBGC deficit. Nevertheless, the committee unanimously supported the $8.50 premium and that is what is contained in H.R. 3500.

Not only does the PBGC face the problem of eliminating the existing deficit, it also must control the level of claims in the future. Thus the reforms are urgently needed as well. According to the Congressional Budget Office, the additional effect on the Federal deficit is sizable if even one major plan termination were to occur in 1986 that could have been prevented with the reforms. In recent weeks, one major termination has occurred and one is imminent. PBGC's liability is significant: Over $165 million for Allis-Chalmers and approximately $425 million for Wheeling-Pittsburgh Steel. In addition, the press has reported the possibility of a third big termination: LTV, Corp., with unfunded pension liabilities of $850 million.

Therefore title III of the bill makes necessary structural changes to close certain loopholes in the current law in order to avoid unwarranted or abusive claims against the insurance system—claims that must ultimately be paid by the rest of the premium payers. In addition, structural reforms are needed to prevent profitable employers from avoiding responsibility for payment of certain earned benefits to participants and beneficiaries that are not guaranteed by the PBGC.

The single-employer provisions of H.R. 3500 are strongly supported by the administration and by organized labor. The business community is generally not opposed to them. At every step in the process over the past 4 years, the legislation has had bipartisan support and it passed the Education and Labor Committee this year twice unanimously. Both the premium increase and the reforms are germane to the budget reconciliation process and are needed now. Moreover, the other body has similar reform legislation on its budget reconciliation bill as well. Thus it appears that at long last the PBGC may receive the financial shoring up it needs so badly. Just as importantly, participants will be better protected when their plans terminate and will be more likely to receive the full benefits that they have been promised and have earned.

I want to express my appreciation to the chairman of our committee, GUS HAWKINS, and the ranking Republican member, JIM JEFFORDS, for their support and cooperation in bringing this matter to the floor today. Special thanks also to the ranking member of the subcommittee, MARGE ROUKEMA, for her hard work and cooperation. Together we have fashioned a good and necessary bill.

I urge you to support H.R. 3500.

Mr. HAWKINS. I have no further requests for time, Mr. Chairman, and I reserve the balance of my time.

Has the other side used their time?

Mrs. MARTIN of Illinois. Mr. Chairman, on this issue, we are finished.

The CHAIRMAN. The gentlewoman from Illinois [Mrs. MARTIN] had yielded time to the gentleman from Vermont [Mr. JEFFORDS] on this item.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Chairman, I rise in support of the committee version of the reconciliation, but primarily to tell the House that the reconciliation coming from this committee was worked out in the finest bipartisan spirit that I have seen in the many years that I have been on the committee; and indeed we did save more money than we were told to save, but we did not do that at the expense of any student or any program because we made some changes that are not earth shattering, but they will produce savings that offset any improvements, as such, that we made, and that was done.

Some of the amendments came from the Republican side and some from the Democratic side; unanimously with respect to higher education, I must say. We are a little bit different than the Senate and we will have to go to conference; and presumably between the two versions we will come up with something even better.

I would like to take this opportunity to thank the Members, both the majority and minority members of the Subcommittee on Postsecondary Education for working in such a manner with the cooperation, one with another, to make it possible for us to do what could have been very painful, and could have cost a lot of people the loss of their dreams for an opportunity to pursue their education.

I am pleased to say that I do not think that what the committee has done is going to produce that kind of result, even though we are initiating some efficiencies that will reduce the cost of the program.

Mr. HAWKINS. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore (Mr. TORRES). The Chair now recognizes the gentleman from Pennsylvania [Mr. GRAY].

Mr. GRAY of Pennsylvania. At this time, Mr. Chairman, we would defer to the minority with regard to the Committee on Interior and Insular Affairs. We believe they would like to take some time at this point to discuss the issues in reconciliation.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 6 minutes to the gentleman from Colorado [Mr. STRANG].

Mr. STRANG. Mr. Chairman, I yield to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. I wish to notify the chairman of the committee that the ranking member of the Budget Committee will soon return. Some of us have to go to our own task forces.

I would ask the Members, however, to remember that even when some of these committees are saying they are meeting budget guidelines that there is enough smoke in this particular reconciliation package that if the Surgeon General would have to label it, he indeed would have to label it "Dangerous to the financial health of the Nation."

Mr. STRANG. I thank the gentlewoman for yielding.

Mr. Chairman, in this reconciliation bill is a proposal that we have visited before in this House; and the proposal is to abolish the Synthetic Fuels Corporation, and to take apart those agreements which the Synthetic Fuels Corporation has made in good faith with some existing companies.

Now I am particularly concerned, Mr. Chairman, about what has happened in my particular part of the country, western Colorado. I am concerned because the Synthetic Fuels Corporation has made in good faith, agreements under legal permission under existing law, to provide for incentives for companies to produce oil in commercial quantities not to exceed a certain limit, to produce this product for this country so that in the event we have the plug pulled on us in international oil, we will have available to us in this country a supply, a safe supply of synthetic fuel.

Oil shale contains, in the Green River Formation, 620 billion barrels of recoverable oil surrounded not by countries of the Mideast, but surrounded by our own Nation.

It has never been the intention to try to produce in a declining commodity market synthetic oil at prices that are presently seen on the world market. That is not the issue, Mr. Chairman.

The issue is that this country must have a supply of hydrocarbons against that day which is coming fairly soon when we simply are shut off again from world markets. This has happened twice before, and I believe it is happening again.

I would submit that this kind of legislation in this bill is not germane to the bill; that is an issue that we can take up, but the rule simply begs the issue.

I have written a letter, Mr. Chairman, to Secretary Herrington which I have asked the Wall Street Journal to print in which I point out that once again, the House of Representatives is

about to vote to abolish America's energy future.

What does that mean? In my area it means that an industry which has been struggling, an industry which has put $2 billion of private money in development without a penny of taxpayers dollars, is being told that when we make an agreement for the U.S. Government, we really do not mean it.

More importantly, Mr. Chairman, the arguments that have been used by the Secretary, by the administration, and by many people who have been ill-advised in this body; those comments are full of factual misstatements, probably not intentional; misstatements about what synfuels is all about and what it can do.

□ 1500

I am concerned about jobs. I am concerned about people in Illinois, in Ohio, in Michigan. I am concerned about the manufacturing heart belt of this country when we have a severe energy crisis. What are we going to tell them when we have done nothing to find a replacement for the energy that is going to be cut off? And we know it is going to be cut off from many foreign markets. I believe that this issue is so serious that it is inappropriate to deal on the floor of the House, by amendment, without having the committee process discuss the true facts of energy independence and strategic energy independence.

The Synthetic Fuels Corporation has had its troubles, I realize that, but over the last 8 months a newly constituted Synthetic Fuels Corporation has been able to come to grips with the situation realistically, under a cut-down budget, under smaller projects, to be sure that the American taxpayer is well served.

I would simply say, Mr. Chairman, that we are going to have to face this issue, we are going to have to not only face it now but in the 1990's when they say: "Where was the U.S. Congress when we had an opportunity for rational, controlled, minimal development of synthetic fuels as a bargain for the American taxpayer?"

Sure, oil is $25, $26 a barrel right now. What is it going to be when the plug is pulled? $90, $100? Probably.

At that time, what we do now will represent a significant bargain.

I would urge this Committee to oppose the proposal to abolish the Synthetic Fuels Corporation and to undo its commitment.

Mr. GRAY of Pennsylvania. Mr. Chairman, at this time, if there are no further requests from the minority side on the Committee on Interior and Insular Affairs, I yield 15 minutes to the distinguished chairman of the Committee on Merchant Marine and Fisheries, the gentleman from North Carolina [Mr. JONES], and I ask unanimous consent that he be permitted to yield time.

Mr. JONES of North Carolina. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, on October 2, 1985, the Committee on Merchant Marine and Fisheries reported its response to the reconciliation instructions imposed by the first budget resolution for fiscal year 1986. The cost estimate compiled by the Congressional Budget Office indicates that the Merchant Marine and Fisheries Committee has met its reconciliation directive by reporting legislative changes resulting in $495 million in savings over 3 years. Title VI contains eight subtitles, each dealing with a different, specific issue.

Subtitle A amends the boating safety fund. It authorizes a $15 million transfer to the General Treasury from amounts deposited in the fund during fiscal year 1985.

Subtitle B authorizes the National Oceanic and Atmospheric Administration to increase the price for nautical and aeronautical charts. The Secretary of Commerce must increase the price of these charts annually, so that by the end of a 3-year period, the cost of a chart is closer to the costs of producing and distributing it. The Secretary may charge a lower price if necessary for reasons of air and marine safety. These provisions will increase the average cost of a chart from $5 to approximately $12 over 3 years.

Subtitle C amends the Fishery Conservation and Management Act of 1976 to increase the fees charged to foreigners fishing within the 200 miles of the United States. These changes will result in additional revenues of $42 million over the 3-year period.

Subtitle D amends the Outer Continential Shelf Lands Act to distribute nearly $6.1 billion in disputed revenues between the Federal government and coastal States. The provision reported by the Committee on Merchant Marine and Fisheries are largely similar to provisions reported by the Interior Committee, with one important exception: The Merchant Marine and Fisheries version will result in additional Federal revenues of $183 million during fiscal year 1986.

Subtitle E contains the text of the Ocean and Coastal Resources Management and Development Block Grant Act. This bill is better know as general, OCS revenue sharing. It has been considered by the House and passed on four occassions. Each time by increasingly wide margins, and most recently by a vote of 312 to 94. This program would not begin until fiscal year 1988. During that year it would be authorized at $150 million, or one-half the authorization level previously approved by the house.

In fiscal year 1989, the authorization level increases to $300 million and 5 percent each year thereafter. The funds would be distributed to coastal States, including Great Lakes States and U.S. territories, in the form of block grants for a broad range of ocean and coastal management activities. Again, I would like to emphasize that this measure has been considered by the House and passed overwhelmingly on four occasions.

Subtitle F contains the text of H.R. 2121, a bill to amend and reauthorize the Coastal Zone Management Act of 1972. This bill was considered by the House on July 30, 1985, and was passed on an uncontested voice vote. After 13 years of overseeing this law, the Merchant Marine and Fisheries Committee remains firmly convinced that important national interests are being well served by this program.

Subtitle G contains amendments to the Merchant Marine Act of 1936.

Subtitle H contains proposed amendments to the Outer Continental Shelf Lands Act. They would require that any vessel or structure used for exploring or producing oil and gas on the Outer Continental Shelf must be built in the United States. In addition, that structure must be built from materials or supplies which are at least 50 percent, by cost, of U.S. origin. These "Buy American" provisions would not apply to the Alaskan OCS.

As I mentioned previously, these provisions will result in $495 million in savings to the Federal Government from fiscal year 1986 to fiscal year 1988. Therefore, the Committee on Merchant Marine and Fisheries has fully complied with its reconciliation instructions. Some additional material has been included within title VI, such as the general OCS revenue-sharing legislation and the Coastal Zone Management Act reauthorization. However, these are not issues which are unfamiliar to the Members of the House. Both of these matters have been fully debated on the floor of the House with full opportunity for amendment and modification.

Both have been approved by this body overwhelmingly. For this reason, I will oppose the amendment to be offered by Mr. LATTA because of its intent to eliminate the provisions of subtitles E and F. Likewise, I hope that all of my colleagues who have supported OCS revenue sharing and Coastal Zone Management Act legislation in the past will once again lend their support by joining me in opposition to the Latta amendment.

I rise in opposition to the amendment proposed by our colleague from Ohio.

That amendment would purge two specific authorizations from the provisions reported by the Committee on Merchant Marine and Fisheries. I would hope that my colleagues would vote, as they have on several occasions in the past, to support these programs.

The authorization for an OCS revenue-sharing program has been debated on the floor of the House and passed by overwhelming margins on four occasions. The Coastal Zone Management Act reauthorization was debated and passed by an uncontested voice vote on July 30. The House of Representatives has demonstrated its support for these programs. I trust that this support will continue and that all of my colleagues who have supported OCS revenue sharing and coastal zone management in the past will again support those programs by voting against the Latta amendment.

I rise in opposition to the motion by our distinguished colleague from Arizona.

There is no need to extend debate further on this controversial and complex issue. My committee, Mr. UDALL's committee, and the Energy Committee in the Senate have all considered this issue at great length. All sides of the issue have been debated within each of these committees, and each came to a similar resolution. We have before us a rather rare circumstance. Three committees in the U.S. Congress have considered a very complex and controversial issue and all have come to largely the same resolution. We seem to have agreement. We should not seek to throw that agreement asunder. We should stand by the agreement and recognize the expertise and thorough consideration of our committees. I rise in opposition to the motion, and ask for the support of my colleagues.

Mr. Chairman, I have no further requests for time, and I reserve the balance of my time.

The CHAIRMAN pro tempore. The gentleman from North Carolina [Mr. JONES] has consumed 5 minutes.

Mr. LATTA. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. LENT], the ranking member of the Committee on Merchant Marine and Fisheries, and I ask unanimous consent that he be permitted to yield time.

Mr. LENT. I thank the gentleman from Ohio for yielding to me.

Mr. Chairman, I just want to very briefly take this opportunity to associate myself with the remarks of the gentleman from North Carolina, the chairman of the Committee on Merchant Marine and Fisheries, and join with him in supporting title VI of H.R. 3500.

Mr. Chairman, I would like to point out, in doing so, that under this distinguished and able leadership the House Committee on Merchant Marine and Fisheries has fully met its obligations under reconciliation.

Mr. Chairman, the contents of title VI have been debated thoroughly by the Merchant Marine and Fisheries Committee at one time or another.

I support the contents of this title and hope that it is given favorable consideration.

Mr. Chairman, I yield back the balance of my time.

Mr. LATTA. Mr. Chairman, I yield 6 minutes to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Chairman, I rise in opposition to this measure. Despite the efforts of many of the House committees to comply with the reconciliation instructions of the budget resolution, that effort has come up short. In its present form, I cannot support this legislation.

My basis for opposition has two strands—one relates to what has not been included in this bill, but should have been, and the other relates to something that should not be in this bill, but was included anyway.

What should have been included in this bill was a proposal of mine to raise $150 million per year in Coast Guard user fees.

The amendment I had proposed to offer, but which was not made in order under the rule, was based on legislation I introduced last April, H.R. 1936, which would have authorized the Coast Guard to collect approximately $150 million in user fees from the beneficiaries of Coast Guard services. This would have included $50 million from direct fees, for such things as vessel documentation, licensing fees, and regatta permits.

The other $100 million would have been raised from a modest fee of less than $20 per year, to be paid every year by recreational boaters who use waters under Coast Guard jurisdiction. With about 6 million boaters in this category, it would take a fee of only $18 a year to raise $100 million.

We had a hearing on my measure last June before the Merchant Marine Subcommittee on the Coast Guard. The general reaction, as I recall, was that the members of the committee would oppose me with an open mind.

I regret that attitude. The selfish interests of a small minority of boatowners are going to result in a tremendous loss of Coast Guard services. At a time when we are facing drastic cuts in human need programs like Food Stamps and Elderly Nutrition, and are even talking about reducing cost-of-living increases for Social Security recipients, I think it is incredible that the boaters of this country would refuse to pay $18 a year—$18 a year—to help pay the cost of Coast Guard search and rescue services.

Even as we debate today, the Senate Appropriations Committee has reported out a bill that cuts Coast Guard operating expenses by $200 million. That means reducing search and rescue by 4,000 cases a year. That means reducing drug interdiction by 20 percent. That means reducing icebreaking, almost eliminating fisheries enforcement, and significantly reducing noncoastal environmental response capabilities. That is the effect of our current budget situation.

Faced with this situation, I would have thought that the boaters of this country would have been willing to pay $20 a year or even more to keep the Coast Guard in the search and rescue business. That amount is peanuts compared to the value of the boats involved—surely a trivial amount to pay as a form of insurance to protect that investment.

Mr. Chairman, in response to suggestions made by members of the boating community and members of the Merchant Marine Committee, I have tightened up my bill. I have proposed to put the money into a trust fund, to be made available only for Coast Guard use. I have made the $20 limitation statutory. Even then, I couldn't get it considered today.

But I'm not going to give up. I will reintroduce this measure, and seek cosponsors. Because I have faith that when the boaters of this country realize that the Coast Guard really needs this money to keep providing essential services, the boaters will come through.

Mr. Chairman, I wish I did not have this cold, and I wish the rules of the House would let me sing a song because I would sing something like this to the voters of this country:

Row, row, row, my boat
Gently, up the stream,
But if you try to make me pay,
I'll throw a fit and scream.

Tow, tow, tow, my boat
Through the surf to shore;
So what if I don't pay my share,
The others can pay more.

I hope that after listening to my speech, the boaters will change their tune, as follows:

Search, search, search, for me
When I am over-due;
The Coast Guard needs these user fees,
To pull us safely through.
Tow, tow, tow, my boat—
I'll pay that user fee;
'Cause when I really need it,
The Coast Guard's there for me.

Mr. Chairman, on another issue, I take strong exception to the provision in this bill to take the highway and aviation trust funds offbudget. That would place them in a special category, exempt from any budgetary control or oversight—a status that even the Social Security trust fund would not receive until 1992.

Mr. Chairman, this is back-door spending if I've even seen it. This proposal would provide a blank check to the Federal Highway Administration and the Federal Aviation Administration to spend these funds without oversight, without review, and without congressional supervision. I think that such an approach would involve walk-

ing away from our congressional responsibilities.

How can we explain to our constituents why highway and airport spending should be exempt from the budget process, while Social Security is not?

How can we explain why highway and airport spending should proceed unchecked, while other trust fund programs like Medicare, Veterans' Life Insurance, Unemployment Compensation, and Civil Service Retirement are subject to the usual budgetary controls?

Mr. Chairman, reasonable people can differ on whether trust funds should be on budget or off budget. But a reconciliation bill is no place to single out a handful of trust funds and put them at the front of the line. This issue has not been comprehensively explored by the Public Works Committee, or by the Government Operations Committee, which really has jurisdiction over the matter.

The one committee that has looked at it seriously, the Budget Committee, recommended that trust funds remain on budget.

Mr. Chairman, I urge that sections 8201 and 8202 be stricken from the bill, and that the Fazio amendment be adopted.

□ 1515

Mr. JONES of North Carolina. Mr. Chairman, I yield such time as he may consume to the gentleman from Louisiana [Mr. BREAUX].

Mr. BREAUX. I thank the chairman of the Committee on Merchant Marine and Fisheries for yielding me some time on this section of the bill.

First, I would like to commend the chairman for the work that he has done on seeing to it that the Merchant Marine and Fisheries Committee has abided by the instructions of the budget reconciliation bill and has come up with the amount of money necessary. It was not easy for our committee to find the cuts that were needed. The chairman has complied with the budget resolution as presented. The Merchant Marine and Fisheries Committee complied with what the budget ordered us to do. That is not an easy achievement. The chairman is to be commended for his leadership in that area.

A couple other things that I think are appropriate to recognize that our committee has reported, that others would try and remove from the budget, are items that have already passed the House. We are merely using this vehicle to allow the legislation and the will of the House to reach completion, and that is the OCS revenue sharing, which passed this House under the leadership of the chairman from North Carolina last year by an overwhelming margin, and one year by unanimous consent, that we have merely taken those provisions and included them in the budget reconciliation that has come from the Merchant Marine and Fisheries Committee. Make no mistake, this is not controversial. It has passed the House once by unanimous consent, once by an overwhelming margin. It is now part of our package. Another thing is the reauthorization of the Coastal Zone Management Act which again is legislation that has already passed the House by an overwhelming margin. This is part of the package that we are now presenting and should not cause anybody any difficulty whatsoever.

The third item, which is extremely important to 30 coastal States, is for the first time Congress, recognizing what Congress thought we had done in 1978, and that is to have the administration comply with the law of the land which requires that the Federal Government share with the coastal States on a fair and equitable basis those revenues coming from the 8(g) area. That is the law of the land. It should not be controversial. It has taken us 8 years to get them to agree on what the figure should be. The figure is so far less than that interior States get from Federal lands from the leasing and oil and gas and mineral production on Federal lands within interior States. I say that because interior States get 50 percent of the bonuses, the rents, and the royalties coming from Federal leasing on Federal lands within their borders. The only thing the coastal States are going to receive is 27 percent. Is it a large amount? Of course it is, because no one has given the coastal States any money since 1978. The interior States have continued to take 50 percent of all of the bonuses, the rents, and royalties.

The Federal Government failed to put enough money into the escrow account over the years, and so this legislation includes a provision which provides for recoupment of the money that they should have put into the escrow account in the first place. There is nothing unusual about that. It makes sense. We are merely trying to get what they should have done in the first place. So it does provide for the past inadequate escrowing activities because of the prorationing scheme that the Interior Department came up with, including post-1978 royalties from the 8(g) tracts no matter when the lease was issued. So I think the bill we have does cover all of the areas of concern and it is recommended to all of the Members. I commend the gentleman from North Carolina for doing what was necessary to comply with the budget and to bring forth good legislation and also the ranking minority member, the gentleman from New York, who has been so helpful in this effort.

Mr. JONES of North Carolina. Mr. Chairman, I yield 2 minutes to the gentlewoman from Maryland [Ms. MIKULSKI].

Ms. MIKULSKI. Mr. Chairman, I rise today to support passage of H.R. 3500. Title VI of this bill reauthorizes the Coastal Zone Management Act and provides for a fair and just sharing of offshore oil and gas revenues between the Federal Government and the coastal States.

Mr. Chairman, this body has already passed H.R. 2121 reauthorizing the Coastal Zone Management Act for 5 years at fiscal year 1985 level funding. The Subcommittee on Oceanography which I chair heard two days of testimony on this legislation. The verdict was unanimous—the Coastal Zone Management Program involving 28 coastal States has been successful in managing our coastal resources. Further, this program serves important national interests related to energy development, port rehabilitation, the protection of living marine resources, and preserving access to coastal areas.

Subtitle E of title VI of this bill provides for the sharing of oil and gas revenues between the Federal Government and the coastal States. During the previous Congress, both Houses passed bills that are practically identical to the revenue sharing provisions of this bill. The right of the coastal States to share in these oil and gas revenues has been established through the many hearings conducted over the past several years by both the House and the Senate.

I urge my colleagues to support passage of this bill.

Mr. JONES of North Carolina. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. Bosco].

Mr. BOSCO. Mr. Chairman, I want to draw the committee's attention to a provision of this reconciliation bill that will add hundreds of millions of dollars to the Federal Treasury and provide about $10 billion in business for American industry and labor. The provision will require that rigs used in the development of offshore oil be constructed in the United States of at least 50 percent U.S. steel.

As one who has voted consistently for free trade, I assure my colleagues that this measure is not a protectionist scheme. Rather, it will carry out the clear intent of our OCS Program that Americans will be the primary beneficiaries as property owned by U.S. taxpayers is developed. Accordingly, at present, only U.S. oil companies and their subsidiaries may bid on this oil. The oil may only be sold domestically. It is only fair and consistent, Mr. Chairman, to insure that American suppliers and labor build the structures that are necessary for the development of this resource.

More specificially, as approved by the House Merchant Marine and Fish-

eries Committee, this provision would require that any platform, drilling rig or vessel built for exploration or production of oil or gas on the OCS after October 1 of this year must be constructed in the United States with at least 50 percent domestic materials. Waivers would be provided under two conditions to ensure that the demand for rigs and platforms can be met. First, if an adequate supply of domestic materials is not available, the Secretary of Interior would be authorized to waive the 50-percent requirement and allow them to be imported. The Secretary could also waive part of the domestic construction requirement on some larger projects. For example, if a company needed two platforms for a given lease sale and agreed to build one in the United States, the Secretary could waive the "build-American" requirement and allow the second platform to be constructed overseas. Taken together, these two provisions should ensure that the OCS Program is able to proceed without undue hindrance while allowing American workers to benefit directly from development of our offshore oil and gas resources.

The issue here is not protectionism versus free trade. The Federal laws, rules and regulations governing the development of our publicly owned natural resources are all inherently protectionist in that they are intended to maximize the resulting benefits to the American public, not private interests or foreign nations. In cases where those basic laws have not been sufficient, Congress has not hesitated to impose additional restrictions to protect U.S. economic and national security interests. Foreign oil companies, for example, are barred from bidding on OCS oil and gas leases unless they have U.S. affiliates. Raw logs from western national forests cannot be exported. Foreign mining companies cannot obtain mineral leases on Federal lands unless their own governments grant Americans the same right.

This provision is perfectly consistent with these longstanding policies. The intent is simply to ensure that American workers and communities receive maximum employment and economic benefits possible from the exploration and development of the publicly owned oil and gas resources on the Outer Continental Shelf.

The American public is not going to reap the benefit of those jobs if Congress does not act to deal with the issue. Since June of 1982, our domestic industry has been virtually shut out of the west coast platform construction market. The last nine contracts have all gone to Korea or Japan, due in large part to large government subsidies of their steel fabricating industry.

When you consider that just one offshore platform may require up to 70,000 tons of steel, provide more than 1,300 jobs and generate hundreds of millions of dollars in benefits to the domestic economy, the ramifications of these exports become enormous. And the problem is not limited to the west coast. Suppliers in the Far East are beginning to penetrate the traditionally domestic market for platforms on the gulf coast as well by shipping components, rather than complete platforms, for final assembly in the United States.

This situation also has serious implications for our national security, as some of my colleagues have already recognized. In a letter to Commerce Secretary Baldrige that I signed earlier this year along with several other members of the House Merchant Marine and Fisheries Committee, we noted that: "If this situation is not abated or at least modified, the United States could find itself in the position of not being able to respond adequately to a national emergency because of insufficient industrial capabilities." We added that we were specifically concerned about "the offshore support, supply and equipment industries as well as steel fabricating and related plants."

There is one other aspect to this issue that Members of this House may want to consider, and that is the effect of the recent decline in OCS-related employment on public support for our offshore leasing program. I can testify from personal experience how difficult it is to explain to my constituents why so many people in Congress believe that we need to open the California coast to leasing when we have been repeatedly rebuffed in our efforts to obtain some of the jobs involved in OCS-related construction.

In closing, Mr. Chairman, I want to underscore my strong belief that the time for strong congressional action is now. I realize that unfair trade complaints and petitions have been filed against the Japanese and Koreans, and efforts have been made to get offshore platforms included under a voluntary trade agreement. But to date, all these efforts have proved futile. In the meantime, our production technological capacity in this field has been rapidly shrinking. If we wait much longer, I fear that it will be too late.

Mr. JONES of North Carolina. Mr. Chairman, I reserve the balance of my time.

Mr. LATTA. Mr. Chairman, I yield 3 minutes to the gentleman from Texas [Mr. FIELDS].

Mr. FIELDS. Mr. Chairman, I rise to express my strong and enthusiastic support for the language contained in sections 5 and 6 of H.R. 3500 dealing with the distribution of certain OCS revenues.

As the ranking minority member of the Panama Canal/OCS Subcommittee, I have long sought a solution to the highly contentious and complex issue of section 8(g) of the OCS Lands Act Amendments.

This provision is designed to provide coastal States with a fair and equitable share of certain revenues obtained from oil and gas resource pools underlying both the Federal OCS and submerged State lands.

Unfortunately, Public Law 95-372 does not define the term "fair and equitable" nor does it provide explicit instructions on how the Secretary of the Interior shall distribute these funds.

While there have been various administrative attempts to negotiate a settlement with the affected coastal States, these efforts failed in the past and are doomed in the future.

The most notable of these efforts was initiated by Secretary William Clark who on August 8, 1984, offered to share with certain States 16⅔ percent of the bonuses, rents, and accumulated interest held in the 8(g) escrow account. The offer was not extended to either Texas or Louisiana allegedly because of their ongoing litigation.

On April 15, 1985, the affected coastal States responded to the Secretary by making a counteroffer of 37½ percent of all bonuses, delayed rentals, royalty payments, and tax income attributable to the 8(g) tracts.

This counteroffer was flatly rejected by Secretary Don Hodel in a letter to Gov. Mark White of Texas on May 24, 1985. While the Secretary indicated that a negotiated settlement was still possible in the future, this was but the latest in a series of failed attempts.

Mr. Chairman, during this period of 7 years of unsuccessful negotiations, there has been a steady increase in the amount of 8(g) money being deposited in the administration's escrow account. These are funds, now exceeding $6 billion, which are unavailable for use by either the Federal Government or the affected coastal States.

Mr. Chairman, regrettably, we have also witnessed a dramatic rise in the amount of friction, acrimony, and distrust between the Federal Government and the 8(g) States.

For the first time in the history of the Federal OCS, we have seen States like Texas and Louisiana, who have long benefited from this program, file a proliferation of lawsuits on not only 8(g) but other issues affecting individual lease sales.

The future of the Federal OCS program and the energy security of this Nation must not be threatened and imperiled by the continued unwillingness or inability to achieve a negotiated settlement of this issue.

The time has come to end this controversy. The language contained within sections 5 and 6 of H.R. 3500 as approved overwhelmingly by the House Merchant Marine and Fisheries Committee and by the Interior Com-

mittee will provide the coastal States with a fair and equitable distribution of 8(g) revenues.

Under the Merchant Marine and Interior solution, the affected coastal States will receive a 27-percent share of the bonuses, rents, royalties, and earned interest from both the existing escrow account and all future revenues obtained from leases in the 8(g) zone.

Mr. Chairman, the 27-percent solution was not arrived at either hastily or with prejudice toward any particular entity. It is based on a number of discussions and congressional hearings involving both the affected coastal States and the Department of the Interior. In fact, the Panama Canal/OCS Subcommittee received extensive testimony on section 8(g) of the OCSLA on April 3, May 3, and July 25 of this year.

I believe this approach, which is the product of many hours of careful deliberation, offers the best, perhaps the only, hope for settling this dispute. While the 27-percent figure is the median point between Secretary Hodel's 16⅔ percent offer and the States' counteroffer of 37½ percent, more importantly, 27-percent is totally consistent with the February 15, 1984, ruling of Judge Robert Parker in the Texas versus Secretary of the Interior case.

In his decision, Judge Parker ruled that prior State leasing activities resulted in enhanced value to the Federal Government and that Texas was entitled to 50 percent of these enhanced revenues. According to Mr. William Bettenberg, Director of the Minerals Management Service at the Department of the Interior, the Parker decision represents approximately 27-percent of the bonuses received on blocks leased either wholly or partially in the 8(g) area.

Mr. Chairman, let there be no misunderstanding—this is not a Federal giveaway to certain coastal States. In fact, the 27-percent solution represents far less, millions less, than dozens of interior States receive under the Mineral Leasing Act and the National Forest Fund which provide them with 50 percent of those Federal revenues obtained from mining and timber leasing on Federal lands within their States boundaries.

The affected coastal States of Texas, Louisiana, California, Alaska, Alabama, Mississippi, and Florida have set aside their well-established claims of 50 percent and have accepted in a spirit of compromise the Merchant Marine and Interior language as their absolute bottom line.

The 27-percent solution represents the absolute minimum amount which can be viewed as fair and which will bring 7 years of contention and litigation to an end.

Mr. Chairman, during the last several days, there has been an increasing amount of discussion on whether to include or not include 8(g) royalties under the 27-percent solution.

Unfortunately, much of this discussion, which has originated from the administration, is both misleading and wrong. We have heard for instance that this legislation will result in the loss of $4 to $6 billion in future 8(g) royalties.

Mr. Chairman, anyone even remotely familiar with the 8(g) issue knows that these figures are ludicrous. Nothing in the past 7 years of experience supports that kind of production.

In fact, after 7 years of 8(g) activity, there is barely $200 million in total royalty payments in the escrow account.

Under CBO's assumption, total royalty income from the 8(g) zone over a 30-year period would be only $3 billion. This is based on an optimistic projection of $100 million a year in total 8(g) royalty income.

For the administration's highly inflated assertions to be correct, the total royalty income would have to be greater than $16 billion, which is simply not credible or possible since vast amounts of 8(g) acreage have already been leased in the past.

Mr. Chairman, it is clear from reading Public Law 95-372 that royalties must be included in any settlement of the 8(g) issue since the language of the act emphatically states that:

> The Secretary shall deposit in a separate account of the Treasury of the United States all bonuses, and royalties, and other revenues attributable to oil and gas pools underlying both the Outer Continental Shelf and submerged lands subject to the jurisdiction of any coastal State until such time as the Secretary and the Governor of such State agree on the fair and equitable distribution of such revenues.

If the Congress had not intended that royalties were to be included, the act would have specifically excluded those revenues from inclusion in the escrow account. It would be totally inconsistent for the Congress on one hand to mandate that royalties be part of the escrow account and then simultaneously dictate they not be shared with the coastal States.

Clearly, the intent was that royalties are an integral and inseparable component of the overall 8(g) account and are to be shared with the coastal States, just like bonuses and rents, on a "fair and equitable" basis.

Mr. Chairman, the 27-percent solution contained within H.R. 3500 is fair, equitable, and in the best interests of all affected parties. It will distribute the existing 8(g) revenues and those in the future based on a simple but fair formula.

It will provide the affected States with badly needed revenues and it will reduce our staggering Federal deficit by over $4 billion. In addition, it will remove a growing cloud of suspicion and friction which now hangs over the Federal OCS Program, which itself provides more funds to the U.S. Treasury than any other revenue raising activity except Federal income taxes.

It will not, however, drain the U.S. Treasury nor will it violate the budget requirement in either this fiscal year or in the future. In fact, the legislative language implementing the 8(g) solution exceeds the savings called for in Senate Concurrent Resolution 32.

Mr. Chairman, 7 years of lawsuits, negotiations, and stalemate have convinced most of us involved in the 8(g) issue that this legislative action holds the only promise of ending this dispute.

I urge my colleagues to join with me in supporting this permanent solution to the 8(g) problem. H.R. 3500 satisfies the requirements of Public Law 95-372 by providing the affected coastal States with a fair and equitable share of these long-contested 8(g) revenues.

Mrs. BENTLEY. Mr. Chairman, I wish to associate myself with the remarks made here on the floor earlier by the gentleman from New York [Mr. LENT], the minority leader on the House Merchant Marine and Fisheries Committee and our chairman, particularly as it pertains to the Buy American provisions of the Bosco amendment in title VI.

I rise in support of title VI of the 1986 Budget Reconciliation bill, in particular, the Bosco amendment.

Foreign government subsidization, below cost pricing, dumping, and the lower cost of labor have placed U.S. producers at a distinct competitive disadvantage vis-a-vis Korean and Japanese producers. Since 1982, only three mobile drill rigs have been built in the United States. Since 1979, 13 of 14 west coast platform construction contracts have been issued to Korea and Japan.

This amendment requires offshore structures used in the production of oil and gas in the protected waters of the west coast, to be constructed in the United States of 50 percent domestic materials. It allows exceptions for short supply conditions and for offshore lease holders promising to install 50 percent of structures on a lease parcel accepting more than one offshore structure.

One offshore oil platform can generate between 1,000 and 1,300 jobs resulting in as much as $200 million in revenue for the U.S. economy. One mobile unit can mean 450 direct shipyard jobs, plus an additional 1,200 indirect steel and supply jobs nationwide. It is predicted that 25 platforms will be built within the next 5 years generating economic benefits totaling $4.9 billion including $91 million in tax revenue.

We, the Congress, are the trustees for the public lands. It is not unreasonable for us to ask the oil companies

who will benefit up to $100 billion from drilling in the OSC to buy American in accordance with the Bosco amendment. Therefore, I urge you to support this amendment which insures national security, generates economic and employment benefits, and is compatible with the Outer Continental Shelf Program.

Mr. JONES of North Carolina. Mr. Chairman, I have no further requests for time, but I would like to say, before I yield back my time, that any controversy which might be attacked tomorrow by the amendments, two items, revenue sharing, coastal revenue sharing, and coastal zone management, have passed this House one or more times by overwhelming votes. It is not something we brought in through the back door during the dark of night but it is something that has been before the House time and time again.

With that, Mr. Chairman, I yield back the balance of my time.

Mr. DERRICK. Mr. Chairman, I yield 15 minutes to the gentleman from New Jersey [Mr. HOWARD], the distinguished chairman of the Committee on Public Works and Transportation, and Mr. Chairman, I ask unanimous consent that the gentleman from New Jersey [Mr. HOWARD] be permitted to yield time.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. HOWARD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to take this time during general debate to express as clearly and dispassionately as I possibly can the reasons why Members should oppose two amendments which may be offered, one by Congressman FAZIO and the other by Congressman LATTA. These amendments would strike the language in the Public Works and Transportation Committee's title of the bill removing certain self-financed, deficit-proof transportation trust funds from the unified budget. Our basic purpose in taking this time and opposing these amendments is to expose the shameful fraud being committed by inclusion of transportation trust funds in the unified budget—all being done in the high name of budgetary responsibility; when, in fact, nothing is further from the truth.

Precisely who is being victimized? Every day, we cheat transportation users who are not receiving the full benefits of their investments and we deceive the public at large by continuing to rely on bogus bookkeeping to conceal higher real deficits than are shown on paper. What we're doing in the name of fiscal responsibility is in fact irresponsible, and you can see it for yourself if you look back far enough.

The evidence is on this chart. The highway trust fund was first brought under the unified budget in 1969, as was the aviation trust fund when it was created in 1970, and the mass transit fund when it was established in 1982. Prior to the adoption of the unified budget concept in 1969, trust funds were reported separately from the administrative budget. As you can see on the chart, the balance for the highway fund was maintained at a relatively low and stable level prior to the adoption of the unified budget concept in 1969. After 1969, the trust fund balances grew dramatically, and by the end of fiscal year 1985, had grown to a combined total balance well in excess of $21 billion. This despite the fact that balances in the $2 to $3 billion range according to the Congressional Budget Office is all that is needed to maintain the highway fund on sound footing; obviously far less would be necessary for the other funds.

Mr. Chairman, how did this happen? How did we build up these excessive balances? First, we had the unified budget working in combination with executive impoundment which began in the late 1960's. Then, we had the unified budget working in combination with congressional impoundment in the form of excessively low obligation limitations. Both achieved the same result.

I would now pose the following question: What conceivable public purpose is served by allowing these trust fund balances to reach such excessively high levels? The simple answer, as astonishing as it may sound, is to assure that these funds are used for other public purposes. Assuming the balances in these funds continue to grow—and there is little doubt that they would under the unified budget—the requirement to invest accruing balances in debt obligations of the Federal Government effectively diverts these funds from the purposes for which they are raised.

Given the reality of these large balances, Mr. Chairman, the sooner these trust funds are separated from the unified budget, the less chance for these programs to distort other spending decisions, or conversely, for other Federal decisions to thwart these pay-as-you-go programs.

Transportation users contribute to these funds because they want to believe they will benefit from their contributions. If they don't believe that, they are not going to be willing to support these programs that offer so much hope for the country's transportation future.

That precious public confidence is something we have to work hard to restore, and it is my view we will have that opportunity tomorrow by defeating these ill-advised amendments.

Finally, Mr. Chairman, I want to respond to the question of why the Committee's language is appropriately included as part of the reconciliation bill. As I indicated during debate on the rule, the committee language is consistent with the primary purpose of the budget resolution to achieve budget savings; it is based on ample precedent; it is germane to the instructions given the committee and to the recommendations that it made; and, finally, it is totally consistent with the procedural exemptions of the Budget Act.

Mr. Chairman, I urge my colleagues to vote against the FAZIO and LATTA amendments and I reserve the balance of my time.

□ 1530

Mr. LATTA. Mr. Chairman, I yield 15 minutes to the gentleman from Pennsylvania [Mr. SHUSTER] a member of the committee, and I ask unanimous consent that the gentleman be permitted to yield time.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. SHUSTER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as a former member of the Budget Committee and the ranking member of the Surface Transportation Subcommittee, I rise to urge my colleagues to strike a blow for truth in budgeting, and at the same time, strengthen America's transportation system.

My colleagues, you may strike a blow for truth in budgeting and strengthen America's transportation system by opposing the Fazio amendment and the Latta amendment when they come before us. Why should this be done? It should be done because finally we have in the legislation before us long overdue language which removes transportation trust funds from the budget.

My colleague, the distinguished chairman of our committee has outlined the reasons behind this. Suffice it to say that as long as we have dedicated transportation trust funds—highway, aviation, transit—on budget, it has the effect of masking the enormity of the real general fund deficit. As long as we have transportation trust funds on budget, we are breaking faith with the American people because we told them that if you pay your dedicated gasoline taxes into these dedicated trust funds, the money will not be spent for anything else: It will be spent solely for transportation purposes.

But as a result of putting these trust funds on budget, they are being used

to build up surpluses, to mask and hide the real general fund deficit. So we can strike a blow for trust in budgeting if we finally remove these dedicated trust funds from general fund budgeting.

There is a second reason equally if not more important. That second reason is by doing so, we can improve and increase the expenditure of these dedicated funds for the purposes for which they are meant, and that is transportation construction.

The Members have heard earlier that this is simply a bookkeeping matter; it really makes no difference; it is simply bookkeeping. That is just not so. As long as trust funds are on budget, this means that the Appropriations Committee has a strong interest in reducing the obligational ceilings for transportation expenditures. As we know, the obligations ceilings limit those funds that are actually permitted to be spent. As long as transportation trust funds are on budget, this means that the Appropriations Committee by reducing obligational expenditures, even though the dollars are there in the trust funds, by reducing them it means that more spending can take place in the general fund categories and the overall impact on the deficit is hidden because the surpluses in the transportation trust fund cover up these other deficits.

So do not be misled, my colleagues, by the argument that this is simply a bookkeeping transaction. It is much more than that; it is a very real matter. When we remove transportation trust funds from the general budget, then the Appropriations Committee has no motive to reduce obligational ceilings and they can let the trust funds expend whatever is in there and whatever can be justified on a deficit-proof basis.

So this is an extremely important issue. It is the heart of the issue. It is real; it is not bookkeeping. Let me share with the Members just a couple of examples of what it means as a result of the Appropriations Committee passing low obligational ceilings to mask expenditures. The effect has been that virtually every State across America, while it has had more money apportioned to spend, has been unable to spend the money, and has not been permitted to spend the money because of the obligational ceiling placed upon it.

What does this mean? For example, just in this fiscal year 1986, in Pennsylvania, while the federally apportioned funds from the Highway Trust Fund amount to $587 million, because of the artificial obligational ceiling placed upon it by the budget process, Pennsylvania will have an obligational ceiling of only $505 million. Therefore, Pennsylvania is being shortchanged in 1 year alone out of the trust fund, $85 million.

The money is there; it is lying there, but Pennsylvania and Pennsylvania taxpayers cannot spend it. This is not a Pennsylvania problem; this problem applies across the board. When you add up the cumulative effect of the gap between what has been apportioned to States and what can be spent, the figures are staggering.

California, for example, has unobligated balances, apportionments that they are not allowed to spend over the years of $704 million. That is highways and only highways in this example. But you can extend this to aviation and transit. Likewise Texas, $494 million; Massachusetts, $345 million; Ohio, $246 million; Louisiana, $218 million; Hawaii, $202 million; Florida, $201 million; Maryland, $190 million; New Jersey, $175 million; on and on. Virtually every State across this country.

□ 1540

Hundreds of millions of dollars are not being spent, dollars that are dedicated, paid for by the highway and aviation users of America, dollars that are tied up because the money is tied up as a result of these obligational ceilings because the trust funds are on budget.

The cure, the solution: Remove these dedicated trust funds from the budget, and let them stand on their own. There can be no deficit spending. As you know, under the law, the law requires you cannot spend a penny out of these trust fund dollars unless the dollars are there, one of the few deficit-proof programs we have in this Congress.

So, do not be beguiled by these other arguments. Support honesty in budgeting. Support a better transportation system. Let the dollars that are sent by your taxpayers to Washington for dedicated transportation purposes be returned to the States so they can be used. Oppose, vote down these pernicious Latta and Fazio amendments.

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Chairman, I commend the gentleman for his very articulate statement, and I rise in support of H.R. 3500, the 1985 Omnibus Reconciliation Act.

Mr. Chairman, I rise in support of H.R. 3500, the 1985 Omnibus Reconciliation Act.

My colleagues have eloquently and adequately explained the provisions in our committee's reconciliation package, and I join them in urging that the language in that package be accepted without any altering amendments.

However, as ranking member of the Aviation Subcommittee, I do want to underline the importance of our provision removing the airport and airway trust fund from the unified budget.

Since this trust fund usually contains a surplus, the practice, under the unified budget, has been to inflate its cash balance by not spending money to meet very real program needs, thereby offsetting the real deficit of the general fund.

In other words, our Government has been collecting billion of dollars in taxes from the users of our airports for the stated purpose of expanding or repairing those facilities, and at the same time, has been refusing to spend the dollars collected for their specified purpose.

Without question, we are breaking faith with the airline passengers and private pilots in this country.

I well recall that when aviation taxes were increased in 1981, the airline industry and passengers were told that such increases were necessary to modernize our air traffic control system and to expand airport capacity so that the system could handle the increased demands expected during this decade. The needs were well documented; they were very real then, and they are very real today.

However, in order to make the Federal deficit look smaller on paper, the aviation taxes collected as a result of that congressional action in 1981 have not been used as promised. The programs established in 1981 have not been fully funded, and, in fact, obligation ceilings have been imposed on the Airport Improvement Program in every year since fiscal year 1981. Right now, there are many airports throughout the country, both large and small, in need of new runways or significant repairs. But appropriations for such airport improvements are more than $300 million below authorized levels. This situation is expected to get worse in fiscal year 1986.

Appropriations for airway facilities and equipment show an even greater shortfall. By the end of fiscal year 1986, it may approach $1 billion. This means that important programs to increase the safety and efficiency of the air traffic control system are not being fully funded.

To give just one example, our subcommittee recently held hearings on the need for a new doppler radar system to detect wind shear.

This radar system could have prevented crashes like the one in Dallas last summer or the one in New Orleans in 1982. But this radar system is very expensive. It will cost about $3 to $4 million at each airport. It would be unfortunate if any more airline passengers had to die because we lacked the money to install doppler radar. But it would be even worse if the money was there in the trust fund, and Congress refused to spend it simply to make the deficit appear smaller. Yet this could occur if the aviation trust fund is not taken off budget.

Uncommitted surpluses continue to rise in the airport and airway trust fund. Currently, more than $3 billion has not been spent at all. It is estimated that this surplus will rise to $4.5 billion by the end of fiscal year 1986.

There is no real danger that trust fund spending will exceed trust fund receipts.

Not only does this fund contain a large surplus, but our proposal contains an antideficit provision similar to the Byrd amendment in the highway trust fund.

We cannot reasonably expect continued support for our aviation programs if the taxes collected are not used as the taxpayers were told they would be.

Therefore, in the interest of a strong national transportation system and the integrity of the Federal budget process, I urge my colleagues to support H.R. 3500 including the provision to take the aviation trust fund off budget.

Mr. SHUSTER. Mr. Chairman, how much time do I have left?

The CHAIRMAN. The gentleman from Pennsylvania [Mr. SHUSTER] has consumed 8 minutes. He has 7 minutes left.

Mr. SHUSTER. Mr. Chairman, I reserve the balance of my time.

Mr. HOWARD. Mr. Chairman, I yield 4 minutes to the chairman of our Subcommittee on Surface Transportation, the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, in the few minutes I have to address this critical issue, I want to clear up three misconceptions I have heard repeated by some of our colleagues, and then to lay out, once again, our case for taking the transportation trust funds off-budget.

First, let me clarify that the Public Works Committee has met the funding levels we were given. We are in full compliance with our reconciliation instructions. So any who would suggest that we are trying to go off-budget because we failed to meet these instructions are simply confusing their facts.

Second, I feel constrained to point out that we are not engaged in some jurisdictional turf battle. Whether or not we are successful in turning back the Fazio and Latta amendments will have no impact on the ability of our friends on the Appropriations Committee to impose annual obligation ceilings on our trust fund programs or to engage in other practices relating to those programs. Taking the trust funds off-budget will not affect the relationship between our two committees.

And that's an important point. Because, third, there are those who suggest that if we go off-budget, the ceilings on our programs will be lifted and, if I can mix my metaphors, the dam that holds back transportation spending will be shattered. But, I would point out that obligation ceilings may still be periodically imposed on the programs to control spending and impose necessary budgetary restraints desired by the Congress. And, of course, there is the protection afforded by the Byrd and Rostenkowski amendments for highways and mass transit; and I suppose we should call it the Mineta amendment for aviation, which is included in our language, to absolutely guarantee that the trust funds be administered in a responsible, conservative manner.

So what are we trying to do? If we are not trying to blow the lid off transportation spending, if we are not trying to evade the responsibility that was given to us as part of reconciliation this year, and if we are not trying to grab some other committee's turf?

Mr. Chairman, we are trying to be honest with the American people.

As has been explained, the transportation trust funds are generated exclusively by fees levied on transportation users, and may be used exclusively for their designated transportation purposes. They are administered separately from the general funds of the U.S. Treasury. They have absolutely no genuine impact on the horrible, terrible, monstrous deficit or debt confronting our country.

Yet there are those who would like to say, "Let's hold down trust fund spending," they forget what the trust in trust fund means. "Let's hold down trust fund spending so that the deficit will look a little bit smaller." Mr. Chairman, those who would do that are saying, "Let's try and fool the American people. Let's not let them know how big a deficit we really have.

Mr. Chairman, I don't want to fool the American people. And I don't want it said that we misled them 3 years ago when the highway user fees were increased so that we could have better highway and public transit systems in this country. Those fees should be used and not abused.

Mr. Chairman, that is why we must turn back the Fazio and Latta amendments.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from New Jersey.

Mr. HOWARD. Mr. Chairman, I thank the gentleman, and thank him for his statement.

I would just like to comment on what the gentleman from Pennsylvania stated about the amount of money that is in the trust fund, able to be apportioned, but not obligated. It amounts to about $6.2 billion. At the rate of 140,000 jobs per billion dollars, that is about 868,000 people in this country that could be working building and fixing and repairing our roads and bridges and other transportation systems in this country.

Mr. Chairman, I thank both gentleman for making very good points.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman from New Jersey [Mr. HOWARD] for his contribution.

The CHAIRMAN. The time of the gentleman from California [Mr. ANDERSON] has expired.

Mr. SHUSTER. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. CLINGER], a member of the committee.

Mr. CLINGER. Mr. Chairman, I thank the gentleman for yielding time to me.

Mr. Chairman, I urge in the strongest possible way rejection of the Latta and the Fazio amendments. This would undercut the entire user-fee concept, and I urge defeat of both amendments.

Mr. SHUSTER. Mr. Chairman, I yield 3 minutes to the distinguished ranking member of the full committee, the gentleman from Kentucky [Mr. SNYDER].

Mr. SNYDER. Mr. Chairman, the reconciliation submission of the Committee on Public Works and Transportation, as detailed in title VIII of H.R. 3500, contains some very important and far-reaching provisions.

First of all, it complies fully with the Budget Committee's instructions to reduce the obligational authority of the highway trust fund. Among other things, it reduces the fiscal year 1986 authorization for the Federal-aid highway program by $800 million; sets obligation limitations on the program as directed by the budget resolution; and takes the highway, aviation, and mass transit trust funds off-budget starting with fiscal year 1987.

I cannot overstate the importance of removing these trust funds from the unified budget. We have the world's finest transportation system, and that is directly attributable to the willingness of our citizens to pay taxes on gasoline, airline tickets, and aviation fuel in order to make the capital available to support that system.

The trust funds created as a repository for this capital have served our transportation system well—when they have been permitted to do so. They are unique because by law they can have no deficits, and therefore, they have never contributed 1 penny to the Federal deficit. They rely on dedicated sources of revenue, and they are self-supporting.

Since the users of this Nation's highways and airways pay the taxes to support both systems, they have every right to expect that those taxes collected be spent for the purpose for which they are levied—the improvement of the Nation's highways, transit systems, airports and airways.

That was the contractual obligation, if you will, of the Federal Government when it imposed these taxes. Unfortunately, the Federal Government has not lived up to its obligation.

Since these transportation trust funds usually contain surpluses, the practice under the unified budget has been to inflate their balances by not spending money to meet program needs, thereby offsetting the actual deficit of the general fund.

In the most fundamental sense, this amounts to breaking faith with the Nation's highway and airport users, and I submit that there is no reason to assume that they will continue to support these vitally important systems if their taxes go unused.

It is time we put an end to this long-running budgetary charade by letting the real Federal deficit be seen for what it is and letting Congress address the true deficit accordingly.

This is not a new proposal. The uniqueness of trust fund capital programs and the need to preserve their integrity was recognized by the very Presidential Commission that recommended the inclusion of trust funds in the unified budget. It was also reflected in the 1974 Budget Act. Unfortunately, while the distinctions have been recognized, they have not been observed in practice.

Now is the appropriate time to address this issue. It is the intent of reconciliation to help decrease the general fund deficit. Under this very bill we are cutting the highway trust fund program to make the paper deficit in the general fund look smaller—and that is exactly the problem we are trying to correct by taking these trust funds off-budget.

There is also precedent for taking this action at this time. The Omnibus Budget Reconciliation Act of 1981 took the strategic petroleum reserve off-budget, and that was not even a user-supported program.

This is in reality a "truth-in-budgeting" provision. Once we can see what the budget deficit really is, we will get an accurate picture of Federal spending in future years and can make budget decisions free of the distortions created by having self-financed transportation trust funds pitted against other Federal programs which compete for scarce general revenues.

Some of our friends on the Appropriations Committee feel that by taking these trust funds off budget, the Public Works Committee is trying to get rid of obligation ceilings, drop all congressional controls, and go on a spending spree.

Nothing could be further from the truth. Our two committees have had their differences as to how these ceilings should be utilized and that will probably continue, but nothing in this provision will prevent the Appropriations Committee from continuing to put obligation ceilings in appropriations bills. All this provision would do is remove the incentive for that committee to gradually ratchet down on trust fund programs in order to make room in their budget for general fund programs.

The so-called Byrd amendment insures that the trust funds can never operate in a deficit regardless of how much spending Congress authorizes. The highway trust fund has lived with that discipline for years, and the reconciliation bill adds a similar antideficit provision to the airport and airway trust fund.

In addition, the Public Works Committee continues to put obligation ceilings on these programs in our authorizing legislation in order to maintain an even flow in our programs. New funding for the highway program, for example, can be no higher than the trust fund can support. This is a "pay-as-you-go" program.

Taking these trust funds off budget is an idea whose time has come. The Public Works Committee has over the years argued for more national treatment of these trust funds, but our pleas have fallen on deaf ears. As a result, the highway and aviation programs have been damaged and the integrity of the budget process has been seriously undermined.

Another provision of our committee's reconciliation submission makes available excess budgetary authority for the construction of three bridges across the Ohio River to demonstrate the feasibility of reducing the time required to replace unsafe bridges.

This is merely the reprogramming of a portion of existing budget authority which was originally provided to construct two Ohio River bridges under section 147 of the 1978 Federal-aid Highway Act.

The committee's package also retains the historical prohibition against the sale of excess power by the Tennessee Valley Authority outside its service area. This provision is merely a response to the reconciliation language adopted by the Energy and Commerce Committee which would remove this so-called "wall" around the service area of TVA.

I feel very strongly that this "wall" should not be removed. It was established in the 1933 TVA Act, as amended, for the purpose of protecting surrounding utilities from competition with TVA. In any case, the matter is exclusively within the Public Works Committee's jurisdiction.

I feel confident that we can resolve this matter during conference, and I have received some assurances from the Energy and Commerce Committee leadership along those lines.

□ 1550

Mr. HOWARD. Mr. Chairman, I yield 4½ minutes to the chairman of the Subcommittee on Aviation, the gentleman from California [Mr. MINETA].

Mr. MINETA. Mr. Chairman, I rise today to demonstrate my full support for the provisions to remove the highway and aviation trust funds from the unified budget and congressional budget processes but not from the appropriations process. The provisions which I support are contained in subpart B of title VIII of the Omnibus Budget Reconciliation Act.

The 1982 Airport and Airway Improvement Act was a mutual commitment between the Federal Government and the aviation industry to look to the long-term needs of the airport and airway system, to provide funding for needed growth and improved efficiency through the introduction of new technology, and to build in a financial mechanism equal to doing the job. Unfortunately, the Federal Government has repeatedly reneged on its commitment, while the users have continued to make good faith payments into the trust fund.

Not only the executive branch, but my colleagues in the Congress as well, continue to take less than seriously the agreements, made in our 1983 legislation. Only a month ago, the fiscal year 1986 DOT appropriations bill passed by the House reduced funding for the Airport Improvement Program to $925 million, about 10 percent below the authorized level. To come within the overall transportation spending ceiling set by the budget resolution, the House allowed $75 million in available trust fund dollars to be cut. Similarly, during the prior 3 fiscal years, obligations under the Airport Improvement Program were a full $300 million less than the amounts which were authorized and for which the users had paid taxes.

There has been an even greater shortfall in the facilities and equipment program for modernization of the air traffic control and navigation systems. From fiscal 1982 through fiscal 1985, appropriations for this program were $700 million below the authorized level. The House appropriations bill for fiscal 1988 produces an additional $318 million deficiency below the authorization level.

These shortfalls are inexcusable when user taxes are producing far more revenues than are needed to support the airport and airway trust fund programs. As a result of the shortfalls, the uncommitted surplus in the trust fund has grown from $2.1 billion at the end of fiscal 1982 to an estimated $3.3 billion at the end of fiscal year 1985. By the end of fiscal 1986, the uncommitted surplus is estimated to reach $4.5 billion.

Thus, despite the airport and airway trust fund's ever-increasing surplus and the fact that aviation users have paid the taxes in good faith, expecting them to be used to finance needed airport and airway safety and capacity improvements, aviation's dedicated revenues continue to be surreptiously used to avoid having to cut general fund programs. The only relationship between the programs that are indirectly subsidized by the surplus in the airport and airway trust fund and the airport and airway programs is that

they are all included under the Budget's Act transportation category.

To prevent this from continuing to happen, I have tried various remedies. I have supported legislation to provide a separate process for capital budgeting at the Federal level, inserted a "pay-as-you-go" amendment for trust funds in the fiscal year 1985 budget resolution, testified repeatedly before the Ways and Means and Appropriations Committees, and authored legislation to amend the Budget Act to allow trust fund programs to expend what they collect in revenues.

In every instance, at every turn, I have been met repeatedly with the refrain that now is not the time.

In the face of a $2.078 trillion debt limit, how can now not be the time?

When the administration is virtually mandating tax reforms that produce no additional revenues to ease that deficit, can this body say now is not the time?

When the House conferees are forced to consider a so-called emergency deficit control measure which institutionalizes and memorializes the present use of the aviation and highway trust fund surpluses to offset the overall Federal deficit, can now not be the time? The fact that our users have paid for these programs in advance is meaningless if the hastily contrived and irresponsible measure is allowed to pass and we are blocked from taking these trust funds from the unified budget.

You should be aware that our off-budget proposal includes its own anti-deficit language which allows us to authorize spending only what has been collected in revenues. Between this provision and the appropriations process itself, we are assured fiscal responsibility for the airport and airway improvement programs.

In the face of the the other body's actions tearing the existing congressional budget process to shreds, I have to say that now is the time for approaches more radical than those we have tried in the past.

That is why I have come forward with my Public Works and Transportation Committee colleagues to take the self-supporting and deficit-proofed airport and airway trust fund, as well as the highway trust fund, out of the Presidential and congressional budget processes.

I have been a long-time supporter of the Congressional Budget Act of 1974 and the process it established. I chaired the budget process task force during 4 of my 6 years on the Budget Committee. It is therefore, only after trying all other avenues and failing in those attempts that I have reluctantly concluded that the trust fund concept will not work for aviation and aviation safety unless our trust fund is separated from the unified budget with its massive deficits.

That is why I implore you to vote against the Fazio and Latta amendments on Thursday.

Mr. SHUSTER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from California [Mr. PACKARD].

Mr. PACKARD. Mr. Chairman, I rise in opposition to the amendment.

There are those who say that the treatment of trust funds should not be dealt with in budget reconciliation. They would have us delay this issue and continue business as usual, with all of the unfavorable repercussions that would have for our highway, transit, and aviation programs and for the integrity of the budget process itself.

I say that this is precisely the right time and the appropriate vehicle for moving the highway and aviation trust funds off budget.

In the first place, the budget process treatment of trust-fund financed transportation programs lies at the very heart of the problem the Public Works Committee seeks to remedy by removing the trust funds from the unified budget.

The very purpose of the reconciliation process is to reduce the general fund deficit, and to that end, it directs the Public Works Committee to reduce spending for the Federal-aid highway programs, which we have done. The reconciliation bill is, therefore, cutting trust fund programs to make the paper deficit in the general fund look smaller. This is dishonest, counter productive, and deceptive.

Since the budget process is causing the problem, we should deal with that problem through the budget process. There is certainly precedent for taking this action in a reconciliation bill. The Omnibus Budget Reconciliation Act of 1981 placed the strategic petroleum reserve program off budget, and that was not even a user fee supported program.

Let's face it, taking the trust funds off budget is really a truth-in-budgeting provision and, conversely, the amendment before us is most definitely not a truth-in-budgeting amendment.

Removing these trust funds from the unified budget would enable us to have a more accurate picture of Federal spending in future years. These self-financed programs only distort decisionmaking in the budget process when they are pitted against other programs which compete for scarce general revenues.

It is time that we see the budget deficit for what it really is, so that Congress can deal with it directly. The American people have already lost confidence in Congress' ability to deal with budget. Is the way to restore that lost confidence, to deceive, and hide the real size of the deficit?

The Fazio amendment would have us continue to use trust fund surpluses to hide the true budget deficit. The budget process does not deserve this, and the users of our transportation system—the benefactors of those systems—do not deserve it either.

I urge my colleagues to vote against both the Fazio and Latta amendments.

Mr. SHUSTER. Mr. Chairman, I yield 1½ minutes to the distinguished gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. Mr. Chairman, I rise in support of removing the highway and aviation trust funds from the unified budget.

When Congress passed legislation in 1982 authorizing the funding for the national airspace system plan [NAS] and increased the taxes going into the airport and airways trust fund skeptics were assured that this time surpluses would not be allowed to accumulate. This time the funds really would be appropriated for their intended purpose of air safety modernization.

However, each year since then, we have watched budgets submitted with funding levels below that needed to fully fund the "NAS" plan. And each year we have failed to appropriate the needed funds and have even reduced the funding.

It is obvious that as long as the budget deficits continue and the trust fund continues to grow larger, the temptation to use this surplus to offset those deficits will increase, not diminish.

The Federal Government has clearly not kept its side of the bargain, and I am not very optimistic that any change is in sight. To continue to include these trust funds in the unified budget is a betrayal of the hundreds of millions of transportation users who have continued to pay into these trust funds in good faith.

The current situation is a gross injustice, but worse yet, it is dangerously shortsighted. There is no excuse to place the safety of the traveling public in jeopardy in order to allow Congress the luxury of continuing to avoid facing the real dimensions of the real deficit.

If we are to put an end to the mishandling of the trust fund we must put an end to the temptation; and, therefore, I strongly support the removal of these trust funds from the unified budget—now.

Defeat the Fazio-Latta amendments.

Mr. HOWARD. Mr. Chairman, I yield 1 minute to a member of our committee, the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Chairman, as a member of the Public Works and Transportation Committee, I urge defeat of the Latta and Fazio amendments.

The trust funds that are used for most transportation projects and gen-

erated by user fees should be considered off budget. Since these funds are used only for their designated purposes, they have absolutely no effect on the real deficit.

Attempts to reduce the deficit by pulling a fast one on paper and applying the trust fund surplus to the deficit is nothing more than a deceitful ploy to fool the American people that Congress is acting responsibly and is attempting to really reduce the deficit.

Let us take real action to reduce the deficit, but let us quit playing bookkeeping games with the trust fund.

I agree with the chairman, as he stated, that tampering with this $6 billion plus in this fund is equivalent to eliminating or endangering 850,000 jobs for Americans in our infrastructure.

This revenue to update our infrastructure should not be a political football here today.

Our deficit situation needs to be addressed, but not on the back of the situation as it has been presented.

Mr. HOWARD. Mr. Chairman, I yield my remaining 30 seconds to the gentleman from California [Mr. DYMALLY].

Mr. DERRICK. Mr. Chairman, I yield 1 additional minute to the gentleman from New Jersey [Mr. HOWARD].

Mr. HOWARD. Mr. Chairman, I yield that additional time to the gentleman from California [Mr. DYMALLY], so that he may be recognized for 1 minute and 30 seconds.

The CHAIRMAN. The gentleman from California [Mr. DYMALLY] is recognized for 1 minute and 30 seconds.

Mr. DYMALLY. Mr. Chairman, I rise in opposition to the amendment to be offered by my colleague from California.

Mr. Chairman, this amendment contends that removing from the unified budget highway, mass transit, airport, and aviation programs will unfairly shelter and protect these programs from future budget cuts required to balance the budget. This amendment contends that removing the Federal Aid Highway Program from the unified budget will cause other on-budget programs such as Medicare, housing, and other trust fund programs to suffer deeper cuts in the future and, therefore, exempt Federal Aid Highway Programs from sharing in the sacrifice of program budget cuts in our effort to reduce the deficit.

Mr. Chairman, nothing can be further from the truth. We are talking apples and oranges in this case.

Transportation trust funds do not belong in the unified budget because spending from these trust funds is limited to specified programs. Moreover, spending from these funds cannot add to the Federal deficit. Transportation trust funds are generated by user fees and can only be used for highway and transit capital projects mandated by the passage of the 1982 Surface Transportation Act which imposed a 5-cents-a-gallon gasoline tax that in turn created the transportation trust fund to be utilized by the States for their respective transportation-related projects. Current law requires the Department of Transportation to reduce or withhold disbursements from the highway trust fund if anticipated user fees cannot support obligations for the affected programs. Therefore, highway and mass transit spending cannot exceed the balance in the trust fund and cannot add to the Federal deficit.

This amendment will allow highway trust funds to be raided as a part of a misguided attempt to reduce the Federal deficit by making a sacrificial lamb of highway programs that did not cause the deficit problem that we are faced with today.

Mr. Chairman, for these reasons, I again register my opposition to the Fazio amendment and urge my colleagues to do likewise.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. DYMALLY. Yes; I yield to the gentleman.

Mr. BOEHLERT. Mr. Chairman, the gentleman made reference to apples and oranges. I would suggest that we are talking about phony baloney and the phony baloney is having these trust funds in the unified budget. I support strongly the removal of these trust funds from the unified budget.

Mr. DYMALLY. Phony baloney—I do not like baloney.

Mr. DERRICK. Mr. Chairman, I yield such time as he may consume to the gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. Mr. Chairman, the House is taking another step today in meeting its fiscal responsibilities by considering the Omnibus Budget Reconciliation Act. This bill reduces Federal spending by $61.1 billion over the next 3 years. That is $3.3 billion more than required by the reconciliation instructions of the budget resolution.

This bill deals with Federal spending for veterans, housing, student loans, the Small Business Administration, and highways as well as a host of other programs.

The Members of this House should be congratulated for reporting a bill that cuts more than was required by the budget resolution. We've done it again. This is the only way that fiscal discipline can be imposed, steadily, and incrementally.

This, I submit, shows out determination to follow through on our commitment to reduce spending and the deficit and restore America's economic vitality.

No one should be surprised that this bill comes in below the budget resolution spending targets. Congress over the years has fulfilled its responsibility to wield the fiscal knife.

National Journal, the publication that covers Congress so perceptively and thoroughly, recognized our seriousness about meeting our fiscal obligations. In a recent article, National Journal observed, "In fact, Congress has probably done more this year than it is getting credit for" in reducing spending and the deficit.

This recognition by the press is critical. Only through the type of accurate reporting that we see in National Journal will the public come to accept that Congress is doing its job and that Congress recognizes the gravity of the threat posed by the deficit.

The public must understand that we, indeed, are heeding the warning of Franco Modigliani of the Massachusetts Institute of Technology, this year's winner of the Nobel Prize for Economics. Professor Modigliani told the Joint Economic Committee earlier this week that the deficit posed a great threat to our economic stability, requiring Congress to "cut the budget now and cut it deeply, with no ifs, ands or buts."

Congress can do the job. In fact, it has been doing the job for the last 42 years. That's the best kept secret in Washington. Congress has been keeping appropriations below the amount requested by the President for all but 4 years in the past 4 decades.

The figures speak loudly and clearly about what we have done. Let's look at appropriations approved by Congress and how they compare with the President's requests:

In 1944, in the midst of World War II, Congress appropriated $2.3 billion less than requested by the President.

In 1954, Congress appropriated $2.6 billion less than requested by the President.

Ten years later, in 1964, the appropriations bills voted by Congress totaled $4.1 billion less than requested by the President.

In 1974, Congress appropriated $9.7 billion less than the President's budget request.

And last year, the amount was $17.2 billion less than the President's budget request.

All of the figures I have just cited are taken from a comparison compiled by the House Appropriations Committee of Presidential budget requests and congressionally appropriated amounts enacted in regular, supplemental, and deficiency appropriations bills.

The budget resolution for fiscal 1986 passed on August 1 demonstrated once again Congress' intent to provide for less spending than requested by the President. Spending approved in the budget resolution is $4.6 billion below what the President asked for.

We have just seen, in dollars and cents, that the problem is the President. Congress knows how to cut and has cut appropriations bills below the President's request. That's an incontrovertible fact.

Today, the spending problem has reached a magnitude never before experienced in our Nation's history. The President talks about cutting spending and cutting the deficit. Yet the Reagan administration has piled up a $1 trillion deficit just since 1981.

This is a deficit that threatens economic disaster and the economic well-being of our people and Nation. It is a dagger pointed at the heart of America.

This deficit draws in foreign capital in record amounts to finance it. This influx of foreign capital has produced an insidious form of inflation—the overvalued dollar. This, in turn, has resulted in a $150 billion trade deficit, the worst trade deficit in our Nation's history.

The overvalued dollar has made American products too expensive for foreigners to buy, and it has subsidized foreign imports that have taken jobs away from hundreds of thousands of American workers.

Federal spending must be cut and can be cut. Congress has demonstrated over the past 40 years that it has kept Federal spending below the Presidents' requests.

We have shown year in and year out the leadership in cutting spending and we will continue to provide that leadership.

COMPARING PRESIDENTIAL BUDGET REQUESTS AND CONGRESSIONALLY APPROPRIATED AMOUNTS ENACTED IN REGULAR ANNUAL, SUPPLEMENTAL AND DEFICIENCY APPROPRIATIONS BILLS [1]

[Current as of January 16, 1985]

Calendar year [1]	Appropriations: Congressionally appropriated amounts	Presidential budget request [2]: Congressionally appropriated amounts	Congressionally appropriated amounts less (−) or more (+) than Presidential request
1943	$115,041,366,395	$110,634,660,785	−$4,406,705,610
1944	63,513,471,020	61,257,906,152	−2,255,564,868
1945	62,453,310,868	61,042,345,331	−1,410,965,537
1946	30,051,109,870	28,459,502,172	−1,591,607,698
1947	33,367,507,923	30,130,762,141	−3,236,745,782

1984	576,343,258,980	559,151,835,986	−17,191,422,994

[1] This data is given on a calendar year, not a fiscal year, basis since supplemental and deficiency appropriations laws are generally enacted in the calendar year succeeding the calendar year during which the regular annual appropriations acts are enacted for the fiscal year to which the supplemental and deficiency appropriations laws apply.

[2] This column includes only those requests which are considered by the Committee on Appropriations.

Data source: Committee on Appropriations, U.S. House of Representatives.

Mr. SHUSTER. Mr. Chairman, I yield myself the remaining 30 seconds.

Mr. Chairman, I would ask my colleagues to think about it for a minute. We have trust fund surpluses building up, dedicated tax dollars not being spent, safer highways and airways not being built, thousands of real construction jobs not being created.

The cure—defeat Latta, defeat Fazio.

Mr. DERRICK. Mr. Chairman, I yield 5 minutes to the distinguished chairman of the Committee on Small Business, the gentleman from Maryland [Mr. MITCHELL], and I ask unanimous consent that the gentleman be permitted to yield time, if he wishes.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was not objection.

Mr. MITCHELL. Mr. Chairman, I want to make clear at the outset that I do not rise in support of these provisions, although I do favor a few of them. My heart tells me to oppose them, but I know that to do so would be futile as this train has already left the station.

The Small Business Administration repeatedly has incurred drastic budget cutbacks and yet everytime we need to reduce spending more, the President and a majority of those in Congress again look toward SBA. This must stop.

The provisions in the small business title of this bill are virtually identical with those contained in H.R. 2540 except that we are expanding the scope and duration of a pilot program to shift the financial mechanism for funding certified development companies away from the Federal Financing Bank and into the private sector. If this pilot is successful, I would expect that we would move the program totally into the private sector.

I am including a brief summary of the provisions of title IX and would note that they are fully explained in both the House Small Business Committee's report on H.R. 2540 (House Rept. 99-222, part 1) and on pages 680-772 of the report on this reconciliation measure (H. Rept. 99-300). Suffice it to say that the Congressional Budget Office has evaluated this measure, with the additional certified development company provisions, and has found that title IX reduces budget authority by $2.082 billion or $10 million more than is required and outlays by $2.48 billion or $1 million more than is required.

I certainly hope that I never am called upon again to discuss provisions making budget cuts in SBA of this magnitude. I am convinced that the adverse impact of these reductions upon small business, minority small business and our economy is going to be felt for years to come.

SUMMARY OF HOUSE SMALL BUSINESS COMMITTEE PART OF RECONCILIATION (H.R. 3500, TITLE IX)

PROGRAM LEVELS AND AUTHORIZATIONS

Section 1 provides levels for each of fiscal years 1986 through 1988 as follows:

General business loans	$2,332.00
Direct and IP	0
Guaranteed	2,332.00
Handicapped loans	20.00
Direct and IP	15.00
Guaranteed	5.00
Economic opportunity loans	105.00
Direct and IP	45.00
Guaranteed	60.00
Energy loans	15.00
Direct and IP	0
Guaranteed	15.00
Development compnay loans	450.00
Direct and IP	.....
Guaranteed	450.00
Investment company loans	291.00
Direct and IP	41.00
Guaranteed	250.00
Veterans loans	20.00
Direct and IP	20.00
Guaranteed	.....
Total business loans	3,233.00
Direct and IP	121.00
Guaranteed	3,112.00
Disaster loans	(1)
Physical	(1)
Nonphysical	0
Surety bond guarantees	900.00
Pollution control bond guarantees	50.00

Salaries and expenses	205.34

[1] As needed.

In order to support the above program levels, the bill authorizes the following appropriations:

	1986	1987	1988
Business loan and investment fund	$376.00	$410.00	$417.00
Real estate lease guarantees	0	0	0
Surety bonds	12.00	12.00	12.00
White House conference	0	0	0
Salaries and expenses	205.34	205.34	205.34
Total	593.34	627.34	634.84

DISASTER PROGRAM CAP

Section 2 eliminates the $500 million program limit on physical disaster loans and economic injury disaster loans for 1986 and repeals the $100 million program level for non-physical disaster loans for 1986.

LABOR SURPLUS AREA POPULATION

Section 3 provides a minimum population criterion of 25,000 when population criteria are used in determinations of labor surplus areas for the purpose of set-asides under section 15 of the Small Business Act.

SALE OF SBIC DEBENTURES

Section 4 prohibits the Federal Financing Bank from purchasing debentures issued by Small Business Investment Companies. Instead these debentures, guaranteed by SBA, would be sold in the private market.

POOLING OF SBIC DEBENTURES

Section 5 clarifies that SBIC debentures may be pooled or packaged and sold to investors in the secondary market under the same terms and conditions governing secondary market sales of SBA guaranteed loans.

AGRICULTURAL DISASTER LOANS AND NONPHYSICAL DISASTER LOANS

Section 6 prohibits SBA from making disaster loans to agricultural producers and abolishes the non-physical disaster loan programs which have been used to provide loans to small businesses hurt by El Nino, the peso devaluation, or PIK.

LOAN GUARANTEE FEE

Section 7 requires SBA to collect a 3 percent guarantee fee on any loan with a term in excess of one year (now 1 percent).

DEVELOPMENT COMPANY DEBENTURES PILOT

Section 8 directs SBA to conduct a pilot program for the sale to private investors of debentures issued by certified development companies and guaranteed by SBA. The amount of the pilot program in 1986 would be $220 million and in 1987 would be $280 million. The balance of the annual $450 million program level would be via sales to the Federal Financing Bank.

MINORITY FRONTS

Section 9 makes it a criminal offense, punishable of a fine of not more than $50,000 or imprisonment of not more than five years, or both, to make a knowing misrepresentation of small business status or disadvantaged (minority) status in order to obtain contracts or subcontracts restricted to firms or individuals in such a status.

STUDY OF NON-GOVERNMENTAL-LOAN GUARANTEES

Section 10 requires SBA to report by December 14, 1985 on options available for establishing a non-Federal government 8(a) guaranteed loan program.

LOANS TO ABORTIONISTS

Section 11 prohibits SBA from providing 7(a) loans to benefit any applicant who performs abortions, engages in abortion research, promotes abortions or trains individuals to perfom abortions unless performed, promoted or recommended in cases where the life of the mother would be endangered if the fetus were carried to term.

IMPOSITION OF FEES

Section 12 requires SBA to impose fees of up to $5.00 each for SBA publications, of up to $100 for processing applications for guaranteed or other loans, and for up to $100 for determining whether any business is a small business concern or any type of such concern, which shall be refunded to the applicant if such designation is not made.

It also requires a report within one year on the feasibility of imposing fees for counseling services and for an annual guarantee fee on loans.

□ 1605

Mr. Chairman, I reserve the balance of my time.

Mr. LATTA. Mr. Chairman, I yield myself 1½ minutes, and I do this just to compliment my good friends on the Committee on Public Works and Transportation on their unity in opposition to the proposition that we put forward in holding together what we have presently as far as having these trust funds on the budget.

We seem to have forgotten that Lyndon Johnson, when he was President of the United States, brought them on budget. It was not something that was done in this administration, and it has been quite some time since Lyndon Johnson was President, as we well know.

So I am a little surprised at the unity over a bookkeeping mechanism. They seem to leave the impression that we are going to be able to build more highways and more bridges and more airport runways if we suddenly take this money off budget. They are still going to have to run through this Congress to get the authority to do whatever they want to do with that money. They are not going to have an open door where they can just reach in at will in that committee or any other committee and haul out the money.

So we cannot overlook this fact, but I do want to commend them on their unity.

Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. McDADE].

Mr. McDADE. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of title IX of this bill. I would like to commend the very distinguished gentleman from Maryland for his outstanding leadership, we will sorely miss that leadership when he leaves Congress.

Let us focus for a moment on the mission of SBA. The Small Business Administration was established as an independent agency in 1953 under President Eisenhower and the Republican-controlled 83d Congress. Through that action, President Eisenhower and Congress specifically recognized the crucial role played by small business in the American economy.

During the past 32 years, SBA has assumed an ever-larger role as the protector of the independent sector. The agency has been saddled with more and more responsibilities, many of them lying far outside SBA's natural territory. Perhaps it has been a victim of its own effectiveness.

SBA has been so efficient in expediting assistance to victims of natural disasters that it has been told to assist agricultural enterprises. It has been forced to duplicate programs administered by the Department of Agriculture.

Originally, SBA provided financial assistance only through direct loans analyzed, made and monitored by SBA employees. In a short time, this proved to be an expensive and cumbersome program, so SBA began to make more and more of its loans jointly with banks through its loan guarantee authority. Today, the overwhelming majority of SBA loans are made through the guarantee mechanism and the agency has made great strides in delegating lending authority to banks and other financial institutions through its certified and preferred lender programs.

In 1958, Congress passed the Small Business Investment Act and established an innovative source of venture capital for new and growing businesses. It was innovative because it harnessed private sector capital and management to achieve a public policy goal. Congress gave SBA the authority to license and regulate these small business investment companies, as well as the authority to make loans to SBIC's to supplement their private capital. Originally, SBA received appropriations to make direct loans to SBIC's but for the past 14 years the assistance has been in the form of guarantees.

In the late 1960's and early 1970's a number of programs to encourage and promote minority business were established and SBA was given additional responsibilities in this area.

In 1976, Congress created the Office of Chief Counsel for Advocacy. In a short time that office has become an effective and active champion of small business in every Federal department and agency.

During the last 3 years Jim Sanders has been a most outstanding Administrator. He has made the agency effective and useful for small business.

Mr. Chairman, our committee took a long hard look at all the programs. I do not need to go into detail on the cuts we made—the bottom line is we achieved over $2.4 billion in savings

for the next 3 years. Savings that were not easy but were a bipartisan effort of a committee of which I am very proud to be a member.

Mr. Chairman, I yield back the balance of my time.

Mr. DERRICK. Mr. Chairman, I yield 15 minutes to the distinguished chairman of the Committee on Energy and Commerce, the gentleman from Michigan [Mr. DINGELL], and I ask unanimous consent that he be permitted to yield such time as he wishes.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DINGELL. I thank the gentleman for yielding this time to me, and I yield myself 5 minutes.

Mr. Chairman, I want to express my particular thanks and very high regard for my distinguished friend, the gentleman from South Carolina [Mr. DERRICK], and to have my colleagues know the great esteem and respect in which I hold that very able Member of this body.

Mr. Chairman, I rise in support of H.R. 3500, the Omnibus Budget Reconciliation Act of 1985. I would like for a few minutes to discuss title IV of that bill, the title which contains the reconciliation recommendations of the Committee on Energy and Commerce.

Title IV contains legislation that will result in 3-year outlay savings of $5.9 billion. These savings have been achieved in part by abolishing the wasteful, scandalous, and unnecessary Synthetic Fuels Corporation, whose officers and directors have characterized themselves uniquely by their attention to their own high standard of living and to providing themselves with various emoluments of office to which they are entitled neither by election nor by performance. Our committee's legislation also achieves reconciliation savings by reducing the rate of fill for the strategic petroleum reserve, by requiring utilities to repay their Federal debts for uranium enrichment, and by imposing fees on users of various Federal regulatory agencies.

These user fees have been imposed on licensees of the Nuclear Regulatory Commission and the Federal Energy Regulatory Commission, and on parties before the Federal Communications Commission. The committee also imposed fees on oil pipelines to cover the cost of safety inspections by the Department of Transportation. It was the view of the committee that the users of the services of these agencies should pay a modest sum to cover the costs of administering the benefits they derive therefrom.

In addition, the committee voted to terminate the local rail service assistance program in this and future years, while permitting all previously appropriated but unobligated or unexpended funds for this program, as well as State revolving loan funds, to remain available until expended.

Mr. Chairman, in addition to these savings in title IV, H.R. 3290, introduced on September 12, 1985, represents the joint effort of the Committee on Energy and Commerce and the Committee on Ways and Means to achieve reconciliation savings in Medicare and Medicaid. That measure is moving separately through the House.

The combined savings from H.R. 3290 and title IV of the bill before us result in total deficit reduction of more than $16.3 billion over 3 years. I am proud to report that the Committee on Energy and Commerce has thus exceeded its reconciliation instructions by nearly $850 million. And I would add that these are all hard savings. There is no "blue smoke and mirrors" whatsoever in the package of the Committee on Energy and Commerce.

Mr. Chairman, this package was the product of a strong bipartisan effort in our committee. Indeed, many of the items in this package originated with our dear friends and colleagues on the minority side. I want to pay particular tribute to the able and distinguished ranking member of the committee, the gentleman from North Carolina [Mr. BROYHILL], as well as the chairmen and ranking members of the several subcommittees who cooperated in this effort, for their invaluable input and their active and capable participation in this difficult process.

Mr. Chairman, I would now like to take some time for a colloquy with my able and distinguished friend, the gentleman from Illinois [Mr. YATES], in regard to the synthetic fuels issue.

Section 4110 of the bill includes a rescission of most funds appropriated for the Energy Security Reserve. Normally such rescissions are accomplished by the Committee on Appropriations. The Committee on Energy and Commerce, however, included this rescission language concerning the Synthetic Fuels Corporation in its reconciliation bill because of the strong support for the provision in the committee and in the House.

I do understand that my dear friend from Illinois and the Committee on Appropriations harbor strong concerns about jurisdiction and about the need for the Committee on Appropriations to retain the right to score budget savings from the rescission. I will support Mr. YATES, of course, on the point of order which I gather he intends to offer. The gentleman from Illinois [Mr. YATES] has always dealt with us in a gentlemanly fashion and has supported us in the past on similar points of order concerning legislation in appropriation bills.

I would appreciate, however, if Mr. YATES would confirm his strong support for retaining in the conference report on Interior appropriations the synfuels rescission adopted by the House in the Interior appropriations bill for fiscal year 1986.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I would be glad to yield to the gentleman from Illinois for a comment on this point.

□ 1615

Mr. YATES. Mr. Chairman, I thank the gentleman for yielding.

I will say to the gentleman that in view of the House's vote on the rescinding of funds of the Synthetic Fuels Corporation, this member of the conference committee will strongly support the House's position.

Mr. DINGELL. Mr. Chairman, I thank my distinguished friend. I am aware of the difficulty that this has caused him, and I am appreciative of his sensitivities and those of the distinguished Committee on Appropriations.

Mr. YATES. If the gentleman will yield further, it causes me no great difficulty. I voted with the gentleman's position when the bill was before the House.

Mr. DINGELL. The gentleman cannot be criticized in my presence. I intend to defend him against all criticism, as I properly should.

Mr. Chairman, I yield back to the distinguished gentleman from South Carolina.

Mr. BOULTER. Mr. Chairman, I yield 10 minute to the gentleman from New York [Mr. LENT] a member of the Committee on Energy and Commerce, and I ask unanimous consent that he be permitted to yield time.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LENT. Mr. Chairman, I thank the gentleman, and I yield myself such time as I may consume.

Mr. Chairman, I rise in support of title IV of H.R. 3500, the reconciliation recommendations made by the Energy and Commerce Committee. Working in a bipartisan fashion, the committee achieved $4.681 billion in outlay savings over fiscal years 1986 through 1988. These savings are real. This estimate comes from the Congressional Budget Office and reflects savings resulting from the legislative recommendations contained in title IV. Let me briefly detail what the committee did.

First, the committee abolished the Synthetic Fuels Corporation and authorized a scaled-down Synthetic Fuels Program at the Department of Energy. This is consistent with the action taken by the House on July 31 when it voted to rescind all but $1 billion of the funds remaining available to the Corporation in the energy security reserve.

Second, the committee reduced the fill rate of the strategic petroleum reserve to the level assumed in the conference report on the first budget resolution. The reserve would be filled at a rate of 35,000 barrels per day over the next 3 years. Construction would be continued on facilities to store up to 750 million barrels of oil and on enhancements to the reserve's drawndown and distribution capability.

Third, the committee would require the Department of Energy to accelerate repayment of the debt its Uranium Enrichment Program has incurred to the Treasury. This repayment schedule was negotiated with the Department of Energy and is generally acceptable to it.

As part of this section, the committee also authorized the Department of Energy to sell to utilities electricity it is contractually committed to take from the Tennessee Valley Authority, but for which it has no need. I understand that the Public Works Committee has strong concerns about this provision, but I trust that we will be able to work together in conference to remedy those concerns.

Fourth, the committee authorized the Nuclear Regulatory Commission, the Federal Energy Regulatory Commission, and the Department of Transportation to collect user fees to offset some of the cost of regulating interstate natural gas pipelines, interstate oil pipelines, and electric utilities.

The conference report on the budget assumed that the Energy and Commerce Committee would report legislation imposing a system of user fees to fund most of the activities of the Federal Energy Regulatory Commission. The committee complied with this assumption in a manner similar to previous administration proposals on FERC user fees.

The committee determined that user fees could and should also be imposed to defray the costs of the Federal Hazardous Liquid and Natural Gas Pipeline Safety Program administered by the Department of Transportation, and of the Nuclear Regulatory Commission. The total cost of the Pipeline Safety Program would be funded through user fees imposed on pipelines subject to Department of Transportation regulation. The NRC would be required to assess annual charges on its licensees which, when combined with other fees, would equal one-half of the total NRC budget.

Fifth, the committee would authorize Federal agencies to enter into shared savings contracts with private energy service companies. Under these contracts, private contractors would install energy conservation equipment in Federal buildings at their own expense. The private contractors would be repaid by sharing in the savings to the Government resulting from the installation of the energy efficiency improvements.

Private building owners, as well as State and local governments, are finding shared savings programs to be very successful. The Federal Government should be able to participate in such contracts as well. Any opportunity to save Government money, provide opportunity for private enterprise, and save energy ought to be seized.

Sixth, the committee would require the Federal Communications Commission to charge fees for the services it provides to the firms it regulates. These fees have been recommended by the FCC and are based on the Commission's estimate of the cost of providing such services.

Seventh, and finally, the committee recommends that no additional funds be authorized for the Local Rail Service Assistance Program after September 1, 1985. This is consistent with the assumption of the conference report on the first budget resolution that funding for this program would be terminated. All previously appropriated but unobligated or unexpended funds would remain available until expended.

In summary, this package is a good package which deserves the support of this body. It complies with budget resolution assumptions and provides real savings. It does not contain extraneous material I commend the chairman of the committee on the bipartisan manner by which this package was developed and I urge my colleagues to support it.

Mr. Chairman, I yield back the balance of my time to the gentleman from Texas [Mr. BOULTER].

Mr. EDGAR. Mr. Chairman, as you know I have opposed proposals to implement a means test and third party reimbursement for Veterans' Administration medical care. I have long been concerned about deficits, but there were several reasons for my not supporting these proposals. Chief among those reasons was the inability of the VA to provide details of the impact of the anticipated savings.

With regard to the third-party-recovery authority, I have consulted closely with representatives of various third-party insurers and others with an interest in the legislation. As a result of these consultations, I offered, and the committee agreed to, clarifications on two points. The first point is about how the costs of VA medical care are to be established by the VA. Specifically, the VA may use either the regulatory process with public review and comment or may enter into contracts or agreements with third parties to establish reasonable costs. In either event, the way the costs are established should be open and clear. The second point is the extent that such costs could be recovered from third parties. No third-party payor would be required to reimburse the VA for the cost of a health care service that is not covered under the terms and conditions of their contracts or agreements with the veteran patient. Except for the provisions which invalidate insurance contract exclusionary clauses banning payment for VA care, all other provisions of an insured veteran's health insurance contract will be applicable in any situation in which the VA is seeking to recover the cost of care provided to the veteran. Thus, to the extent that insurance contracts have provisions requiring preadmission screening or utilization review requirements, or any other such elements, the VA, if it seeks to collect under contracts, will have to comply in a similar fashion as a non-VA entity.

With regard to the means test in title X of this bill, in my judgment, it is still not clear what the savings will really be; it is still not clear what the impact will be on other Federal programs such as Medicaid and Medicare due to demands for care from veterans made ineligible by the means test; it is still not clear what the impact will be on private insurers and the rest of the American health system; and it is still not clear what the impact will be on veterans themselves.

Mr. Chairman, in addition to clarifying the specific items in the third-party reimbursement provision that I have just discussed and in consideration of my doubts about the means test provision, I proposed and the committee agreed to a report on the implementation of these policy changes. This report will include, but not be limited to, the following: First, the number of veterans receiving health care from the VA during the report period, including the existence and extent of policies, contracts, or other arrangements with third parties for the purpose of providing, paying for, or reimbursing expenses for health services; second, the number of veterans applying for health care from the VA during the report period, including the existence and extent of third-party reimbursement arrangements and reasons why veterans who applied for care did not receive it. I did not intend when I offered this provision, nor did the Committee on Veterans' Affairs intend, that an elaborate or costly data collection system be set up. This report is to be derived from management information only. The cost of the report as projected by the CBO is the cost that is routinely incurred as program operations expenses.

There is one final feature about the provisions in title X that is salient. This is a provision that I developed, Mr. MONTGOMERY, the chairman of the full committee agreed to, and was accepted by the committee. It is most important as it provides a sunset clause which would terminate the health care eligibility reform provision of title X after 3 years unless the Congress acts to extend them.

Mr. Chairman, I voted against the package of provisions at our committee markup even though I sincerely believe that my amendments improved it. I would have hoped then and I would hope now that the Members of this body could have the opportunity to vote on these major changes to VA health care eligibility separate from the

overall budget reconciliation package before us today. That opportunity has not been afforded. I still carry my doubts on the VA policies in this package, and would hope that as these provisions are developed further that our committee and the Congress will have the opportunity to fully monitor and evaluate the resulting impact on the veteran population very closely.

Mr. FORD of Michigan. Mr. Chairman, the first concurrent resolution on the budget, fiscal year 1986, includes reconciliation instructions and assumptions which require that the Committee on Education and Labor achieve $800 million in savings in the Guaranteed Student Loan [GSL] Program over the next 3 fiscal years. The savings are to be distributed as follows: $100 million in fiscal year 1986; $250 million in fiscal year 1987; and $450 million in fiscal year 1988.

The reconciliation proposal adopted by the full committee on September 19, 1985, contains items which result in $868 million in savings for fiscal year 1986 through 1988.

Additionally, there are five noncost items in the reconciliation recommendations which help to ensure that the savings do not adversely affect the smooth and continuous operation of the GSL Program.

The committee's budget recommendations contain three proposals which directly affect the financing of guaranty agencies: A return of $50 million in advances in fiscal year 1988; mandatory payment of the administrative cost allowance by the Secretary of Education; and the collection of a 3-percent insurance premium per loan from students.

The first of these provisions requires that $50 million in advances made by the Secretary to guaranty agencies to establish reserve funds and to pay insurance costs be repaid in fiscal year 1988. However, the Secretary must take into consideration the solvency and maturity of the agency as determined by the Comptroller General and any State which established a guaranty agency less than 5 years prior to the recall of the advances is exempt from repaying their advances.

The second guaranty agency financing provision mandates that the Secretary pay the administrative cost allowance for each year beginning in fiscal year 1985. The allowance has not been paid in fiscal year 1985 and, as a result, the operations and financing of several State guaranty agencies have been severely disrupted. This is not a cost item because the Congressional Budget Office [CBO] assumes payment of the administrative cost allowance in its baseline projections for the GSL Program. The administrative cost allowance has been paid in every year from its establishment until fiscal year 1985. Requiring the Secretary to pay the allowance provides greater stability and predictability in financing the agencies.

The committee recommendation further requires all State agencies to charge students an insurance fee of 3 percent per loan collected proportionately on each disbursement of the loan. Current practice in most States is to charge students an insurance premium of 1 percent per year for the in-school period and grace period. The flat 3-percent insurance fee per loan results in a slightly higher premium for students in shorter programs, who are the most likely to default, and the same premiums for students in a 4-year program, who are less likely to default. This provision also enhances the national uniformity of the GSL Program while providing a short-term increase in State guaranty agency financing. In part, this provision will offset the recall of advances.

A second major area addressed by the committee recommendation is collection of loans. While the committee is well aware that the default rate on student loans is low and over the past few years has fallen, it is still important that every action be taken to reduce it even further. Therefore, three provisions in the proposal will have the effect of reducing defaults.

The first of these requires that collection attempts on a defaulted loan continue for 210 days before a State guaranty agency can file with the Federal Government for reinsurance. Currently, defaulted loans can be turned in for reinsurance after 120 days. Thus, the State guaranty agencies are to spend an additional 90 days attempting to get a defaulted loan into repayment status before they can file for reinsurance.

Reimbursement to State agencies or lenders for the costs of supplemental preclaims assistance, in addition to the statutorily required due diligence efforts, is permitted. The amount of the reimbursement is limited to 2 percent of the loan or $100, whichever is less.

During full committee markup, the committee also adopted modified provisions of the Coleman collection bill, H.R. 2150, which was introduced on April 22, 1985. These amendments are designed to improve debt collection activities and default recoveries and to reduce the costs of loan programs administered by the Department of Education.

The committee recommendations further require that students receive a determination of their eligibility or ineligibility for Pell grants before being eligible for a guaranteed student loan. This provision takes effect July 1, 1986, and is not a cost item. It prevents unnecessary borrowing by low-income students who are eligible for Pell grants and helps ensure that Pell grants achieve their basic purpose as the foundation of Federal student aid.

All students are also required to undergo a needs analysis and their guaranteed student loan must be limited to their "remaining need." Current law requires such a needs analysis only for students from families with incomes of $30,000 or more. The recommendation also includes a related provision which extends the current needs analysis for GSL through fiscal year 1989.

All lenders must multiply disbursed guaranteed student loans. Loans made for enrollment periods of 1 semester, 2 quarters, 600 clock hours or less or for amounts of $1,000 or less need not be multiply disbursed. Lenders will receive the in-school interest subsidy and special allowance only on the portion of the loan actually disbursed. The student's loan origination fee is charged proportionately on each disbursement.

The proposal extends the GSL Program for 2 years, fiscal years 1987 and 1988. Since the program expires at the end of fiscal year 1986 but the committee is adopting provisions to make savings in fiscal years 1987 and 1988, it is logical to extend the program through the years in which the savings are to be achieved. This is not a cost item because the CBO baseline projections assume the continuation of the program beyond 1986.

Two additional amendments were adopted in full committee which do not affect costs. The first of these; intoduced by Representative GUNDERSON allows the Student Loan Marketing Association [SLMA] to increase its investment in tax-exempt student loan revenue bonds to support the GSL Program without the necessity of owning a financial institution.

The second amendment, offered by Representative TAUKE, and adopted in full committee includes a provision directing the Secretary to promulgate regulations to permit, in the computation of family contributions for the Pell grant and GSL Programs, the exclusion from family income of any proceeds from a sale of farm or business assets of that family, if such sale results from a foreclosure, forfeiture, or bankruptcy. The provision is effective for academic years beginning on or after July 1, 1985.

The provision is necessary to correct an inequity caused by current law and regulations which require that proceeds from the sale of assets be included in the computation of the family contribution, regardless of the outstanding debt or financial insolvency of the family. The committee believes that denying student aid to families facing farm or business foreclosure or bankruptcy misconstrues the intent of Congress and should be addressed as soon as possible.

Mr. DANNEMEYER. Mr. Chairman, I rise to address the budget savings made by the Committee on Energy and Commerce which are within the jurisdiction of the Subcommittee on Fossil and Synthetic Fuels, of which I am privileged to be the ranking minority member.

The largest single source of outlay savings in the Energy and Commerce title comes from setting the fill rate for the strategic petroleum reserve at 35,000 barrels per day for each of the next 3 years. This action produces a 3-year outlay reduction of $4 billion. This can be done without adversely affecting our energy security position.

As of the end of fiscal year 1985, the strategic petroleum reserve contained 489 million barrels of oil, enough to cover our oil imports for 100 days. This quantity in storage represents a taxpayer investment of almost $18 billion to date.

The 35,000 barrel fill rate is a compromise with the administration, which originally had recommended a moratorium on

any further fill of the reserve. Adoption of the administration request would have resulted in an additional $1.5 billion in savings over the next 3 years.

There is one aspect of the SPR provisions which continues to trouble me. The Energy Policy and Conservation Act, as amended and extended earlier in the year, links the continued production and sale of oil from the Elk Hills Naval Petroleum Reserve in California to the fill of the SPR until the reserve contains at least 500 million barrels of oil. This bill would extend the linkage until the SPR contains 527 million barrels, the projected level after 3 years of further fill at 35,000 barrels per day.

It is unwise and unfair to continue to hold the Elk Hills Reserve hostage to the SPR. Elk Hills is one of the largest oil fields in the United States and its revenues to the Federal Government, which owns three-quarters of it, exceed $1.2 billion annually. Its production of lighter grade crude and natural gas are absolutely necessary for the production, transportation, and refining of the extensive heavy oil fields in the surrounding Kern County area. Furthermore, Elk Hills is a vital source of crude for independent refiners in California, who in turn supply the independent gasoline stations that are at the heart of competition at the retail level in California.

The conference committee on the supplemental appropriations bill earlier in the year recognized the importance of the Elk Hills field by amending EPCA to provide greater flexibility in applying its linkage. I am hopeful that the conference on the reconciliation bill will also recognize the importance of Elk Hills in fashioning the final version of this legislation.

The bill also eliminates the U.S. Synthetic Fuels Corporation and rescinds $6.9 billion budget authority. However, this only results in a 3-year outlay savings of less than $500 million. The reason is the SFC assistance is in the form of loan and price guarantees, not grants. This leaves $1 billion in the energy security reserve, of which $500 million will go the Clean Coal Technology Program and $500 million will be used for a smaller synthetic fuels program at the Department of Energy.

The bill purports to retroactively block project awards made after July 31, 1985 by prohibiting future payments and removing any right of affected parties to sue the U.S. Government. This provision is of dubious constitutionality. Beyond that, it represents very bad policy. Project sponsors, such as Unocal in my congressional district, responded to the Government's call for synthetic fuels programs. Over $700 million in its own funds have been invested to date. The assistance is in the form of price guarantees, so there is no Government outlay until and unless there is product to sell. The SFC board recently scaled back phase two of the Unocal shale project from $2.7 billion to $500 million in keeping with the interest in Congress for a smaller program. It did so on the basis of the statutory charter under which it operates. Congress can, of course, change that charter and we would be doing so with the enactment of the legislation before us. However, to be fair, changes should not be applied retroactively to abrogate contracts in this manner.

The third area of budget savings is in energy-related user fees. The Reagan adminsitration and the Grace Commission have recommended that user fees could save general fund money in cases where a Govenment agency provides benefits or undertakes regulatory activities due to the needs of particular industries and individuals.

The bill authorizes and mandates that the Department of Transportation collect fees to cover the Pipeline Safety Program, which regulates natural gas and hazardous liquids pipelines. There is direct Federal regulation in some cases and also grants to States. The General Accounting Office looked into this at the request of the subcommittee. It is feasible and the impact on consumers of passing through an $8 million program in a multibillion-dollar industry is de minimis.

Unfortunately, the bill before us is contradictory on this issue. While the Energy and Commerce title mandates these fees, the Public Works Committee's title expressly prohibits them. This will need to be worked out in conference. In doing so, permit me to observe that the Public Works Committee has seen fit to add the pipeline safety reauthorization bill to this package. It contains other provisions with which I am in sympathy, but all of these matters must be resolved satisfactorily to move forward on any of them. User fees are an important element. This bill seeks sacrifices from many groups to reduce the deficit. It is not unreasonable to ask certain industries to do their fair share.

On user fees generally, the Energy and Commerce version also directs the Federal Energy Regulatory Commission [FERC] to collect additional fees and charges from those it regulates. This will save an additional $110 million over the next 3 years. It has been requested by the Commission and also deserves our support.

As always, I look forward to working with my colleagues to come up with meaningful budget savings in our committee's jurisdiction to reduce the deficit.

Mr. KILDEE. Mr. Chairman, I rise in support of the Education and Labor Committee's Pension Benefit Guaranty Program provisions in H.R. 3500, the Omnibus Budget Reconciliation Act of 1985.

I know that the members of the committee—and especially Representatives CLAY and ROUKEMA—worked long and hard to develop provisions that would address the various problems facing the Termination Insurance Program in a manner that is acceptable to all interested parties. They have produced an excellent product, and deserve to be commended for their efforts. The single-employer pension provisions were approved unanimously by the Education and Labor Committee, and they have been endorsed by both the administration and by the labor movement.

I would like to take a moment to talk about the background leading up to this important legislation. Title IV of the Employee Retirement Income Security Act of 1974 [ERISA] provided for the establishment of the Pension Plan Termination Insurance Program. Under this program, the Pension Benefit Guaranty Corporation [PBGC] guarantees the payment of certain pension benefits in situations where a pension plan is terminated with insufficient assets to pay benefits which have been earned by participants.

Since the PBGC was created, it has played an invaluable role in assuring the retirement income security of participants. Especially in plant closing situations—which have had a particularly devastating impact on my own State of Michigan during the last recession—the PBGC has helped to assure that participants receive at least a portion of the pension benefits which they have earned.

Although the Pension Plan Termination Insurance Program has generally been successful in achieving the objectives it was intended to accomplish, a number of problems have arisen in connection with the portion of the program covering single-employer pension plans.

First and most importantly, the PBGC currently has a deficit of $462 million. This deficit is projected to grow unless prompt action is taken to increase the premiums paid by plan sponsors to finance the Termination Insurance Program. In its original budget recommendations, the administration requested that the PBGC premium be increased from $2.60 to $8.10 per participant per year—effective January 1, 1986. To eliminate the PBGC's deficit and to insure that the PBGC will be able to meet its future obligations to participants, the legislation approved by the Education and Labor Committee would increase the PBGC premium to $8.50 per participant per year. We believe that this slightly higher amount is justified, in light of the fact that there have been a number of plan terminations involving large unfunded pension liabilities.

The increase in the PBGC premium is not excessive, and will not impose an undue burden on plan sponsors. The General Accounting Office has verified the need for the premium increase. Furthermore, the increase would only amount to about three-tenths of 1 cent per hour in labor costs, which is a small price to pay for such valuable protection for the retirement income security of participants.

It is also important to note that the PBGC premium has not been increased since 1977. Thus, part of the increase simply reflects the need to catch up for inflation.

Second, in the past some profitable employers have been able to take advantage of loopholes in ERISA in order to dump their unfunded pension liabilities onto the PBGC. This has not only increased the PBGC's deficit; it has also increased the upward pressure on the premiums which must be paid by other plan sponsors.

Furthermore, in some cases profitable employers have also been able to evade re-

sponsibility for the payment of certain benefits which have been earned by employees and retirees—such as early retirement and plant shutdown benefits—but which may not be guaranteed by the PBGC. As a result, employees and retirees have still lost a substantial portion of their pension benefits, despite the PBGC guarantees, and even though their employer continued in business and was profitable.

Last July 16, the Labor-Management Relations Subcommittee of the Education and Labor Committee held hearings on the proposed single-employer pension legislation. Several retirees who had formerly worked for companies in my own State of Michigan testified about situations involving this type of abuse. In one case, 667 out of 839 retirees had their benefits reduced when the company terminated its pension plan. Some of these persons had worked over 30 or 40 years for the company. Yet the pension benefits which they had earned were drastically cut when the company terminated its pension plan, even though the company continued in business and was earning record profits. In another case involving a subsidiary of a corporation, almost all of the 67 persons who had retired under the company's pension plan wound up losing a substantial portion of their benefits when the pension plan was terminated. Again, many of these people had been loyal workers for 30 or 40 years. Yet they still had their pensions cut, even though the corporation continued in business and remained a highly profitable corporation. In both of these cases, the retirees suffered tremendous hardships due to the cuts in their pension benefits—benefits which they had earned and were relying on. In both cases there was no reason for these losses, since the companies were highly profitable and could afford to pay for the benefits which they had promised.

Mr. Chairman, I believe that Members on both sides of the aisle share my outrage at this type of situation. It is simply not right that a company should be able to hold out the promise of a pension to its workers, and then after they have worked 30 or 40 years to earn their pension simply pull the rug out from under them by terminating the pension plan. Something is wrong when a profitable company can simply walk away from any responsibility to pay for pension benefits that have been earned by workers under its pension plan.

I am pleased to say that the legislation approved by the Education and Labor Committee would close the loopholes in existing law that have permitted both of the types of abuses that I have described. That is, the legislation would prevent profitable employers from dumping their unfunded pension liabilities onto the PBGC—and thus indirectly onto the other premium payors. And the legislation would also prevent profitable employers from evading responsibility for the payment of certain benefits that have been earned by participants, but which are not guaranteed by the PBGC.

The legislation accomplishes this by creating two types of voluntary plan terminations—standard and distress terminations. Unless an employer can satisfy certain objective criteria of financial hardship, it would only be allowed to terminate its pension plan in a standard termination. Under a standard termination, the employer would be required to pay for all "benefit entitlements" that have been earned by participants, regardless of whether those benefits are guaranteed by the PBGC. Under this type of termination the PBGC and participants are both completely protected against any losses, because the employer must fully fund all benefits that have been earned by participants.

If an employer does satisfy the hardship criteria, then it would be permitted to terminate its plan in a distress termination. However, if the employer later returned to profitability, it would have to set aside a portion of its profits to cover any losses that were sustained by the PBGC or by participants. I want to stress, though, that in the event the employer does not return to profitability, the employer would not have any additional liability beyond that imposed under current law.

The legislation also addresses several other problems which have arisen in connection with the Single-Employer Pension Plan Termination Insurance Program. The legislation provides that if a principal purpose of any person in entering into a transaction is to evade liability to the PBGC or to participants, then that person will still be held liable under the law. This is designed to prevent companies from trying to evade liability to the PBGC or participants through abusive spinoff transactions. The legislation also clarifies that the IRS may require plan sponsors to provide greater security to a plan in situations where they are requesting a funding waiver. This is designed to reduce the losses which may be sustained by the PBGC as a result of funding waiver.

Mr. Chairman, the Education and Labor Committee has wrestled with the problems associated with the Single-Employer Pension Plan Termination Insurance Program for the last 5 years. I believe that the reforms which have been developed by the committee represent a balanced package that addresses the concerns of all interested parties in a fair and equitable manner. It is a good package, which I am confident will greatly improve the soundness of the Single-Employer Pension Plan Termination Insurance Program, and contribute to the retirement income security of participant.

Mr. UDALL. Mr. Chairman, today during debate on the rule for H.R. 3500, the budget reconciliation bill, several proponents of the giveaway of billions in Federal offshore oil and gas revenues to certain coastal States argued that the provision is comparable to the 50–50 split of onshore mineral receipts with other States. I wanted to take a couple of minutes to explain how utterly wrong headed this notion is.

It is true that since 1920 the Federal Government has shared with the individual States 50 percent of the revenues derived from the leasing of the public mineral lands. It is also true that the Federal Government does not now share any of the revenues derived from offshore oil and gas development in Federal waters.

However, what the seven coastal States who benefit so overgenerously from H.R. 3500 want this House to conveniently forget is that the United States made its deal with the coastal States on offshore resources and revenues 32 years ago.

In 1953, after the Supreme Court ruled that all offshore waters belong solely to the United States, the Congress turned around and gave the coastal States the first 3 miles of those waters. In the case of Texas, the grant was 3 leagues or about 11 miles. Within this first 3 miles, these States have been receiving 100 percent of all the rents, bonuses, royalties, taxes, and other economic benefits of oil and gas development for the past 32 years.

Now that these States are complaining that that was not enough and they want to get a piece—they modestly are willing to settle for just 27 percent this time—of the next 3 miles of Federal waters. So when these coastal States cry out for fairness and equality in sharing U.S. mineral revenues, the answer is simple. You already have it and you have it in ways the noncoastal States never will have it.

Even if the Congress were to accept the proponents basic theory, the talk about comparing percentages—27-percent offshore as opposed to 50-percent onshore—are wildly misleading because the amount of revenue at stake is completely incomparable.

For example, in fiscal year 1985, my own State of Arizona collected $2,687,000 as its 50 percent share of onshore mineral receipts. Under H.R. 3500, the State of Louisiana will get $662,000,000 in bonuses, rents and royalties collected since 1978 and an untold amount in the future. At this rate, it would take Arizona 254 years just to catch up to this one-time giveaway to one State. California is guaranteed at least $600,000,000 and it would take Arizona 240 years to catch up to that State. Even at an annual rate, Louisiana's windfall is 37 times what Arizona got from onshore mineral receipts last year.

To compare these mechanisms is wholly misleading on many other grounds. The onshore lands are entirely within the boundaries of the respective States while the 8(g) zone of offshore waters are completely outside the boundary of any State.

In addition, although proponents of this giveaway love to read the requirements of section 8(g)(4) which requires a "fair and equitable distribution" of all revenues from the 8(g) zone, what they don't quote to you is section 8(g)(2). This section makes it clear that there is to be a division of these revenues with the States only when Federal leasing in the 8(g) zone directly involves a reservoir of oil and gas that is commonly held by the State and Federal government, an extremely rare circumstance.

Congress never intended in 1978 to put what amounts to 20 percent of all its OCS revenues on the table for some vague fair and equitable distribution with the States. It never intended this relatively obscure

section to become the excuse for slipping general OCS revenue sharing past the Congress, which is what it has become. If Congress wanted to do that now, then fine. But I know, and I suspect my colleagues from these coastal States know, that if this effort were exposed to the full legislative process they could never succeed.

Mr. Chairman, these cries for fairness and justice heard today miss the mark and miss it badly. They cover up an indefensible grab of purely Federal revenue that has been skillfully engineered by these seven States.

Ms. OAKAR. Mr. Chairman, I rise to strongly support the provisions of the Omnibus Reconciliation Act of 1985 concerning Federal employees and annuitants.

As you may know, in its recommendations to the budget committee, which have been incorporated in the Reconciliation Act, the House Committee on Post Office and Civil Service removed the current 75-percent limitation on the Government's contribution to the Federal Employees Health Benefits Program [FEHBP] and mandated a 5-percent pay raise for Federal workers in fiscal years 1987 and 1988.

By removing the cap on the Government's contribution to the Health Benefits Program, the committee reaffirmed its commitment to providing health insurance protection to Federal workers and annuitants at a reasonable cost. If the cap is retained, the 3 million subscribers to the FEHBP would be forced, in many instances, to pay substantially more for their health insurance protection than justified by the rate structure of the various plans.

Mr. Chairman, the 75-percent limitation on the Government's contribution would force these individuals to pay more than $100 million in additional premiums. Given the recent history of the FEHBP, in which the administration has cut benefits by approximately 15 percent while increasing premiums by nearly 50 percent, it is only fair that we permit subscribers to pay the actual cost of their insurance and not an artificially increased rate. It is for these reasons that the Post Office and Civil Service Committee approved the elimination of the cap on the Government's contribution which, by the way, was supported in testimony before my Subcommittee on Compensation and Employee Benefits by the administration, numerous employee organizations, and other public witnesses. I would urge the House to retain this provision of the Reconciliation Act.

Mr. Chairman, we have also witnessed a tremendous buildup in the FEHBP reserves this year, due to decreased utilization and excessive premium charges. Eleven carriers will be providing rebates to subscribers, while many others have announced premium reductions. It is extremely important that all funds which are rebated from the special reserves be returned to subscribers or remain within the program and not be transferred to the General Treasury. The FEHBP provides less benefits at greater cost than scores of plans in the private sector and the States. We should use the excess reserves to improve the program and restore some of the unwarranted reductions that have taken place over the past 3 years.

As many of you are aware, the Budget Reconciliation Act freezes the pay of Federal workers in fiscal year 1986. Through this action and other reductions in previous years, the wages of Federal workers are nearly 20 percent behind those of their private sector counterparts, according to the President's own advisory committee on Federal pay. The current system for determining wages for Federal workers is a shambles, providing neither the stability nor the predictability that Congress intended when it adopted the Federal Pay Comparability Act of 1971.

In reviewing the history of wage increases in the Federal Government for the past 15 years, I am struck by the fact that pay for white collar workers has risen by 221 percent, while wages in the private sector have increased by 270 percent; and the consumer price index has increased by 306 percent.

Because of the failure of Federal pay to keep pace with inflation and wage movements in private industry, the Government is losing some of its most talented and experienced employees. Of equal concern, the Federal Government is experiencing great difficulties in recruiting top-notch college students, especially in the engineering and scientific occupations. I am convinced that, if we do not act in a fair and reasonable manner to provide an equitable wage adjustment for Federal workers, we will continue to witness an erosion of Government services because of the inability to attract and retain highly qualified employees.

For these reasons, the committee approved a provision in the Budget Reconciliation Act providing a 5-percent pay raise for Federal workers in fiscal years 1987 and 1988. While these adjustments will not bring Federal wages to the levels of private industry, it will demonstrate to employees our recognition of the serious inequities in the current wage system and our determination to ease their burden. It also recognizes the need to take immediate action to deal with the severe deficit problem that we are facing by limiting the pay raise to 5 percent.

Mr. Chairman, I believe that this is a balanced proposal that is fair to the employees and the citizens of our great Nation and urge its adoption by the House. If we are to retain a high caliber, dedicated workforce to provide essential services to the American people, then we must begin to act reasonably and responsibly in dealing with the severe problems in Federal compensation. We have an opportunity to begin this process today by supporting the provisions of the Omnibus Reconciliation Act of 1985 affecting Federal wages and the Health Benefits Program.

Mr. CONTE. Mr. Chairman, I want to take a few minutes to run through the Small Business Committee provisions of H.R. 3500—title IX of the legislation.

Earlier this year, when the administration had proposed shutting down the Small Business Administration, we on the Small Business Committee worked long and hard to come up with a proposal to slim down, but not shut down, that Agency. The committee held weeks and weeks of hearings on the importance of the SBA. Witness after witness told us that Congress could do two things for small business in America: Reduce the deficit, and retain the SBA as an independent agency for small business in this country.

Title IX of this bill is consistent with both of these principles. It is a carefully crafted, balanced compromise which the Small Business Committee should be proud of. It keeps a strong, independent voice for small business in the executive branch, but consistent with the budget constraints facing our Nation, achieves $2.5 billion in outlay savings over the next 3 years. This will not cripple or destroy small business in America, but it is an important first step on the road to fiscal restraint.

I want to thank my chairman, PARREN MITCHELL, for inviting all members of the committee to sit in on the hearings he held earlier this year on the SBA, and for his work and accommodation to the members of the committee on drafting an authorization bill. I also want to thank my good friend, JOE MCDADE, the ranking member of the committee, for his hard work in drafting a balanced compromise for the SBA authorization.

Mr. Chairman, the small business authorization bill contains an important amendment I offered in the full committee, requiring the SBA to impose user fees for certain services the Agency provides. Many of you know of my interest in imposing user fees for many Government services, and the amendment adopted by the committee is an important first step in that direction. We're not saying that small businesses will have to pay outlandish fees for simple services—in fact, the bill prevents that. Instead, we're saying that these people who get publications and other benefits for free will now have to pay a nominal fee to recover some of the Government's costs. In other words, if you want to dance, you'll have to pay the piper.

Mr. Chairman, user fees are an idea whose time has come. A more technical explanation of the amendment and the committee's intent follows:

USER FEE AMENDMENT TO TITLE IX

The bill requires the Administrator of the SBA to impose modest fees for *only* the following services: publication, loan applications, and designation as a small business entitled to preferential treatment under any federal government programs. In addition, the SBA will be directed to study and report to the Congress within one year on the feasibility of imposing user fees for SBA-sponsored counseling services, including Small Business Development Centers and the SCORE and ACE programs. Although the Committee did not express any opinion on the appropriateness of imposing user fees for counseling services, I believe that this is another area where fees could be imposed.

With respect to fees that must be imposed, the Committee directed the Administrator of the SBA to advice the House and Senate Committees on Appropriations and

Small Business of the fees proposed and the services for which fees will be imposed. That report is due within 60 days of enactment. The Administrator will also advise the committees as to the date he expects the fees to become effective. The Administrator would, before imposing the fees, issue regulations to formally implement them, and the Committee anticipated that the fees would be in effect no later than March 1, 1986.

The Committee believed that this period of time was suitable for the Congress to study the Administrator's fee schedule. The Committee urged the Administrator to impose reasonable fees which will meet with the approval of the Congress. To further insure that the fees are fair to users of SBA services, the Committee imposed statutory limits on the fees that could be charged for certain services.

With respect to publications provided by the agency, the Committee directed the SBA to charge the lesser of $5, or the actual publication costs. The Administrator could also charge up to, but no more than, $100 for processing applications. Finally, if a firm seeks designation as a small business eligible for preferential treatment, the fee could not be more than $100. The Committee also believe that if the designation was not made, the fee would be refunded.

The proceed collected from the user fees would be deposited into the general fund of the Treasury as proprietary receipts of the Small Business Administration to be retained and used by that agency to cover the costs of services and publications on which the fees are imposed. Use of those receipts would be subject, of course, to the annual appropriations process. The Committee expected the Administrator to provide an annual verification to the Congress on the amounts collected from the fees.

Since adoption of the Conte amendment, it has come to the Committee's attention that the amendment may pose two minor problems. First, the amendment requires the Administrator to impose fees for "guaranteed and other loans". Initially, we thought that this phrasing would give the Administrator enough discretion to avoid imposing fees for certain types of loans—disaster loans, for example. The Committee did not intend that fees be imposed for disaster loan applications. A technical amendment in conference with the other body is anticipated to clarify the Committee's intent.

The user fee amendment also requires fees to be imposed for "designation as a small business (or any type of such business)" eligible for preferential treatment under the Small Business Act or any other Act. The SBA has indicated that such broad language may create administrative problems. The Committee's intent in including this service was only to require fee imposition for such designation as an "8(a)" firm. Again, a technical amendment is anticipated to clarify this point.

Mr. BOULTER. Mr. Chairman, we have no further requests for time and I yield back the balance of my time.

Mr. DERRICK. Mr. Chairman, I yield back the balance of my time, and I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. DINGELL] having assumed the Chair, Mr. DE LA GARZA, chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3500) to provide for reconciliation pursuant to section 2 of the First Concurrent Resolution on the Budget for the fiscal year 1986, had come to no resolution thereon.

GENERAL LEAVE

Mr. DERRICK. Mr. Speaker, I ask unanimous consent that all Members may be permitted to revise and extend their remarks and to include extraneous matter on H.R. 3500, the bill just debated in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

A PROPOSED MEMORIAL TO HONOR THE 3D INFANTRY DIVISION

(Mr. RAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RAY. Mr. Speaker, last month the Society of the 3d Infantry Division gathered in Tampa, FL, for its 66th reunion. More than 600 members from around the United States attended this meeting, including two Medal of Honor recipients and two veterans from World War I.

At their convention, the members of the society adopted a resolution calling on Congress to enact H.R. 2440, which I have introduced authorizing them to establish here in Washington a memorial to their fallen comrades.

The legislation will not cost the taxpayers any money. And the society is raising the funds necessary to cover the cost of the memorial.

The long, proud history of the Army's 3d Infantry Division demonstrates that its war dead are deserving of this kind of memorial. And there is ample precedent for the memorial.

Over 50 of my colleagues have already joined me in cosponsoring H.R. 2440, and I urge others to join us.

Mr. Speaker, I insert in the RECORD at this point the text of the resolution that was adopted by the society at its meeting in Florida:

RESOLUTION

Whereas, the Government of the United States has a long and ennobling history of honoring its war-dead, and

Whereas, respectful memorialization of 3d Infantry Division dead from two World Wars and the Korean Conflict is clearly consistent with this policy and practice, and

Whereas, they deserve to be and are not memorialized in the National Capital Area, and

Whereas, two measures now pending in the 99th Congress, S. 1107 and H.R. 2440, can satisfy this need at no cost to the Government, therefore

Be it resolved, That the Society, recognized by the U.S. Government as "a national, non-profit, patriotic veterans' organization" and open to all who have contributed, or are now contributing, to the 3d Infantry Division's proud and unparalleled record of nearly seventy years; continuous distinguished service on four continents, petition the 99th Congress for early approval of the measures identified in this document.

And further resolved, In recognition that the Society draws its membership from virtually all fifty states, a copy of this Resolution be presented to each Member of the 99th Congress as an expression of broad-based constituent concern and interest in these measures.

PRESIDENTIAL PRIMARY REFORM LEGISLATION ON TRACK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, I recently introduced H.R. 3542, the Regional Presidential Primary and Caucus Act, to bring a measure to order to the present chaotic way we nominate candidates for President of the United States.

My legislation would reform the nominating process by dividing the country into 10 regions and provide for primaries or caucuses in the States of 2 of the regions at a time—on 1 of 5 dates over a 4-month period. The States could decide, with the respective national and State party committees, on whether to have a primary or a caucus or to choose their national convention delegates in some other way. But the dates of the primaries and caucuses would be specified according to lot and would be limited to the five dates separated by 4-week periods. Candidates would be able to concentrate on the States in two areas, instead of running all over the country in a frantic effort to meet primary and caucus schedules set by competing State legislatures.

I think the result would be a more orderly and rational system of selecting the Chief Executive of the greatest country on Earth. It would made the Presidential selection process less of a mad scramble and would strengthen our basic democratic institutions.

I include with my remarks at this point in the RECORD an editorial recently published by Florida Today, October 17, 1985, on this subject, as follows:

[From Florida Today, Oct. 17, 1985]

NELSON ON TRACK TO SEEK PRIMARY ELECTION REFORMS

With the next presidential election three years away, the subject of presidential primaries is not exactly a hot topic right now, but that issue is on the mind of Brevard Congressman Bill Nelson.

Last week he filed a bill that would drastically reform the "system"—or, more correctly, the lack thereof—by which our nation selects its presidential contenders. Actually, now is an opportune time to pursue this reform, because there would be no hope of getting the political action necessary if a presidential election were on the horizon.

Nelson's proposal calls for limiting the number and timing of presidential primaries by changing to a regional system. We editorially advocated the same type of change 10 years ago. And a special bipartisan commission, jointly headed by Melvin Laird, a Republican former defense secretary, and former Sen. Adlai Stevenson, D-Ill., made a similar recommendation in 1982.

Nelson's proposal would cut the number of primary election dates to just five. Contrast that with the fact that in 1980 primaries were held by 37 states stretching over a period of half a year.

Under the congressman's proposal, the nation would be divided into 10 regions, with two regions holding primaries on each of five set dates. The first primary would be held the first Tuesday in February in the presidential election year, with succeeding primaries held at four-week intervals. Primary dates would be assigned to regions by lot, with a provision that regions conducting primaries on the same date not be contiguous.

Florida would be in Region 10, along with Tennessee, Mississippi, Alabama, Georgia, Puerto Rico and the Virgin Islands.

Nelson says a federal law is necessary to "bring a measure of order to the present chaotic process." We fully agree, because things haven't changed in the 10 years since we noted:

The length of the primary seasons and the requirements for raising contributions for federal matching funds almost force campaigning to begin two years before the election. That's too much for the candidates and the voters to stand, and should be reduced.

States such as New Hampshire with early primaries have far too great an impact on the nomination, way out of proportion to their size. Voters in several large states with late primaries were forced to sit helpless, unable to support the candidate of their choice, because he had dropped out after only a few losses in smaller states.

"Crossover voting" should be banned to make sure only Democrats vote for Democratic candidates and Republicans for Republicans in primaries. (It's already that way in Florida.)

Rules governing selection of convention delegates should be standardized to make the election process convenient and easy to understand. In some states, one candidate won the "beauty contest" or popularity vote, while another walked off with all the delegates. In some places, like Florida, candidate names were on the ballot. Elsewhere, only delegate names were printed.

A TRIBUTE TO MARINES KILLED IN BEIRUT, LEBANON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut [Mr. GEJDENSON] is recognized for 5 minutes.

Mr. GEJDENSON. Mr. Speaker, I rise today to pay special tribute to the 241 marines who were tragically killed 2 years ago today in Beirut, Lebanon.

I think all of us here today remember that painful moment when we learned that a suicide bomber had driven a truck loaded with explosives into the marine barracks at Beirut International Airport. That explosion took the lives of 241 brave, young, American men, 4 of whom came from the Second District of Connecticut; Thomas G. Smith of Middletown, Thomas A. DiBenedetto of Mansfield, William Hart of Groton, and Stephen D. Tingley of Ellington.

Whatever disagreements there may have been at the time over what U.S. policy with respect to Lebanon should have been, there is no argument that these young men represented America's hope for bringing peace to a region of the world that has known only violence and terror for many years now. I know that my colleagues in the Congress share my view that the marines who gave their lies in Lebanon will be forever remembered in the hearts of their families and in the hearts of all of us who hope for peace in the world.

STATUS REPORT ON FIRST CONCURRENT RESOLUTION ON THE BUDGET, FISCAL YEAR 1986

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GRAY] is recognized for 5 minutes.

Mr. GRAY of Pennsylvania. Mr. Speaker, I am submitting for the RECORD my letter of today's date setting forth the report of the Committee on the Budget, as follows:

COMMITTEE ON THE BUDGET,
Washington, DC, October 23, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending.

Pursuant to Committee Rule 10, I am herewith transmitting the status report under S. Con. Res. 32, the First Concurrent Resolution on the Budget for Fiscal Year 1986. This report reflects the adopted budget resolution of August 1, 1985, and the current CBO estimates of budget authority, outlays, and revenues.

As with last year, the procedural situation with regard to the spending ceiling is affected this year by Section 3(b) of S. Con. Res. 32. Enforcement against possible breaches of the spending ceiling under Section 311(a) of the Budget Act will not apply where a measure would not cause a committee to exceed its "appropriate allocation" made pursuant to Section 302(a) of the Budget Act. In the House, the appropriate 302(a) allocation includes "new discretionary budget authority" and "new entitlement authority" only. It should be noted that under this procedure neither the total level of outlays nor a committee's outlay allocation is considered. This exception is only provided because an automatic budget resolution is in effect and will cease to apply if Congress revises the budget resolution for fiscal year 1986.

The intent of the Section 302(a) "discretionary budget authority" and "new entitlement authority" subceiling provided by Section 3(b) of the resolution is to protect a committee that has stayed within its spending allocation—discretionary budget authority and new entitlement authority—from points of order if the total spending ceiling has been breached for reasons outside of its control. The 302(a) allocations to House committees made pursuant to the conference report on S. Con. Res. 32 were printed in the Congressional Record, September 5, 1985, H. 7290.

The enclosed tables compare enacted legislation to each committee's 302(a) allocation of discretionary budget authority and of new entitlement authority.

Sincerely,

WILLIAM H. GRAY, III,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1986 CONGRESSIONAL BUDGET ADOPTED IN SENATE CONCURRENT RESOLUTION 32

REFLECTING COMPLETED ACTION AS OF OCTOBER 17, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	1,069,700	967,600	795,700
Current level	1,067,268	980,306	792,895
Amount under ceilings	2,432		
Amount over ceilings		12,706	
Amount under floor			2,805

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $2,432 million for fiscal year 1986, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in S. Con. Res. 32 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate in outlays for fiscal year 1986, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in S. Con. Res. 32 to be exceeded.

REVENUES

Any measure that would result in a revenue loss for fiscal year 1986, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in S. Con. Res. 32.

CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 21, 1985.

Hon. WILLIAM H. GRAY III,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for those items contained in the most recently agreed to concurrent resolution on the 1986 budget (S. Con. Res. 32). This report for fiscal year 1986 is tabulated as of close of business October 17, 1985, and is based on assumptions and estimates consistent with S. Con. Res. 32. A summary of this tabulation is as follows:

[In millions of dollars]

	Budget authority	Outlays	Revenues
Current level	1,067,268	980,306	792,895
1985 budget resolution, Senate Concurrent Resolution 32	1,069,700	967,600	795,700
Current level is:			
Over resolution by		12,706	
Under resolution by	2,432		2,805

Since my last report the Congress has cleared for the President's signature the Energy and Water Appropriations Bill for 1986, H.R. 2959; Simplification of Imputed Interest Rules, H.R. 2475; Health Professions Educational Assistance, H.R. 2410; and amendments to the Arms Control Act affecting the Special Defense Acquisition Fund, S. 1726. Budget authority, outlay, and revenue estimates change as a result of these bills.

With best wishes,
Sincerely,

RUDOLPH G. PENNER.

PARLIAMENTARIAN STATUS REPORT HOUSE SUPPORTING DETAIL, FISCAL YEAR 1986 AS OF CLOSE OF BUSINESS OCTOBER 17, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
I. Enacted in previous sessions:			
Revenues			792,700
Permanent appropriations and trust funds	708,256	631,009

* Interfund transactions do not add to budget totals.
Note.—Numbers may not add due to rounding.

IN MEMORY OF ALEX ODEH

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio [Ms. OAKAR] is recognized for 5 minutes.

Ms. OAKAR. Mr. Speaker, the murder of Alex Odeh was a despicable act that we must all condemn and deplore. Above all, his murder is a terrible tragedy for his family, that includes three small children. I want to offer my condolences to his widow and children. Nothing can ever make up for the terrible loss they have sustained.

Because Alex Odeh was allegedly murdered for his political beliefs, his death is a terrible loss to our society, as well. He was the victim of a vicious bombing because he chose to exercise his constitutionally guaranteed right to express his views in a public forum. In a very real sense, therefore, the attack on Alex Odeh was an attack on our society and an attack on each citizen of our country. Our country is strong because of the diversity of our people. The rich interplay of views and ideals creates a dynamic in our society that invariably leads to creative solutions to difficult. Political dialog itself, is often the first step toward the solution of seemingly intractable problems.

Alex Odeh had strong views on the Middle East, grounded on his personal experiences with the problems of the region. He emigrated to our country in the early 1970's and immediately began participating in our society, eventually becoming a citizen. Alex Odeh offered his insights and his suggestions for a responsible and peaceful resolution of the conflict in the Middle East. Not everyone agreed with his views but that is the American way. Everyday, throughout our land, people appear on radio and television talk shows, they write letters to the editor, they offer articles for

publication to magazines and newspapers. The listeners and readers of these views, are able to measure their own views against them and change them accordingly. The practice of free speech has served our country well for more than two centuries. On Friday morning, October 11, 1985, a good, decent man was killed for engaging in this practice. The fabric of American life was pierced as a result.

As we take time today to commemorate the memory of Alex Odeh, let us resolve to reaffirm our belief in the principles of free speech. Only by continuing to exercise our own right to free speech, and by defending the rights of others to that same exercise, can be contributed to repairing the damage to our society that was done by that vicious bomb blast.

It is also essential that the perpetrators of this crime be brought to justice. This is a case that demonstrates the adage that the price of freedom is eternal vigilance.

Finally, we must all contribute to a resolution of the terrible conflict that continues to divide the people of the Middle East and has even spilled over into the normally peaceful office buildings of Snata Ana, CA. We must put an end to all violence by bringing to justice those who have perpetrated these actions.

□ 1630

ORDER OF BUSINESS

Mr. CRAIG. Mr. Speaker, I ask unanimous consent to proceed at this point with my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Idaho?

There was no objection.

CONGRESS' ACTIONS ON THE DEFICIT AND THE BALANCED BUDGET CONSTITUTIONAL AMENDMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Idaho [Mr. CRAIG] is recognized for 60 minutes.

Mr. CRAIG. Mr. Speaker, I have taken this special order out this evening to once again discuss an issue that is not only very important to the constituency of the State of Idaho, but now has grown to become a major national issue; and that is the question of the deficit and the question of what this Congress will do in the coming months to build a program of deficit reduction that the American people can effectively recognize as being a process that will work and a process that they can believe in.

Some years ago, as I began my service here in the Congress, it became clear to me as it has been clear to others for a good long while, that unless we changed the budget process, unless this Congress was and had to live under a rule that would dictate in large part to them what they could or could not do in the area of spending, that we would someday arrive at an unmanageable deficit.

The reason that was happening is a historic one. A historic one that results over the last 20 years of the passing of laws and the creating of programs that has to this day institutionalized the spending process. So that when Members of Congress are asked if they are fiscally responsible and support deficit reduction they find themselves in most instances saying "Yes, they do; Yes, we do; and Yes, of course, we vote for those kinds of things."

While at the same time, budgets continue to grow way beyond balance, deficits continue to grow and today we are now faced with well over a $200 billion deficit, and in just the last several weeks, we have been asked to raise the debt ceiling in this Nation to well over $2 trillion.

I use the word "institutionalizing." What is meant by that? I believe it means in large part that the Budget Act itself and programs that have granted entitlement are those that drive the budget process and result in Members of this body not necessarily having to vote on individual programs while the spending process continually goes on.

It was this fear and this concern and a lack of willingness to make hard, tough fiscal decisions that brought me to the conclusion some time ago that it would not be a law inside this body; that it would not be a Federal statute that would and could control the spending of our country, but that it would have to be a constitutional law. A constitutional provision, a constitutional amendment that in fact mandated a certain level of spending.

It was with that in mind that I joined with others who were then actively involved in the process of attempting to get a constitutional amendment to our Constitution that would mandate a balanced budget.

Two years ago, I and others began to work to form an organization here called Congressional Leaders United for a Balanced Budget. That organization is now well over 150 strong and today we have well over 200 cosponsors who support House Joint Resolution 27, that mandates a constitutional amendment to balance the Federal budget.

As we talk about that and as we work for cosponsorship and encourage a broader base of this Congress to recognize the will of the American people, another issue has developed on the scene that I beleive goes hand in glove with the effort to balance the Federal budget vis-a-vis a constitutional amendment.

What is that? Well, that is, of course, the amendment to the debt ceiling that was sent to us by the other body known as Gramm-Rudman, or here in the House as Gramm-Rudman-Mack-Cheney.

It is an amendment that would mandate a procedure for the next 6 years that would require a given dollar figure of deficit reduction that would bring us in to compliance or into a balanced budget by 1991. That issue is now before a conference of the House and the Senate as they attempt to work out the difficulities that are argued are built within the legislation itself.

Some have said, "Well, now, if we have this, if the Congress in their wisdom passes Gramm-Rudman-Cheney-Mack, then we won't need a constitutional amendment requiring a balanced budget; that this solves the problem."

My argument and the argument of a good many others who support Gramm-Rudman is that it will not solve the problem. It is telling the American people by law, by legislative action that here is a process, here is a 6-year process that the American public can watch and that will govern this body and the other moving toward a balanced budget by 1991.

Remember, it is important to recognize that it is a law; it is not a constitutional amendment, it is a Federal statute if it becomes law.

It was in 1978 and 1979 that this body and the other body in their wisdom passed similar laws that said, by a given date—and that date was 1981—that we would have a balanced budget; that we would require of our Government a balanced budget; in essence, we would require of ourselves a balanced budget.

What happened? Why do we not have a balanced budget today if it is in fact law upon the books of this country that we were to have one by 1981?

Sadly enough, there lies the problem. What laws this body passes are laws that it can change; and it decided, as it found that it was very difficult to cut spending, very difficult to bring budgets in balance, that it would simply violate the law by ignoring the law with another law; and of course in the Budget Act and in the rules of the House, that became an easy kind of thing to do.

Many of my colleagues, including myself, have from time to time pointed out as we voted on appropriation bills that were way beyond a balanced budget that we were violating our own law.

Technically that was not true. We had by that act waived the law that was passed in 1978 and restated in 1979. Although the law for a balanced budget remains on the books of this country, it has been consistently bypassed over the last good many years, and of course we now have well over a $200 billion deficit.

Am I arguing, then, that the Gramm-Rudman-Mack-Cheney proposal would be followed or reacted to by this body in the same way? No; not necessarily. It is distinctively different in that it grants certain powers to the Executive that did not exist in the last that was passed in 1978.

Remember, it is a law; it is a Federal statute that could be changed by this body as it mandates the very, very difficult choices that would have to be made under a Gramm-Rudman-Cheney-Mack proposal.

That is why I have said, and the members of the CLUBB organization and those who support a constitutional amendment to balance the Federal budget have continually said: Mr. Speaker and Members of this body, give us both. Give us Gramm-Rudman-Cheney-Mack as a procedure or as a process by which to get to a balanced budget by 1991, but to ensure to the American people that we really do mean business. Give us a constitutional amendment to send forth to the States for their ratification that would require, by constitutional law, a balanced budget by 1991.

That way we have doubled insurance: We have provided for those who are our skeptics and who say, how can you balance a budget that is $200 billion in deficit today? We can say, "Here's the process. Here's the procedure by which we'll do it, and we'll do it over a 6-year period; and then here's the constitutional law on the other side that will strengthen the backbone and the will of this body to assure that we will have a balanced budget and that in fact it will become the law of the land, the constitutional law of the land by 1991."

So I am saying, Mr. Speaker, give us both. Give us and the American people the opportunity to have both Gramm-Rudman-Cheney-Mack and also give us the opportunity to vote here on this floor on a constitutional amendment that we can then send out to the American people for their decision-making process; for their ratification and not for this body's decision.

That is really the issue that I think is before this Congress today, as our conference, our joint House-Senate conference works its will in attempting to refine and bring forth the Gramm-Rudman proposal, let us also echo forth the need for a constitutional amendment that would ensure or assure the implementation of Gramm-Rudman.

I believe those are the critical issues of the day if we are to convince the American people who are now becoming very skeptical as to whether this Congress will be fiscally responsible and begin a rather lengthy and arduous march down the road toward a balanced budget and fiscal responsibility that we can arrive at by 1991.

□ 1640

I would be happy to yield to my colleague from Arizona.

Mr. RUDD. I thank the very distinguished gentleman from Idaho for yielding.

Mr. Speaker, I appreciate the concern of the gentleman and the fact that he is attempting to see that that concern is projected to the people of the United States. I would just like to say that only a short time ago I was speaking to a group of people who asked me what I thought was the most important thing that Congress could do, what was the most important concern facing Congress at this point and facing the United States of America. And I responded without hesitation that that concern is the debt, a debt of $2 trillion-plus at the moment and huge deficits that have made that debt possible and that are occurring and reoccurring every year. This is the single biggest concern. It is not the taxes at this point; it is that concern. And the only way that we can possibly address this impossible figure of $2 trillion is to do something about balancing the budget. That means income must equal outlay and vice versa. The only way we can get started to do something about that debt, to do something about the deficits, is to do what the gentleman is pleading for.

First of all, enabling legislation such as what is being considered, what will be considered here shortly in the form of attempting to have a balanced budget by 1991. And that enabling legislation would lead very smoothly into a possible constitutional amendment which would prevent this ever from happening again without some very strong emergency situations that would occur. And I can foresee that, too.

I do thank the gentleman for yielding. It is the single most important problem facing the people of the United States, and therefore this Government, and therefore this Congress.

So I again thank the gentleman for what he is doing.

Mr. CRAIG. I thank my colleague from Arizona for those remarks. I had the privilege of being in the district of the gentleman from Arizona not long ago on hearings, that the Subcommittee on Mines and Mining of the House Committee on Interior and Insular Affairs was holding as it relates to the copper industry in the area of the gentleman, in his district, which has just literally been devastated in the last several years and laid thousands of people out of work.

One of the things that is consistent in the thread of the testimony that we heard in the State of Arizona and then when we went on up to Utah and heard the same kinds of thoughts and concerns with the large copper industry being laid off in the State of Utah also, is that we no longer can compete. We simply cannot compete at the level that our foreign competition is selling into the market for.

One of the things that became obvious as we began to analyze it was the strong dollar, the extremely strong dollar, that was pushing markets and straining the economic fiber of this society, and those of us who believe in a balanced budget and believe that we ought not have these massive deficits are also strongly led to believe that a component, not the total problem but a clear component of that very strong dollar that is throwing thousands of people out of work in the district of the gentleman, in my district, and across this country, in primary resource industries, manufacturing, and a variety of other kinds of industries, is a product of deficit spending.

Whatever this House does, the one thing the American people are sounding a very loud cry for at this moment is a program to reduce the deficit, to bring it under control, which we believe, I think, will begin to bring down the value of the dollar, stabilize this economy, and reinstate our competitiveness in some ways in an international market that we have got to be in and also tremendously assist the kind of problems the gentleman is having in his district with unemployment, not just in copper but in a variety of other industries.

I yield to the gentleman.

Mr. RUDD. I again thank the gentleman for yielding.

The gentleman has hit the mark right squarely in the center. Our copper industry, which previously provided 64 to 65 percent of all of the copper in the Nation, has now been destroyed, not only in my State but in Michigan, in Idaho, and especially in Utah.

So the gentleman has hit the mark. I thank the gentleman very much for his empathy, and understanding, and concern of the problem.

Mr. CRAIG. I thank the gentleman once again, the gentleman from Arizona, and if there is anything we in the Congress can do besides pushing to get a good clean Gramm-Rudman-Mack-Cheney proposal before this body is of course to push toward and ask the Speaker and the chairman of the House Committee on the Judiciary to allow us to vote on a constitutional amendment to balance the Federal budget, because I know of no other issue as it relates to deficits and deficit control that is driving this country right now toward high levels of unemployment in primary industries that are so critical to the economic base that all of us strive for.

I would now be happy to yield to my colleague from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding. And I, too, want to congratulate him once again for rais-

ing the attention of this body and the attention of the American people to the problem of the deficit and the need to move toward a systematic means of dealing with deficits and moving us toward a balanced budget.

The gentleman, I think, has performed a magnificent service over the last several months of moving this body in the appropriate direction.

And who can doubt that we need to be moved along, and who can doubt at this point that we need something along the lines of the Gramm-Rudman-Mack-Cheney proposal? Because today, under the budget process that we now operate under, we have the reconciliation bill out on the floor. We debated it today, and it will be up for a vote tomorrow. At a time when this Nation has $200 billion worth of deficits, what does that reconciliation bill include? Among other things, the bill that is supposed to get us to reduce spending has increased spending by $3.5 billion. So we simply are not capable at the present time, under the present means that we have available to us, of controlling the spending.

Most appalling of all, buried down within that bill is none other than a congressional pay increase. Here we are, after all of this talk about deficits for many months on the floor, we come to the floor with a bill that is supposed to do something about the budget, and what do we do? We come to the floor, and we talk about the poor, the disadvantaged, and the needy. Many of the speeches on the floor today, nobody wants to mention that down in the bill buried in there is a 10-percent pay increase for Members of Congress.

Yes, indeed; they are going to raise our pay from $75,000 to $82,000 mandated in this bill and to do in a way that hides behind reconciliation and tries to tell the American people that we do not know where these pay raises will come from. Here is one place I can tell you it comes from, it is right in the reconciliation bill. Buried in that bill, that reconciliation bill, is at least a $7,500 pay increase for Members of Congress. You cannot get away from it.

This is our version of balancing the budget? Our version of controlling deficits? It is absolutely appalling. There is no way that anyone can vote for that bill tomorrow and not recognize that what they are doing is voting for a congressional pay increase. I think that it is very important for the American people to understand when their Member of Congress comes back home proclaiming the fact that he was saving them money in the reconciliation bill, that he was voting for a 5-percent increase next year and a 5-percent increase the year after to bring his pay to about $82,000. That in the name of helping to do something about the deficit. The process that we have got around here is failing.

We cannot even bring ourselves to freeze our own pay during times of deficit crisis. We are going to proceed ahead with something that raises the pay of every Member of this body. Now, what we have asked people who are opposed to the process to do is give us an alternative. Last evening I was surprised we had a couple of members of the Democratic Party come to the floor, and when I asked them that question they gave me some outlines of their alternative, of what their alternative would be to Gramm-Rudman. They are saying they are opposed to that, that they do not want that procedure. So I said, "OK, what is your alternative?" And they gave me a series of things where they would make their cuts, the kind of budget that they would bring forward to get us to a balanced budget.

I took the time today to cost out what they told us last evening, the Democratic alternative presented to us on the floor last evening, which consisted of eliminating water projects, eliminating foreign assistance, eliminating the National Endowment for Democracy, eliminating Radio Marti, eliminating synthetic fuels, raising the cigarette tax, eliminating agricultural subsidies, and reducing significantly the defense weapons programs.

So I went through today and costed out to find out how much of a dent in our $200 billion deficit that would make, because obviously if you are going to propose that as your program, then it seems to me that you ought to be able to say it is going to get us to a balanced budget just like the Gramm-Rudman proposal is going to get us to a balanced budget.

Surprisingly enough, I find it does not get us anywhere close to a balanced budget, by doing all those things.

Let me give the figures. If you take the water projects and you cancel the entire money given to the Interior Department's Bureau of Reclamation, you save $820 million. Then if you take the DOD Civilian Corps of Engineers Program, which includes all the water resource projects, recreational resource projects, the flood control projects, the coastal projects, the mine and harbor projects, and you cancel them all completely, you do not do anything, that gives you another $2.3 billion. So in water projects you can get $3.1 billion, a little bit more, in savings by canceling them all, doing nothing, just having no water projects whatsoever. We cancel every one of them.

Now, I do not think there is anybody on that side of the aisle that will buy that program. Nevertheless, let us give them the benefit of the doubt. They are willing to come out here and are going to have the guts to cancel everything in the water projects area as a part of their program. Then in foreign assistance, I went back and I got the figures for that for fiscal year 1986. And I find out that if you cancel the entire foreign assistance program, wipe it all out, nothing, no humanitarian aid, no aid going to Ethopia, no aid whatsoever for humanitarian purposes anywhere in the world, just cut it all out wipe out the entire foreign assistance program, you get a savings of $18.34 billion. Now, that would mean that we would have no programs for any aid anywhere, there would be no aid for Israel, no aid going to Egypt, no aid anywhere in the world. We would simply wipe out the entire foreign assistance program.

All right, fine. Let us give them the benefit of the doubt, let us say that there is a majority of Members of Congress who are willing, in the majority party, to do that, let us wipe out the whole thing, and so on, and let us say they have the votes over there to do that. All right. Then they said that we will cancel the National Endowment for Democracy. That is $290 million. Let us say they would wipe that out completely. They said last night they would.

Let us say they would wipe out Radio Marti. Fine. That would save $130 million. They are willing to do that.

They are going to raise the cigarette tax. That will get them $1.8 billion more, that is one more thing that they are willing to do, basically double the cigarette tax. Fine.

They are willing to eliminate the entire Synfuels Program. Fine. They get $320 million next year by totally eliminating the Synfuels Program, something a number of us have said is something that we are willing to do. That is fine. Let us do that.

They are willing to wipe out virtually every agricultural subsidy.

Now, let us understand, let us understand that if you take every agricultural subsidy out and you take out the Commodity Credit Program, that is all the dairy subsidies, that is all the grain subsidies, virtually every subsidy that the Federal Government has in agriculture would be eliminated, there would be no more Dairy Program, no more Grain Program, no more nothing. You would simply wipe out the entire Agricultural Subsidy Program. That gets you $10.5 billion.

Then if you eliminate, in addition, the Rural Electrification Program; the Farmers Home Administration; the Soil Conservation Service; the Animal, Plant, and Health Inspection Service; and the Agricultural Marketing Service, you come up with a total savings, by totally wiping out all the programs aimed at the farmers and the Department of Agriculture, you come up with a savings of $16.5 billion.

In defense, and this is the area where they concentrated a lot of their attention, let us say they would have the votes on their side to wipe out all of these programs, do away with virtually every one of these programs, do away with MX deployment, do away with Minuteman silo modernization, do away with the Trident Submarine Program, the development and production of the Trident II missiles, the continued modernization of the bomber fleet, namely, buying 48 more B-1B bombers, the development of a new bomber, new cruise missiles using Stealth technology, deployment of the first generation of cruise missiles, and the continued reengining of the KC-135 tanker so you have longer distances.

Let us say they are willing to wipe out every one of those programs. In other words, we would have no modernization of our strategic defense whatsoever. This Nation would unilaterally disarm under that kind of a program. Let us say you are willing to go that far. Let us say they have the votes on their side of the aisle to unilaterally disarm the Nation.

□ 1655

All of those programs put together save you a total of $29.9 billion. What does that all add up to? Those were all the programs they gave us last night that they would be willing to eliminate as part of their program. The whole thing comes to $70 billion worth of savings that are in their program. That ends up $130 billion short of what you need in order to get us to the balanced budget.

Now, where are they going to get the other $130 billion? That is the problem. That is the reason why we are for Gramm-Mack-Rudman-Cheney, because you have to have a mechanism that gets you to where you want to be, $70 billion in savings. I will admit to you there is no way that there are votes of a majority of the Members in this body to do that whole $70 billion. That is their alternative, though. That is the alternative we heard from at least two of the Members last night. Costed out, we find that it does not get us anywhere.

Now, let me say to the gentleman that there is a way in defense, if you use the defense budget, since that was their big item, there is a way that you get almost to the $200 billion. Let me tell you how much further they would unilaterally disarm the Nation, going into the conventional forces, if in fact they wanted to get the money they need. They would eliminate the procurement funds for the M-1 Abrams tank; 716 Bradley fighting vehicles; the Apache helicopters; the Blackhawk support helicopters; short-range Stinger and Chaparral missile system; the long-range Patriot and Hawk missile systems; and also of course the one we already know is being eliminated, the Sergeant York gun.

In the Navy, they would eliminate 11 Aegis cruisers, 17 guided missile destroyers, 19 attack submarines, 12 amphibious ships, 24 support ships, 21 minesweepers, the modernization of two aircraft carriers. They would take away 24 land-based patrol squadrons, the continued procurement of 18 F-14, 84 F/A-18 airplanes, 46 AV-8B aircraft, as well as 9 P-3C long-range patrol aircraft and 18 LAMPS helicopters for antisubmarine warfare.

In the Air Force, they would do away with the procurement of the F-16's, the F-15's, the MC-130H special operations forces aircraft, and they would do away with the entire support for the 26 active tactical wings of the Air Force.

We would have no weapons left. We would literally do away with the weapons systems of the United States.

If you did all of those things—and I do not think anybody is going to suggest that you do all of those things—they still come up short of balancing the budget under their program using defense. They come up $16 billion short under their plan.

The reason why I make this statement is because last night this was presented as their alternative. When we suggested that you need an approach like Gramm-Rudman, they suggested that there was an alternative, and they gave us this scenario. There is exactly what you would have to do, and they still come up short. Given that situation, I think it is absolutely essential that we pass the Gramm-Mack proposal. I think it is absolutely essential that we move to a balanced budget amendment to the Constitution, because we have got to have a process that equally shares across the board some of the burdens of cutting back so that we can in fact eliminate $200 billion worth of deficits. It cannot be done with the alternative they gave us last night. As a matter of fact, this kind of listing is almost an absurdity, because everybody knows that you are not going to wipe out every agricultural program that exists in order to get the $16 billion in savings. It just is not going to happen.

So their program is nonsense. Unless they get on board for the Gramm-Mack proposal, it seems to me that they have no alternative, and what we are going to end up with is the spenders continuing to spend, the deficits continuing to mount, the burden of debt piled upon young people in this country continuing to expand, and this country's economy continuing to move toward collapse as a result of the overweight of debt. If they do not have an answer any better than this one, which is a pretty crummy excuse for an alternative, then it seems to me they had better get the two proposals that the gentleman mentioned out here on the floor so that this Congress can begin responsible action.

I thank the gentleman for yielding.

Mr. CRAIG. Mr. Speaker, let me thank my colleague from Pennsylvania for that interesting and rather unique analysis.

I think the problem that we face in this country and that clearly we face in the U.S. Congress, I think all of us here in the Congress have had the experience of going home and holding town meetings or being in public gatherings where we have talked about the deficit and the problem of the deficit, and certainly as a strong advocate of the balanced-budget constitutional amendment, I have been back in my district and have traveled across the country speaking about it, and you hear these kinds of comments: Well, if you would just cut back on defense spending, you could balance the budget. If you would just eliminate foreign aid or foreign assistance, you could balance the budget. If you would do just this one thing or this other thing, Congressman, then the deficit would go away, because there are those who are led to believe, for whatever reason, that it is only this or that part of the total budget that is driving the phenomenal debt burden that the citizens of this country now have to pay for well over the tune, in interest alone, of some $120 billion plus a year.

Well, I think the examples and the observations that my colleague from Pennsylvania has just made, demonstrate that it is no easy task, that it is not an impossible task but that you do not single out one or two items big or small in the budget and solve the problem. If you are going to go goose hunting, you go where they are flying in flocks, in hopes of bagging one. And that is what we have to do here. That, of course, is what the Gramm-Rudman proposal brings about. It looks at the budget problem, the deficit, in total, and it says in a fair and equitable way that we will do the kinds of across-the-board reductions that touch every segment of Federal spending, that we are not going to single out one program or another, that we are not going to, in essence, bring forth special interest groups that are supportive of one program, we are going to bring them all out because we are going to go after every segment of the budget, and we are going to attempt a deficit reduction over a 6-year period of approximately $36 billion a year progressively and that we will move and have that balanced budget, of course, by 1991.

I have not seen yet a proposal that demonstrates more fairness and equity than the one that the conference committee is now working on. I know of no other way that we can proceed in an orderly fashion, that we can touch every segment of Federal spending,

that we can tell all of our constituents with a good, clear conscience that we are treating all segments of Government with some degree of equity as we approach the kind of deficit reduction that is critically necessary to bring us to the balanced budget.

So I appreciate my colleague's analysis.

It is not a partisan issue, Gramm-Rudman is not, and the balanced-budget constitutional amendment is not. It is a bipartisan problem. It is a bipartisan issue. It is Democrat and Republican alike that has to support this approach if we are to deal with it fairly and equitably.

One of the problems we get into in attempting to deal with this is the division of who supports and who does not. I have always said it is the spenders versus the nonspenders. I think that is what we saw here on the floor last night—those who advocate solving social problems and economic problems and human problems in this country with money, and they believe, as they have historically, that that is how you arrive at solutions: money from the Federal trough solves all problems. And, of course, the reverse of that is that when you begin to reduce the volume of flow from the Federal trough, you begin to hurt people.

We have all known for a long time that the only real way you help people is to provide a vibrant economy in which those people can seek work and provide for themselves. We have been told by economists, liberal and conservative, that when you begin to reduce the deficit in a timely fashionable way and you arrive at a point where you can bring revenues and expenditures into balance and keep them there, that you will unleash the kind of dynamic forces in this country that not only brings down the value of the dollar, make our products salable once again abroad in foreign markets, but you bring down real interest rates and therefore the kind of long-term capital investment that is so critically necessary to this country, that produces jobs by producing plants and employment, is exactly the product of the kinds of cuts that we have to produce in the budget to bring about that kind of economic renaissance.

I wish to thank once again my colleague from Pennsylvania for that observation, and I yield to my colleague, the gentleman from Texas [Mr. BARTON].

Mr. BARTON of Texas. I thank the gentleman for yielding.

Mr. Speaker, I was attending the Republican conference this morning when the gentleman from Idaho got up and made remarks that he spent the weekend listening to the people in his district and they told him that reducing the deficit was a top priority. The gentleman's district and my district must be quite a bit alike. I recently did an opinion poll in my district that 94 percent of the people in my district said that reducing the deficit is the No. 1 priority, and they strongly support the balanced-budget amendment.

The first thing that I did, once I was sworn in back on January 3, was to introduce my own balanced-budget amendment, House Resolution 12. I have also cosponsored the gentleman's amendment. I am a member of the CLUBB organization that you are the chief sponsor of, you and Congressman CHARLES STENHOLM, and I am here to tell you that I feel that the service you are doing to this country by bringing this issue to the attention of the American people and getting enough sponsorships, cosponsorships on your amendment, that we actually have a chance to bring it to the House floor, is one of the most important things that we are going to do in this Congress.

Now, we have a chance next week with Gramm-Rudman-Mack-Cheney to begin a 5-year program to bring spending under control. But that is not going to be enough. We need the constitutional amendment that you are the chief sponsor of to have a permanent solution to spending.

Now, we have heard some people say that we have these programs that we need to help, we need to help the needy, we need to help the handicapped, we need to help all these folks. That is very true. But the fastest growing item in the Federal budget is interest on the national debt. I believe last year that is was an additional $13 billion.

Now, we are not going to have any money for anybody if we cannot bring spending under control and stabilize what we pay on interest on the debt. If we can get your balanced-budget amendment to the Constitution, if we can get Gramm-Rudman passed, then we will control spending, we will have additional funds that we can spend on these new programs. But if we do not, we are going to spend more and more every year on interest on the national debt.

So I rise in support of your amendment. I hope you get the 218 signatures on the cosponsorship list. I will be there to help you.

I have one question for you: Is there a discharge petition now at the desk that we can sign to try to get it out of the Judiciary Committee and get it to the floor?

Mr. CRAIG. Let me respond to my colleague from Texas. I thank you for those comments and I appreciate your observation as it relates to the people of your district versus the people of my congressional district. I guess they have one thing in common. They are Americans. And as Americans they believe in their system of government. But they have also come to recognize very clearly in the last 10 to 15 years that their Government is not doing for them what they ask it to do, and that is to provide them, in a limited sense, with a variety of programs that provide for their safety and for their protection and yet at the same time assures that they will have access to a free and vibrant economy with which to seek their successes and their failures as American citizens.

I have often said that if there was anything good to come out of the recessions of 1981 and 1982 it was the fabulous lesson in economics for the American people, because they saw for the first time so clearly what happens when you tax too much and when you spend too much at the Federal level and at all levels of Government, and you simply pull from the economic reserve or reservoir in this country that we call the gross national product too much money for Government, simply not leaving enough money for the average citizen. Interest rates went through the roof, inflation began to take off, and all of those kinds of problems resulted from a Government that was running loose and rampant. We were able to rein it in some over the period of 1981–83. But why does the American public, without question today, say that the number one issue is the deficit, as they say in your district and as they say in mine? Because they know. They know very clearly, from lessons of the past, that deficit spending is that dynamic, if you will, or that force inside the economy that ultimately destroys the economy, and when you destroy it you destroy their jobs, you destroy their homes and you destroy the very future they have that they can turn and offer to their children and to their children's children. And that is what they are frightened of right now. To see the interest on the debt becoming one of the largest single items in the Federal budget is a frightening experience, because we know, as business people in what we oftentimes say real life, with business experience, when that happens with business, all of a sudden it is bankrupt, it is gone, it destroys its jobs, it destroys any form of economic vitality that it had. There is only one difference here. We can borrow and we can print, but it does catch up with us. And that is what is happening today. There are a good many of us who are struggling to try to bring that under control.

I think the gentleman is absolutely correct. Gramm-Rudman-Mack-Cheney provides us with the tool, the enabling legislation, the process by which we get from here to here and over here, is that balanced budget. And to ensure that it happens, then, I do believe, as the gentleman has mentioned, that we need a constitutional

amendment that says to the Congress, "No, you cannot change us arbitrarily because we are the Constitution, we are the law that governs you, because we are the people."

That is one thing that sometimes the American citizens forget. The Constitution is theirs.

□ 1710

We cannot change it here in the Congress; we can only propose change. Is it the American people that have to vote by three-fourths of their States in the ratification of a change that really brings about the change. Well over 70 percent of the American people today say that a constitutional amendment to balance the Federal budget is what they want. Of course, they recognize, as the 90-plus percent in the gentleman's district recognize, that you can accomplish deficit reduction by getting to that balanced budget vis-a-vis the peoples' law.

Once again, let me thank my colleague from Texas for those excellent remarks and observations and I appreciate your loud, clear, and strong leadership on this critical issue.

Mr. BARTON of Texas. I would ask the gentleman: Is there a discharge petition that we can sign?

Mr. CRAIG. There is not at this time. We are nearing the 218 cosponsorship that we have been striving for; we believe once that is accomplished, depending on how the leadership in this House and how the chairman of the Judiciary Committee reacts to a majority of the Members of this body saying, "We want to vote on a constitutional amendment to balance the budget."

We are going to give them an opportunity to react—to let the process here work. If it fails, then there will be a discharge petition and we will simply say that it is the right of the people of this body, the Members, to serve their constituents by getting an opportunity to vote on that on the floor.

Mr. BARTON of Texas. If the gentleman would yield, I would suggest to the gentleman from Idaho that if we can get it out of committee and get it on this floor and get an up or down vote on it, it will pass overwhelmingly.

If we can, in the glare of publicity and let the American people see the true merits of the case, your amendment on this floor will pass this Congress overwhelmingly. So I urge the gentleman to do everything possible to get the requisite number of signatures. If we need a discharge petition, I will be more than willing to help the gentleman from Idaho because we will win because the American people as you said, are behind us.

Mr. CRAIG. I thank the gentleman and I now yield to the gentleman from Arizona [Mr. RUDD].

Mr. RUDD. Once again, Mr. Speaker, I would like to commend the gentleman from Idaho, for his statesmanlike concern for this most all-important problem that faces our Nation today. I would also like to commend the gentleman from Pennsylvania, for his statesmanship in the same vein.

Especially I would like to commend our colleague from Texas, Mr. BARTON, for his interest in these matters, in this matter particularly, but in all matters like that, and I hope that the people he represents will be very aware that this Congressman from Texas is a first-term Congressman and has worked very, very very hard to do the job of a Congressman, to do the work of a Congressman, and has deported himself in a good, statesmanlike way and I think he should be commended.

Mr. CRAIG. I want to thank my colleague from Arizona for those comments and I yield to my colleague from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, the gentleman made a statement a little bit ago, about the fact that you can divide the economic classes in this Congress between the spenders and the nonspenders. That essentially is what you are dealing with in the economic clash that takes here.

I think the gentleman is right that there are two distinctly different groups. For the gentleman's possible definition in the future, I would suggest that the real clash is between the spenders and the builders. That the people around here who are attempting to get a rein on Federal spending are not just nonspenders—what they are is builders.

As the gentleman so eloquently pointed out, what we found out at the time of the recession in the 1981-82 time period, is that too many taxes and too much spending in fact lead to economic troughs, that cause tremendous hardship across this country. We are still trying to recover from the unemployment problem generated by that. We are still trying to put lives back together that were shattered at that particular recession.

The reason why I think you can use the term "builders", if you go back slightly before that time, you will find out that what we had in this country is a negative GNP. That we were actually not only not growing, we were actually declining. This country was in a state of economic decline, in the late seventies and early eighties. That was because that we had spent our time taxing and spending at the Federal level, to the point where it had become such a burden on the economy, that the economy was no longer viable.

The people who advocate a reduction of spending, a reduction of borrowing, a reduction of taxes, are in fact the builders who have put the economy back together again, and are allowing positive growth in the economy, not as fast as we would like, but nevertheless who have produced a growing economy at the present time. That is building—that is building for the future.

When you are a spender and you are adding to the debt burden of every man, woman, and child in this country, you are not doing anything positive, you are doing something very negative. If you are trying to reduce the debt burden, you are a builder.

It seems to me that the contrast is very, very clear. On the economic issues that face this body, it is indeed a clash between spenders and builders. The fact is that the Gramm-Mack-Rudman proposal and the balanced budget amendment to the Constitution, are building proposals. They put the reins on the spenders. It is the spenders who are out here screaming bloody murder. It is people who want to continue to spend and borrow and tax who do not want Gramm-Rudman. It seems to me that anybody who casts a no vote on Gramm-Rudman is in fact defining themselves in precisely that way. They are a spender. They do not want to spend, they do want to tax, they do want to borrow. Instead, it seems to me that what you want to do, is come up with proposals that are building-type proposals, where you create things that allow us to build an economy and build a future for our young people in the future.

Mr. CRAIG. I thank the gentleman and I yield to the gentleman from California [Mr. DYMALLY].

Mr. DYMALLY. I thank the gentleman.

Mr. Speaker, I note with some humor, that every time the gentleman refers to the big spenders, he looks over at this side. I just want him to know that I am a small spender.

Mr. WALKER. If the gentleman will yield, I thank the gentleman for his observation. However, we do have, it seems to me, some empirical data developed by the National Taxpayers Union that makes fairly clear where this body comes down, and I would say to the gentleman that we consistently find that the Democrats—and particularly liberal Democrats—are those people who fall into the spending category, while on this side of the aisle, it is the people on this side of the aisle, who fall into the building category. That is one of those things that the American people can analyze each election. It seems to me that one of the votes that will make it quite clear, who is who, and where is where, is when we get a vote, hopefully in the near future, on the Gramm-Mack-Rudman proposal.

Mr. CRAIG. Once again, let me thank my colleagues for joining me this evening, in this special order to discuss the Gramm-Rudman-Mack-

Cheney proposal, that is now before the conference committee of the House and Senate, and of course, before the American people.

One of the reasons I thought it was important to have this special order, is to say once again that there is a very real difference between Federal law, Federal statute, and constitutional law, or the Constitution itself. One of the things that we have consistently read in the press, the last couple of weeks is "The Balanced Budget Amendment Will Do This"; "A Balanced Budget Amendment Was Attached to Debt Ceiling Legislation." In the headlines of many of the papers across this country, have been printed the words "Balanced Budget Amendment."

That simply is not the total story, nor is it the true picture. What the press is referring to in its reaction, or its observation as to what the other body or this House is doing, is looking at a procedure that we call Gramm-Rudman-Mack-Cheney, a proposed amendment, to the debt ceiling which would be, if passed by this body, Federal law that would mandate a 6-year process, by which we would get to a balanced budget by about 1991. But it in no way mandates that we must have a balanced budget by 1991.

□ 1720

We have tried that in the past and, of course, as I mentioned earlier, we have simply failed, because when pushed up against the hard decisions, the Congress caved in their spending mentality and said, "Can't do it." And they waived Federal law and moved right on down the road of deficit spending.

A constitutional amendment, as I mentioned earlier, in the people's law, would tell this body, that they would have to bring expenditures and revenue into balance except under certain conditions, in which they could in fact deficit-spend. And it would be that kind of law that this body would have to abide by and could not change.

So I though it was important this evening through this special order and being joined with my colleagues to point out the importance and the difference, the importance of the enabling legislation that the Gramm-Rudman-Mack-Cheney proposal recognizes, a process and procedure by which to move toward a balanced budget, and then a constitutional amendment that would require a balanced budget by a given date.

In other words, to assure that this process or procedure that we call the Gramm-Rudman bill, would be adhered to and that Congress would not in their wisdom, as they would choose to call it, and as the American people would say in their lack of wisdom, attempt to violate over the course of time and remain in their spending mentality, or that institutionalized process which says that we always spend more the next year than we did the year prior, and that we will ultimately have to either borrow more or tax more, from the American people to satisfy what we think the American people want in the form of Federal programs.

Is it not unique that while we are here on the floor and in our committee work struggling to bring about certain programs, and fund them, and to deal with the financing of our Government, all of us believe, or at least a good many believe, that a lot of the programs with which we work so hard to get, are what our people want?

Yet, at the same time, the American public is saying louder and more clearly than they ever have before, "Cut the deficit. Get it under control. Give us a balanced budget."

I have to believe that the American public is saying by that expression, "Cut your spending. Get your spending under control. A lot of the programs that you are attempting to provide to us for our good, are simply programs we don't need, or if they are, we don't need that much of a program, that lucrative of a program, a program with that kind of benefit."

That is the fundamental debate that is going on in this Congress today. It is the debate that is underway in the House-Senate conference committee. It is very, very important that the Members of this body understand, and the American people understand that here lies a unique opportunity, to put in process that motion, that activity that will bring us to a balanced budget, and then to assure the American people that we will adhere to it, by offering forth to the American people a constitutional amendment to balance the budget that they can debate, in their own State legislatures and decide to accept or deny, and it would be that law that would then govern this body.

ORDER OF BUSINESS

Mr. OWENS. Mr. Speaker, I ask unanimous consent that my special order may be called at this time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

THE DANGER OF GRAMM-RUDMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes.

Mr. OWENS. Mr. Speaker, my concern is the Gramm-Rudman proposal or the Gramm-Rudman process, as some speakers have labeled it. My primary concern is the fact that the Gramm-Rudman process, its final impact, its dangerous impact, will fall mostly on the poor and defenseless and it will fall particularly on the black people of this country, because in addition to them being poor, a larger percentage of black people being poor, they are also the victims of certain other policies of the present Reagan administration with respect to affirmative action, the attempt to eliminate affirmative action, the rollback of certain other civil rights programs, all of which combined result in a situation which you might call the final abandonment of black people in America.

I think that the Gramm-Rudman proposal is a cause for alarm and the alarm should be sounded loud and clear. There are a number of things wrong with it, beginning with the fact that it is a process going forward in secret.

The Gramm-Rudman process is being discussed in a conference of the House and Senate by what you might label superlegislators only. All of us were elected to represent our constituents and all of us should be participating in a debate of this magnitude. A program as important as the Gramm-Rudman proposal should not be a program which is debated and decided in secret. A program as important as Gramm-Rudman should be subjected to the same processes that any other bill before this House would be subjected to. It should have a series of public hearings. Since it is a major change in the way we conduct our Government, since it is a change even in the basic principles of the Constitution, there should be a nationwide series of hearings.

The President of the United States has gone throughout the country making speeches and discussing his proposed tax reform bill. It does not appear that that tax reform bill is going to come before us any time soon. But I think Gramm-Rudman has even greater implications than the tax reform bill. And certainly if we are going to discuss the tax reform bill across the country, and have leading political figures talk to large audiences and get a feedback from those audiences, then Gramm-Rudman should be subjected to the same process.

Not a single hearing has been held on Gramm-Rudman. Not a single opportunity for the American people and their various representatives of various groups, who participate has been provided under the present procedure. So Gramm-Rudman represents a very undemocratic or antidemocratic process to begin with.

We should not allow this kind of process to decide such major legislation. We should not allow the prerogatives of elected officials from the 435 districts in this country, to be taken

away and the process be put behind closed doors and brought back to us later in a package where we have to vote it up or down. So that is the first problem with Gramm-Rudman.

The next problem with Gramm-Rudman is it is a discussion of how to take care of the deficit merely by cutting spending. Gramm-Rudman refuses to recognize the basic fact that, that the problem is not the deficit alone. The deficit is the problem; I agree with the speakers who say we must get the deficit down, and everybody is concerned about getting the deficit down. It is important to get the deficit down. It is important to eliminate the deficit.

But let us talk about the deficit in context. The only way we are going to have a solution with the deficit problem is to deal with it in the context of a mismanaged economy. We have a mismanaged economy, an administration which is out of control. The deficit did not appear as a crisis overnight. The deficit was created by this administration, the super deficits.

When the Carter administration left office, we had a deficit of less than $75 billion, less than $75 billion. Now we have a deficit of more than $200 billion. It has run for several years more than $200 billion, with projections that the deficit at this level will probably continue if we do not take some extraordinary measures.

How did we get here? How did we get here? It was not by magic. It was not by the Democratic Members of the Congress, as we have heard before, spending.

We have the leadership of a new administration, a new President who said that you could at the same time you increase spending in megabucks, large increases for defense, decrease taxes. At the same time a family's income is going down, a family can run out and spend tremendous amounts of money on some chosen priority.

It is as simple as that. That is what the leader of this country decided to do, and that is why we went from a national debt of less than $1 trillion, to a national debt now approaching $2 trillion in such a short period of time, less than 5 years. It was not by magic. It was created by decisions made by the present administration.

I do not accept the charge that as a Congressman I am a big spender or spender at all. I have no pork barrel projects in my district. I do not have any factories manufacturing useless MX missiles in my district.

We are put in a position of having to defend ourselves against charges which are totally erroneous. The President of the United States at present has never submitted a balanced budget. The President of the United States on the other hand has submitted budgets which did have deficits in them. At the same time you had tremendous deficits in those budgets, this President has also made it clear that he wanted to cut certain kinds of programs. He has put zero in the budget for certain kinds of programs and still not achieved a deficit, but he has put zero in the budget, so we now what kinds of programs he wants to cut.

Here is the problem with Gramm-Rudman. Gramm-Rudman in the final analysis, the bottom line, is it hands the President the power to make the final budget cuts, to set the priorities for this Nation without the Congress participating in that final decisionmaking about what should be cut. The imperial Presidency is augmented greatly. Many of the Congressmen or most of the Congress might as well go home because a nation is defined by the way it sets its budget. We can have all kinds of ideologies, philosophies, differences, et cetera, but if we have no control over the budget, we are whistling in the wind, we cannot do very much about the problems, we cannot implement policies.

So if we hand the President the power to make the final decisions about the budget, then we have very little left to do here in the Congress. We are violating the principle of separation of powers, which is a basic flaw in the Gramm-Rudman bill, but there are other people who can argue that matter of constitutionality far better than I can.

Another problem, as has been pointed out by people who are economists and who can make the economic argument far better than I can is that it is bad economic policy, or it puts us in a straitjacket where we cannot deal with problems as they arrive, that if you have a situation in the next 5 years where we move into a recession, whether a deep recession or a light recession, that the option of being able to correct that by spending in certain areas is taken away. Not only is the option to spend taken away, but certainly the mandate to cut is there, so you must keep cutting regardless of what kind of revenue is being generated by the economy, you must keep cutting, so we will sink deeper and deeper into a depression if that process begins to start to take place.

That is one of the basic things wrong with taking the prerogatives of decisionmaking away from the Congress, and mandating that they must proceed in a certain way. That is a devastating blow to the prerogatives of both the President and the Congress. So it is bad economics, the results will probably be quite bad indeed.

The other thing, and I am moving toward the basic point that I want to make, is that the cuts that will be made by the President, the imperial President, with these powers, the same President who through his voodoo economics, the President's approach of cutting taxes at the same time you dramatically increase expenditures, that approach was labeled "voodoo economics" not by a Democrat, it was labeled "voodoo economics" by a candidate for President who later became the Vice President, Mr. BUSH. Voodoo economics is what we are the victims of, mismanagement of the economy via voodoo economics.

We must pay the price of voodoo economics. Voodoo economics has created a $2-trillion national debt. Voodoo economics has created a budget crisis in terms of a deficit which everybody has to be concerned with. Let us not forget where it came from.

So the creator of the problem will now have handed to him the authority to not only, not atone for the mistake that he has made in the past, he has not handled that responsibility, but he is handed new authority, he is given new authority to make cuts in those areas where he has already demonstrated great hostility. He has already demonstrated great hostility toward social programs, certain educational programs. They are going to be cut. Domestic programs will be cut dramatically by a President who says that is what he wants to cut. The goal of some of these policies and practices of voodoo economics has not been concealed. It is not a secret. We have been told again and again that one of the major goals for us is to shrink the amount of money available, to box in the Congress and the whole governmental establishment in a situation where the scarcity of resources, the scarcity of money would be so great that they would be forced to make the cuts in social programs and domestic programs. They would be forced to do it, because who dares to look at defense with an objective, analytical approach?

They did not expect that two men in the Senate who are responsible for the oversight of the Defense Establishment, the defense budget, would be willing to look at defense clearly, objectively, and say where the emperor has no clothes on and what is wrong. That has happened. That was not expected.

It is expected that only in the area where the hostility has been shown by this administration will the cuts take place if you squeeze the amount of money available for expenditures.

We are now in that position. Gramm-Rudman is the final coup de gras. It is going to take care of the situation and finish off the work that was begun with voodoo economics in 1981. What Gramm-Latta started, Gramm-Rudman will finish.

The bulk of the programs, as I said before, are programs which are most needed by people in this country who

depend on our Federal Government as the advocate of last resort.

Why must the Government stay in the business of advocating for certain groups? Why must the Federal Government remain in the position of providing aid to dependent children? Why must the Federal Government remain in the business of providing food stamps to the needy? Why must the Federal Government remain in the business of being the major financier of health care for the needy? Because if the Federal Government is not in the business, nobody else is going to do it. The local governments, the State governments, will not pick up what the Federal Government lays down.

The history of these programs is quite clear. We never had the kind of concern expressed at the State and the local level until the Federal Government got involved in the problem. There was no concern about health care on a scale that there should have been. There was no concern about education of the kind the Federal Government now finances. Those concerns are expressed through the collective wisdom of the American people, and the generosity as expressed by the collective wisdom of the American people, that is not expressed at the local level and many local governments rush to abandon programs once they have no Federal participation, and many local governments and many State governments would not be in the business of providing certain kinds of programs if there were no Federal participation. So the Federal participation is crucial. If you take that away, down the drain these programs go and the people dependent on them will go also.

Now, who cares about poor people? We are in a situation where this administration has indicated that it operates on the principle of triage, that we are unconsciously or consciously, it does not matter, if you get killed by a bullet accidentally, you are dead as you would be if the bullet is aimed at you. Whether it is consciously done or unconsciously done, the practice of triage is under way, and this administration has been very consistent with it. This administration has decreed silently behind the scenes that we shall throw overboard a certain segment of the population. We will not be concerned about unemployment as long as unemployment only affects about a tenth of the population.

The President made the statement once that if 9 people out of 10 are working, then why are you worried about the problem of unemployment?

I am sure the same thing is true if nine people have their stomachs full, why worry about the one person who is hungry, and on and on it goes. If nine are healthy, why worry about providing health care for the one that is sick.

That kind of reasoning is the driving force behind this administration. We are just going to throw overboard a certain segment of the population. We do not care.

It is very important I think for us to stop and think for a moment about the future of this Nation, the security of this Nation, the kind of ongoing long-term struggle that this Nation is engaged in. We are engaged in a long-term struggle which I think could be compared sometimes with the struggle between Athens and Sparta, ancient Athens and ancient Sparta. We, of course, are Athens because we have a democratic system. We believe in the worth of the individual. We extol the worth of the individual. We are philosophically, theoretically, committed to providing an opportunity for individuals. We are philosophically and theoretically committed to providing a vehicle for the democratic participation of individuals.

We have a great system, a great form of government, a great economic system, but if we do not hew to the theoretical and philosophical principles that we extol, if we do not see every individual as being of great value, if we do not see our citizenry, our own people, as being our primary resource, our people are a primary resource in this long-term struggle, then we are surely going to fail, just as ancient Athens did. They failed because they did not have the nerve to live up to their own principles. They failed because they did not really believe enough in democracy. They failed because they really did not believe enough in individuals.

We are going to fail if we are going to make the assumption that we can throw overboard a large segment of our population. We are going to fail if we assume that we do not need to educate everybody in this country, that it is big enough, great enough that we can have all we need. We can have the scientists, the superscientists that are responsible for the strategic defense initiative. We can have the technicians. We can have people at every level that we need without educating everybody. We can have an elitist education. We can just educate a few and do not bother to deal with the necessary funds that are needed and the reauthorization say of the Higher Education Act.

Let us cut back, begin to cut back on our commitment to higher education. We have already cut back drastically on our commitment to elementary and secondary, and vocational education. Let us continue to cut back.

Let us set aside certain classes of people and give them tax breaks, make certain that their parents are able to take care of them, and forget about the fact that we need in a society as complex as ours, everybody to be educated in order for him to do what he has to do a little better. We need in a society as complex as ours everybody to have knowledge and be able to deal with the very complex world that is changing rapidly.

It is important that we put more funds into the education of airline pilots. We are spending the maximum on the training and education of airline pilots, of plane pilots.

I am worried about the education of the person who lubricates, who provides the lubrication for the plane or who puts the gas in the plane, the necessary increase in education that is due at that level, just as it is in any undertaking of our society.

You need people at every level to have more education. You do not get that more education if you do not have a commitment to spend more money on education. Money will not necessarily solve the problem, but you certainly will not get the problem solved if you do not have the necessary money or necessary funds out there.

We seldom compare ourselves to the Soviet Union in terms of commitment to education. I think we ought to take a hard look at what they do in the number of scientists that they produce each year, the number of technicians that they produce at every level. We are engaged in a long-term struggle and our principal foe, is the Soviet Union. Let us study more carefully the resources that are committed to education. They are committing large amounts of resources to defense, to weapons systems also, but they are committing large amounts of resources to the development of people in their country.

Development of people means more than education, of course. They have to be healthy in order for them to get an education. They have to be getting enough to eat in order for them to concentrate in school.

Understanding that every individual is a valuable resource is the beginning of a process that is necessary if we are going to meet the challenge of a long-term struggle either with the Soviet Union as an ideological and philosophical foe or with our allies in the free world who are our commercial competition. We are not going to be able to compete commercially with Japan, with Germany, and with a number of other nations, unless we continue not only to theoretically and philosophically value the individual, but also in the implementation of our policy.

What does Gramm-Rudman do? Gramm-Rudman will cut very deeply into the commitment that we have made to education. The dollars for education will be cut drastically because they are out there. They do not have any contracts. If they have contracts, it is minuscule, the number of

contracts that are out there for education.

Gramm-Rudman says that the portion of any program that is contracted out will be protected. The President will not be able to cut in situations where there are contracts.

Well, in the domestic area when you are talking about education, health, or food stamps, aid to dependent children, there are no large numbers of contracts out there. They will not benefit from that particular provision of Gramm-Rudman. The great beneficiaries of that particular part of Gramm-Rudman would be the Defense Department, because already their major commitments, a large part of the budget, at least half the budget is committed in a way where contracts are involved. Weapons systems involve contracts. The building of new installations, new defense installations involves contracts.

I assure you that as we move through this process and Gramm-Rudman appears more and more to become a reality, that numerous contracts that are not made already in the Defense Department will be made and they will be in place by the time Gramm-Rudman is supposed to go into effect.

□ 1745

So I doubt if we are going to impact on any part of that budget except the parts where we probably should have the least impact, the salaries of the servicemen, the military pensions, whatever fringe benefits there are, services provided to the individuals. Again, the educational programs probably for servicemen. A number of things that should not be cut are going to be cut, even in the military.

That is what Gramm-Rudman will result in. Where we cannot make contracts, that is where the cut will fall, and because the cut has to meet a certain goal, $36 billion is it per year, because the goal must be reached, the cut will be heavier because of the fact that they cannot take cuts out of Social Security, cannot take cuts out of the interest on the debt, cannot take cuts in the area of defense where we have made contracts. So the cuts, where do they fall? They have to fall in the areas where there are not contracts, and those will be the areas like food stamps, the Pell grants, aid to higher education institutions, chapter I aid to elementary and secondary education, vocational education, and on and on it goes.

One of my colleagues recently brought a list of letters from various organizations dealing with the handicapped, dealing with certain kinds of disabling diseases, a number of groups that expressed a great deal of concern about Gramm-Rudman, and they are on target. They should be concerned, because their portion of the budget, the little amount that they have in the Federal budget will not be shielded or concealed in any way from these tremendous cuts.

Again, those groups that have been spoken of as special interest groups have only a tiny amount of the total Federal budget. It is almost immeasurable in many cases, the portion of the Federal budget that people who are in certain categories, disabling diseases, the handicapped, et cetera, have. What they are concerned about is the fact that if that tiny portion of the Federal budget, that almost immeasurable amount, is taken away they will have no recourse because foundations often base their funding on the fact that an agency or a program receives Federal funding. the judgments that they make about where they put their resources in many cases are made on the basis of what agencies are getting Federal funding.

I have already spoken about the fact that the State governments and the local governments often make their decisions, or they will not give any funds, unless they are giving funds as part of a matching grant program. So the stimulant, the dollars that are necessary to prime the pump, come from the Federal Government.

True, the Federal Government is not the basic source of funds for education, not by a long shot. We probably do not spend any more than 10 percent of the funds that are spent in this country for education, but the priming of the pump is very important in matters related to education, and the provision of funds that cannot provide it in any other way for themselves.

Remedial education under chapter I, it was for a long time understood that it was needed and the kinds of successes that chapter I has realized in this country have been documented by numerous studies. The successes of Head Start have been documented by numerous studies. It was realized long before the Federal Government began to fund Head Start that the earlier you get to a child to provide education, the more likely you are to have an impact on the total life of that child. That was realized long before we had Head Start. Until we had Head Start, with funding flowing from the Federal Government, there were no dollars out there to do large-scale experimentation. Certainly there were no dollars available in the poor communities to test out the theory of early childhood education and the benefits of early childhood education. The poor, the people who needed it most, did not get it until the Federal Government became involved.

In black communities, those communities that are predominantly poor and also the victims of racial segregation and racial oppression, there were no funds available to do the kinds of experimentation that Head Start has brought forward until we had the Federal funding.

So Gramm-Rudman will cut Head Start. Gramm-Rudman will cut Head Start dramatically. Gramm-Rudman will cut funds that are provided for college students who would never be able to go to college, unless they had the Federal assistance. That will be cut dramatically. And because of the fact that the goals must be met, the $36 billion or whatever additional goals are set, they must be met, and it means that people who are entitled, people who qualify, will also be cut. It does not matter that you need it.

Means-tested programs are included. One of the major amendments offered in the other body to the Gramm-Rudman bill, was an amendment to exempt means-tested programs, or programs where people have to prove that they are in need before they can get the service. I think it was a very intelligent amendment. Gramm-Rudman in general I think is a disaster, but if you have to have Gramm-Rudman, it certainly could be made more humane if we had an amendment which exempted the means-tested programs.

That was voted down. It was voted down and had to be voted down, because the philosophy, the ideology of this administration, is to eliminate these programs. That is the target. The last thing they want to do is exempt those programs which are ultimately the target of this effort.

More important than balancing the budget is the elimination of certain social and educational programs that are disliked for ideological reasons, not because they have such an overwhelming percentage of the Federal budget. When you look at the budget and you count up the domestic programs that we are talking about eliminating, those are not the ones that have the overwhelming percentage of the Federal budget. But because they are ideologically and philosophically unacceptable, because they are the reason we have Gramm-Rudman in the first place, the last thing that will be accepted is an exemption of these particular programs.

So Gramm-Rudman is bad for all of these reasons. It is bad for the country. It is constitutionally questionable and for a number of reasons it is a disaster, but my primary concern is that it is the final abandonment of the black people of this country. The black people of this country have been under attack since this administration came into power. The black people of this country have to endure an attempt to roll back the clock in areas not related to fiscal or budgetary matters. In areas related to civil rights, we have a situation now where the Attorney General of the United States is proposing to eliminate an affirmative-action order that we have lived with

for a number of years that has achieved a number of dramatic successes that I think most American people are ready to accept. But for ideological and philosophical reasons, an assault will now be attempted to roll back the affirmative action Executive order. That does not relate directly to budget and fiscal matters, but it does relate to the assault on the black community. It relates to the fact that those same people who have no jobs being provided by Federal employment programs, who have no jobs being provided by training programs, who are struggling and now have to struggle even more to get an education than they did before, those same people who are up against discrimination and always have been up against discrimination as a major factor, they will now have no protection in terms of law with respect to affirmative action.

A recent study done by the Community Service Society of New York City demonstrated the fact that large numbers of jobs were created in New York City over a 5-year period, and those jobs were not necessarily high technology jobs. Many of the jobs were entry level jobs, clerical jobs, secretarial jobs, jobs which the young black people of New York City could qualify for. But they found a pattern of discrimination which froze those people out, and most of the jobs that happened to be located in New York City went to people who came in from the suburbs, who happened to be white.

There are numerous reasons for this. One of them is the old pattern that all of us know so well, the old-boy, old-girl network, and now we have the young-boy, young-girl network. But anyway, if you know somebody who works somewhere, they have connections with the boss, if they are already in, then they reach out and they get other people that they know. So it is a social pattern. If there are no obligations to interview people and allow them to have an opportunity to objectively qualify for the jobs, then you have a problem.

So we have jobs being created. We have large numbers of people unemployed, and yet the jobs are going to people who live in the suburbs, while people who live close to those jobs are not able to get them, mostly for reasons related to discrimination.

The assault of Mr. Meese, the Attorney General, is therefore, a very deadly one in the black community. When you add to the fact that this administration has in various ways attempted to turn back the clock, with respect to the black community in matters of civil rights, in matters of employment and affirmative action, when you add to that Gramm-Rudman, which finishes them off in terms of budget and fiscal policy, then you have a concentration of this poison. This evil that Gramm-Rudman represents is concentrated and focused on the black community as nowhere else, and that is the reason I am here. We must sound the alarm and understand what we are doing to the population in the black community.

□ 1755

First of all, we must understand what we are doing to all of the poor people, and second and finally, we must understand that particularly the concentration of the impact of Gramm-Rudman will be in minority communities, black, Hispanics are just as bad off, but I am focusing on black communities because my district happens to be one of them. I am speaking primarily from that which I know best in my own constituency.

I think that Gramm-Rudman again, to return to my earlier statement, I think that Gramm-Rudman ought to be a discussion which has a much larger scope than the present narrow attempt to balance the budget with gimmicks. I think that Gramm-Rudman should be a discussion of the mismanaged economy and how we got where we are, and beyond that, Gramm-Rudman should be a discussion of priorities.

What is this Nation all about? What are our priorities? How do we deal with the long-term struggle that we are involved in? How do we first of all stay true to our own values in the budget decisions that we make?

For that reason, I would like to turn for a moment to a document which has been ignored, certainly in this House, certainly by the media, just for a few background statements. I would like to talk for a minute about the Catholic Bishops Pastoral Letter entitled "Catholic Social Teaching on the U.S. Economy." I am going to read just a few portions from that, because I think it undergirds what I am about to say.

We have a responsibility that is moral, idealogical, philosophic, and beyond that, I think we also have a responsibility to see what we are doing to our own national security, to our own population, and what the impact of that is going to be in the long run. Certainly the Catholic bishops are on target when they state that employment, above all employment is a moral concern, and ought to be an urgent concern in U.S. policy.

Let me just read a portion of that section on employment. I quote from the document:

> The most urgent priority for U.S. domestic economic policy is the creation of new jobs with adequate pay and decent working conditions. The prime goal must be to make it possible for everyone who is seeking a job to find employment which befits human dignity. By almost any measure for individuals, social, economic or political, the costs of unemployment are enormous. Current levels of unemployment are morally unjustified. Several criteria presented which can help shape an effective response to unemployment, efforts to generate employment should be aimed specifically at bringing marginalized persons into the labor force.

Marginalized persons, Mr. Speaker, are a large percentage of the unemployed in my district. They can be categorized as marginalized persons.

> It should give priority to long-term jobs. It should produce jobs and services needed by society. It should be as economically efficient as possible, and it should include both the private and the public sectors.

Then they have under a section called policy objectives:

> The Nation should make a major new policy commitment to achieve full employment, to reduce unemployment to the range of 3 percent or 4 percent.

And in this policy objective that the Catholic bishops are stating, they follow closely the existing Humphrey-Hawkins full employment bill which calls for our Government, our President to take certain actions when unemployment reaches 4 percent. Of course, unemployment is far above 4 percent. And most important of all, in certain areas which are impacted heavily by unemployment, in my district, the 12th Congressional District in Brooklyn, unemployment for adults is close to 20 percent, and unemployment for teenagers is close to 50 percent.

The policy objectives statement of the Catholic bishops continues:

> The Government should increase support for direct job creation programs targeted on the structurally unemployed.
>
> Three, job training and apprenticeship programs in the private sector supported jointly by business, labor and Government should be expanded.
>
> Four, local, State and national coalitions to press for job creation should be formed.
>
> Five, job placement services should be improved and expanded.

It goes on to discuss unemployment and poverty.

In other words, nothing is more central to both the improvement of our economy and also the improvement of the lives of individuals, the saving of the lives of individuals and family than employment, job creation.

In the most practical and specific terms, every economist argues that every increase in the number of employed people produces revenue which decreases or has the potential of decreasing the deficit.

Why do we not discuss unemployment, why do we not discuss a full-employment policy, or a policy that gets us as close to full employment as possible? Why do we not discuss that at the same time we are discussing ways to get ourselves out of the current mess that we are in with our mismanaged economy.

Gramm-Rudman is too narrow in scope. Gramm-Rudman might be helped a great deal, or the goals of

Gramm-Rudman to reduce the deficit and to help balance the budget might be helped a great deal if employment is increased, if job creation programs are increased. But this administration, for ideological and philosophical reasons refuses to expand programs for employment and programs for job training.

In another section of the Catholic bishops letter, they talk about employment further.

The most urgent priority of U.S. domestic economic policy is the creation of new jobs with adequate pay and decent working conditions. The prime goal must be to make it possible for everyone who is seeking a job to find employment which benefits human dignity.

As noted above, Pope John Paul II has written that human work is a key to the whole social question. There are many forms of work which express human dignity and contribute to society, not all of them in the formal job market. Homemakers, students, artists, and those whose lives are devoted to enhancing the spiritual life of the community deserve respect and support. Nevertheless, a job with adequate pay should be available to all who seek one, and a job with adequate pay produces taxes, it produces revenue for the Government. It eliminates and lessens the number of people who are in need of special help, the number of families that are in need of special help. It keep families together.

This is only one example of the numerous policies that should be discussed at the same time we are considering Gramm-Rudman.

I mention jobs because they are the cornerstone of any economic policy. We have sat by in this administration and watched jobs flow out of the country at an ever-increasing rate. We have seen plants closing down, manufacturing plants closing down at an ever-increasing rate. We have allowed our competitors to swindle us at the same time that they put enormous barriers up before American products and do not allow American products to be received as imports and sold widely in their own markets.

We allow them to swindle us and we keep the barriers down here in the name of free trade. Free trade should not be a swindle, and for its own reasons, and those reasons might relate to the fact that there are so many people that have left the Government and are on the payroll of some of these foreign exporters, the people who are sending products here and who know very well how to deal with our Government, and they have a large number of lobbyists, and large numbers of advisers who are on their payroll, some of them who recently came out of the present White House. So the mystery that exists around why we allow ourselves to be swindled by other governments and other economies that refuse to accept our products while they flood our markets, some of that mystery can be solved by taking a close look at the employment policies as relates to some former high-level officials in our own Government. They influence our policies and they keep us parroting a line which says that it is bad for our economy to have any policies which seek to protect the American workers. It is bad, it is unholy in the litany of free trade and the free economy, it is unholy, and for their own various reasons, they have sold us this bill of goods, and we are the victims of an ongoing swindle.

If we had a policy, if we were more concerned about employment, if we had a policy of full employment, some of this camouflage, some of this smokescreen that we have been forced to accept with respect to our own export and import policies, the fact that our balance of trade, you know, the money, we are hemorrhaging in terms of the amount of money that is flowing out of the country because we have a lopsided balance of trade. With Japan alone, I think the surplus on their side is $80 billion. That is, we are buying $80 billion more from the Japanese than we are selling to them because they are smart enough to put up barriers and keep our products out, while we let their lobbyists, the people that they pay to lobby for them tell us that we cannot put up any barriers here.

So numerous issues fold into this bigger issue of employment, and the inability or the refusal of our own Government to have an employment policy which addresses the basic problems in this economy. It you give people jobs, you eliminate a large part of the necessity of Government participation. If you give people a job, you eliminate a large number of problems. And if you give people jobs, you also increase revenue, and you will go on to eliminate a large part of the deficit.

The black community, the black people of the United States of America who are the primary victims of the policies of this administration so far, and who will be the victims of Gramm-Rudman, Gramm-Rudman will finish off that population that is already suffering so greatly, they would greatly benefit from a discussion and an implementation, development and implementation of a full-employment policy.

If we were to create jobs at the same time we are talking about Gramm-Rudman and talk about the improvement of our economy and the better management of our economy, we would instead of victimizing the black population of America, we would restore the kind of help that Government should give and is best able to give, and that is the help of having individuals develop a meaningful life because they are employed, they are able to make a contribution, and they are also able to take their fair share of providing revenue for this economy.

Mr. WALKER. Mr. Speaker, will the gentleman yield for some questions on the facts that he has stated during his speech?

Mr. OWENS. I will yield in just a moment. I just want to conclude, and then I will yield to questions.

I cannot stress too much the fact that Gramm-Rudman is a dangerous adventure. Gramm-Rudman is an attempt to stampede legislators who ought to know better. Gramm-Rudman is being developed in secrecy. It is an extraordinary process that is anti-Democratic, that is non-Democratic. The American people have no opportunity to participate in that, and because of that, instead of discussing what should be discussed, and that is the mismanagement of the American economy by this administration, and what steps we could take to correct the mismanagement of the economy, we are discussing merely how to make cuts. The only solution to the deficit problem we see is how to make cuts, and those cuts, in the final analysis, we are going to wire the situation, we are going to rig the game in a way which guarantees that most of those cuts are going to be made in ways which hurt the poor people of this Nation the most, which hurt the black communities, the black populace of this Nation the most.

For that reason, Gramm-Rudman should be opposed. Gramm-Rudman should not be passed. Gramm-Rudman should be seen for what it is: An attempt to stampede people who should know better, and we should withdraw it and develop an alternative plan within a timetable.

Why are we in such a hurry? Let us have a timetable that allows full participation of the American people.

I will support a balanced budget, a policy which calls for a balanced budget. I would be happy to support it. A lot of Democrats would support a balanced budget. A lot of Democrats from communities and districts like mine would support a policy which called for a balanced budget, because the abuses of the budget in the past certainly have not been in the area of social programs.

If a dime is appropriated for any social program, or any educational program on this floor, that appropriation of that dime will have the maximum discussion. We will come in with a rule which is an open rule allowing endless amendments whenever social programs are discussed on this floor, whenever they are discussed, either in terms of authorizing or in terms of appropriating, and they always have maximum discussion. Never is anything done in secret, and for that reason, there are very few abuses that have taken place with respect to social programs.

I know the myth the social programs had dollars thrown at them, and they took a great part of it, they sucked money out of the economy, et cetera. It is a myth. When you look at the facts, when you look at the proportions, the dollars that were appropriated, the small proportion of the total Federal budget that was taken by these programs, you see that that is all it is, is a myth, and social programs have not hurt the economy that much, social programs are not the cause of the deficit.

□ 1810

On the other hand, when certain other kinds of programs are discussed, we come with closed rules. With the prerogatives of certain committees, you find items added so that you have pork barrel projects appearing in the districts of the most powerful committee chairpersons, and the ranking members in their districts.

So the kinds of things that have gone on which have abused the budget, have not helped at all in my community, in my constituency; so I have no problem with a balanced budget policy, a process which would achieve a balanced budget; an open process where the American people can see what the priorities are, an open process where we move to correct the mismanagement of the economy. I welcome that. That would be a great alternative, a worthy alternative to the Gramm-Rudman stampede process that is now under way.

Let us deal with a deliberative process which takes into consideration the total problem. The problem of mismanagement of the economy, and lay aside the Gramm-Rudman proposal as a centerpiece for the discussion. It is a dangerous centerpiece, and will only lead us down the path to making disasterous decisions.

I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding. He has made a number of statements that I just would like to raise some questions about, and I have a whole series of them here, and I do not think probably in the time left that we may get to all of them; I am hopeful maybe the gentleman will stick around.

I have some time and I would like to pose some of these questions, and I do not want to do it in a way that the gentleman would not have a chance to to respond.

Mr. OWENS. Reclaiming my time, I will take the gentleman's most significant questions, by his priority.

Mr. WALKER. There are a number of them.

First of all, the gentleman has said that the process is going forward in secret. Now, does the gentleman have information that I do not? It is my understanding that the conference is wholly open; that today there were some 250 people in there, some 15 television cameras, a number of radio stations, major newspapers; that in fact the conference is going on in full view of the public.

Does the gentleman have information different than that?

Mr. OWENS. Yes; when will they have the first hearing?

Mr. WALKER. Well, they have already held hearings. There have been a number of hearings already. The gentleman stated that——

Mr. OWENS. No; Gramm-Rudman has not had a single public hearing.

Mr. WALKER. The gentleman is wrong on that point. The Government Operations Committee has held hearings on Gramm-Rudman. Some of the statements coming from your side——

Mr. OWENS. No, no; the Government Operations Committee has not had hearings on Gramm-Rudman.

Mr. WALKER. The Legislation and National Security Subcommittee the other day held a hearing on this; they brought people in to talk about the Gramm-Rudman approach; the conference committee itself has held hearings, brought people in.

The fact is——

Mr. OWENS. What day did they have hearings? The conference committee?

Mr. WALKER. The conference committee has been bringing people in to listen to them. As a matter of fact, some of the people on your side have been delighting here recently in quoting the Nobel Prize winner who called the Gramm-Rudman plan a mickey-mouse plan or something like that——

Mr. OWENS. He did not do that at a hearing?

Mr. WALKER. Yes; he did. He said that at a hearing—I am not certain which committee hearing that was——

Mr. OWENS. A Gramm-Rudman hearing?

Mr. WALKER. But it was said in the course of a congressional hearing.

Mr. OWENS. If the gentleman would give us a schedule of those hearings, we could let the American people know when the hearings are taking place, and——

Mr. WALKER. This gentleman does not happen to serve on the conference committee; he is simply telling the gentleman from New York——

Mr. OWENS. The gentleman seems to be quite knowledgeable about what is going on, so why does he not share the information, and we can all go to the hearing?

Mr. WALKER. I am telling the gentleman where some of these are being held, and I would say to the gentleman, I just want to make certain that when he makes these statements that he in fact is factual. It is not proceeding in secret; it is proceeding in the open and there are hearings taking place.

Mr. OWENS. As far as I know, what I said is factual.

What I said was factual; I have heard nothing to the contrary yet.

Mr. WALKER. Well, I am telling the gentleman something to the contrary, and I hope the gentleman will go back and check his facts.

Mr. OWENS. What date and what time are the hearings being held?

Mr. WALKER. Well, I would ask the gentleman to go back and check his facts, because indeed hearings have been held over the last few days, and indeed they are being held by the conference committee; the conference committee has split up into task forces at the present time in order to hear a whole variety of witnesses dealing with some of the criticisms of the proposals so in fact there is a process going forward that at least comes up.

I would also say to the gentleman——

Mr. OWENS. I welcome the gentleman's information. I hope the process will go forward. I have a lot of suggestions about where hearings should be held, and I hope that they will honor some of those suggestions.

Mr. WALKER. I would also say to the gentleman that he ought not raise the question of the hearings process with the people on this side of the aisle who are the supporters of Gramm-Rudman.

The fact is that it is the Democratic leadership who made the decision to go to conference rather than take the procedure which would allow them to take this bill to the Rules Committee, and in the Rules Committee they could have certainly held hearings.

But instead, the decision was made to proceed directly to conference rather than give the House the opportunity of going through the regular processes that the gentleman seems to endorse.

Mr. OWENS. The gentleman is misinformed.

Mr. WALKER. I would suggest the gentleman may want to take that up with his own leadership.

Mr. OWENS. I reclaim my time. The gentleman is misinformed. I did not criticize the people on that side of the aisle; I did not single out any side of the aisle for criticism.

I say the whole process is extraordinary, antidemocratic; it should not be going forward, whoever bears the blame for it should accept it.

Mr. WALKER. Well, once again, it was the people who tend, though, now to be opposing this approach who were the people who decided on the direction that we go. So to hear, then, the opponents then say that the process is a wrong process having determined the process themselves, it seems to me is somewhat disingenuous.

Mr. OWENS. Has the gentleman asked me to yield for questions? Do you have a question?

Mr. WALKER. Yes; I have another question. The gentleman said that the President has not submitted a series of statements, or a balanced budget; he has not submitted any programs for reductions; the President——

Mr. OWENS. No; I did not say that. I said the President has never submitted a balanced budget.

Mr. WALKER. Well, that is wrong. The President in his very first budget——

Mr. OWENS. He submitted a balanced budget?

Mr. WALKER. Yes; the very first budget.

Mr. OWENS. When did he submit one?

Mr. WALKER. The very first budget the President sent up here was a balanced budget, which was rejected out-of-hand by the Congress. The very first one, soon after he came into office was rejected out-of-hand by the Congress.

Mr. OWENS. He was hurt, and since then all the budgets he has sent, he refused to have them in balance?

Mr. WALKER. The President has not submitted a balanced budget since then, although the President has submitted budgets since then that have called for dramatic program cuts, none of which the Congress has decided to take.

This year, for example, the President submitted 20 program eliminations; eliminations of programs like Amtrak and some of these kinds of things, that serve basically people who make $30,000 and $40,000 a year. Not one of those program eliminations was agreed to by this Congress.

It seems to me that once again Congress has not——

Mr. OWENS. Reclaiming my time. The gentleman was correcting me on the issue of the President submitting a balanced budget. The gentleman says he submitted one.

Mr. WALKER. Yes; that is correct.

Mr. OWENS. I will accept that. How many budgets has the present President submitted, and has he ever submitted a budget that did not have a deficit over $100 billion? Except for the first one.

Mr. WALKER. Well, if the gentleman will yield further, as I said to the gentleman in his earliest budget submission, that was rejected out-of-hand by the Congress——

Mr. OWENS. I will accept that as fact even though I will have to check it, if the gentleman says so.

How many budgets has he submitted since then, and has he submitted one that did not have a deficit of under $100 billion?

Mr. WALKER. And the gentleman is absolutely correct; the President's budget deficits have come up, but let me——

Mr. OWENS. They have been above $100 billion, have they not?

Mr. WALKER. That is exactly right.

Mr. OWENS. The President has submitted budgets with deficits above $100 billion.

Mr. WALKER. And Congress has never yet cut back on what the President submitted. The Congress has the authority to do something—we do not have to accept the President's figures; we do not have to accept his deficit figures.

Mr. OWENS. Was there ever another President who submitted such enormous deficits to the Congress? In peacetime? Nonwar?

Mr. WALKER. In terms of percentage of gross national product, the answer to your question is yes.

Mr. OWENS. I did not say in terms of percentage of gross national product.

Mr. WALKER. Well, that is a major——

Mr. OWENS. Because the gross national product is not helping us to reduce the deficit. We have an enormous debt, enormous interest on that debt——

Mr. WALKER. Oh, sure it is.

Mr. OWENS. And the gross national product is not relevant, obviously, because it does not bring that down. So why introduce a factor like gross national product?

Mr. WALKER. If the gentleman would yield, one of the reasons why we have major deficits today is because we had a declining gross national product in the early eighties.

The fact is that we had an economy that was in decline; that obviously produces major dislocations in terms of Government revenues, in terms of the ability of the economy to sustain any kind of Government spending.

Mr. OWENS. The gentleman is saying that the President should not have reduced revenues so drastically?

Mr. WALKER. Oh, I think the President needed to reduce revenues drastically in order to get the economy growing again. When we were taxing at the rate that the gentleman wants to tax, evidently, we had an economy that was in an absolute decline.

Mr. OWENS. Did the President achieve his goal of getting the economy going again to the point where it generated the revenues that would balance off the deficit?

Mr. WALKER. Well, if the gentleman would yield, if the gentleman would yield, instead of having a decling GNP at the present time, we have an advancing GNP. We are growing again instead of declining, as an economy. That certainly is a success.

Mr. OWENS. And how is that reducing the deficit?

Mr. WALKER. Well, for one thing, we have generated, I would say to the gentleman, 25 percent more revenues in just the last 2 years than we were generating before.

Mr. OWENS. And how is that reducing the deficit?

Mr. WALKER. Well, more revenues coming into the Federal Government as a result of economic growth has certainly helped reduce deficits.

The problem is——

Mr. OWENS. Why is the deficit going down then?

Mr. WALKER. Well, because Congress continues to spend at a greater rate than the increased revenues. Last year, for example, I would say to the gentleman, between March and March, you had an 11-percent increase in revenues to the Federal Government. That is a rate almost three times the rate of inflation.

So in fact we had revenues coming in at a very, very large rate. The problem is that Congress was spending at a rate of 12 percent, and so we are spending at a greater rate out of this Congress than we are collecting revenues, even though revenues are at three times the rate of the growth of the economy.

Mr. OWENS. Did I hear the gentleman say——

Mr. WALKER. Rate of inflation.

Mr. OWENS. Did I hear the gentleman say that we had an increase of $25 billion in revenue?

Mr. WALKER. No; we have an increase of 25 percent. Revenues have gone up during the period of time from 1983 through fiscal year 1985 by 25 percent, in a 2-year period. That is a tremendous amount of growth of revenue for one——

Mr. OWENS. From what to what? From 1980——

Mr. WALKER. No; from 1983——

Mr. OWENS. Reduced it drastically, and now the gentleman is telling me that we have a tremendous growth.

Mr. WALKER. Yes.

Mr. OWENS. After reducing it.

Now we have gotten back to where we were?

Mr. WALKER. Absolutely.

Mr. OWENS. Before the reduction, and——

Mr. WALKER. We are way over the revenues that we were collection in 1980, I would say to the gentleman.

□ 1820

In fact, we are collecting the same percentage of revenues when you compare it to GNP as we were in that period of time. We used to collect, under the old system, about 18 percent of our gross national product in Federal revenues. That is what we are getting today. The revenue base of this country has not declined. The problem is that in spending, instead of being at a 20-percent level where it was just a few years ago, spending has gone up to a 25-percent level. So that the problem

in our deficits is the fact that spending has increased from 20 percent of GNP up to 25 percent of GNP while the revenue base has remained relatively stable. But the revenue base is not declining, I would say to the gentleman, it has been expanding in terms of dollars coming into the Federal Government.

Mr. OWENS. The spending has increased, I would agree. I am all in favor of decreasing the spending in the areas where it has so dramatically increased. It has increased mostly in the area of defense. The gentleman is criticizing the President's program to drastically increase the defense expenditures.

Mr. WALKER. If the gentleman would yield again, in this particular budget year of course we have frozen defense spending.

Does the gentleman——

Mr. OWENS. Finally frozen it, but not the President, he did not freeze it, we froze it.

Mr. WALKER. Exactly. The President eventually agreed to that.

Mr. OWENS. But a responsible Congress had to freeze it.

Mr. WALKER. Does the gentleman contend that we ought to cut defense more than that, that we ought to have real cuts in defense spending instead of just freezing? Is the gentleman advocating that we ought to take and now go in and cut, in absolute terms, the defense budget?

Mr. OWENS. If I may reclaim my time, absolutely, we should cut the defense budget. That is the place where you have the largest amount of money. We should have weapons that are defunct or weapon systems that are questionable like the Sergeant York gun cut out.

Mr. WALKER. We already cut that out.

Mr. OWENS. We should give up on the MX missile, which has been agreed by military experts does not add to our defense, certainly not in proportion to its tremendous cost. We should listen to the gentleman from the other body that our defense apparatus and establishment is mismanaged. We should look to making managerial changes, changes in the way the services operate, changes in the amount of money and resources we commit to modernization. There are a number of things that can be done that do not cost as much as some of the systems we have under contract and underway at this point.

We do not need to spend as much money as rapidly as possible, even if you accept the necessity for a strategic defense initiative. You know, the Congressional Black Caucus budget, its alternative budget, recognized that here is an area where certainly research should go forward, but we do not need to put as much in the budget as we have put in. We cut it because we know you cannot spend money that rapidly and spend it wisely. The history of the Defense Department under this administration is that they have been throwing dollars at problems and not getting the kind of results that we have paid for. So we should spend at a slower rate, we should set our priorities more carefully, and we can realize considerable savings in the area of defense where the great expenditures are being made.

It has been interesting to talk to the gentleman. He always has lots of words and lots of statements. I assume most of them are factual. But I would like to conclude at this time, Mr. Speaker, and say that Gramm-Rudman is a disaster and it should be defeated if ever it comes back to the floor.

Mr. Speaker, I yield back the balance of my time.

ORDER OF BUSINESS

Mr. HUNTER. Mr. Speaker, I ask unanimous consent that my special order may be called at this time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

STRATEGIC DEFENSE INITIATIVE IS TRULY A REAGAN INITIATIVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. HUNTER] is recognized for 60 minutes.

Mr. HUNTER. Mr. Speaker, "isn't it better to save lives than to avenge them?" President Reagan made these remarks, made this statement, in opening his strategic defense initiative speech on March 23, 1983, and with that speech gave new hope not only to the United States but to all of the democracies of the world for a chance to escape the situation that we have lived in for some 30 to 40 years, that situation in which we relied on a mutual terror, that is, mutual assured destruction, to preserve the peace.

You know, it has been said by a lot of defense experts that President Reagan has not really come up with any new defense programs. They have pointed out that the MX missile was Jimmy Carter's program, the B-1 bomber development initially started under the administration of Richard Nixon, and on a number of other weapon systems that we are producing at this time, they really began under other administrations and have evolved to the point where we are just now producing them under the Reagan administration.

But, Mr. President, it can truly be said that this in fact is your program, this very meaningful program that has great import to the Western World, the strategic defense initiative, it is a chance for us to utilize the one ace in the hole the Western World has had for the last 30 or 40 years, and that is their technology to defend their freedoms.

You have been the leader in this, and by bringing forth this program you have been able to do something that other Presidents have not been able to do for many years, and that is to really get the attention of the Soviet Union.

Mr. President, we are worried that you may make some concessions before the summit conference, during the summit conference or afterward that may, to some degree, give away or surrender some of the advantages that the United States can find under the strategic defense initiative. We want to talk about a few of those tonight. We want to talk about some of the important elements of the strategic defense initiative.

I would like to yield at this time to my friend from Arizona to see if he has any statements he would like to make to start off with.

Mr. RUDD. I thank my friend and colleague from California for yielding. I have a lot to say about this, but I will keep it very brief. We are involved in a last-ditch operation to preserve freedom in our country, in my estimation, and it all relates to the strategic defense initiative at the moment. So, Mr. Speaker, I would ask the President of the United States to hold firm. I recognize that the flames of pressure are singeing him constantly in an effort to try to put this, the strategic defense initiative, in as a bargaining chip or as a part of the negotiations with the Soviet Union with regard to arms reduction.

I plead with you, Mr. President, not to use this in any way along those lines. The only reason we are at the bargaining table today is because this strategic defense initiative has been brought forth as something that we intend to do on behalf of our country and in defense of our country, and I ask you not to do that.

So let me enumerate some of the actions for the benefit of the people, some of the actions that are involved and surround the strategic defense initiative.

First of all, what has happened here in Congress? The President initially asked for a strategic defense initiative in 1984, his initial request was cut by $1 billion, from $3.72 billion to $2.75 billion. The heavy pressure continues in the House and in the Senate to cut that funding even further. I hope that the public will become aware of the very meritorious actions that the strategic defense initiative has brought forth and will help the President and insist on the Congress providing suffi-

cient funds for this. Let me tell you what the Soviets have done.

The Soviets are launching an all-out propaganda campaign to stop the SDI Program, and it is estimated and indicated that the Soviets will spend more time and money trying to derail SDI than they did in trying to undermine the deployment of the Pershing and cruise missiles in Europe back in 1983.

The Soviets are working on their own SDI development and have been for perhaps a dozen years. So they are well ahead of us in this order.

While the Soviets continue to denounce America's continuous militarization of space, in their words, they are simultaneously upgrading their Moscow antiballistic missile system, deploying antiballistic missiles, surface-to-air missiles, constructing phased array radars in violation, I might say, of the SALT I Treaty, and investing many billions of dollars, perhaps more than $2 billion annually, in laser research alone.

Now, with regard to what has happened on the domestic scene here, Mr. Speaker, and I relay this to my colleague and friend from California, a number in the so-called peace movement organizations are opposing SDI. SDI opponents are having a lot of difficulty justifying their opposition to this initiative since they argue against a defensive system which, in essence, means a continuation of the status quo of the mutually assured destruction, or MAD, theme, if they would destroy SDI.

These contradictions are undermining the own positions of the so-called peace movement organizations and even undermining public support of their freeze movement.

With regard to the media, let me say this: There are segments of the media which have praised the Soviet leader Gorbachev's recent offering of reducing nuclear weapons on both sides by 50 percent as a bold, new initiative. Conveniently, they forget at the same time that President Reagan made a similar offer 3 years ago which the Soviets flatly rejected in order for them to continue their offensive, nuclear modernization.

This is another reason why they are at the bargaining table today, because they ignored that and they now are concerned about anything we might be doing in SDI.

Certain segments of the media have refused to acknowledge that the Soviets are violating the ABM Treaty and that we are strategically no better off today than we were in 1972 when the ABM Treaty was ratified. Because of technological advances, ABM could not possibly apply to the offensive nuclear missile capabilities which exist today. With regard to public awareness, let me just quickly enumerate for the benefit of the people of this country what SDI is all about and the positive side of it.

SDI is purely defensive, and it is our constitutional mandate to protect you, the citizens, the citizens of this country.

Second, SDI kills Soviet missiles and in the postlaunch or boost phase with nonnuclear methods.

Another reason, and I will just clock these off, Mr. Speaker, SDI saves lives. It does not avenge them as under the MAD theory. SDI is a defensive reaction to the Soviet offensive buildup after the ABM Treaty was signed by the Soviets who declared the world would be a safer place, and yet today they have three times the arsenal that they had back in 1972 when the treaty was signed.

So we do not live in a safer world.

SDI research and development does not legally violate any of the terms of the ABM Treaty. Discussion of SDI has already contributed to the arms negotiations, as I previously stated, because it is SDI which brought the Soviets back to the arms talks and negotiations and brought them back in a serious vein for negotiations.

SDI does not help fight a better war; it helps build a better peace. Unless we commit ourselves to defense against the real Soviet offensive threat and take the necessary steps to push forward with SDI research and development, we do not deserve to continue as a free nation.

Let me tell you that we will not continue as a free nation. Public opinion shows that in 1985 the indication was that 90 percent of the people of this country support deployment of SDI and its systems as a shield against Soviet long-range offensive weaponry; 76 percent of the people feel that committing 2 percent of the entire defense budget to SDI is fiscally responsible and therefore acceptable.

□ 1835

This is for the benefit of the people and, hopefully, for the benefit of the Members of Congress who will vote on this initiative from this moment forward.

I thank the gentleman from California for taking this special order. It is a tribute to him and his concern for this, and his concerns, and my concerns, and the concerns of a number of other Members of Congress that the President might be pushed into negotiating a part or putting this SDI initiative on the table as a part of the negotiating. It does not belong there; it was not agreed to in the original arms control setup, and it is the only reason we are there with the Soviets today, so it should not be a part of this negotiation. Mr. President, I plead with you not to use this as a part of the negotiations.

Mr. HUNTER. I thank the gentleman for his statement and I thank him for his participation in this special order.

Let me just say there are a number of reasons why we should hang tough with our SDI Program and the President should not be interested in surrendering any parts of that program to the Soviet Union at this time.

No. 1, we should not adopt an interpretation of the ABM Treaty that is more conservative than the interpretation that the Soviets have adopted.

Let me just explain that. The Soviet Union has built a radar at Krasnoyarsk that most of our experts say, because it is located in the interior of the country and it is in a situation where it can be used for battle management, it has been deemed to be a violation by most experts, not just those who support the SDI Treaty but those who oppose the SDI Program. It has been deemed to be a violation of the ABM Treaty. The Soviets have done that. They have not apologized for it. They have not indicated that they are going to stop work on it, that they are going to dismantle it, or anything else. And yet, apparently, over the last several weeks this country has become involved in an exercise of torturing ourselves over the limitations of the ABM Treaty and in fact we have now two interpretations that have been offered, one by an analyst who was asked to do an analysis of the ABM Treaty by the Department of Defense. After his analysis, the Secretary of State asked another expert to analyze the treaty. Both analyses came to the conclusion that in fact some of the more exotic equipment that could be used for strategic defense initiatives—and we are talking about lasers, particle beam weapons, and things of that sort—in fact could be developed and could be deployed, at least according to one interpretation, under the treaty as it stands. They claim that in reading the record of the ABM Treaty our negotiators back in the early 1970's tried to convince the Soviet negotiators that we should lock out even futuristic types of weaponry, and the Soviets refused to go that far. So the Soviets built in this exclusion in the treaty. But now we have people in the administration and people who are urging this administration to adopt a more constrictive interpretation of the treaty than the Soviet Union has adopted itself. We cannot have an adoption of the ABM Treaty that is going to give us tighter constraints that the Soviet Union gives itself under the treaty.

I yield to my friend, the gentleman from Arizona.

Mr. RUDD. I thank the gentleman for yielding. What the gentleman is saying is: Let's face reality, let's face facts.

I know the gentleman is an admirer of the very distinguished scientist, Dr.

Edward Teller. I just remind my colleague that Dr. Teller has faced facts throughout his life, throughout his career. An example of this is the development of the hydrogen bomb. Dr. Teller was a lone voice in the development of the bomb. Everyone else said, "We don't dare develop this bomb," and the other scientists were all opposed to him, saying, "We should not develop this because it will encourage the Soviets to develop it." But Dr. Teller professed reason, projected reason, and the hydrogen bomb was built. Then we found out that the Soviets really had that hydroben bomb concomitantly and at the same time that we developed it. They were with us or either very shortly behind us on the hydrogen bomb. Dr. Teller today is a proponent of SDI. Again in the scientific world he becomes a lone voice. Thank God for Dr. Teller.

I just want to remind my colleague of his admiration for Dr. Teller, which I know he has.

Mr. HUNTER. I thank the gentleman. I think the debate that he is referring to in the early 1950's is the Oppenheimer-Teller debate, when Dr. Oppenheimer said that we should not develop the hydrogen bomb because it would provoke the Russians into developing their own. Dr. Teller retorted that he thought that they were already developing their own and, sure enough, shortly after we tested, they tested.

Mr. RUDD. The gentleman is correct.

Mr. HUNTER. And that goes to another point. In January 1985, speaking in Madrid, a Soviet scientist, Bashov asserted: "Moscow would have no difficulty in duplicating the American Star Wars Program."

Dr. Teller says, "I suspect that Bashov's confidence arises from his knowledge that the so-called duplication is already completed."

Let me give another reason why the United States should hang tough with SDI and why we should not surrender any parts of our SDI Program.

No. 1, it puts the security of the free world back into our own hands. Even though we have a policy now of mutually assured destruction, that policy is based on the rationality, the presumed rationality of Soviet leaders. We are hoping, we are praying that we are not going to be faced with Soviet leaders who would be willing to take enormous casualties in their country in return for devastating the United States of America. And we hope that that will never occur. But if we have a defensive system, if we are able to knock those missiles out before they can arrive in the United States, then our security is not in their hands and it is not dependent on the Soviet Union having a succession of very stable leaders, something that I do not think we can depend upon.

Another thing we have to remember is that SDI is inspiring our European allies to investigate the issues and the questions of their own self-defense. Under the ABM agreement, ATBM's are allowed, that is, antitheater ballistic missile systems. That means right now they can develop SDI systems or defense systems against slow-moving theater ballistic missiles, and that is the main type of missile that faces Western Europe right now. For example, the SS-20's. They can do that.

I think that for that reason an SDI Program, a sharing of information and going forward with the entire Western World, moving forward together, is going to bring the allies together, not drive them apart.

I yield to my friend from Texas.

Mr. BARTON of Texas. I thank my colleague from California for yielding. I want to commend him for conducting this special order. This is a very important subject, especially considering the President will soon be meeting with Gorbachev in Geneva.

Although I am an engineer, I am not a real technical person, and I do not pretend to know all of the technical reasons for and against the strategic defense initiative. But I look at this in a little more simplistic fashion. What we have today, we have a situation called mutual assured destruction, where the Soviet Union has got an offensive nuclear arsenal, the United States has got an offensive nuclear arsenal, and we depend on the ability to annihilate each other to keep either side from pulling the trigger, so to speak.

Mr. HUNTER. That is right. We called it mutual terror.

Mr. BARTON of Texas. Mutual terror. And so far that has worked. But it is beginning to get to the point where there are those who believe that the Soviet Union, because they have moved ahead with their own strategic defense program, has the ability to negate our offensive capability. As President Reagan said in 1983, when he announced the strategic defense initiative, if we have the ability to make offensive nuclear weapons obsolete, we have an obligation to do that. I support the strategic defense initiative. I voted for full funding. I consider this not to be a bargaining chip. I consider it to be the most important defensive program that we are currently pursuing. Let me state why.

Right now, when I go to bed each night and I tuck my children into bed, the only thing that I have that I feel comfortable with is knowing that I am going to wake up the next morning, and my children are going to wake up the next morning, and we still have this mutual terror. But if we had the ability to make sure that even if the Soviets decided to pull the trigger it would not work, why should we not do that? I think we should. I would encourage the President, if he were in this Chamber this evening, to say, "Mr. Chairman, do not use this as a bargaining chip, because this is so important." We have, possibly, if research proves that we can implement this system, we have the ability to once and for all render nuclear war obsolete. Let us go ahead and do it.

To use a football analogy—and in my State, football is very important.

Mr. HUNTER. It used to be.

Mr. BARTON of Texas. It still is. But right now we have two offensive teams on the field. Both teams, since there is no defense, has the ability to score touchdowns. Consequently, neither team tries to score touchdowns, but if the Soviet Union puts a defensive team on the field, they may decide to go ahead and begin to score touchdowns because they know they can keep us from scoring touchdowns.

Now, in the history of warfare, to every offensive action there has at some point in time been an equal and opposite defensive reaction, whether you are talking about building moats around castles or walls around cities. We have at least the potential to research a defensive system that would prohibit the Soviet Union from even contemplating a first strike.

I do not think it has to be 100 percent effective. If it is 80 percent effective or 70 percent effective, if it is in any way a high degree of probability that it will be effective, then we ought to build it. We are not yet at that stage to know whether we should build it. We need, as I understand it, 2 or 3 more years of research. But we should certainly go ahead and do that research. And until we have done it and until we know whether it is implementable, whether it is effective, we should not even consider it as a bargaining chip. It is so important.

So I would tell the President, if I could, "Mr. President, go to Geneva, try to get the Soviets to negotiate a meaningful arms reduction, try to get the Soviets to negotiate in good faith, but, for heavens sake, do not negotiate away the only thing that we have that may actually be able, in the long run, to prevent nuclear war."

I know my colleague from California is of that opinion, my colleague from Arizona is of that opinion. I think the American people are of that opinion. In my district, strategic defense initiative has got an 85-percent approval rating right now, because where I come from people realize that you cannot always trust the other guy. You have to have the ability to defend yourself. And we should not negotiate this away until we know whether it will work or not and until we know that the Soviet Union will trust us and work with us to reduce their nuclear arms.

Mr. HUNTER. I thank the gentleman for his remarks, and I think his observations are very good. In reflecting upon what we have to rely on in the Soviet leadership, while we have some new style and a few new suits in the wardrobe of the Soviet leader, we still have a system that resulted in Major Nicholson lying in East Germany, suffocating on his own blood, while the East German officers refused to allow anybody to give him medical help. That type of a system I think holds little promise for Americans who are relying on the mercy of the Soviet Union in preventing a nuclear war.

I want to yield in a second to my good friend from Ohio, Mr. KASICH, but I want to say just one thing before I do that, and that is that any American President, when he negotiates with a foreign power, really has two negotiating sessions. The Soviet leader only has one negotiating session. That is when he negotiates with the President of the United States. But the President of the United States has two negotiating sessions. The first negotiating session takes many months. It precedes the summit, it always precedes the summit, and it takes maybe 4, 5, or 6 months. In that negotiating session he negotiates with the press, he negotiates with Congress, and he negotiates with our allies. He is forced to talk with them and to talk about them and to talk to their concerns. If the Soviets are lucky, during that first negotiating session he gives up valuable things that they then do not even have to deal with in the second negotiating session when he meets them face to face. I know a lot of people predicted that there would be pressure on this President, before he even got to the summit with Mr. Gorbachev, to start giving up things. And I thought, "Well, that is not going to happen." And, sure enough, last week, when we had an interpretation of the ABM agreement, which looks to me to be absolutely accurate, to the effect that we did not agree with the Soviets, in fact, they did not agree with us in the early 1970's to ban futuristic systems, at least the development, if not the deployment, of futuristic systems, and the President, after being pressured by the State Department, allowed that even though that was not the law under ABM, as matter of Presidential policy he would allow himself to be constrained, already taking on constraints that the Soviet Union has no intention of taking on for themselves.

□ 1850

Mr. Speaker, I now yield to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman for his work on SDI. He really has had a futuristic look at SDI. In fact, it was not long ago I remember him telling me how he wanted me to sit down with his brother who is one of the fine scientists in this country who is familiar with the kind of technological capabilities that we have in this country, and I have got to tell the gentleman that I had the great pleasure of having Jim Abramson in my district. He was able to attend Batell, which is in my district, one of the Nation's great research institutes.

He was able to attend the session at Ohio State University with people from the strategic studies area of Merchon, and these are people who are thinkers in defense policy. I was able to make a speech to the Columbus Council on World Affairs where he took a number of questions from people in the audience who were trying to gain an understanding of what SDI is all about. I had an opportunity to meet with a variety of people who really want to know can SDI work.

Now, I happened to catch the very beginning of the gentleman's special order where he talks about our current policy of MAD—mutual assured destruction. That of course being the idea that you will not blow us up if we can blow you up, so therefore, if we have enough weapons to blow you up, you will not think about blowing us up.

Let me say this to the gentleman. I an sure he finds this interesting. In 1972, when we negotiated the ABM Treaty, it was negotiated under the philosophy that if we limit the amount of defenses that we have in the country to one site; the Soviet Union has decided to deploy an ABM system around Moscow and we limited ourselves of course to one under that treaty, if you only have very limited defenses and only affecting one site, there would be no incentive to build a great number and stockpile or develop new nuclear weapons, would there? Because it would only take the bare minimum of these weapons to destroy the other nation.

Mr. HUNTER. The gentleman is absolutly right. A number of our so-called far thinkers thought that if we signed the ABM Treaty there would be no proliferation of nuclear weapons.

Mr. KASICH. Absolutely. And since that time of course we have seen a deployment of the SS-17, the SS-18, the SS-19, which are the most accurate and powerful weapons that we have in the world and I know the gentleman is familiar because he used these same numbers in the same arguments, and then beyond that of course, in just recent times they have deployed the SX-24, which is their new system under the SALT Treaty, that they get to deploy one new system, and today, on the front page of the New York Times, and on the front page of the Wall Street Journal; I have not seen the Post today; the Secretary of Defense announced that the Soviets are again violating our agreement with the deployment of the SX-25, which is the second long-range missile clearly in violation of our treaty. That is the second time they have violated the treaty that we clearly can charge, one, on the deployment of the SX-25, of the numbers of them, and there are more than two, but in recent times the two cases we have been talking about lately is the SX-25 and, of course, the deployment of the radar, the Krasnoyarsk radar which is located in the country. Under this ABM Treaty, you can have radars but only if they are located on the periphery of the country. Krasnoyarsk radar is located in the middle of the country. It gives them battle management capability with this new radar.

It is clearly a violation; there is no one in any of the intelligence communities, either here or around the world, that will dispute this. But back to what I was saying about this 1972 treaty, the philosophy perhaps was a good one at the time that if we have very limited defenses there will not be a deployment of additional systems, and yet, we have got the 17, the 18, the 19, the 24, the 25 on their side. We have pretty much stuck to it with only modernizing the Minuteman III. Now, of course talking about MX, but we have not pursued that line but we still see a need to modernize, and even the need to deploy a new system when we talk about MX.

So obviously the idea that they limited defenses will mean that people will have no need to deploy new systems has not turned out to be a very effective argument. So what we are talking about now is rather than permitting the continued proliferation of systems, the President says in light of the political problems you have on trying to build consensuses for more new systems, in light of the resource probem you have, not having the kind of money that you need to deploy systems, and in light of the fact of this policy that you blow us up and we blow you up is really a "MAD" policy; it has worked well since World War II. We have not had a war like that. We have not used the weapons; deterence has worked.

I think there is a sense in our minds, a sense in the view of the President and his military advisers that we ought to change strategies; that we ought to shift away from this idea of destruction on each other, raining destruction on one another, and move into an area of survival. Let us put a giant "catcher's mitt" or a safety net, but a more effective description perhaps would be a "shelled defense," a variety of nets that could catch these systems. A system that could render these weapons of destruction impotent

on the boost phase. Of course that is an important point because in that boost phase that weapon, that 17, 18, 19, 24, or 25, those 5 separate kinds of missiles are armed with 10 warheads. If you can take that missile out in the boost phase, and it is not an explosive thing, you do not rain nuclear destruction on people if you can take it out with a laser system or some effective system in the boost phase, you will prevent those warheads from ever being able to separate from that missile and pose a great technical problem on us, the ability to distinguish which warheads are real and which of these objects are decoys. But the bottom line here is you set it up, you get something that can take it out in the boost phase or in the intermediate range or when it is up in space or when it begins to reenter the atmosphere.

If in fact we can develop the kind of technology that the experts, many, many, many experts, brilliant scientists say that we can, then in fact we do change the strategies of the United States and of the Soviet Union away from policies of MAD and into the policies of mutual assured survival, and then you do not need to build another generation of missiles. You do not need to keep stockpiling more weapons because your system of defense will mean these systems simply will not work, will not be effective, and I think frankly like the President says, it is the great hope for mankind to take and rid ourselves of these weapons.

Let me just say this to the gentleman, because I think one of the questions in the minds of people all across this country, your district, my district, is, "Great idea, John, but can it work?" You listen to the scientists who are involved in the project, first of all, the scientists who were opposed to it said, well, we have got to have x amount of objects in space. They have now cut their predictions literally three-quarters, saying now that we were wrong in our estimates about how many different systems and computers we need. Now they are changing their minds on that.

As General Abramson points out, and I remember back, it was not too long ago, whoever dreamt we would put a man on the Moon? Whoever thought that beyond putting a man on the Moon we would be up there in space literally catching satellites and repairing them so that they would work. The ability of people in this country to develop technology that can save man can never be underestimated. I do not care whether we are talking about the science of space or the science of medicine, boy, we need to take a chance. This is a research program. We are attempting to find out which of the technologies can work the best. I would say to the gentleman from California that we have got to be very careful in this body and in the other body that we do not engage in a wholesale stoppage of programs in SDI, because the research phase is allowing us to try to determine which of those programs really can work.

What you do, if you limit the ability of these people to investigate and to determine which of these programs makes the most sense, is you cut off the research into a technology that really might work.

□ 1900

So I would urge us to fund SDI at the level that can give us the kind of research we need, that we follow forward with this research program and do all the investigations, the checks, the counterchecks into what kind of systems will be, how effective this thing can be, and then somewhere down the road we will let a future Congress or a future President decide if this thing really can happen.

But let us not sell it short. They talked about Fulton's folly, they talked about so many things and laughed at the Wright brothers. People would have said, "Buck Rogers, that is a cartoon. We can't land anybody on the Moon or fix satellites." I think we can do these kinds of things. Or give a man an artificial heart, we can do it. We can make this technology work for all of mankind.

I appreciate the gentleman's leadership because I believe he is one of the first people in this Congress that recognized the value of SDI. I certainly appreciate the gentleman taking this special order.

Mr. HUNTER. I thank my friend from Ohio.

Let me read a brief speech by Dr. Teller. I am going to read just a few pages of it and try to insert the rest of it in the RECORD, because I think it explains part of the evolution from our thinking during the ABM Treaty to the situation as it exists today. It is entitled "Better a Shield Than a Sword." This is Dr. Teller's speech:

BETTER A SHIELD THAN A SWORD

(By Edward Teller)

(EDITOR'S NOTE.—Edward Teller is a senior research fellow at the Hoover Institution, Stanford, and associate director emeritus of the Lawrence Livermore National Laboratory. A recipient of the National Medal of Science, Dr. Teller serves on the White House Science Council.)

ABM

In the spring of 1969 my friend, Henry Kissinger, telephoned; "Edward, you argued for the anti-ballistic missile (ABM). We are supporting it, but we know there will be objections. You must go on the road and explain it." So I did.

In June of that year, I was invited to speak at a conference of the media at Glacier National Park. I arrived on a beautiful, sunny morning and went for a walk with some other members of the conference. That afternoon, my talk was introduced by one of my companions on that hike who told an anecdote: "A hundred yards from the lodge, Teller picked up a large dead branch. I asked him what it was for. He replied, 'For protection against grizzly bears.' I protested, 'That stick isn't an effective weapon!' He answered, 'I know, but I hope the grizzly bears don't.' Edward Teller will now talk about ABM defense."

This was, at that time, a justified introduction. Neither plans nor ideas suggested that a cost effective, comprehensive defense system could be produced in the foreseeable future. Why then was I arguing for it?

The basis of my support remains unchanged today. The balance of terror, aside from its ill effects on international cooperation and trust, is an unstable means of securing peace. The balance depends on current technology remaining unchanged. But in fact technology is changing at an accelerating pace. Deterrence by retaliation becomes ineffective if defense is possible. Defense, even if incomplete, has more reliability in deterring aggression because it makes the outcome of an attack dubious.

Defense is also a much more humane form of deterrence. I find it hard to argue the justice of 'an eye for an eye, a tooth for a tooth,' much less for the morality of millions of lives in exchange for millions of lives.

The 1968 ABM debate ended with approval by the margin of a single vote in the Senate. But work was barely underway when the United States signed an agreement that limited the Soviet Union and the United States to protecting a single site. At that time (1972), I was not sure enough of my arguments to lodge a protest.

The Soviets decided to protect Moscow; we chose to defend one of our missile sites. Subsequently, the American authorities abandoned this site defense; the Russians have continued for more than a decade to improve their missile defense of Moscow. Indeed, defense is very much of a reality in the Soviet Union. The uncounted billions of rubles that they have devoted to it may not be in a hard currency, but the extensive Soviet defense effort is a hard fact.

THE SOVIET DEFENSES

"I think that a defensive system which prevents attack is not a cause of the arms race. . . . Perhaps an anti-missile system is more expensive than an offensive system, but its purpose is not to kill people, but to save human lives."

This statement is one with which I wholeheartedly agree. It was made in London on February 9, 1967 by Aleksei N. Kosygin, then Premier of the Soviet Union, when he was asked by western newsmen about limiting ABM defenses.[1]

For twenty years the Soviets have developed and deployed defenses and the leaders argued for their necessity. On March 23, 1983, President Reagan changed the minds of some Americans with his strategic defense proposal; but even more clearly, he changed the statements coming from the Soviet Union.

Within three days, Secretary Andropov had denounced defense. After eighteen days, 244 members of the Soviet Academy of Sciences—led by Evgenii Velikhov—issued a statement about the Strategic Defense Initiative that bears little resemblance to earlier Soviet pronouncements on defense: [2]

[1] *Pravda*, February 11, 1967.

[2] Appeal to All Scientists of the World, *Pravda*, April 10, 1983.

"The initiative . . . is clearly oriented toward a destabilization of the existing strategic balance. By his statement, the President is creating a more dangerous illusion which may cause an even more threatening spiral of the arms race."

Many other Academicians who signed the statement have been involved in the development of Russian defenses. Nikolai Basov and Alexander Prokhorov who were among them, shared the 1967 Nobel Prize for their work on lasers together with Charles Townes. At present, Townes is working in Berkeley on some problems of the highest scientific interest connected with the center of our galaxy. One question is whether our galaxy contains a black hole a million times more massive than our sun. By contrast, Basov and Prokhorov have been working on practical problems including national defense.

In January 1985 speaking in Madrid, Basov asserted that "Moscow would have no difficulty in duplicating the American Star Wars program." [3] I suspect that Basov's confidence arises from his knowledge that the "duplication" is already completed.

For instance, recently some information about the large Soviet directed-energy research center at Sary Shagan was made public. High intensity ground-based lasers such as theirs are effective in destroying satellites. It is probable that they also can provide defense against ballistic missiles. The deployment of lasers at the weapons testing center suggests that Russians consider lasers useful in defense.

The Soviets have focused the attention of their best scientists on questions pertinent to military affairs for a very long time. In 1951, the greatest and most respected of them, Andrei Sakharov, suggested the use of an explosive to compress a strong magnetic field and generate an even stronger field.[4] In 1966 he, together with his associates, reported that they had produced a magnetic field so strong (25 million gauss) that only the use of a nuclear explosive could have produced it.[5] The technique in question may be used to transform the energy of a nuclear explosion into electricity and eventually produce microwaves that could be employed against electronic devices. Such electromagnetic pulses have been studied by the Russian scientists more thoroughly than by the Americans. One of the obvious uses of these pulses is to destroy or confuse the electronics of missiles used in an attack. The experiment performed by Sakharov anticipated similar American activities by nearly two decades.

These are just examples of the large, diverse and continuing Russian effort in defense.

During the last thirteen years, the ABM system deployed around Moscow has been twice upgraded. This installation gave their military the opportunity to train scientists and technicians on an operational ballistic missile defense system. Such defense requires appropriately placed, high performance radars. These cannot be built in a hurry, but it is generally known that the Soviets have built at Krasnoyarsk at least one such radar which violates the ABM Treaty of 1972. With parts prepared in advance, the system deployed around Moscow could be duplicated in other cities and military facilities in a very short time.

In five or ten years Russian defenses, more perfect versions of those at Sary Shagan and Moscow, may have the capability of stopping a retaliatory blow, for instance one launched from our submarines, even if the submarines remain practically undetectable. In that case, the danger of a Soviet first strike will have increased sharply. The effectiveness of such a strike could be overwhelming—provided we are still without a defense. This situation may be one reason for their protests.

Directed energy weapons, important in American defense plans, work as precisely as surgical instruments. They are not a means of producing mass destruction, but a means of preventing it. Lasers are one example of such weapons; particle beam accelerators are another hopeful prospect; and x-ray lasers, if successfully developed, may become the most effective of all. In all these cases, the pioneering work has appeared in the open Soviet scientific literature. As the scientific aims have been approached, the publications stopped. The significance of this work has been recognized in the United States only recently.

An hour after President Reagan proposed that Americans attend to defense, headlines appeared dubbing his suggestion "Star Wars". Reagan's speech included no reference to space, satellites or stars. The purpose of SDI, Reagan announced, was "to provide a long-term research and development program to begin to achieve our ultimate goal of eliminating the threat posed by strategic nuclear missiles." He mentioned no specific lines of research. Secretary Andropov did not answer in terms of what Reagan had said, but in terms of "Star Wars".

The strong Soviet reaction to President Reagan's defense proposal makes no sense unless the Soviets believe that we may succeed. They have decades of experience in this field. Their opinion, not the one expressed by rhetoric but the one made evident by their action, is, indeed, relevant.

THE UMBRELLA

Shortly before 6:00 in the evening of March 23, 1983, I arrived at the White House. I had received a cryptic message a few days earlier that I should be there for dinner, but it was only just before dinner that I learned of the approximate content of the President's speech.

"Isn't it better to save human lives than to avenge them?" This is Reagan's sentence which I shall never forget. In a few words it summarized all my worries and all my hopes. The purpose is to make weapons of mass destruction impotent and obsolete. After some 30 months of hard work this goal appears to be nearer.

Minutes after the President finished his talk, Secretary Shultz, with whom I worked for many years, asked me: Could we stop 99.9% of the incoming missiles? The question is most important.

A 99.9% defense can not be attained soon. It may not be attained ever. Even if it is attained, it will not be attained with complete certainty.

How complete can the defense be? No amount of war damage is "acceptable": War must be avoided. Defense happens to be the best deterrent for aggression. Defense does not need to be a tight umbrella. It suffices if it makes the sucesss of an attack uncertain.

It has been said to the horrible concept of mutually assured destruction that it has kept peace for forty years. I believe that what has kept the peace are the memories of two world wars. These memories are deeply embedded in the consciousness of all people of the advanced world. In the democracies, they are the ones who ultimately make the decision.

The real danger of war comes from the dictatorships, and particularly from the most powerful military power in the world.

In the first half of the twentieth century, the Russians fought the Russo-Japanese War, the First World War, the Russian Civil War, the Russo-Finnish War, and the Second World War. Tens of millions of Russians died. The men in the Kremlin are fully aware of the horrors of war. They too want to avoid war. But they also want power and ever more power. They are not paranoid; their planning is consistent and logical. Since great power is in the grasp of only a few Soviet leaders, it will be difficult to predict the ways in which they may try to attain their goals.

A defense of America and the free world which is not complete but which makes the outcome of an attack dubious would have great persuasive power to deter aggression. To my mind, and I believe to anyone's mind in a democracy, a third world war is not winnable. I believe that for a Soviet leader it is winnable only if it results in complete world domination—in the annihilation of the United States. That is why even an imperfect and uncertain defense would be an excellent deterrent. Gorbachev could not count on an absolute victory. The grizzly bears in the Kremlin don't like to take chances.

In the long run we should try to get an excellent defense. The atomic bomb took less than seven years. What we could develop by the year 2000 may come remarkably close to a satisfactory unbrella. But in the foreseeable future the umbrella probably will be leaky; it's primary purpose is to deter war. It also has a second military purpose: If we should not succeed in deterring war, SDI will diminish human suffering. This suffering will remain at a level which is entirely unacceptable, but the difference between having or not having active defense, as between having or not having civil defense, could amount to many millions of lives.

On the basis of their terrible experience, the Russians have realized this truth. Why should so many in the democratic countries doubt it?

THE ARMS RACE AND SAKHAROV

Won't defense fuel the arms race?

The answer is no. The Russian tortoise has been plodding ahead for years. The American hare has been sleeping behind the hedge.

I do not blame the Russians for their effort. If we vigorously support SDI, we shall develop a defense that will create a valuable deterrent. Rivalry in protective defense is far more acceptable than our present situation. Ultimately, if could lead to a political climate that would have the potential for rational discussion and cooperation. But in view of the international discussion on defense one must still consider the arms race. Defense will not be the final answer. Any defense may be defeated by more ingenuity. Also, any attack can be stopped by a better defense. Indeed, for

every system of defense there can and will be a countermeasure, probably even more than one. For defense to be effective in the long run it must cost less—if possible much less—than the cost of replacing the weapons that it stopped. Similarly, defense must be designed so that destroying it will be more expensive than deploying it. Defense in itself does not mean progress toward stability. Such progress is accomplished only if defense has a sufficiently low price.

I believe that this goal can be reached. Great ingenuity will be required. This is one more reason to take steps toward an obvious goal: we should try to bring about greater cooperation among free world nations. There is no insurance against a higher quality of offense. The only thing that will help in defense is even more ingenuity.

The question should be asked in a different way. What is an arms race? Why must it be avoided? The conventional concept suggests that an arms race is a quantitiative race; more men under arms, more guns, more battleships, more bombs which can be used for war alone. What is happening today would be named more appropriately a race in technology, rather than an arms race. This cannot be compared with arms races of the past.

Unfortunately, the emphasis in U.S. weapons research has not been on defense; but neither has it been on larger, more powerful weapons of mass destruction. Emphasis has been given to weapons that are more accurate, lighter and less expensive to deliver.

Because of the current excessively restrictive classification rules, the number of megatons in our stockpile remains a secret. The published data show only how the stockpile has changed. In 1960, our total megatonnage was four times greater than it is at present. We are accomplishing the same military purpose with less unintended and unwanted destructive power. This unilateral fourfold reduction is the result of American weapons research and testing. The reduction of the American stockpile would not have occurred without testing.

While the American stockpile was becoming more effective and less indiscriminately destructive, the Soviet stockpile continued to increase in megatonnage as well as in quality and accuracy.

Much of our work in developing defensive arms can be used with little or no modification in the civilian economy. One essential new development is to enhance accuracy. This had the effect in the past of reducing our stockpile. Accuracy is even more essential in all defensive weapons. The same technique has made it possible to locate objects anywhere on earth to a 10-foot accuracy. This technology is beginning to be applied in transportation; no vehicle will be lost on land, sea, or air unless the people in it want to be lost.

A perfected x-ray laser, besides being an effective anti-missile device, could have an important application in science. One may make three-dimensional holographs of such biological phenomena as a virus attacking a cell, or a normal cell in the process of dividing. The resolution would be a hundred times finer than that of three dimensional microscopic pictures of the present.

Energy storage will be required to power lasers if an extensive defensive system is to be deployed. Such devices would also benefit the energy economy.

New computer technology is essential for defense. This is a small portion of the use of these computers. The major application of the computers is in industry, science, even in our cultural life and the games of our children.

According to conventional wisdom, any arms can be misused and the only way toward peace and stability is through negotiations and treaties. Actually, negotiations and agreements can also be misused and this, indeed, has been the case in recent history.

The USSR signed the Helsinki Accords, thereby pledging to guarantee certain human "rights" to its peoples. Most unhappily, the only visible change was that Yuri Orlov and Anatoly Shcharansky were sent to prison for asking that the Accords be put into practice.

Andrei Sakharov, the Russian physicist instrumental in the development of the Soviet hydrogen bomb and the scientist who has outdone Galileo in resisting authoritarian control, gave us some insight how the Soviet leaders consider negotiations.[6] In early 1961, he together with some of his colleagues were called by Khrushchev to a secret Soviet meeting which, it turned out, was "to prepare for a series of tests that would bolster up the new policy of the USSR on the German question [the Berlin Wall]." I wrote a note to Khrushchev, saying "to resume tests after a three-year moratorium would undermine the talks on banning tests and on disarmament, and would lead to a new round in the armaments race—especially in the sphere of intercontinental missiles and anti-missile defense." I passed it up the line. Khrushchev put the note in his breast pocket and invited all present to dine. At the dinner table he made an off-the-cuff speech that I remember for its frankness and that did not reflect merely his personal position. He said more or less the following: Sakharov is a good scientist. But leave it to us, who are specialists in this tricky business, to make foreign policy. Only force—only the disorientation of the enemy. We can't say aloud that we are carrying out our policy from a position of strength, but that's the way it must be. I would be a slob, and not chairman of the Council of Ministers, if I listened to the like of Sakharov.

The essential words "force—only the disorientation of the enemy"—refer back to foreign policy.

The moratorium was actually broken on a one day notice.

For thirty years, or for sixty if one counts disarmament treaties prior to the Second World War, we have tried to negotiate for peace. No one has ever asked whether an agreement can offer a 99.9 percent guarantee against war. The past three decades have seen Soviet military power become dominant in the world. The result is "stability" of the Soviet variety as seen in Afghanistan, Africa, and Central America.

In response to the nuclear freeze movement, Sakharov wrote a letter which was published in 1983.[7]

"The restoration of strategic parity is only possible by investing large resources and by an essential change in the psychological atmosphere in the West. There must be a readiness to make certain limited economic sacrifices and, most important, an understanding of the seriousness of the situation and of the necessity for some restructuring. In the final analysis, this is necessary to prevent nuclear war, and war in general . . . If the probability of such an outcome could be reduced at the cost of another ten or fifteen years of the arms race, then perhaps that price must be paid."

THE OBVIOUS DEFENSE

The defender always had the advantage that he did not need to cover great distances. He could stay at home. In rocket warfare the main expense is to hurl an object over a distance of several thousand miles. For the defender 100 miles suffice.

The most simple defense is to destroy an incoming warhead shortly before it reaches its target. One such defensive measure was demonstrated by the United States in 1984. A short-range, inexpensive device, assisted by radar, tracked and intercepted an approaching rocket at an altitude of 100 miles with remarkable accuracy. This accuracy was not even necessary because the defensive missile opened up like an umbrella to cover a considerable area. The velocity of the two approaching objects was so great that the incoming rocket would have been destroyed if any portion of the umbrella had touched it.

Against a massive attack, this demonstrated defense would not suffice. The attacking rocket would be accompanied by decoys. When the rockets reenter the atmosphere, the cheap and light decoys will be slowed down and burned up. Now it is possible to concentrate on the rockets, but only a minute or two remain in which they can be destroyed.

A further difficulty is that maneuverable warheads can be used. During reentry, the rocket can sprout stubby wings that steer the rocket on an erratic path to a predetermined target. The demonstrated American device would miss such a rocket by a considerable margin. An additional problem is that a nuclear missile can be triggered to explode with full force if it is merely touched. Such bombs, even if they do not reach their target, could do much damage. The explosion would also make it much more difficult to track the rockets that follow.

It is more effective to arm the defensive rocket with a very small nuclear explosive. This would work even if the attacking rocket maneuvers. It also prevents the nuclear explosion of the attacker. While the incoming warhead might have several million tons of explosive force, the nuclear explosive of the defensive rocket would be roughly equivalent to a thousand tons.

Still, the non-nuclear rocket interceptor has some important uses. It sufficies to stop a small attack, such as Colonel Khadafy could launch. It also could prevent the catastrophe that would be caused by the accidental, unintentional firing of a missile. The probability of such an event is quite low. Yet it remains worrisome. Deployment of interceptors would make it probable that the consequences will not be dreadful.

These rocket interceptors could provide some protection before the end of this decade. But this system is inadequate as the only national protection against a large scale attack.

Mr. Speaker, I ask unanimous consent that the remainder of the extraneous material be placed in the RECORD at this point.

SHORT-RANGE LASER DEFENSE

Progress in directed energy weapons was the main reason why, six years ago, I became confident about the feasibility of defense. Today, a limited but significant

success of defense is not a mere possibility; it is a high probability.

Lasers are most familiar as visible light of great regularity, sharp direction and remarkable intensity. In technical terms, they have a sharply defined phase. They have already made great contributions in medicine, manufacturing, and scientific instruments. One military application for lasers is to increase the effectiveness of radar in tracking incoming missiles.

Today, lasers are also the most promising directed-energy defensive weapons against missiles. Science fiction fans may call them death rays. But they are not weapons of mass destruction. They are not to be used against humans but against missiles of attack. They are anti-weapons.

Lasers become increasingly effective as the wavelength gets shorter. Microwaves are about an inch long. Infrared wavelength is shorter by a factor thousand and the wavelength decreases through infrared, visible light, and ultraviolet to x-rays whose wavelength is once again a thousand times shorter.

To destroy satellites in space is the least difficult military application of lasers. This is an important reason why predeployed battle stations in space are not apt to survive. Ground-based lasers may play an important role in providing direct defense against short-range missiles (fired from 100 miles away) in less than ten years.

Defense against short-range missiles is much easier to accomplish than defense against long-range missiles for several reasons. For instance, much of the path of the short-range missile is in full sight of the attacked position; decoys are usually not a problem.

Lasers of the necessary energy are being developed rapidly and effectively. Ground-based lasers can be supplied with power directly from the civilian electric grid. Since the laser would need great amounts of energy for short periods, energy storage devices would be advantageous.

However, the beam of a ground-based laser must be transmitted through the atmosphere without distorting its favorable regular properties. Turbulent air causes density changes that deflect light, as one can see in the apparent twinkling of stars. Such diffusion of a laser beam makes the beam far less effective. The problem is not insoluble. Astronomers have recognized for years that irregularities in atmospheric density can be compensated if one replaces big curved mirrors by an array of many small mirrors, which can be oriented in a fraction of a second to eliminate the twinkling. Rapid progress in solving this problem in a practical manner is currently being made.

Unfortunately, clouds stop laser beams, though high intensity light can bore a hole through thin clouds for the requisite short time. Still, duplication of laser installations at various locations will be needed to ensure that at least one of the beams will get through. This, incidentally, is also an insurance against attempts on the part of the attacker to put the defense out of action.

While short-range missile defense is important to the United States as a protection against missiles launched from offshore submarines, such a defense system is most interesting for our allies in Europe, Japan and particularly Israel.

Laser defense does not use any nuclear devices, is not connected with any deployment of battle stations or anything else in space, and does not violate any treaties because such defenses are purely tactical. None of the current objections apply to it. Therefore, laser defense against short-range missiles is likely to be the defense first deployed.

LONG-RANGE LASER DEFENSE

The lasers described above would not be effective against missiles whose range is much more than 100 miles. The range can be extended by the use of mirrors. Such mirrors would be deployed on the ground but would be popped up out of the atmosphere at the time of an enemy attack. The longer the distance the higher the needed pop up and the greater the difficulty.

The mirrors required become smaller and easier to handle as the wavelength of the defense laser becomes shorter. Short wavelength lasers are also more efficient in destroying enemy rockets.

The existence of an x-ray laser has been demonstrated. This in itself is a remarkable accomplishment. If a usable x-ray laser can be produced, we will have made an immense step forward in our ability to defend ourselves. These lasers would be the most effective; they are also the most difficult to develop.

It should be noted that x-ray lasers will not penetrate the atmosphere. They together with their power sources, have to be lofted outside the atmosphere. The only power source that can be popped up is a nuclear explosive. The effects of powering an x-ray laser with a nuclear device would have no serious effect on the ground.

It should be mentioned that our work on the x-ray laser was based on publications from the Soviet Union. These publications essentially stopped in the late 1970s, a fact that suggests that the Soviets consider this information of not purely scientific interest.

MORE DIRECTED ENERGY WEAPONS

One radically different directed-energy weapon probably capable of destroying missiles in flight is an electron beam device. This instrument could be used in the moderately high atmosphere, though not outside the atmosphere. One would require first a well-directed but relatively weak laser to ionize a path along a narrow channel which becomes positively charged; then a high-intensity electron beam can be sent along this path. In this way the electron beam will not be deflected by the earth's magnetic field which is neither constant nor sufficiently predictable. All this was first discussed in the Soviet Union, for scientific uses.

Lasers and other rapid-fire directed-energy weapons may be used for the more modest but important purpose to find which, among the approaching objects are the dangerous rockets and which are mere decoys.

Another possibility is to use a beam of neutral atoms. This can be done by accelerating atoms that carry an extra electron, and then, just before use, stripping off this electron. The beam of atoms would be specifically useful in discriminating decoys from real rockets outside the atmosphere. It seems best to pop up the apparatus which produces the beam.

DEFENSE IN SPACE

Reagan did not speak of stars, space, satellites, only about defense. There are advantages in deploying defense in space. There are also great disadvantages. The deployed defenses can be attacked over many months, even years. Space defense may not be impossible—it is certainly difficult.

In one case we should try to use space deployment.

A rocket-launching is accompanied by the sudden, characteristic appearance of a powerful infrared radiation burst. This can be easily detected from space, for instance from a synchronous satellite. Even now, we have such observation satellites. It is possible but difficult to protect these early warning systems. One may make them "hard," or may make them easily replaceable, and one also may have inconspicuous "sleeping detectors" which will unfold and become active only when the functioning detector is incapacitated. These sleepers in turn may be protected by decoys.

All this can be done. Whether it can be done cheaply enough to be really effective is an open question. It will help to make the detecting system as simple as possible.

Detectors in space may, in turn, be backed up by earth-based radars. Against short-range rockets, these radars will be highly effective. If the radars work at long wavelengths, ionization in the high layers of the atmosphere will confine the propagation of these waves to the neighborhood of the earth's surface so that the radar will follow the curvature of the earth over long distances. This is called over-the-horizon (OTH) radar.

The OTH radar will locate the launching of a rocket over any distance, because the launching emits plenty of electromagnetic waves of long wavelength. Thus we can know when to pop-up our defense systems, particularly in the case of a massive attack. However, the problem of detection needs much more attention.

Space deployment—Star Wars if you please—has many purposes. The Russians are working on this problem. We must be aware of the possibilities. But we should not follow suit until we know that the system is effective and survivable. The most hopeful, though not mandatory approach, is to use stations in space for early warning.

Not battle stations, but observation posts!

COMPUTERS

Computers are important for defense. Indeed, without computers, defense against a massive attack hardly could work. Computers may make it possible to keep track of thousands of rockets and many more decoys. Does this mean that vital decisions must be turned over to computers? When one understands the root of the problem, the answer becomes obvious.

One real danger of nuclear conflict is connected with the fact that the crisis may occur fast and it may be over—with a tragic ending—in practically no time.

Decisions must be made in minutes. Some must be made in seconds. Whom can one trust with fast decisions? I would not trust myself. I would not trust anyone. There is no perfect solution. We must be satisfied with an imperfect solution. After careful consideration, the best alternative seems to be the computer.

It has been claimed that the computer system that must be deployed is beyond our capabilities. In particular, to write a program that will function under battle conditions is an unprecedented challenge.

But anyone who gives up at this point has forgotten that a tenfold improvement in computer technology has occurred regularly in every decade since 1945. The needs for defense will further stimulate this rapid development. The latest design of supercomputers utilizes numerous parallel computers. This often results in redundancy, and redundancy is precisely what is required when one in under attack. The parallel computers

could be widely dispersed and still in almost instant communication. Thus the attack is apt to result in nothing more serious than a reduction of the redundancy. The programming for several connected computers is a tremendous task. Plans call for the programming to be performed by the computer itself in a redundant manner.

The program of a computer may fail, even in a catastrophic way. It should be possible to plan self-surveillance by the computer. When there is a serious failure, the computer should be programmed to fall back to a simpler, less effective procedure that it still can handle.

Neither the defender nor the attacker can know fully how much a computer can achieve. Given the excellence of our computer technology, the result may well be sufficient to serve as a powerful deterrent to the Soviets. They may fear our computers more than our bombs.

REAGAN

Around November 1, 1939, President Franklin D. Roosevelt received a letter from Albert Einstein. I was present when this letter was signed. The letter stated that fission had been discovered in Berlin, that atomic explosives of unprecedented power were now possible, that Nazi Germany had taken control of the Czechoslovakian mines from which the bomb's raw material could be obtained, and that the United States should initiate a program to try to develop such an explosive. On receiving this letter Roosevelt called for urgent action.

In 1967, the newly elected Governor of California visited the weapons laboratory at Livermore. Reagan was the first California governor to visit the national laboratory in his state. This was his first chance to hear about defensive weapons. During his presidential campaign in 1980, Reagan visited the National Defense Center, located deep within Cheyenne Mountain, not far from Colorado Springs. He was told that Russian missile launch could be detected and ascertained minutes after launch. "And what can we do about it?" Reagan asked. The answer was: "Nothing."

This is the background of the present discussions on defense of which I have personal knowledge. After two years in office, Reagan challenged American scientists to replace the balance of terror by real defense. He clearly indicated that success in such a huge undertaking cannot be expected in his lifetime. But he did set a new direction for our work. Comments about President Reagan's lack of forethought in proposing SDI need to be assessed by comparison with the Presidential decision that began the atomic age. The threat to our national survival today is comparably greater than it was in 1939.

In arriving at this decision, Reagan consulted numerous individuals: scientists, politicians, and his official advisors on national defense—the Joint Chiefs of Staff. The President did not ask some of the long-time advocates of disarmament negotiations who have exercised great influence on our nuclear arms policy during the past decades. The latter were invited to the White House when the President make his statement on March 23, 1983. Their reaction, having considered the problem for a very short time, was adversarial.

What will happen if Gorbachev offers a real reduction of Soviet arms in exchange for a bilateral cessation of defense preparedness? Such an agreement would make the Republicans enormously popular and would amply justify our meager efforts on SDI. Yet, no agreement can stop research in a verifiable manner. We would stop. The Russians would not.

Recently, Gorbachev offered a unilateral test moratorium for the remainder of 1985. This was a clever step in a campaign that may prove disastrous to our fledgling defense effort and to our future. The test moratorium broken by the Russians in 1961 marked the beginning of a Soviet advantage in nuclear research that we have not been able to repair. Today, we need leadership and wisdom as badly as during the horrors of civil war in the 1860's; perhaps more so. We need to ensure the ability of our children and grandchildren to live in peace and freedom.

We cannot hope that the policy of the balance of terror, where the terror is more certain than the balance, can deter war much longer.

Our present administration differs sharply from the previous one. Indeed, it has been the most innovative in decades. Reagan's epochal proposal has not borne fruit as yet. It may be seen by posterity to be as important as the liberation of slaves by Lincoln.

WHAT IF WE REALLY SUCCEED?

After two years of discussion, I thought that I had heard all possible questions about SDI. Recently, however, the editor of the New York Times asked a novel question in a private conversation: "What if we succeed completely? Suppose we destroy all the weapons coming at us in a massive attack. Should we retaliate?"

I responded instinctively and spontaneously: "Certainly not!" The editor was not satisfied. He wanted a complete answer, a measured answer. He was right. After careful consideration, I am convinced that my first reaction was correct. Here are my reasons.

If we succeeded in a complete manner, if a Soviet attack killed not one single person, retaliation would be wrong. Indeed, it would be a crime to test the efficacy of Soviet defenses; such an act might result in the deaths of innumerable innocent people. Furthermore, completely stopping a nuclear attack would be a victory. Not only would this be crushing for the aggressor, it would be a victory for peace that would lift a nightmare from mankind. If we can achieve it, we must not introduce another nightmare by attempting to retaliate.

Our greatest achievement in the Second World War came after 1945 when we helped our former enemies, Germany and Japan, to recover. This possibility of acting out the values of this nation is the goal to which Ronald Reagan opened the door on March 23, 1983.

THE GENIE AND THE BOTTLE

The atomic genie existed during the unmeasured depth of time in the dark bottle of ignorance. Neither through technology nor through our fervent wishes can we put the genie back into that bottle.

But technology can provide a better situation. The Genie should contribute to the shield, stronger than the sword.

Will this be a final solution to international problems? In human affairs, there is never a final solution. Man is a problem-solving animal. Even more, he is a problem-creating animal. As long as people live, they will have problems. But these problems need not include the menace of sudden massive destruction by human agency. To set limits to that destruction is possible and necessary.

Mr. KASICH. Mr. Speaker, will the gentleman yield?

Mr. HUNTER. I yield to my friend from Ohio.

Mr. KASICH. Mr. Speaker, let me ask the gentleman a question, what the gentleman's thinking would be if we assume that the Soviets are engaged—I mean, we look at the facts and we recognize the escalation of the numbers of systems that they have deployed, offensive nuclear systems.

Let me ask the gentleman what his view is when we take a look at the fact that the Soviets are in the process and really have a functional ABM system that surrounds Moscow, and I will put the second generation of interceptors in there; they have got their key command in control operations underground, developing a tremendous number of air interceptors, and some people say can use some of their surface-to-air missiles in an ABM mode. What are the consequences of a country that can develop both offensive and defensive systems in absence of our being able to develop or refusing or deciding not to develop a system and really being very limited in the offensive systems that we deploy?

I wonder what the gentleman's view would be of the consequences of that.

Mr. HUNTER. I think the gentleman has pointed out a major problem that a lot of Americans do not want to address, and that is the fact that the Soviets have embarked on their own SDI program in a fairly uninhibited fashion.

As Dr. Teller said when one Soviet scientist, "We can duplicate the Star Wars system," he said that he thinks that that so-called capability of duplicating that, that confidence is generated by the fact that perhaps much of that system is already in place in the Soviet Union.

But to answer the question, if the Soviets can acquire a defensive capability before we do and acquire an offensive capability and do not combine that with the same policy changes that the President has offered to make defensive available perhaps even to our adversaries, then it would be a critical situation for the United States.

There are a number of scientists who feel in fact that we may be reaching that situation in Europe very shortly, because the Europeans are faced with short-range ballistic missiles. They could legally under the ABM Treaty build short-range ballistic missile defense right now.

The Soviets are building an SA-12, which is an ATBM, an antitheater ballistic missile defense system.

Mr. KASICH. That would be a mobile system, too, would it not?

Mr. HUNTER. That is right. It would be a mobile system and the radar would be mobile.

Mr. KASICH. That would be in violation of the treaty.

Mr. HUNTER. Absolutely.

One problem is it is very difficult to tell where ATBM leaves off and ABM begins.

But again to go back to the concern many scientists have raised in the West, it is a concern that we are going to be in the same position that we were with regard to theater nuclear weapons. All of a sudden we found out that we had a great many SS-20 nuclear weapons facing our allies in the West and we had nothing. We are running to play catchup with our Pershing II's and our ground-launched cruise missiles.

And we may be in the same situation if we do not act and act expediently and actively effectively. We may be in the same situation with regard to SDI. We may find that they have developed a defensive system and we have not developed a defensive system, and we may find that that is not going to accrue to our benefit.

Mr. KASICH. I think the gentleman would comment on the fact that the Soviets have not just been experimenting and in fact, of course, deployed a system that would utilize a missile or a projectile against an incoming missile. That is somewhat of a capability that we could deploy literally today.

But they have moved in the area of directed energy, something that we really do not think the Soviets do not have the view all too often, the Soviets have the capability to develop. Is not that in fact true that they are directed energy weapons, in fact have done a lot of research on those?

Mr. HUNTER. That is right. In fact, they had a great many publications and references to directed energy research in their own scientific publications. But as they became more adept and made bigger and bigger advances, all of the information disappeared from their open publications, which indicates that they are making some headway in that area.

□ 1910

Mr. Speaker, at this time I yield to my friend, the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. Mr. Speaker, I just appreciate the gentleman taking the time to discuss this issue. I hope we are going to do it a number of times as the program develops, because I think we need to talk about developments as they occur. The successful test that occurred on the use of the laser not long ago, I think we need to come out and to talk about the succeses, because it is not magic. It is hard work and it is the use of the kind of technologies that we have to make it clear that there is no magic, but in fact we can do these kinds of things. We can make in the minds of the Soviet military planner, we can tremendously increase doubt about the success of an attack and that is one of the obviously vital elements of the SDI proposal.

The ultimate goal, however, is not just to make it worth anything to keep developing these weapons, but rather in fact to rely on a system that can provide survival, rather than destruction.

Mr. HUNTER. Mr. Speaker, I thank the gentleman. I think he has made a good point, because we live in a horribly imperfect world and yet those who would be against this system and who would criticize it say that we cannot attempt to defend ourselves against nuclear weapons because we do not have a guarantee that we will have a perfect system. That makes no sense.

In fact, I think it makes good sense and I think it is a good moral judgment to go ahead with a system that would save at least in the event of nuclear war, God forbid, millions of American lives.

There is a good chance that we can develop a system that will be very, very close to leakproof.

Mr. Speaker, I thank the gentleman for his contribution. I wish I could read the entire speech into the RECORD that was given by Dr. Teller, but I think it lays out, it puts the ABM Treaty in perspective, and I think it puts our development and our evolution of the decisionmaking process in Washington, our decision to move ahead with SDI in perspective also.

The Soviets like the idea of defense and they like to rationalize its use to European leaders because they were developing the SA-5, the SA-10, the SA-12 until they saw the United States of America developing defense and their speeches changed overnight, from a good thing; in fact, you could have taken Mr. Kosygin's words about defense being such a great thing, you could have put that in the President's speech. Instead of defense being such a good thing, all of a sudden it was a bad thing.

I hope the gentleman, who is a member of the Armed Services Committee and a very active member of the committee, will work with me with regard to the strategic defense initiative and with our other leaders over the next 6 or 7 months.

I hope that this President will hang tough and not surrender any part of the initiative in his coming talks with Mr. Gorbachev.

DOMESTIC TERRORISM AND NATIONAL POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DYMALLY] is recognized for 60 minutes.

Mr. DYMALLY. Mr. Speaker, I have asked for time tonight because in the past 2 weeks an Arab American and a Jewish American have been murdered in terrorist incidents. As representatives of both the Arab American and the Jewish American communities, it is our responsibility to look carefully and objectively at why these two decent and innocent Americans were deprived of life. It is our responsibility to search for the means by which to stop terrorism. With that sense of responsibility in mind, I want to begin a careful and objective discussion of terrorism. And I want to pay special attention to terrorism in the United States because although the national consciousness is most often captured by acts of terrorism against Americans abroad, domestic acts of terrorism have occurred much more often.

A recent article in the Washington Post recounted an interview several years ago with Mohammad Abbas. The reporter noted that Abbas was clearly moved by the deaths of Palestinian Commandos and, in fact, kept pictures of these people on his wall. In many instances these Commandos were killed when they were staging attacks against innocent Israeli civilians. The reporter marvelled that Abbas was intensely aware of the death of each Palestinian but seemed hardly aware that Israelis had died as well.

Similarly when Alex Odeh, an Arab American, was murdered in Santa Ana, CA, on October 11, 1985, the reaction of the chairman of Jewish Defense League, Irv Rubin, was, "I have no tears for Mr. Odeh. he got exactly what he deserves." The FBI has linked the Jewish Defense League with at least 15 terrorist acts in the United States resulting in at least one death and seven injuries since 1981.

Common to the reaction of both Mohammed Abbas and Irvin Rubin is a depersonalization of the victims of terrorism. Black Americans are not unfamiliar with the effects of depersonalization. We have known it by many names: bigotry, stereotyping, prejudice, racism, discrimination. In all cases, whatever its name, the effect of depersonalization is to make it permissible to carry out inhumane acts against the depersonalized individual. The mental replacement of a human being with a stereotype makes it alright to commit atrocities. Why? Because the human victims become merely symbols. Leon Klinghoffer was not seen by his murderers as a person. Through his Americanism, he became a symbol of America. Alex Odeh was not seen by his murderer or murderers as a person. Through his Palestinian ancestry he became a symbol of the Arab community.

If we are to stop terrorism, then as leaders and as representatives we must ourselves not resort to the mental

shorthand of stereotyping, of depersonalizing as a base for action. I want to attempt to personalize one of these acts of terrorism for you. I knew Alex Odeh, and I grieve personally for him and for the young family he leaves behind. Alex was a member of the Los Angeles Human Rights Commission, and was known in Southern California for his efforts to gain equality for the disadvantaged. As head of the Southern California regional office of the American Arab Anti-Discrimination Committee he worked tirelessly to promote friendly dialog among Semites.

That term Semites is not one we hear often. We usually accentuate the difference between Jews and Arabs. Semite is a term that applies to all those with their roots in the Middle East. It connotes a commonality of origin that is all too often ignored by opinion makers. Denial of that common human bond allows depersonalization.

And only hours before his murder Alex was on television characteristically speaking out against stereotyping, against lumping everyone in a complex group under one summary designation. In that interview he condemned all forms of terrorism. He went on to point out that there is a difference between the Palestine Liberation Front which carried out the *Achille Lauro* hijacking and the Palestine Liberation Organization which played an important role in bringing the hijacking to an end without further loss of life. I regret that the television station in Los Angeles choose to edit out Alex's condemnation of terrorism and broadcast only his drawing of a distinction between Palestinian groups. They too should weep for his death because of their journalistic manipulation.

Alex was a teacher at Coastline Community College. He taught Arabic and Middle Eastern cultures. You can see that through his civic activities, through his teaching, and through his life he tried to bring about an end to depersonalization.

Alex was a poet as well. He had published one book of poetry and a second book was at the typesetter when he was killed. Here is a part of one of his poems which I think says something about his approach to his work and to those whose lives he touched deeply in his own brief life:

Lies are like still ashes.
When the wind of truth blows
The lies are dispersed like dust and disappear.
At least we all owe thanks
To the one who tries to speak write or paint
An honest thought to the world.

I share with Alex one thing that many of my colleagues will understand. He and I both fathers of daughters. My daughter, Lynn, is grown now. And I cannot tell you how much we have shared. But those of my colleagues who are fathers of daughters know that special bond of affection between father and child. Alex was the father of three daughters. Suzanne is only two; Samia is five, and Helena is seven. I am so saddened when I think that Alex's daughters will grow up without that very special affection. Alex was at his happiest moment when he was just walking through the park with his wife Norma and their three daughters. He spent every free moment with them often taking pictures the way young fathers do.

To me, and I hope now to you also, Alex is much more than a symbol. He was a warm and gentle person, a man full of intelligence, full of humor, and motivated in his actions by the need to bring his fellow human beings to treat one another humanely.

If we are to stop terrorism, then we must not only resist the efforts of terrorists to depersonalize the victims, we must also resist our own tendency to depersonalize the terrorists. And we in Congress have been as guilty as anyone of such depersonalization. We are the elected leaders of this country. We do a disservice to those who elected us when we fail to make critical distinctions. Moreover, we should not expect our constituents, who may be remote from the debate on terrorism, to make distinctions if we do not make them ourselves.

When I say we fail to make distinctions I mean we are all too prone to allowing the hateful act of an individual or even a group of individuals to color our approach to the whole of the group the terrorists purport to represent. We know from our own political process that no one group speaks for all Americans. The Republican Party does not speak for Democrats. The Democratic Party does not speak for Republicans. If we recognize diversity among ourselves it should take no great leap of the imagination to realize that no terrorist group should be taken as the surrogate of the whole group from which it springs. The Jewish Defense League is not the Jewish people. The Palestine Liberation Front is not the Palestinian people. It is not even the Palestine Liberation Organization. And it is certainly not Arabs broadly defined.

If we succumb to the tendency to generalize the acts of terrorists to the whole group from which they spring, then it is ourselves who will be most damaged. Why? Because in generalizing we obscure the range of our own options not only in dealing with the terrorists but in our relationship with the large group from which they spring. And there is a second subtle but crucial effect of our failure to make distinctions. By failing to do so we invite the citizens of our own country to be superficial as well. We invite them to think the Arabs killed Leon Klinghoffer, or the Jews killed Alex Odeh. All of us know we are swayed by public opinion and we know also that by our public statements and our deeds we help to form public opinion. Let us not participate in the formation of public opinion that might lead us to make very wrong, very unfair public policy decisions.

Let me illustrate my point with an example. FBI Chief William Webster announced shortly after Alex was killed that the FBI intends to step up surveillance on all pro-PLO groups in the country. Now, potentially, that could include every Arab American group in the country. I expect that this stepped up surveillance is meant to stop PLO terrorism within the United States. The superficial reaction is to say, "Great, the FBI is protecting the public." But wait a minute! When was the last time a PLO group committed an act of terrorism within our borders? I obtained the FBI analyses of terrorist incidents in the United States for the years 1981 through 1984, the last date for which a published report is available. Our FBI reports show no PLO terrorist acts in the United States. And with the exception of two terrorist incidents in which Libyans terrorized other Libyans, there is no mention of any domestic terrorist activity by an Arab group whatsoever including the PLO during those years. A Moslem group held a sit-in at the Saudi Arabian Embassy in Washington in 1982. That is the closest that non-Libyan Arabs have come to terrorism in the United States and as I said earlier that action was a sit-in.

If we are to be responsible policymakers, then we must ask why the surveillance is being stepped up. Is it because of past Arab terrorism in the United States? No, it cannot be. Such terrorism has not occurred here. Is it because the PLO hijacked the *Achille Lauro* off the coast of Egypt? But wait. Wasn't that the Palestine Liberation Front, not the PLO? Has the FBI committed the depersonalizing error of over generalization? Will that over generalization encourage the American people to think all Arab Americans are potential terrorists? Will that encourage prejudice against Arab Americans? Will that public opinion continue to make it expedient for public officials like you and me to downplay or, even worse, ignore, domestic terrorism when it is perpetrated against Arab Americans? The fact of the matter is that Arab Americans have shown themselves to be peaceful, law abiding citizens in our society. The fact of the matter is that Arab Americans have been the victims, not the perpetrators of terrorism. They live in fear of discrimination. They live literally in fear for their lives. Alex Odeh received so many death threats that as a precaution his incoming mail was x-rayed before he received it. Fear of

terrorist activity has prompted our former Senate colleague Jim Abourezk, chairman of the American Arab Anti-Discrimination Committee, to request repeatedly and in writing that the FBI investigate the alarming number of terrorist threats and terrorist acts against Arab Americans. If we are responsible representatives of our constituents then far from condoning the surveillance of Arab Americans, we should be asking clearly and forcefully that our Arab American citizens be protected from terrorism in this land of the free. Mr. Speaker, keep in mind we are talking here about Americans, not foreigners, or visitors.

If we are to be responsible representatives, then we should know what groups are terrorizing our citizens. A look at the FBI reports for the past 4 years in enlightening. Let me summarize for you the findings which cover the years 1977 through 1984. There were 395 terrorist incidents in the United States over those 8 years. Terrorism, by the way, is defined by the FBI as "The unlawful use of force or violence against persons or property to intimidate or coerce government, the civilian population, or any segment thereof, in furtherance of political or social objectives." Interestingly enough the FBI does not consider bombings of health clinics as terroristic and does not include these incidents in its statistics. How strange! How very strange! Jurisdiction over these incidents rests with the Bureau of Tobacco, Alcohol and Firearms rather than the FBI.

Of those 395 incidents of terrorism, 161 or nearly 41 percent were perpetrated by groups related to Puerto Rican politics. Many of these groups are dedicated to making Puerto Rico an independent country through revolution. The next most frequent perpetrators are members of the well known category "other." The FBI divides "other" into "domestic other", and simply "other." "Domestic other" is the most active with 98 incidents. These incidents are divided among a hodge podge of domestic groups ranging from the Aryan Nation, which has been responsible for much of the terrorist activity against Jewish citizens and property, to various remnants of 1960's radical groups. No single group has acted often enough to have a distinct category within the statistics. Next most active with 57 incidents are Cuban groups dedicated to the overthrow of Fidel Castro. The fourth most active group in the FBI list is called Jewish groups. They have been responsible for 39 incidents. At least five Jewish groups have been named: Jewish Direct Action, Jewish Defenders, The Jewish Defense League, and the United Jewish Underground and the American Revenge Committee. The FBI describes the latter two as affiliates or offshoots of the Jewish Defense League. The FBI reports for 1981 through 1984 show that in those years the groups have claimed responsibility for nine attacks on Russians or Russian property, five attacks on Arabs or Arab property, and one attack each on Germans, French, Iranian, and Austrian persons or property.

After the Jewish groups, Armenian groups have been next most active with 14 incidents. The major group is the Armenian Secret Army for the Liberation of Armenia. Other groups appear to be offshoots of this main group. The terrorism is aimed at achieving two goals: avenging the genocide of Armenians by Turks at the beginning of this century and reconstituting Armenia as a state free of Turkish control.

Croation groups are next most active with 12 incidents. The goal of the Croation Freedom Fighters is to remove the historically Croation region from Yugoslavian control.

Next most active is the catch all group "other" with nine incidents. The "other" category, like "other domestic" contains an array of groups. The list includes Salvadoran, Haitian, South African, Liberian, and Philippine groups as well as one opposed to the Sierra Leone Government and an antinuclear group.

Iranian and Libyan groups are tied for next most active with three incidents each out of the total of 395. The Iranian incidents have involved attacks against the government of the Ayatollah Khomeini, while the Libyan attacks have involved terrorism against Libyans who are opposed to the rule of Colonel Mu'ammar Qadhafi.

Finally, there are two incidents recorded involving Middle Eastern groups outside of Libya. In 1982 a group of Moslems held a sit in at the Saudi Arabian Embassy in Washington to protest the Saudi Arabian Government. And in 1978 a terrorist act was also accredited to a "Middle Eastern Group." Because the detailed FBI analyses of terrorist activities were published for the first time in 1981, I have not yet been able to determine the nature of the 1978 incident. FBI officials are checking their files for me to determine what occurred.

I think, however, that the facts speak for themselves. If we count Libyan terrorist activities against other Libyans as Middle Eastern group terrorist activities, then Arabic groups have perpetrated 5 of the 395 acts of United States domestic terrorism since 1977. That is about one tenth of 1 percent. If Libyan terrorism is not counted, then Arabs or Arab Americans are responsible for two cases in 395 acts committed since 1977.

I want to reflect on the statistics for a moment because they are important in helping us determine how we should respond to domestic terrorism. It appears that domestic terrorism may be divided into two broad groups: those that perform single terrorist acts and those that perform repeated terrorist acts over time. More than 65 percent of the terrorist acts since 1977 have been singular acts. The other roughly 35 percent have been perpetrated by groups that have struck repeatedly. The obvious approach to minimizing the effect of groups that repeatedly terrorize others is to identify the leadership of the groups and make every effort to bring those leaders to justice. To the credit of the FBI, it appears that they have been doing just that. In 1977 there were 111 terrorist incidents. In 1984 there were 13. Of those 13 incidents in 1984, 6 were committed by the Aryan Nation group or its apparent offshoot the Aryan Resistance Movement. Five were committed by Puerto Rican groups, 1 by Jewish Direct Action, and 1 was committed by a Marxist group.

It is in identifying new groups or single act groups that the greatest difficulty lies. And it is in this area that policy makers must exercise the greatest sensitivity. Many of you remember that during the Nixon Presidency it was proposed that children be given a test to determine whether they were prone to become criminals. The idea was met with outrage and was quickly dropped. The FBI in the case of new or single act terrorists is faced with a dilemma like Richard Nixon's. The American people are best protected from terrorist attacks when those attacks can be stopped before they happen. But to accomplish such a task, it would appear that our law enforcement agencies would need to intrude in the lives of those who might be prone to commit terrorist acts. The critical public policy question is "where should the line be drawn between protecting the public from terrorism and undue government intrusion in the activities of individuals or groups?"

I think the Government, and I include the Congress here, has gone too far if its activities invite the general public to form prejudicial attitudes toward all members of a group. The prejudice itself will breed violence as it did in the case of Alex Odeh. I think repeated threats of violence either by a potentially terrorist group or by the potential victims of terrorism must be taken extremely seriously. Again referring to Arab victims, it is undeniable that Arab American organizations have received and reported a large number of terrorist threats in the past year. So far this year the threats have resulted in at least two incidents of deliberate destruction of property and three terrorist bombings, the latest of which killed Alex Odeh.

When terrorists are apprehended they must be prosecuted to the fullest extent of the law. These criminals are in a special category. They do much more than destroy property or take life. Through the fear they generate they are attempting to undermine the civil and constitutional rights of whole groups of citizens. Their targets are not just individuals but all members of a racial, ethnic, religious, or social group. They are attempting to undermine freedom. And it is that attempt to undermine the basic principles of democracy that compels me to call for severe penalties for terrorism.

In the same breath, however, I want to emphasize that individuals, even if they hide behind the cloak of an organizational name, are the perpetrators of terrorism. Individuals, therefore, must be punished, not groups. Individuals may by their activities invite surveillance. But the specter of surveillance should not be held over the heads of an entire group of people.

Moreover, public figures must exercise the greatest caution in commenting about acts of terrorism lest they invite the public to engage in an escalation of terrorism. Lawmakers, the President, as well as Jewish-American and Arab-American public figures and public figures representing any group that has experienced terrorism, should be united in condemning individuals who engage in terrorism or who advocate terrorism. But no public figure should fuel the fire of hatred by generalizing the acts of the few to the many; to an entire national group.

I believe terrorism can be stopped in the United States through responsible action. I would call on my colleagues to join in that responsible action by helping to form an enlightened public attitude toward terrorism. All Americans should be concerned that an Arab-American, Alex Odeh, was killed by individuals engaging in terrorism. All Americans should be concerned that four people participated in the terroristic kidnaping and murder of Leon Klinghoffer, a Jew. All Americans should desire that those individuals responsible for these acts be brought to justice. But no Americans should be led to mistrust Arab-Americans or Jewish-Americans or Armenian-Americans or Cuban-Americans or Puerto Rican-Americans because individuals from these groups take it upon themselves to undermine the liberties of all Americans.

I would end by pointing out that I am proud of Jewish-American leaders in southern California who set an example for the Nation in the wake of Alex Odeh's murder. Their condemnation of the act and their call for justice was immediate and ringing. They knew that the life of a good man was taken cruelly and senselessly. While they did not always agree with Alex's views, they recognized his right to hold them. Let us hope that in their act of solidarity with Arab-American leaders in condemning this act of terrorism against democracy we may find the seeds of friendship and a beginning to the end of conflict between these two groups of Americans.

Mr. Speaker and Members of Congress, I thank you for the opportunity to bring this important message to you, and wish to emphasize, in conclusion, that I have attempted to be very objective in my analysis of domestic terrorism in the United States, by using data supplied to me by the FBI, without fear, favor, or prejudice. Again I thank you.

□ 1950

ORDER OF BUSINESS

Mr. WALKER. Mr. Speaker, I ask unanimous consent to proceed out of order on the special order previously ordered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

THE CASE FOR THE GRAMM-MACK PROPOSAL TO BALANCE THE BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. WALKER] is recognized for 60 minutes.

Mr. WALKER. Mr. Speaker, let me begin by saying I have been reminded by the Chair of the World Series game, and I will try to take that into account, but I do want to talk a little bit on the Gramm-Mack proposal for balancing the budget, because we had a fairly extensive discussion out here earlier this evening in opposition, which raised a number of questions which I think deserve to be addressed; and I am disappointed that the gentleman from California [Mr. DYMALLY] who talked earlier, was not able to stay around and respond to some of the things I am going to raise, because I think there were a number of cases of misinformation in what he had to say, and I would like to correct the record, and hopefully make the case for the Gramm-Mack proposal as a device that should help us move toward the balanced budget that large numbers of Americans across the country say that they want.

The problem that we hear so often defined on the House floor that is brought up with regard to the Gramm-Mack proposal is the fact that somehow we are going to get away from what is Congress' responsibility to do budgeting.

Congress has had the responsibility under the Budget Act here since 1974. The fact is the budget process has failed miserably. It is coming apart at the seams; we have consistently, over the last several weeks, had rules out on this floor that were aimed not at enhancing the budget process but destroying the budget process.

Every bill that comes to the floor under a rule recently, it seems, has a waiver in it of the Budget Act. Simply throwing the Budget Act and saying that we do not need that Budget Act any longer.

The reconciliation bill that we brought to the floor today is going to be voted on tomorrow, came out under a rule that waived the Budget Act. It seems to me that it is awfully strange to have a bill that is supposedly enforcing the Budget Act that has to come out here with a Budget Act waiver in it; there is something awfully strange happening in this House—and we all know what it is; it is a strange system of spending, spending, spending.

In fact, in the last 5 years we have overspent our own budgets by $150 billion. That is a system out of control; it is a system that has to be dramatically modified. The dramatic modification that is now before us is the Gramm-Mack proposal, and we ought to move ahead with that particular proposal.

I will be glad to yield to one of the authors of that proposal, the gentleman from Florida [Mr. MACK].

Mr. MACK. I just want to raise the question, you mentioned that over the last 5 years that we have overspent our own budgets by $150 billion?

□ 2000

Mr. WALKER. That is correct. If you analyze what we said we were going to spend and then the actual spending by the end of the year, you will find out that with the supplementals and the add-ons that we have done over that period of time that we took our budget resolutions and overspent them by $150 billion. So in fact we have added $150 billion to the national debt over and above what we ourselves said was going to be our spending pattern.

Mr. MACK. It would be helpful, I think, if we would determine how in the world we could establish a budget and then turn around and overspend it in a 5-year period by $150 billion. The gentleman mentioned the term "supplementals." By that, does the gentleman mean there are other methods, that, in essence, you could circumvent the budget process?

Mr. WALKER. Oh, sure. The appropriations process has become an atrocity. For example, we actually bring appropriations to the floor with the knowledge that they are not going to be the whole appropriations for the year but later on in the year we are going to come back with another appropriation to spend more than what that appropriation bill calls for.

The original appropriation bill comes to the floor supposedly under budget or at budget. We are told that during the debate. What you find, though, is that they have buried down in the bill little devices aimed at bringing about additional spending later on in the year. I will give the gentleman an example:

In the Food Stamp Program we are now consistently bringing the appropriations for the Food Stamp Program to the floor funded for only 9 months, meaning that at some point during the fiscal year we have to come back and fund the other 3 months. That bill is under budget when it first comes to the floor, but then when you do the add-on for the last 3 months of the year for the Food Stamp Program, it throws it over. So that supplemental then leads to additional spending in the program. We do that with appropriation bill after appropriation bill after appropriation bill with the knowledge that the administration then will come back and ask for a supplemental. And that is another phony thing that goes on around here. We hear the gentleman on the other side continually talk about the fact that these supplementals are those the President asked for. Sure, he has to ask for it. What is he going to do? Say for the last 3 months of the Food Stamp Program that we are not going to issue them? He has a choice of either not issuing the food stamps or coming up here and asking for a supplemental because we did phony budgeting in the first place. That is one device.

The other device I would say to the gentleman that is prominently used on the House floor is the budget waiver. We consistently, with rules that we bring to the House floor, simply say that the Budget Act does not matter, for one purpose or another we are going to waive the Budget Act. So, therefore, we specifically say that we are going to get around those mandates that we impose upon ourselves in the Budget Act. That is a consistent pattern on this floor.

Nearly every rule since we have come back from the August recess has had a budget waiver in it.

I yield to the gentleman.

Mr. MACK. I think the gentleman has brought up a good point in the sense of how we should approach this to the proposal of the Gramm-Rudman in the Senate and the Mack-Cheney bill in the House. Basically, it says that there must be circumstances under which supplementals that are not really done deviously, there are times when there are needs for additional spending. So we have not in this proposal said that an individual or a committee could not request supplemental spending. But what we have said is that if you do come to the floor with a supplemental that you must, in essence, make it neutral. That is, that you cannot break the target that has been established. So you have to do one of two things when a supplemental is brought to the floor. You have got to show where spending has been reduced in another area of the budget to allow this spending to take place or simply state the revenue source, the tax increase necessary, to provide for that supplemental.

Again, one might argue whether it is a good policy or a bad policy to have supplementals. One might argue whether it is a good policy or a bad policy about the particular funds and program that you want to spend it for. That is debatable. But all we are saying is that people have to live within the targets that we have established. Therefore, supplementals would be allowed but there would have to be offsetting reductions in the spending in other places to make it in order.

Mr. WALKER. The gentleman is absolutely right. We do have time when you have emergencies arise, that you have emergency supplementals. But I think what the gentleman's program would end up doing is, it would stop the planned supplementals, it would stop the process around here that uses supplementals as a way of subterfuging additional spending. So people who come to the floor knowing that they have to bring a supplemental later on, knowing that it would not be neutral then but would throw the budget out of constraints, would therefore have an impact that is dramatically different than the impact today.

Mr. MACK. This goes right to the point we have been making for several years now, that what we need to do, we ought to be labeling this thing "Truth-in-Budgeting," that no longer can you phony up assumptions, no longer can you phony up spending proposals, no longer can you hide future spending plans until after the budget goes through and say, "Here, by the way, is an emergency situation that has come up that should be taken care of."

Again we have allowed for supplementals in this particular procedure, but there must be offsetting receipts, there must be an offsetting spending reduction. The second point I would like to raise has to do with the budget waivers. I would assume that that is an area where we really do get into trouble in the sense of being able to overspend the budgets that we have passed. And what we have done in this proposal is to say there are still times when there may be ligitimate reasons for a budget waiver. But we have said in this particular case you have to have three-fifths votes of the House in order to take care of that. So we have allowed again budget waivers. But the other thing to keep in mind is, if you do breach that or if you do pass a waiver, if the overall spending is going to breach the target, then the automatic spending reduction, reduction in spending across the broad takes place. So we have added, you might say, some consequences to the responsibilities of the actions around here.

Mr. WALKER. The final point the gentleman makes is what is driving the spenders in this body up the wall. it is not that they do think they can muster the three-fifths vote from time to time in order to pass a budget waiver, although it would make it more difficult, but the fact is that now, if that budget waiver puts us over the amount that we have as our overall budget target, then all of a sudden the President is given the power to sequester the funds and they lose their ability to really spend that money without the discipline. That is what they are really screaming about. That is what all the talk is about. When you have them coming to the floor, they are talking almost wholly about the sequestering process because they realize that that is ultimately the real control here.

I think the gentleman would agree with me, the fact is, you never have to get to sequestering. You never have to give the President the authority to make these onerous cuts that we keep hearing about. If the Congress does its job and does the budgeting within the constraints imposed upon us, namely, that you have deficits consistently going down, the President is never given the power to sequester. If the Congress lives within the budgets that it develops that meet those constraints, the President is never given the power to sequester.

So that what you really have is the President sitting there as a disciplinary tool that never has to be used.

It is a little like when I was in school and you had the paddle hanging on the wall. The fact is that the teacher did not use it very often or at all. In many instances I remember the teacher, in my going through school, the teacher never had to use the paddle because it was hanging there as a symbol of what could happen.

That is precisely the kind of way that this can operate. If we do our job, do it right, do it within our constitutional prerogratives, we never have to have the discipline of sequestering imposed.

The point of the spenders is, they do not think they can live with that and they do not want anything in the way of their spending just as they have not allowed the budget process that we have now in place, which was a very elaborate document, to get in the way of their spending.

Let me ask the gentleman: In the discussion we had a little bit ago with the gentleman from New York, he mentioned the fact that the great

problem with the Gramm-Rudman-Mack proposal is the fact that it is being hammered out in secret, that there are some kind of secret sessions going on, hammering out this process, in fact it has been subject to no hearings, and we do not have a process that is meeting the legislative need to have an open process. Am I correct that the conference is totally open to the public?

Mr. MACK. Well, if I may just kind of expand on that a little, that is the reason I smile, because last evening I raised a point that was mentioned here that one of our colleagues was concerned because they just did not have time to study the proposal and know what was in it. I was chastised for reminding that gentleman that anyone who is really serious should really not use an excuse about not knowning what is in it or it is a closed session kind of situation. Anybody who knows the workings of this place knows full well that there virtually are no secrets, No. 1. No. 2, the hearings, I think we can go back to the other body where in September there were rather lengthy discussions and debate about what was proposed as far as the Gramm-Rudman-Hollings proposal was concerned. Since then we have gone to conference; which, by the way, there are 48 Members of the House in that conference. Those meetings have all been open. We have had hearings, we have had people come in and testify as to what they believe is in the proposal; those things have been excluded; suggestions they have made about problems; suggestions they have made about cleaning it up.

So I would say that, again, if there was a real interest in knowing what was in there——

Mr. WALKER. My understanding is that right in the conference committee you have about 15 television cameras in there and a couple of hundred people sitting around. Is that correct?

Mr. MACK. I would certainly say the first day there were quite a few members of the press, TV cameras, and so forth.

Mr. WALKER. So this is happening right out in the open. The gentleman mentioned hearings. Now, what the gentleman from New York told us in his opposition is that there have been no hearings on this bill.

Mr. MACK. By the way, I have just been referring to what has happened in the conference committee. I think the gentleman knows there have been several committees of the Congress in the past few weeks that have been holding hearings. I know the Budget Committee has held several meetings.

Mr. WALKER. The Budget Committee held hearings on this?

Mr. MACK. They certainly have.

Mr. WALKER. And the conference committee held hearings on it?

Mr. MACK. They certainly have.

Mr. WALKER. The Government Operations Committee, on which I serve and, by the way, on which the gentleman from New York serves on, the gentleman who was talking about this, that committee, I know, has held hearings. Has not the Joint Economic Committee held hearings on this, too?

Mr. MACK. They may have held a hearing today, I am not sure about that.

Mr. WALKER. I am pretty certain there have been a whole series of hearings held on this process. Once again, there is nothing going on in secret.

Mr. MACK. I think it is interesting in this relatively short period of time that there have been all these hearings on what is referred to as the Balanced Budget Emergency Deficit Reduction Act. You know, as the gentleman from Pennsylvania knows, I have been here now for about 3 years, and one of the things that I feel strongly about when I ran for the Congress and that I feel more strongly about now was the need to pass an amendment to the Constitution requiring a balanced budget. But it is interesting, at least again as far as my knowledge is concerned, I do not believe that in the entire 3 years that I have been here that there ever were any hearings about the balanced budget amendment.

Mr. WALKER. In this body I do not think there have been; I think the gentleman is absolutely correct.

Mr. MACK. Until the crisis was at hand, when we have been able to say that those people who say they are serious about reducing spending, balancing the budget, have an opportunity to come and step forward and support this proposal. It is interesting that most of the hearings seem to be directed at trying to find ways to undermine the proposal as opposed to a real open hearing of presenting both sides of the issue.

Mr. WALKER. The gentleman, I think, makes a key point that has been made a number of times on this House floor. There is a real attempt around here to bottle up things that the majority party does not want to deal with. Balanced budget has been one of those. However, all of a sudden they were presented with a fait accompli, the Senate-passed balanced budget language, and all of a sudden there is panic in the House of Representatives. The spenders have become apoplectic about the fact that they actually have to face up to this issue. So the gentleman is correct; we have had a whole series of hearings, but it is not, as was portrayed out here earlier this evening, a case where there have been no hearings.

That is certainly not a case that can be made in reality.

Another point raised, and I would bring it up to the gentleman, was that we are changing basic constitutional principles in the amendment or in the bill that the gentleman has drafted. It seems to me that those kind of things are also being addressed by the conference committee. Is there not a task force specifically set up to look at those particular questions?

Mr. MACK. There is a separate task force to deal with the question of the constitutionality. And I would assume that the question of constitutionality comes up on almost any piece of legislation that the Congress is going to deal with. I would suspect in many cases the question of constitutionality is a smokescreen and is not the real issue that people are concerned with.

Mr. WALKER. If the gentleman would yield back to me just a minute, I would tell the gentleman that on a couple of occasions we have had bills brought to the House floor by the majority party that I would have regarded as being constitutionally dangerous.

□ 2015

On a couple of those occasions, I have brought the issue to the floor, suggesting that there might be constitutional problems with this. The ruling of the Chair at that point has been that constitutional arguments against the bill are not admissible as a part of points of order, and so on, out here. So the fact is—and this gentleman knows it, too—when we bring up constitutional points, those are ultimately going to have to be resolved by the courts. That is not something which is admissible in legislative consideration other than as a debating point. Certainly, people can get up and call it unconstitutional, but we do not decide constitutional questions here. That is something that is left to the court.

Mr. MACK. If the gentleman will yield further, I think one of the points that has been raised under the guise of a constitutional question has to do with the transfer, the supposed transfer of power from the legislative branch to the executive branch.

Mr. WALKER. I think that is the main thing.

Mr. MACK. A moment ago you used the term, though, that the President is empowered to execute the sequester order. I think, frankly, there is a better way of saying that. The President really is an executor of the law. He is required to sign the sequester order. Not empowered. He is required to sign the sequester order.

Mr. WALKER. He does not have discretion, in other words.

Mr. MACK. That is absolutely right. He has no choice. He must sign the order.

And the second point of it is, he cannot pick and choose as to where the sequester order is going to hit. He

must follow it according to the law that is being established.

Mr. WALKER. Would the gentleman specify for us precisely what that particular requirement is, because we have heard a lot of talk, again, from the critics of the bill out here on the floor that somehow some programs were going to be hit much harder than other programs.

Is it not true that under the formula that there is an attempt to protect programs even during a sequestering process?

Mr. MACK. What we have tried to do, even though many of us may disagree with present policy as it is exemplified by expenditures of the Federal budget, while many of us may disagree with those, what we have said is our desire is to try to maintain as close as possible the present policy so that we want to touch programs across the board in equal percentages.

Now, there is truth to the argument that there have been some exemptions. One exemption that has been given is Social Security. People may grin and say, "Well, gee, that is strange." Well, the reality, the political reality, the reality of this place, is that there is no way to put forward any meaningful deficit reduction plan that includes Social Security.

Mr. WALKER. There is one other point, too, and that is that there does exist a separate trust fund for Social Security, which is in fact a solvent trust fund, given what we did a couple years ago. So you are dealing with a little bit different economic reality than the general-fund budget at that point; is that not the case?

Mr. MACK. That is true. And let me mention the second area. The feeling was that if we have contracts that the Government has entered into in the private sector, in which the person that we have contracted with can, in essence, come back and sue us for specific performance, it is misleading for us to say that we can reduce the expenditures under those contracts when we know we are going to have to, in essence, pay more as a result of that suit.

So we have exempted long-term or multiyear contracts, where we believe there is a higher cost to us for sequestering.

Again, the strawman that has been raised is that that whole thing was designed for the purpose of protecting defense.

Mr. WALKER. That is precisely the point raised by the gentleman earlier today. He said that that particular device is in there in order to protect one-half of the defense budget and emasculate the domestic programs.

Mr. MACK. Well, let me tell you where I think they have gotten the idea that that was occurring. Frankly, when the whole plan was first discussed, when people heard that there was this contract provision in there, there was a natural kind of reaction saying, "Wait a minute, that really is done for the purpose of protecting something. We really need to find out what that is."

During the process of the discussion, there were also some numbers and some figures that came out as to what contracts in dollar amounts would be exempt. And a figure was generated of roughly $92 to $109 billion on the defense side and some $74 or $76 billion on the domestic side. The point I am raising there is that even under the first run, there was the belief on both sides, that is, the domestic and the defense, would be affected by some kind of an exemption for contracts.

As we worked through this and we began to look closer at the makeup of the contracts and the wording of those contracts, we found that in most of the Defense Department contracts there was an option that, in essence, said at the convenience of the Government there could be some changes in performance. As a result of that, those contracts would be included in the overall sequester order.

So what really has happened now is that the greater dollar amount of contracts that are going to be exempt actually occurs on the domestic side, not on the defense side.

Mr. WALKER. Well, now, wait a minute. That is precisely opposite of what we heard out here earlier this evening. You are claiming that in the hearing process that you have gone through, in the study process that you have gone through, it has now been developed that the contract provision in the proposal will result in more domestic set-asides than defense set-asides?

Mr. MACK. That is absolutely correct. Let me go further and say that that information I believe was available either last Thursday or Friday in one of the open conference sessions that we had.

Mr. WALKER. So in other words, in one of these open meetings that we had heard were not taking place, in one of these open public meetings it has been in fact explained at this point that under the proposal you would have more discretionary set-asides, or, I should say, set-asides for domestic programs under the contracting authority than you would the defense programs.

Mr. MACK. The gentleman is correct.

Mr. WALKER. I think that is an important refutation of the explanation that we had in opposition to this bill earlier on this evening.

We also heard earlier this evening that absolutely this program is going to cut education, it is going to cut Head Start, it is going to cut college grant programs.

Is there any way that that particular point of view can be sustained based upon the reality of the program?

Mr. MACK. Let me respond to that and say that, yes, that could occur, but I would remind you that that would only occur either because Congress decided to do it, No. 1, or No. 2, that Congress failed to carry out any kind of significant deficit reduction that would get us within the targets.

The point is, if we do not put together a plan that sets other priorities that gets us below the target number, then sequestering would take place, that is, the reduction in spending across the board, and, therefore, the program that you mentioned would be hit on a percentage basis, the same way as, say, the defense number, or any other particular spending in the makeup of the Federal budget.

Mr. WALKER. So in other words, the way we would get there is if we ourselves spent our way into the problem, that is we found that we were not able to discipline ourselves to the point of meeting the target, the only way we could get to those kinds of cuts would be that the spenders win up here and we do not get to a responsible level of reduced deficit.

Mr. MACK. If there is a failure on the part of the Congress to meet the targets as established in this proposal, then there would be a sequester across the board, which would impact the programs that you just mentioned. That is one way.

The second way would be, as the gentleman knows, that, while we have established targets here, and sequestering would take place at some point, the Congress still has the responsibility of developing its own budget resolution that meet those specific targets. If the Congress should happen to decide that education or the other programs that you mentioned should be cut, that is a second way. But a way of protecting those programs is for those people who feel strongly about that to put their proposal together as to how they think the priorities of the Federal expenditures ought to be arranged. And then the Congress can debate which of those should take place.

Mr. WALKER. I thank the gentleman. Of course, the point being made by some of the opponents of your proposal is the fact that this would hit particularly hard at domestic policies, and the statement was made that that is irresponsible because it is a known fact that there has been no real social program waste, that there is a myth of social program waste. The fact is that we do have in the Defense Department, we do have waste in the social programs, as well. To cite one, just to let people know that that is not a myth, the Food Stamp Program, for example, was examined by GAO just a couple years ago, and they found a 20-

percent waste, fraud and abuse rate in that social program. That is a pretty significant waste, fraud and abuse rate and one which I think we might want to address as a part of a budget-reduction scenario.

Mr. MACK. I think one of the interesting things that is developing on this particular proposal is that those who are concerned about the domestic side of the budget have made the claims that that is where all the cuts are going to occur. Those people who feel very protective of the defense numbers make the claim that that is where all of the cuts are going to be made, or a good portion of it.

And it is also interesting that those of us who feel strongly about no tax increases have heard several say, "Well, this is just the kind of system that is going to force increases in taxes," and we have heard just the opposite point of view about taxes from other people; the point is that this proposal is about as even and as straight across and as neutral approach as you can come up with to, as you said, provide the paddle necessary to make Congress carry out its responsibility.

Mr. WALKER. Well, the final point that was made by the gentleman that was discussing here this morning—and there were a number of other points, too, that can be refuted—was that the Democrats and liberals would in fact support a policy calling for a balanced budget.

Our question to them is: What? What policy is it that you are willing to support?

Last night we had a discussion out here on the floor of the alternative budget that they would propose. Earlier in the evening I went through the alternative budget and found that if you totally did away with all agricultural programs, which was one of the things they discussed, all foreign aid programs, which is one of the things they discussed, all water projects, which is one of the things they discussed, emasculated the entire strategic Defense Program of this country, they would come up with $70 billion in savings, and that included some increases in taxes. They would come up with $70 billion in deficit reduction. That leaves them $130 billion short.

So the question becomes: What are they really willing to do?

They are willing to criticize your proposal, they are willing to talk about balancing the budget, they are willing to try to blame deficits on Ronald Reagan, but they are not willing to come up with a proposal, and they are willing to do anything to destroy a proposal that is now before us.

I think it is an appalling episode. I think it demonstrates once again why we have a dichotomy in the economy today between spenders and builders, and it seems to me that, clearly, those who are spenders are fighting the Gramm-Mack proposal, those who are the builders of our society, trying to build an economy for the future, are those defending it.

The American people need to choose between the two. Are you with the spenders, who want to continue to spend us into debt and into oblivion, as we have spent for the last decade or more? Or are you with the builders who want to rebuild the economy, build toward the future, lower the debt load on the American people and begin the process of strengthening ourselves going into the 21st century?

Those are the choices. It is a choice that has become very clear in the Gramm-Mack proposal, and I think that the opposition voices that we hear on the floor are those people who want to continue the spending.

I congratulate the gentleman for being in the forefront of the builders.

Mr. Speaker, I yield back the balance of my time.

COMMEMORATING THE 40TH ANNIVERSARY OF THE UNITED NATIONS

(Mr. LEACH of Iowa asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. LEACH of Iowa. Mr. Speaker, tomorrow, October 24, 1985, marks the 40th anniversary of the founding of the United Nations. President Reagan, who has on various occasions reaffirmed a U.S. commitment to the principles and ideals on which the United Nations was founded, will be addressing a special commemorative session of the General Assembly on that occasion. I believe it appropriate for the Congress likewise to observe this 40th anniversary by reflecting on the past four decades of post-World War II experience with the United Nations.

It was not far from this Chamber, in 1944, that meetings were convened at Dumbarton Oaks to begin the preliminary work on what was to become the new United Nations organization. The following year, delegates from 50 nations gathered in San Francisco and on June 25, 1945, adopted the Charter of the United Nations. In the post-World War II era, the United States played the dominant role in the United Nations and most other international bodies. Not only did we never veto a Security Council measure, but for 20 years, we never voted on the losing side of a U.N. resolution. As the world's preeminent military and economic power the United States exerted unrivaled influence.

However, as the decolonization process unfolded and the membership of the United Nations tripled, Americans have had to come to grips with the fact that the character of the United Nations has changed as the world has changed. The United States does not now, nor will it ever again claim as great a percentage of the world's economic and military might as it did at the end of the last world war. Hence, in a very practical sense, our national security today requires a greater subtlety be applied to our diplomacy as it effects international institutions.

Apart from arms control, the most fundamental issue of world politics is the advancement of international law and international institutions. In a world which Pope John Paul has suggested has shifted from a "post-war" to a "pre-war" mentality, political leaders in Congress and the executive branch have a responsibility to appeal to the highest rather than the lowest instincts of the body politic in approaching issues of multilateral diplomacy.

This is not to suggest that criticism of the United Nations should be stifled. Rather it should be channeled constructively. Many, for instance, have suggested that the United Nations has degenerated into a world debating society. Citizens of the world had higher hopes for the United Nations than to see country after country use the podium of New York for political diatribe, much of it directed against the United States. As a former delegate to the United Nations General Assembly, I have witnessed firsthand the corruption in rhetoric that plagues the U.N. system today. Still, all in all, words are cheaper than bullets and who knows how much conflict such open discussion of issues prevents.

American representatives, confronted with such situations, have a responsibility to stand up, not only for American national interests, but for the principle of rational dialog. In diplomacy, as in sports, it does matter how you play the game. Verbal joustings, however, must be measured. It is simply counterproductive to suggest, as one of our representatives recently did, that the United Nations should meet half time in Moscow and that he would cheerfully stand at the wharf and wave goodbye to delegates. It is even more mischievous to gratuitously call the United Nations a "cesspool" as the mayor of New York recently has done. Beyond the realm of rhetoric, the burden of proof would seem to be on the administration to show how abandoning UNESCO advances our national interest, how empty chair diplomacy is more effective than U.S. participation. Likewise, torpedoing the Law of the Sea negotiations and abandoning compulsory jurisdiction of the World Court would for all intents and purposes appear to shrink the scope of international law. How does this lead to a safer world?

We may not like all that the United Nations or its individual members do,

but we no longer have the capacity, even if we so desired, to successfully go it alone. We simply cannot reject the world as it is the 1980's and return to the world as it once was or as we would like it to be. The economic and military might we were once able to exercise at the end of World War II is history. Now, Japan and several of the European nations devastated by the war and assisted by the United States in their recovery are heavy contenders for rival economic and political influence and many smaller nations of Asia and Latin America have developed to the point too where they can claim a significant share of the world's economic resources and influence. The reordering of power in the world implies that the United States must work cooperatively with other nations in the promotion of our own interests and ideals, not only bilaterally, but in international organizations such as the United Nations.

Ironically, the American people often seem to understand better than American politicians that isolationism has no place in the world today. If there is any hope of diminishing intolerance and hostility among nations, it must come through a greater international commitment to mutual understanding and cooperative problem solving. Those who demand that the United States get out of the United Nations must realize that going it alone may be psychologically satisfying, but strategically it is a prescription for disaster for the United States. Existing international institutions may be flawed, but the case for retreat from international dialog is nonexistent. Multilateral cooperation is a prerequisite for establishing a safer if not saner world.

While the United Nations more frequently earns headlines through its failures and shortcomings, the success stories of the United Nations go on largely without public notice. During the last four decades, the United Nations Children's Fund [UNICEF] has made a major contribution to the health of the world's children; the World Health Organization [WHO] played a crucial role in eradicating smallpox from the face of the Earth; the International Civil Aviation Organization [ICAO] has helped to assure the safety of the world's commercial air travelers; the International Atomic Energy Agency [IAEA] has, through its inspections and related activities, contributed to global efforts to protect against the proliferation of nuclear weapons; the United Nations Development Program [UNDP] has assisted in the basic task of economic development in many of the world's poorest countries, the U.N. High Commissioner for Refugees earned the Nobel Peace Prize for caring for millions of refugees, and United Nations Educational, Scientific and Cultural Organization [UNESCO] has made a signficant contribution to worldwide problems of literacy and preservation of cultural heritage.

The world has witnessed significant progress in the development of international law under the auspices of the U.N. system, particularly in such areas as maritime law and in the development of human rights conventions.

While these kinds of activities and accomplishments may not relate directly to the peacekeeping initiatives on which we tend to focus such enormous attention, they are, nevertheless, indispensable to the creation of the conditions for a lasting world peace. As a Member of this body, I am proud of the historical leadership role which the United States has played in these areas through the U.N. system.

This is not to say that the United Nations has not been a deep disappointment at times and that the conduct of some of its members has not from time to time been deplorable. But the occasion of the 40th anniversary of the United Nations offers the 159 member states of the United Nations an opportunity to rededicate themselves to the original purposes and principles embodied in the charter and to undertake new initiatives to improve the United Nations itself. As U.S. Ambassador to the United Nations, Vernon A. Walters, said in testifying before two House subcommittees on September 18, 1985, "The United Nations is essential to us. But if the United Nations is to function as it should, if it is to play the role it should play, it must become a more effective institution."

I agree with Ambassador Walters' assessment and have recently introduced legislation which I hope will provide an appropriate format for a constructive review of the United Nations. This legislation (H.J. Res. 417) proposes the establishment of a "United States Commission on Improving the Effectiveness of the United Nations," to consist of 18 members, with the House, the Senate, and the President each selecting six. Former U.S. Permanent Representatives to the United Nations would also be invited to serve as advisors to the Commission. In carrying out its mandate to report back to Congress and the President in 1 year's time its recommendations, the Commission would be charged with giving special attention to such issues as: "weighted" voting, assessed contributions from member states, potential nongovernmental sources of revenue for the United Nations, staff salaries and contracts, peacekeeping functions, the use of the International Court of Justice, potential creation of new mechanisms such as a U.N. Mediation and Conciliation Service and professional antiterrorism units, a possible verification and inspection service to assist in enforcing compliance with arms control agreements, the implementation of international human rights standards, the possible creation of a new U.N. High Commissioner for Human Rights, the role of the United States in the United Nations and a variety of other subjects. The Commission would be mandated to examine such ideas as with a view toward developing concrete practical recommendations for reform in the United Nations. It would also be charged with developing strategies for promoting appropriate reforms at the United Nations itself.

The proliferation in the last couple of years of House and Senate amendments dealing with U.S. policy toward the United Nations reflects a great degree of frustration with the United Nations as it presently operates. The Commission described above is neither intended to be liberal nor conservative, but instead to be, above all, practical. Without a constructive forum for multilateral international discourse, managing global problems will become far more difficult in the years to come.

It is time for the United States to lead, rather than simply denigrate the United Nations. There is no better occasion than on this, the 40th anniversary of the United Nations, to engage the American people in the quest for a better, more effective United Nations for the next 40 years.

I would like to submit for the record the text of House Joint Resolution 417 and to urge my colleagues in supporting this initiative.

H.J. RES. 417

Joint resolution to establish a United States Commission on Improving the Effectiveness of the United Nations

Whereas October 24, 1985, marks the fortieth anniversary of the entry into force of the Charter of the United Nations;

Whereas the United Nations was established for the purposes, as enunciated in the Charter, of maintaining international peace and security, developing friendly relations among nations based on respect for equal rights and self-determination, achieving international cooperation in solving economic, social, cultural, and humanitarian problems, and promoting respect for human rights;

Whereas the purposes and principles of the United Nations Charter and founders remain as relevant today as they were forty years ago;

Whereas the United Nations system is a necessary universal and democratic institution in our interdependent world and has made significant contributions in such areas as the development of international law, peacekeeping, decolonization, nuclear nonproliferation, child health, refugee relief, economic development, and human rights;

Whereas in spite of its achievements, the United Nations has been unable to bring an end to war or human suffering;

Whereas the United Nations has also, on occasion, strayed from its original purposes and has served as a forum for irresponsible rhetoric and politicization, such as the adoption by the General Assembly in 1975 of

Resolution 3379 equating Zionism with racism;

Whereas in spite of such grave lapses, the United States remains committed to the United Nations and the purposes of the Charter, not only as a member of the United Nations and one of its earliest leaders and supporters, but also as host to the United Nations headquarters;

Whereas the fortieth anniversary of the United Nations provides a special opportunity for the United States not only to reaffirm its support for the United Nations but to reappraise the potential of the United Nations and recommend means of making that institution more effective and responsible, consistent with the national interests of the United States; and

Whereas the Secretary General of the United Nations has, on this fortieth anniversary, called for renewed commitment to the Charter and an effort to appraise and improve the functioning of the United Nations: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ESTABLISHMENT OF COMMISSION.

The United States Commission on Improving the Effectiveness of the United Nations (hereafter in this joint resolution referred to as the "Commission") is hereby established.

SEC. 2. PURPOSES OF THE COMMISSION.

(a) PURPOSES.—The purposes of the Commission shall be to—

(1) examine the forty years of the United Nations and identify and evalute the strengths and weaknesses in the organization and its work; and

(2) prepare and submit to the President and to the Congress recommendations on ways to improve the effectiveness of the United Nations and the role of the United States in the United Nations, including the feasibility of and means for implementing such recommendations.

(b) SPECIAL ATTENTION.—In carrying out its responsibilities under subsection (a), the Commission shall pay special attention to the following:

(1) The mechanisms and procedures within the United Nations system for peacekeeping and conflict-resolution and ways in which they may be expanded or improved, examining in particulr the functions of the Secretary General, the role of the Security Council, the use of the International Court of Justice, potential third-party dispute-solving mechanisms (as in the establishment of a United Nations Mediation and Conciliation Service), the possible creation of standing United Nations peacekeeping forces or anti-terrorism units, the role of United Nations institutions in fact-finding, and potential verification and inspection services to assist in enforcing compliance with international arms control agreements.

(2) Formal and informal decisionmaking procedures in the United Nations, its agencies and programs, and recommendations to modify those procedures which have emerged from various interested parties, examining in particular the role of consensus decisionmaking, the feasibility and advisability of weighted voting (including the so-called "binding triad" formula requiring multiple concurrent majorities based on one-nation-one-vote along with population and contributions), the possible modification of the Security Council veto, and the relationship of the principles of universality and democracy to decision-making procedures.

(3) The cost-effectiveness and administrative efficiency of the United Nations, examining in particular budgetary reform (including the role of the major donors in budget decision-making), the prioritization of programs, adjustments in assessments, potential alternative non-governmental sources of revenue, salaries, benefits, hiring of consultants, contracts for goods and services, and appointment of staff in the Secretariat.

(4) The economic, social, and humanitarian role of the United Nations system, examining in particular the optimum coordination of economic development programs, the United Nations' short-term and long-term response to crises and natural disasters, population and health issues, refugee relief, the protection of the environment, the implementation of international human rights law, and the potential creation of a United Nations High Commissioner for Human Rights.

(5) United States participation in the United Nations, examining in particular the strengths and weaknesses of United States performance, United States policy toward the International Court of Justice and international law, provisions in United States law relating to the United Nations, ways in which the United States can better use the United Nations to advance its national interests, the state of public opinion with regard to the United States role in the United Nations, United States voluntary and assessed contributions to the United Nations, and the hiring of United States citizens in the United Nations system.

(6) Strategies and actions for promoting the implementation of recommended reforms in the United Nations and the United States role in the United Nations.

SEC. 3. MEMBERSHIP OF THE COMMISSION.

(a) MEMBERS.—The Commission shall be composed of 18 members, appointed as follows:

(1) Two Members of the Senate, one appointed by the President pro tempore of the Senate and one appointed by the minority leader of the Senate.

(2) Two Members of the House of Representatives, one appointed by the Speaker of the House and one appointed by the minority leader of the House.

(3) Eight individuals from the private sector, two appointed by the President pro tempore of the Senate, two appointed by the minority leader of the Senate, two appointed by the Speaker of the House, and two appointed by the minority leader of the House.

(4) Six individuals appointed by the President, such appointees to be representative, to the maximum extent possible, of the full range of American society. Not more than three of the members of the Commission appointed pursuant to this paragraph may be from the same political party.

All such appointments shall be made no later than 60 days after the date of enactment of this joint resolution. Any vacancy in the membership of the Commission shall be filled in the same manner as the original appointment was made.

(b) ADVISORS.—Former United States Permanent Representatives to the United Nations who are not appointed to the Commission shall be invited by the Commission to serve as Advisors to the Commission.

(c) COMPENSATION AND TRAVEL EXPENSES.—(1) Except as provided in paragraph (2), each member of the Commission shall be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule (5 U.S.C. 5332) for each day during which that member is engaged in the actual performance of the duties of the Commission.

(2) Members of the Commission who are full-time officers or employees of the United States or Members of the Congress shall receive no additional pay on account of their service on the Commission.

(3) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission, and Advisors serving pursuant to subsection (b), shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5, United States Code.

(d) CHAIRMAN AND VICE CHAIRMAN.—The Chairman and Vice Chairman shall be elected by the Commission from among the members of the Commission.

(e) QUORUM.—Ten members of the Commission shall constitute a quorum for purposes of transacting business, except that four members shall constitute a quorum for holding public hearings.

SEC. 4. POWERS OF THE COMMISSION.

(a) IN GENERAL.—For the purpose of carrying out this joint resolution, the Commission may hold such hearings (subject to the requirements of subsection (b)) and sit and act at such times and places, take such testimony, and receive such evidence as the Commission considers necessary to fulfill the purposes specified in section 2. The Commission may administer oaths and affirmations to witnesses appearing before the Commission.

(b) MEETINGS.—

(1) MINIMUM NUMBER OF PUBLIC HEARINGS.—The Commission shall hold a minimum of 5 public hearings.

(2) OPEN MEETINGS.—Section 552b of title 5 of the United States Code shall apply with respect to the Commission.

(3) CALLING MEETINGS.—The Commission shall meet at the call of the Chairman or a majority of its members.

(c) DELEGATION OF AUTHORITY.—When so authorized by the Commission, any member or agent of the Commission may take any action which the Commission is authorized to take by this section.

(d) INFORMATION FROM FEDERAL AGENCIES.—The Commission may secure directly from any Federal agency information necessary to enable it to carry out this joint resolution. Upon request of the Chairman of the Commission, the head of any such Federal agency shall furnish such information to the Commission.

SEC. 5. STAFF.

(a) STAFF MEMBERS AND CONSULTANTS.—Subject to such rules as may be adopted by the Commission, the Chairman of the Commission, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classifications and General Schedule pay rates, may—

(1) appoint a Director who shall be paid at a rate not to exceed the rate of basic pay in effect for level V of the Executive Schedule (5 U.S.C. 5316);

(2) appoint and fix the compensation of such other staff personnel as the Chairman considers necessary; and

(3) procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5, United States Code.

(b) DETAILING OF GOVERNMENT PERSONNEL.—Upon request of the Commission, the head of any Federal agency may detail, on a reimbursable basis, any of the personnel of that agency to the Commission to assist it in carrying out this joint resolution.

SEC. 6. REPORT.

The Commission shall transmit to the President and to the Congress a report containing a detailed statement of the findings, conclusions, and recommendations of the Commission. This report shall be transmitted not later than one year after—

(1) the date on which appropriations first become available to the Commission, or

(2) the first date on which all members of the Commission have been appointed,

whichever date is later.

SEC. 7. FUNDING FOR THE COMMISSION.

(a) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $250,000 to carry out this joint resolution.

(b) PRIVATE CONTRIBUTIONS.—The Commission may accept contributions from private sources to carry out the purposes of this joint resolution. The source and amount of each such contribution shall be listed in the report submitted pursuant to section 6.

SEC. 8. TERMINATION OF THE COMMISSION.

The Commission shall cease to exist 60 days after submitting its report pursuant to section 6.

CONFERENCE REPORT ON H.R. 2942

Mr. FAZIO submitted the following conference report and statement on the bill (H.R. 2942) making appropriations for the legislation branch for the fiscal year ending September 30, 1986, and for other purposes:

CONFERENCE REPORT (H. REPT. 99-321)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2942) making appropriations for the legislative branch for the fiscal year ending September 30, 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 15, 18, 19, 20, 23, 24, and 25.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 5, 6, 7, and 21, and agree to the same.

Amendment numbered 3:

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$919,000*; and the Senate agree to the same.

Amendment numbered 8:

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$16,886,000*; and the Senate agree to the same.

Amendment numbered 9:

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended as follows:

In lieu of the sum named in said amendment insert: *$100,000*; and the Senate agree to the same.

Amendment numbered 10:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert: *$10,880,000*; and the Senate agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows:

Restore the matter stricken and inserted by said amendment, amended as follows: *$2,188,000: Provided, That appropriations under this head shall be available for Bartholdi Fountain repairs without regard to section 3709 of the Revised Statutes, as amended*; and the Senate agree to the same.

Amendment numbered 17:

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert: *$138,047,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 11, 12, 13, 14, 22, and 26.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2942) making appropriations for the Legislative Branch for the fiscal year ending September 30, 1986, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I—CONGRESSIONAL OPERATIONS

SENATE

Amendment No. 1: Reported in technical disagreement. Inasmuch as the amendment relates solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer a motion to recede and concur in the Senate amendment.

JOINT ITEMS

CONTINGENT EXPENSES OF THE SENATE

JOINT ECONOMIC COMMITTEE

Amendment No. 2: Appropriates $2,644,000 as proposed by the Senate instead of $2,670,000 as proposed by the House.

JOINT COMMITTEE ON PRINTING

Amendment No. 3: Appropriates $919,000 instead of $910,000 as proposed by the House and $935,000 as proposed by the Senate.

OFFICE OF THE ATTENDING PHYSICIAN

Amendment No. 4: Appropriates $1,056,000 as proposed by the House instead of $1,036,000 as proposed by the Senate.

CAPITOL POLICE

General expenses

Amendment No. 5: Appropriates $1,336,000 as proposed by the Senate instead of $1,361,000 as proposed by the House.

Official mail costs

Amendment No. 6: Appropriates $100,000,000 as proposed by the Senate instead of the $104,211,000 as proposed by the House.

Statement of appropriations

Amendment No. 7: Appropriates $13,000 as proposed by the Senate instead of $11,000 as proposed by the House.

CONGRESSIONAL BUDGET OFFICE

Salaries and expenses

Amendment No. 8: Appropriates $16,886,000 instead of $16,609,000 as proposed by the House and $17,541,000 as proposed by the Senate. The additional $277,000 provided over the House bill is allocated as follows: $127,000 for computer time sharing, including $27,000 for the personnel system; $115,000 for administrative costs; and $35,000 for the summer intern program.

ARCHITECT OF THE CAPITOL

OFFICE OF THE ARCHITECT OF THE CAPITOL

Contingent expenses

Amendment No. 9: Appropriates $100,000 instead of $235,000 as proposed by the House.

CAPITOL BUILDINGS AND GROUNDS

Capitol buildings

Amendment No 10: Appropriates $10,880,000 instead of $11,405,000 as proposed by the House and $10,590,000 as proposed by the Senate. This level provides $290,000 for the conservation, including the necessary scaffolding, of the frescoed frieze in the Capitol Rotunda. With respect to the frescoed canopy, "The Apotheosis of George Washington," which also requires extensive conservation treatment, the conferees believe that alternatives to the plan for masking the joints between the giornate should be considered. There is a concern that the aesthetics of the giornate will be altered because the proposal presented to the Committees will eliminate the effects of the variations in the painting created by the artist, Constantino Brumidi, in his day-to-day progress on this masterpiece frescoe. Consequently, the conferees direct that an alternative conservation program be developed for the canopy which then can be considered together with the current plan. Funding for the elevator traffic analyzer is not provided.

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which extends the availability of $109,000 appropriated in P.L. 98-367, until September 30, 1986, as proposed by the Senate.

Capitol grounds

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum stricken and inserted by said amendment, insert the following:

"$3,510,000, of which $495,000 shall be available until expended for the procurement and installation of hydraulic security barriers at vehicular entrances to the Capitol grounds, subject to the approval of the design development drawings by the House and Senate Committee on Appropriations

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have approved the front end loader and resurfacing of square 639; funds for a dump truck are not provided. The managers have included funding and approve the reprogramming for the construction of hydraulic barriers at the East Plaza vehicle entrances to increase the security of the Capitol, its inhabitants, and the visiting public. The East Plaza funds are provided subject to approval of the design development drawings by the Committees on Appropriations. Authorization legislation (H.R. 3066) reported to the House on October 11, 1985 also requires that the Architect of the Capitol will proceed with the project under the direction of the House Office Building Commission and the Committee on Rules and Administration of the Senate.

Senate office buildings

Amendment Nos. 13-14: Reported in technical disagreement. Inasmuch as the amendments relate solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer motions to recede and concur in the Senate amendments 13 and 14.

LIBRARY OF CONGRESS

CONGRESSIONAL RESEARCH SERVICE

Salaries and expenses

Amendment No. 15: Appropriates $38,963,000 as proposed by the House instead of $40,333,000 as proposed by the Senate. The managers realize that this level of funding will require very tight financial management at CRS and urge the agency to seek reprogramming authority if that becomes necessary in meeting Congressional workload requirements.

TITLE II—OTHER AGENCIES

BOTANIC GARDEN

SALARIES AND EXPENSES

Amendment No. 16: Appropriates $2,188,000 instead of $2,197,000 as proposed by the House and $2,113,000 as proposed by the Senate. The conferees have allowed $75,000 for repairs to the Bartholdi Fountain, without regard to section 3709 of the Revised Statutes. Funding for a delivery truck is not provided.

LIBRARY OF CONGRESS

SALARIES AND EXPENSES

Amendment No. 17: Provides $138,047,000 in direct appropriations and receipts instead of $136,569,000 as proposed by the House and $139,325,000 as proposed by the Senate. The conferees have allowed $1,478,000 over the House bill, to be allocated as follows: $675,000 for preservation, including $250,000 for continued experimentation with the diethyl zinc deacidification process; $303,000 for automated systems, including $96,000 for personnel expenses for three existing staff positions to assist in the Congressional Research Service automation program; and $500,000 for relocation expenses.

COPYRIGHT OFFICE

SALARIES AND EXPENSES

Amendment No. 18: Provides $17,631,000 in direct appropriations and collection receipts as proposed by the House instead of $18,081,000 as proposed by the Senate. The conferees are aware that recent semiconductor chip legislation has generated additional registration workload, which the Copyright Office has been able to absorb through reassignment of existing resources. The Office should continue to monitor this situation closely, and report the status of this workload during the next appropriation hearings.

Amendment No. 19: Provides a limitation of $6,000,000 in collections under 17 USC 708(c) which may be credited to this appropriation as proposed by the House instead of $6,500,000 as proposed by the Senate.

Amendment No. 20: Provides that the total amount available for obligation shall be reduced by the amount by which collections are less than $6,750,000 as proposed by the House instead of $7,250,000 as proposed by the Senate.

GOVERNMENT PRINTING OFFICE

PRINTING AND BINDING

Amendment No. 21: Appropriates $11,555,000 as proposed by the Senate instead of $11,655,000 as proposed by the House.

OFFICE OF SUPERINTENDENT OF DOCUMENTS

SALARIES AND EXPENSES

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which provides that $3,000,000 of the amount available for fiscal year 1986 shall be derived from excess receipts from the sales of publications as proposed by the Senate.

GOVERNMENT PRINTING OFFICE REVOLVING FUND

Amendment No. 23: Restores language proposed by the House and stricken by the Senate which imposed a limitation of 5,480 employees at the Government Printing Office. In applying this employment cap, the managers direct that it be applied equitably, and with due regard to the efforts at GPO to provide equal employment opportunities to women and minority groups.

GENERAL ACCOUNTING OFFICE

SALARIES AND EXPENSES

Amendment No. 24: Appropriates $300,992,000 as proposed by the House instead of $299,726,000 as proposed by the Senate. The conferees expect that this level of funding will provide necessary training for GS-14's and above, and that the GAO will maintain an employment level of 5,100. The managers also note the increasing use of staff at the General Accounting Office as detailees to the Committees of Congress on a non-reimburseable basis. This practice should not be allowed to further burden the resources available to the General Accounting Office, which are severely limited as they are for all Legislative Branch agencies due to fiscal constraint and increasing workloads. The Comptroller General is asked to review this situation and to make appropriate recommendations in the fiscal year 1987 appropriations requests.

Amendment No. 25: Restores language proposed by the House and stricken by the Senate amending section 7(b) of Public Law 90-545 to authorize the use of the claims and judgments fund for final partial payments and compromise settlement of claims after certification by the Attorney General to the Comptroller General that it is in the interest of the United States to do so.

TITLE III—GENERAL PROVISIONS

Amendment No. 26: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

SEC. 306. (a) Notwithstanding the provisions of this or any other Act, the United States International Narcotics Control Commission, established by section 814 of the Foreign Relations Authorization Act, Fiscal Years 1986 and 1987, is hereby redesignated and shall hereafter be known as the United States Senate Caucus on International Narcotics Control.

(b) Any reference to the United States International Narcotics Control Commission in any law, regulation, document, record, or other official paper of the United States shall be deemed to be a reference to the United States Senate Caucus on International Narcotics Control.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees believe that H.R. 2942 contains sufficient authority in the language under the Office of the Superintendent of Documents to make available for salaries and expenses excess receipts from the sales of publications, in the amount specified. With respect to the narcotics commission, the conferees have inserted language which will clear up an ambiguity created in the conference agreement on H.R. 2068, the Foreign Relations Authorization (P.L. 99-93). This commission, originally approved in the Senate bill to be comprised of members of the House and Senate, as a result of conference agreement consists of only members of the Senate and the public. The amendment redesignates the title of the commission as the "United States Senate Caucus on International Narcotics Control", thus making it a more appropriate reflection of its actual membership.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1986 recommended by the Committee of Conference, with comparisons to the fiscal year 1985 amount, the 1986 budget estimates, and the House and Senate bills for 1986 follow:

New budget (obligational) authority, fiscal year 1985	$1,599,977,138
Budget estimates of new (obligational) authority, fiscal year 1986	1,783,255,000
House bill, fiscal year 1986	1,294,473,000
Senate bill, fiscal year 1986	1,599,663,800
Conference agreement, fiscal year 1986	1,598,293,800

Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1985	−1,683,338
Budget estimates of new (obligational) authority, fiscal year 1986	−184,961,200
House bill, fiscal year 1986	+303,820,800
Senate bill, fiscal year 1986	−1,370,000

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative programs and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BOULTER) to revise and extend their remarks and include extraneous material:)

Mr. PARRIS, for 60 minutes, on October 24.

Mr. SMITH of New Hampshire, for 60 minutes, on October 30.

Mr. LEACH of Iowa, for 30 minutes, today.

Mr. RUDD, for 5 minutes, today.

Mr. KASICH, for 5 minutes, today.

Mr. WALKER, for 60 minutes, today.

Mr. MACK, for 60 minutes, today.

Mr. WEBER, for 60 minutes, today.

Mr. PARRIS, for 60 minutes, on October 28.

Mr. PARRIS, for 60 minutes, on October 29.

(The following Members (at the request of Mr. DERRICK) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. NELSON of Florida, for 5 minutes, today.

Mr. GEJDENSON, for 5 minutes, today.

Mr. GRAY of Pennsylvania, for 5 minutes, today.

Ms. OAKAR, for 5 minutes, today.

Mrs. COLLINS, for 30 minutes, today.

Mr. NEAL, for 60 minutes, today.

Mr. BRYANT, for 5 minutes, today.

Mr. LIPINSKI, for 5 minutes, on October 24.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FORD of Tennessee, prior to the vote on the conference report on H.R. 2409, in the House, today.

(The following Members (at the request of Mr. BOULTER) and to include extraneous matter:)

Mr. GUNDERSON in two instances.
Mr. VANDER JAGT.
Mr. SHUMWAY.
Mr. MOLINARI.
Mr. WORTLEY.
Mr. STRANG.
Mr. LEWIS of California.
Mr. GILMAN in three instances.
Mr. YOUNG of Alaska.
Mrs. BENTLEY in two instances.
Mr. O'BRIEN.
Mr. BATEMAN.

Mr. MONTGOMERY.
Mr. GARCIA in two instances.
Mr. KASTENMEIER.
Mr. MILLER of California.
Mr. CLAY.
Mr. SHARP.
Mr. MICA.
Mrs. BYRON.
Mr. LELAND.
Mr. ECKART of Ohio.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 407. Joint resolution designating the 12-month period ending on October 20, 1986, as the "Centennial Year of Liberty in the United States."

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 104. Joint resolution to proclaim October 23, 1985, as "A Time of Remembrance" for all victims of terrorism throughout the world.

BILL AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill and joint resolutions of the House of the following title:

H.R. 2959. An act making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes;

H.J. Res. 79. Joint resolution to designate the week beginning October 6, 1985, as "National Children's Week"; and

H.J. Res. 407. Joint resolution designating the 12-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States."

ADJOURNMENT

Mr. WALKER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 27 minutes p.m.) the House adjourned until tomorrow, Thursday, October 24, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2174. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 6-96, "Closing of a Portion of Davenport Street, N.W., adjacent to Squares 1672 and 1673, S.O. 84-313, Act of 1985", and report, pursuant to Public Law 93-198, section 602(c), to the Committee on the District of Columbia.

2175. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 6-94, "The Sibley Memorial Hospital Revenue Bond Act of 1985", and report, pursuant to Public Law 93-198, section 602(c), to the Committee on the District of Columbia.

2176. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 6-97, "Mandatory Use of Seat Belts Act of 1985", and report, pursuant to Public Law 93-198, section 602(c), to the Committee on the District of Columbia.

2177. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 6-95, "Business Incubator Facilitation Act of 1985", and report, pursuant to Public Law 93-198, section 602(c), to the Committee on the District of Columbia.

2178. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed lease of defense articles to Israel (Transmittal No. 4-86), pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

2179. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed lease of defense articles to the Dominican Republic (Transmittal No. 1-

86), pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

2180. A letter from the Secretary of Energy, transmitting the seventh annual report on the Automotive Technology Development Program—fiscal year 1985, pursuant to Public Law 93-577, section 15, 19(1), and 20 (92 Stat. 61, 69, 70 and 85); Public Law 95-238, section 310(a); to the Committee on Science and Technology.

2181. A communication from the President of the United States, transmitting notification of the intent to remove Portugal from the list of beneficiary developing countries under the Generalized System of Preferences (GSP) Program, pursuant to 19 U.S.C. 2462(a) (H. Doc. No. 99-177); to the Committee on Ways and Means and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FAZIO. Committee of conference. Conference report on H.R. 2942 (Rept. 99-321). Ordered to be printed.

Mr. FUQUA. Committee on Science and Technology. H.R. 3235. A bill to authorize the Administrator of the National Aeronautics and Space Administration to accept title to the Mississippi Technology Transfer Center to be constructed by the State of Mississippi at the National Space Technologies Laboratories in Hancock County, Mississippi; with an amendment (Rept. 99-322). Referred to the Committee of the Whole House on the State of the Union.

Mr. DELLUMS. Committee on the District of Columbia. H.R. 2050. A bill to give to the Board of Parole for the District of Columbia exclusive power and authority to make parole determinations concerning prisoners convicted of violating any law of the District of Columbia, or any law of the United States applicable exclusively to the District (Rept. 99-323). Referred to the Committee of the Whole House on the State of the Union.

Mr. DELLUMS. Committee on the District of Columbia. H.R. 2946. A bill to establish an independent jury system for the Superior Court of the District of Columbia. (Rept. 99-324). Referred to the Committee of the Whole House on the State of the Union.

Mr. DELLUMS. Committee on the District of Columbia. H.R. 3592. A bill to provide permanent authority for hearing commissioners in the District of Columbia courts, to modify certain procedures of the District of Columbia Judicial Nomination Commission and the District of Columbia Commission on Judicial Disabilities and Tenure, and for other purposes (Rept. 99-325). Referred to the Committee of the Whole House on the State of the Union.

Mr. DELLUMS. Committee on the District of Columbia. H.R. 3578. A bill to provide permanent authority for hearing commissioners in the District of Columbia courts, to modify certain procedures of the District of Columbia Judicial Nomination Commission and the District of Columbia Commission on Judicial Disabilities and Tenure, and for other purposes with amendments (Rept. 99-326). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ACKERMAN:

H.R. 3605. A bill to provide that the authority to establish and administer flexible and compressed work schedules for Federal Government employees be extended through December 31, 1985; to the Committee on Post Office and Civil Service.

By Mr. ASPIN (for himself and Mrs. BOXER):

H.R. 3606. A bill to clarify the application of section 2406 of title 10, United States Code, relating to cost and price management, and to delay the effective date of such provision; to the Committee on Armed Services.

By Mr. HUNTER (for himself and Mr. PACKARD):

H.R. 3607. A bill to declare that certain lands located in California and held by the Secretary of the Interior are lands held in trust for the benefit of certain bands of Indians and to declare such lands to be part of the reservation with which they are contiguous; to the Committee on Interior and Insular Affairs.

By Mr. MITCHELL:

H.R. 3608. A bill to amend the Small Business Investment Act of 1958; to the Committee on Small Business.

By Mr. SILJANDER:

H.R. 3609. A bill to authorize the furnishing of military assistance to the National Union for the Total Independence of Angola (UNITA); to the Committee on Foreign Affairs.

By Mr. YOUNG of Alaska:

H.R. 3610. A bill to equalize the duties on canned tuna; to the Committee on Ways and Means.

By Mr. GUNDERSON:

H.R. 3611. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to clarify the liability of the United States Government for hazardous substances released during the manufacture of munitions or ordnance parts using equipment owned by the Department of Defense or any subdivision thereof; jointly, to the Committees on Energy and Commerce, Public Works and Transportation, and Armed Services.

By Mr. LEVIN of Michigan:

H.J. Res. 426. Joint resolution to designate the week of April 6, 1986, through April 12, 1986, as "World Health Week" and to designate April 7, 1986, as "World Health Day"; to the Committee on Post Office and Civil Service.

By Mr. O'BRIEN (for himself, Mr. ANDREWS, Mr. ANNUNZIO, Mr. BARNES, Mr. CHAPPIE, Mr. CLINGER, Mr. CROCKETT, Mr. DURBIN, Mr. DWYER of New Jersey, Mr. DYMALLY, Mr. EMERSON, Mr. FAZIO, Mr. FISH, Mr. GRAY of Illinois, Mr. GROTBERG, Mr. GUARINI, Mr. HAYES, Mrs. HOLT, Mr. HORTON, Mr. HOYER, Mr. KOSTMAYER, Mr. LAFALCE, Mr. MADIGAN, Mr. MAZZOLI, Mr. MINETA, Mr. MONTGOMERY, Mr. OWENS, Mr. RAHALL, Mr. REID, Mr. RODINO, Mr. ROE, Mr. SHAW, Mr. VALENTINE, Mr. WEISS, Mr. WOLF, and Mr. WORTLEY):

H.J. Res. 427. Joint resolution designating the week beginning on May 11, 1986, as "National Asthma and Allergy Awareness Week"; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. PASHAYAN:

H.R. 3613. A bill for the relief of Wesley P. and Lois R. Kliewer; to the Committee on Judiciary.

H.R. 3612. A bill for the relief of Rodney E. Hoover; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 264: Mr. BONIOR of Michigan.

H.R. 347: Mr. RAY and Mrs. MEYERS of Kansas.

H.R. 604: Mr. RICHARDSON.

H.R. 1229: Mr. EVANS of Illinois.

H.R. 1482: Mr. SUNIA.

H.R. 1616: Mr. PEPPER, Mr. BOSCO, Mr. LANTOS, Mr. COELHO, Mr. GONZALEZ, Mr. MOLLOHAN, Mr. VOLKMER, Mr. DYSON, Mr. LUKEN, Mr. DASCHLE, Mr. GARCIA, and Mr. BROOKS.

H.R. 1662: Mr. ANDERSON.

H.R. 1809: Mr. GRAY of Illinois.

H.R. 1877: Mr. FLORIO and Mr. FOGLIETTA.

H.R. 1920: Mr. FAZIO.

H.R. 2280: Mr. GONZALEZ and Mr. BENNETT.

PETITIONS, ETC.

Under clause 1 of rule XXII,

239. The SPEAKER presented a petition of the Knights of Peter Claver, Lake Charles, LA, relative to apartheid; which was referred to the Committee on Foreign Affairs.

EXTENSIONS OF REMARKS

LATIN AMERICA: POPULATION AND INTERNAL UNREST

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. BARNES. Mr. Speaker, as the administration continues to bend to the desire of those who oppose population programs, rapid rates of population growth in Latin America are creating economic problems, environmental nightmares, and political instability. In an article that appeared recently in the Draper Fund Report published by the Population Crisis Committee, Howard and Ieda Wiarda argue that Latin America's "staggering population growth is likely to have serious political, economic, social, strategic, and other implications."

In the guise of stopping abuses in one country, the foes of population programs have been able to terminate or seriously curtail the long-term commitment of the Agency for International Development to two outstanding population organizations, the International Planned Parenthood Federation and the United Nations Fund for Population Activities. More recently, AID has abandoned its longstanding policy of requiring that contractors provide accurate and reliable information to couples about the wide range of available family planning methods.

Howard and Ieda Wiarda correctly point out that by the year 2000, Brazil's population will reach almost 200 million and Mexico's 113 million (half the current U.S. population in one-fifth of the territory). Food production in the region is not keeping up with population growth, and some experts are already drawing parallels between Haiti and Ethiopia. Although population growth rates have been declining in Latin America, much more needs to be done. The United States has always been viewed as a leader in this field. It is very unfortunate that we are now abandoning this leadership role because the administration has decided to yield in this area to the enemies of family planning programs.

I would like to submit for the RECORD a copy of this article for the consideration of my colleagues.

LATIN AMERICA: POPULATION AND INTERNAL UNREST

(By Howard J. Wiarda and Iêda Siqueira Wiarda, professor of political science, University of Massachusetts)

At current growth rates, the population of Latin America is projected to increase between 1981 and 2001 by 225 million people. Brazil will grow to almost 200 million people, Mexico to 113 million (half the current U.S. population on one fifth the territory) and Central America's population will be similarly burgeoning. This staggering population growth is likely to have serious political, economic, social, strategic, and other implications.

The strong opposition to family planning which came principally from nationalists, the military, the church, the Right, and the Left during the 1960s has changed to general support for voluntary family planning programs in much of Latin America. Too rapid population growth is now widely viewed as aggravating the problems of development and putting severe strains on services and facilities. Surveys show a growing preference among the public for smaller families, especially in cities. The wish to limit family size is particularly strong among women. Both civilian and military elites in Latin America now believe unchecked population growth—and hence an uneducated, alienated, unemployed "mass" of people in the capital cities—spells long-term disaster for society and the nation and, likely, short-term chaos in the form of food riots, mass protests, and general discontent which may destabilize governments.

PRESSURES ON LAND AND AGRICULTURE

Although the person-to-land ratio is lower in Latin America than in India, China or Western Europe, most of Latin America's untapped land is unusable, either so steeply mountainous, densely tropical or barren of topsoil (as in the Amazon Basin) that it cannot support life at even the most meager level of subsistence. The frontiers that did exist (western Brazil, the Colombian and Venezuelan *llanos*) have been settled in the last thirty years.

Latin American landholding has long been characterized by the problems of *latifundia* (large, often unproductive estates) and *minifundia* (holdings that are too small to be economically viable). Food production in most of Latin America has not kept up with population growth. And since most new agricultural production is oriented toward exports rather than home consumption, conditions for most rural populations are worsening.

While subsistence agriculture was never very profitable, it at least enabled many to survive. Today, peasants are forced by large families and competing interests onto less fertile hillsides, often crossing the thin but deadly barrier between subsistence and starvation. In the face of these hardships, there has been widespread abandonment of the land as rural people flock to the cities in search of opportunity. Agricultural countries that were once self-sufficient are now forced to import basic foodstuffs at relatively high prices.

Even in key food producers like Brazil, some people are literally starving to death. Governments pay little attention to "poor people's food" because only export products will help them cope with their international debts. Incomes are so low and unevenly distributed that many *campesinos* cannot afford the food they need and may be experiencing worsening health, as demonstrated by rising infant mortality throughout the region.

ECONOMIC FRUSTRATIONS

The economic dilemmas facing Latin America include widespread poverty, the world's highest *per capita* debt, unemployment and underemployment that may reach between 40 and 50 percent of the workforce, negative economic growth rates over the past five years, immense income inequalities, declining terms of trade, extensive capital flight, little new investment or foreign assistance, increased protectionism on the part of those countries with whom Latin America must trade, rising prices for the goods Latin America must import, and (in some countries) devastation of the economic infrastructure by guerrilla forces.

Governments are caught in a "population-treadmill effect." High fertility countries that face a doubling or tripling of the school-age population by the end of the century will require major increases in spending for education, even if the objective is simply to maintain current, already low enrollment levels. The same population-treadmill effect applies to electric power, transportation, jobs, housing, health care and other basic services. Given present and projected population growth, Latin American economies must move ahead at accelerated rates just to stay even. Nowhere, under present economic projections, is that likely to happen.

In this period of economic contraction, tough decisions must be made about how to spend scarce resources. Today's deprivation will have important effects later on. Insufficient spending on education, for example, will mean a less skilled labor force in years to come when Latin America will increasingly need a better trained population to achieve economic diversification. Additionally, there is mounting evidence that infant malnutrition stunts brainpower. Unchecked population growth means that the severe income inequalities will worsen, as will poverty, unemployment, bitterness and frustration.

URBANIZATION AND MIGRATION

The unprecedented flow from the countryside has made Latin America the Third World's most highly urbanized region with over 65 percent of its population residing in cities, particularly capital cities. Metropolises like São Paulo and Mexico City have grown to 16 or 17 million. Lima, Bogota and capital cities in the smaller countries have also seen their populations double in the last two or three decades. The same is true of Santo Domingo, totaling 300,000 in 1950, now with over a million people, some of the worst slums in Latin America and virtually unmanageable problems.

Social services are breaking down in all Latin American capitals to the extent that over half the inhabitants lack water or sewage facilities. We sometimes read of "ungovernability" in the advanced industrial nations, but that is nothing compared to the increasingly ungovernability of most Latin American capital cities. The relation between size, crowding and internal tension is complex. Crowding may not be a direct cause of violence, but it does provide a set of conditions in which tension, violence, and various forms of aberrant behavior are more likely to occur.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Mexico City adds at least 350,000 migrants from rural areas and small towns each year—in addition to its net annual increase by births of 2.5 percent, another 425,000 people. Projections place Mexico City's population at 26 million by the year 2000. But the city already lacks the governmental infrastructure, economic strength and social services to handle its current population. It has some of the world's worst pollution, its traffice problems are legendary, and it is literally sinking several inches a year as groundwater is progressively drawn from its swampy base. Conservative estimates put infant deaths at 30,000 a year from the effects of inadequate sewage facilities and air pollution alone.

Mexico City is not unique in Latin America. Urban life requires a large and complex set of services—water, sewage and electricity to say nothing of schools and housing—that cannot be easily or quickly scaled up as population growth and migration accelerate. Latin American cities are proverbially short of money. Local governments have little or no taxing power and in most cases also lack the administrative and technical capacity to cope with the doubling of population size which may now occur in a single decade.

There are, of course, benefits to urbanization. These include economies of scale, differentiated labor markets, and concentration of suppliers and consumers. However awful the conditions in city slums, the opportunities there are greater than in the countryside. Three out of four migrants make economic gains in the city and have better access to the limited services provided by the government. Women can also more easily find employment as factory workers, maids or vendors. The sheer size and uncontrolled nature of Latin America's cityward migration, however, threaten to produce such paralysis and chaos as to cancel the gains.

YOUTH AND RADICALISM

Because of high birthrates and public health improvements, half the population in virtually all Latin American countries is under eighteen years of age; in some, half is under fifteen. The implications for politics and public policy are immense. The dependency ratio, which compares the economically inactive, or dependent, population to the economically active and productive population, has undergone a dramatic increase. This rising dependency ratio has increased internal tensions, as a smaller pool of productive persons is being called upon to support more dependents and an ever larger requirement is placed on governments to carry the burden of the vast youth population.

There is mixed evidence on the relationship between youth and radicalism but it is certain that in Latin America most of the generation of university-trained young people are Marxists. As many as 45 percent of college-aged people are activists. The implications of this disaffected group coming to power are enormous, particularly since the generation currently under fifteen is likely to be even more embittered and radical.

In our preoccupation with the political and ideological aspects of the Nicaraguan Revolution, we tend to forget that it also marked a sharp generational change. Both the Somoza regime and its more moderate opponents represented one generation; the Sandinistas represent a whole new age group coming to power. In 1979 most of the comandantes were in their late 20s or early 30s; the Revolution's strongest supporters are also at the younger end of the age spectrum. In fact, the Sandinistas lowered the voting age for the 1984 election from eighteen to sixteen in order to increase their margin of victory.

It is not likely that there will soon be a wave of "Nicaraguas" sweeping over Latin America—although in quite a few countries radical change led by the new generation can be expected. More likely is that demagogic politicians and political movements will seize upon the aggravations, pent-up frustrations, and radicalism of youth for their own purposes. The spectacle of high school or university students and unemployed graduates leading protest marches of recent migrants or urging peasants to take agrarian reform into their own hands is now common in Latin America. These are indirect effects of spiraling population growth. Those in power confronting such "direct action" do not necessarily see the culprit as population growth *per se*, but rather as a malevolent opposition using "marginals" (the urban and rural unemployed) as shock troops. The predictable outcome is usually government overreaction, repression and the reassertion of authoritarian controls.

RISING SOCIAL TENSIONS

Tension, frustration and violence in society are likely to have a political impact. Unemployment in most Latin American countries may now reach 20 to 25 percent. Underemployment, often referred to as "invisible unemployment," may add another 20 to 25 percent, including "penny capitalists" who sell a few cigarettes a day, or shine shoes for a few customers. This "lumpen proletariat," the residents of urban slums surrounding all Latin American capital cities, is a powder keg waiting to explode. Few if any social or city services reach their neighborhoods. Living conditions are wretched; the slums are filthy, unhealthful and increasingly crime-ridden. The incidence of abandoned children (10 million in Brazil alone) has reached epidemic proportions. These are no longer isolated, diffused, "sleepy" peasants, fatalistically resigned to their present circumstances, but people with ambition and expectations who have been uprooted and among whom revolutionary and demagogic appeals are likely to find receptivity.

POLITICAL INSTABILITY

It takes relatively little—a change in bus fares, an increased tax on gasoline, rising prices for basic foodstuffs—to set off lawless protests in the cities' teeming slums. Protests and food riots have recently occurred in Brazil, Colombia, Peru, Nicaragua, Mexico and the Dominican Republic. They are generally unorganized, what social scientists call "anomic movements," without leadership or clear political goals. But these protests can be captured by organized political movements with the potential to undermine governments. Such movements, if they occur when other circumstances are propitious (for example, when the middle class is also feeling austerity's bite, the armed forces are divided, and the government is weak and/or illegitimate), can produce revolutionary consequences.

The prime recruiting grounds for such destabilizing movements are capital city slums, where the legions of unemployed and underemployed are concentrated, where the surplus population gathers with nothing to do, and where abandoned street children are looking for adventure and diversion. It can be a short march from there to the national palace. Movements arising from social tensions derive from unchecked population growth, and we are likely to see more and more of them in the future.

Latin American political system have depended on an ever-expanding economic pie to continue functioning in an efficient, democratic context. As long as there were more pieces of the pie to hand out, the standard of living for most groups could be expected to increase. With the negative economic growth rates of the past several years, however, competition has intensified for the fewer available "pieces." Violence and full-scale revolutionary challenges have increased and existing political systems have begun to unravel—in El Salvador, Nicaragua, Bolivia, Peru and elsewhere.

There is no doubt that mass discontent and challenges to established ways and institutions have been fueled by the population and urban explosions. Although the relationship is indirect, it is no less important. The youthfulness of Latin American populations, the absence of jobs and opportunities, the growing impatience, the economic downturn, and rising social tensions have all combined to make traditional accommodative politics in Latin America difficult at best and well-nigh impossible in certain countries.

In summary, there is a close but indirect relationship between unchecked population growth, spiraling socioeconomic problems and the potential for political breakdown, destabilization and internal unrest in Latin America. It is not necessary to overstate the case or paint it in "crisis" terms in order to recognize the severity of the problem. Population growth rates in Latin America have begun to decline in recent years. Moreover, the problems of the area are not due to population growth alone; economic underdevelopment, social tensions and the weakness of political institutions are also prime causes. Nevertheless, uncontrolled population growth is an important factor adding to the possibility of increased tension, fragmentation and destabilization. As such, it is not only harmful to Latin American but also carries major implicatons for international political alignments and involvement in the region by the major powers. Hence and politically viable policy responses are required.

MARYLAND, SECOND DISTRICT, OPINION POLL RESULTS

HON. HELEN DELICH BENTLEY

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mrs. BENTLEY. Mr. Speaker, the results of a poll run in my district, the Second of Maryland, showed some surprising answers from over 12,250 households. It will possibly be of interest to our colleagues. I ask that the results of this poll from the month of September be included in the extension of remarks for today.

SECOND DISTRICT QUESTIONNAIRE RESPONSES FROM AUGUST

Thank you for your participation in answering the questionnaire which we sent to you in August. We received an overwhelming number of responses, 25,024 to be exact. Here are the results of the opinion poll for your information. It has been very helpful to me to learn your opinions on such very

complicated issues which I must decide upon as a member of Congress.

[In percent]

	Yes	No	Undecided
1. In general, do you approve of the President's tax reform proposal?	56	38	5
2. In order to reduce the Federal deficit, would you approve of a general tax increase?	35	61	3
3. Do you think the United States should help nations in Central America which are under attack from Soviet-backed internal military forces?	69	24	5
4. Do you favor a constitutional amendment that would allow voluntary prayer in our public schools?	71	25	2
5. Do you support the President's strategic defense initiative?	68	24	7
6. Do you support efforts underway to reclaim the Chesapeake Bay and to protect the environmental balance of its tributaries?	93	4	2
7. Do you believe the United States should impose the same restrictions on imports from its foreign trading partners that they impose on U.S. exports?	85	11	3
8. Should a balanced budget be mandated by law?	64	30	5
9. Do you think America is stronger and more respected in the world than it was 5 years ago?	51	44	4
10. Should Congress pass legislation to reaffirm the right of citizens to keep and bear arms?	49	45	5

GROWING HUNGER IN AMERICA

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. MILLER of California. Mr. Speaker, despite the economic recovery, which many Americans are enjoying, the number of hungry people in America continues to grow outpacing our anti-hunger policies.

Whether one looks at the just-released Bread for the World study, "Unfed America, '85," or the Food Research and Action Center's new analysis of the Food Stamp Program, one cannot escape this sad truth. These reports come on the heels of earlier studies issued by the Physicians Task Force on Hunger and the U.S. Conference of Mayors which reached the same conclusions.

Millions of our impoverished children, our elderly, our low-income pregnant mothers, deserve better. In these studies, church volunteers and policy analysts alike tell us that the number of malnourished continues to grow and the programs we have cannot or do not serve them adequately. They tell us that the human tide of misery and want is continuing to rise.

Church volunteers who serve hungry Americans report that in 1985 they served an average of 16.2 percent more people each month. As reported in "Unfed America, '85," "our churches are being called upon to feed and assist growing numbers of individuals and families. The severe crisis of the early 1980's has been a stubborn problem that refuses to go away." Thirty-six cities were surveyed in this study, which looked at all the major Federal food programs, as well as the role of private organizations.

New levels of hunger are not inevitable. This ugly tide has risen before, and we have battled back.

As always, we must begin by facing the facts, and the facts are that our anti-hunger efforts have been curtailed.

The second survey, by the Food Research and Action Center, conducted in 309 grocery stores in eight cities, shows that it is literally impossible for an impoverished family of four to feed itself on the food stamps they receive. In fact, just to purchase the very modest "thrifty" food plan, as defined by USDA, that family would need another $80 worth of stamps.

So, this report proves that our major program to help impoverished Americans meet normal nutritional needs, is not doing the job.

We've got to do better. In the face of this evidence, and numerous similar studies over the last 5 years, doing nothing is simply malfeasance on our part. To do nothing about hunger—which we have the knowledge to alleviate—is an abdication of our most basic responsibilities.

I am submitting two Washington Post articles which describe in greater detail the studies by Bread for the World and the Food Research and Action Center.

The articles follow:

[From the Washington Post, Oct. 19, 1985]

CHURCHES REPORT NUMBERS OF HUNGRY ON INCREASE

(By William Bole)

Church-run emergency food programs are serving rapidly increasing numbers of Americans despite the current economic recovery, according to a nationwide survey released here.

A national Christian antihunger organization that conducted the study also reported that people are now using the programs not as emergency sources of food but as permanent supplements to public assistance programs.

"There are still too many hungry people in our communities. Our churches are being called on to feed and assist growing numbers of needy individuals and families. The severe crisis of the early 1980s has become a stubborn problem that refuses to go away," said the study by Bread for the World, a 49,000-member ecumenical advocacy organization.

Titled "Unfed America '85," the report is based on research in 36 cities and counties by volunteers who take part in Hunger Watch U.S.A., a food-monitoring project. The study estimates that 1.5 million are going hungry in the areas surveyed, and that federal food programs lack adequate funding to meet the needs of hungry Americans.

When Hunger Watch began in 1982, Bread for the World leaders said publicly that the data-gathering project would last only a year or two, until the effects of the economic recession and high unemployment of that period wore off.

"It is fall 1985," the report said. "Parts of the economy have improved, but unemployment and under-employment still plague many areas of the country. Congress has not restored federal public assistance programs to their pre-1982 levels and the impact of Food Stamp program cuts continues to be felt. The need for Hunger Watch U.S.A. surveys has continued."

The study found that the number of people served in private and voluntary food programs, most of which are church-run, has increased during this year by an average of 16.2 percent a month.

Monthly increases of 30 percent were reported in Boston, where an average of 123,389 people use the programs every month; Houston, which serves 17,916 people a month, and Nashville, which serves 1,913 people each month.

Although the rate of increase is slower than it was between 1982 and 1984, this "does not necessarily mean that the hunger problem is diminishing. Instead it may mean that emergency food providers are reaching their capacity to expand services," wrote the authors of the 50-page report.

The study cited a statewide survey in Utah earlier this year that concluded: "While the rate of caseload increases has slowed during 1985, this may be the result of the inability of agencies to serve more people rather than a leveling of demand."

The survey cited Montgomery County as one of a number of places where food programs have cut back hours and tightened eligibility standards for aid because of lack of staff and funds. Others that it mentioned included Appleton, Wis.; Boulder, Colo.; Melbourne, Fla.; Memphis, Milwaukee and Nashville.

Traditionally acting as emergency sources of food, the churches are beginning to serve a new role, the report said. "Private food providers say they are seeing their role transformed from that of short-term emergency food provider to a long-term, permanent supplement to the public-assistance system."

Local coordinators of the study attributed this change to the inadequacies of the federal food stamp program. "These programs are intended to fill a gap, not to sustain the nutritional needs of low-income individuals and families over an extended period of time," said the report.

In other findings, the group reported that "substantial numbers of people" who are eligible to receive food stamps and aid from other food programs, such as those aimed at women and children and the elderly, are receiving no benefits. For instance, in the cities surveyed by Bread for the World, about 60 percent of the people eligible for the Women, Infants and Children program were not participating in it.

As reasons for lack of participation, the report cited the "social stigma" often attached to the programs, lack of information about them and the difficulties of going through the bureaucratic process of getting assistance.

"The real tragedy is that while we hear reports of an improving economy, there are still hungry people in our communities," said Arthur Simon, executive director of Bread for the World.

In its report, Bread for the World called on Congress to raise food stamp benefits by 10 to 25 percent and expand the WIC program. The group also recommended a federal system for monitoring hunger and malnutrition in the United States. In addition, it called on government or private agencies to provide seed money to expand voluntary emergency food programs.

[From the Washington Post, Oct. 19, 1985]

FOOD STAMP ALLOTMENT INADEQUATE, GROUP CHARGES: SURVEY FINDS COSTS FOR "THRIFTY" PLAN MUCH HIGHER THAN ESTIMATED BY USDA

(By Spencer Rich)

The Agriculture Department's allotment of food stamps for a typical U.S. family with

no other income is not enough to cover the cost of USDA's minimum monthly food plan in major American cities, an advocacy group charged yesterday.

Michael Lemov, director of the Food Research and Action Council, said a FRAC survey of 309 grocery stores in the District and seven other major cities found that it would cost a family of four an average of $348.48 to buy the USDA's "Thrifty" food plan, purchasing national brands off the shelf. But, it noted, a family of four with no other income receives only $268 worth of food stamps.

The food plan ranged in cost from a low of $377.20 a month in Philadelphia to a high of $412.88 in the District.

Lemov said the department, using its national surveys, has estimated that the plan would cost only $268 a month, which it uses as the basis for its food stamp allotment.

Lemov said the FRAC survey, supported by a grant from the American Can Co. Foundation, shows that "poor people are being shortchanged on food stamps. This helps explain why people are running out of food stamps by the end of the month and are going to food kitchens and pantries to supplement their food." The FRAC survey, taken during the summer, was based on food purchases for a week's portion of the Thrifty budget in each city.

Betty B. Peterkin of USDA's Human Nutrition Information Service, said the department could not explain the cost discrepancies without a detailed analysis of the FRAC survey.

But she said a preliminary look suggested that FRAC had overestimated by tenfold the amount of ground beef called for in the Thrifty budget, adding $11 a week to costs, used higher-priced breadfast cereals instead of more moderately priced ones and had overestimated needed supplies of certain oils and mayonnaise.

However, FRAC disputed these contentions, saying that, for example, it had substituted the higher level of ground beef for other meat, poultry or fish components to the Thrifty plan.

According to the FRAC survey, the cost of the Thrifty plan, which the department estimates is the minimum adequate food a family needs for a month, was $381.04 in Boston, $383.28 in Chicago, $377.56 in Detroit, $399.76 in Houston, $384.12 in New York and $400.60 in San Francisco, when national brands were purchased. If store-name brands were used, the monthly cost $20 to $60 a month less, with Detroit the lowest at $338.36—but still far higher than the $268 food stamp allotment.

Under the food stamp program, low-income families are allowed to deduct from their income up to 18 percent of earned income, plus $98 a month as a standard deduction, plus certain amounts for extra-high rents and child care.

If that amount comes to zero, they are allowed to obtain food stamps equal to the full cost of Thrifty budget.

However, if their income after deductions is more than zero, they are expected to spend 30 percent of it on food, and they get food stamps to make up the difference between that amount and $268—the cost of the Thrifty plan.

Thus, a family of four with gross income of $446 a month—about average for recipients—might have net income of $260 after deductions.

In that case, it would be expected to spend $78 out of pocket for food (30 percent of $260) and it would get $189 in stamps, bringing its food budget up to about $268 (figures are rounded).

Lemov said that it is absurd to think that a family with $446 gross income a month, receiving $189 in food stamps, could pay another $200 or so a month out of pocket to cover the average of $384.48 that FRAC said is needed to buy the Thrifty food plan.

PERILS OF AMERICA'S ENERGY FUTURE

HON. MICHAEL L. (MIKE) STRANG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. STRANG. Mr. Speaker, over the next 2 days, this House will most likely once again vote to put America's energy future in peril by adopting legislation to abolish the U.S. Synthetic Fuels Program. This time, the opponents of synfuels will attempt to go even farther, by essentially abrogating good-faith, formal contracts, properly executed under existing law and Federal energy policies.

This lack of a thorough understanding by Members of Congress of the crucial national importance of a viable domestic synfuels program is also exhibited by some members of the administration—particularly Secretary of Energy John Herrington. Mr. Herrington demonstrated his lack of understanding in a recent article in the Wall Street Journal.

Secretary Herrington's comments contained several outright misstatements of fact. I would like to share with my colleagues, given the pending debate here over the next 2 days, the following "letter to the editor" which I sent to the Wall Street Journal to set the record straight.

HOUSE OF REPRESENTATIVES,
Washington, DC, October 18, 1985.

LETTERS TO THE EDITOR,
Editorial Page, the Wall Street Journal, New York, NY.

DEAR EDITOR: Given the demonstrated lack of understanding of America's energy security needs as that exhibited by many in Congress and most recently in Op Ed space provided by your newspaper ["The Synfuels Energy Dinosaur" 10/9/85] by Secretary of Energy John Herrington, I most respectfully request an opportunity to respond to correct the record.

It is true that the Synthetic Fuels Corporation (SFC) was born amidst the most recent and severe energy supply disruptions of the early and late 70's. Wartime has also found our nation mobilized to begin ventures in synthetic fuels. Then, as now, when the emergency passes, the Congress conveniently loses sight of the long-range necessity and retreats from what turned out to be a pusillanimous conviction. We wait for the next crisis, which will now surely come by the mid 1990's, to act once again to spur synfuels development, having failed to follow through on prior occasions. The electorate should rightly ask why we must always be reacting to energy emergencies, instead of acting to chart a sound course of action.

The Congress and the Administration did act to chart such a course for energy independence in 1979, when the Energy Security Act was put into place. We set production goals, and earmarked an $18 billion dollars line of credit for the newly created Synthetic Fuels Corporation to invest in our national energy future. But as the SFC sought to define and refine its mission, the immediate crisis passed. Late last year, spurred by smoke and mirror budget claims, the SFC line of credit (not actual expenditures or obligations) was cut about in half, with enough remaining essentially to fund only present letter-of-intent projects. The SFC Board was reconstituted and began to restructure the organization and its goals, and to streamline management and projects under consideration.

The SFC has now converted the letter-of-intent for the Union Parachute Creek Project in Colorado to a contract. The original letter-of-intent was for $2.7 billion. The contract is for a scaled down project with $500 million in price and loan guarantees. Before these price guarantees, and the original $400 million in price guarantees (provided by the Department of Energy) are triggered, the project must first begin producing in commercial quantities. The fact is, not one red cent of taxpayer money has been given to this project, and none will unless and until production is underway. On the other hand, Unocal stockholders have invested over $800 million in private capital in this project and will commit an additional $300 million, for a total of over $1.1 billion. As with any massive conversion from demonstration to commercial prototype, problems have emerged. But those problems are being resolved and are becoming opportunities to assist America's security.

Secretary Herrington's assertion that the Union process "has major technological weaknesses" is an outright misstatement of facts. On another occasion he termed it a "failed technology". While it is true that the materials handling problems on a small site have been difficult, it is also true that the operation of the retort and the refinery process are miracles of technology, that work flawlessly. This is precisely the reason the nation needs a small program to apply technology in a commercial setting at commercial scale.

The Energy Secretary claims, "Both Parachute Creek and Seep Ridge have technologies applicable to only a small portion of the U.S. oil-shale resources." This simply is not true. The Unocal Parachute Creek technology is applicable to the bulk of U.S. oil shale reserves, estimated to be about 600 billion barrels recoverable. The Seep Ridge technology is applicable to a small fraction of the total U.S. reserves; but the total reserve is so large that that small fraction is still enough resource to make a significant, and relatively low-cost contribution to U.S. oil reserves.

Mr. Herrington says, "six to 10 years from now, when subsidies are exhausted, Union could walk away from the project." The fact is, pioneer projects are seldom operated indefinitely, in the private sector or elsewhere. They are typically shut down after six to ten years of successful operation, either because the operating experience suggests ways to build an even better technology or because market conditions do not then justify continued operation. If Unocal chooses to shut down the project after producing enough fuel to collect on the price supports, the technological lessons will have been learned and the taxpayers will have received the benefit of their investment. There is no reason to continue forcing operation of a project once it has accomplished its purpose. The SFC assistance is designed

explicitly to avoid locking the government into long-term operating subsidies for projects.

Mr. Herrington claims, "There is little point in building demonstration projects when the fuel costs are two, three or four times that of current and anticipated market prices. . . . Both [projects] would have guaranteed price supports at a level several times the market price." Again the Secretary misses the mark for two reasons. First, the pioneer projects assisted by the SFC are intended to provide experience with commercial-scale equipment in a commercial setting in a cost-effective way, and are not necessarily designed or sized to minimize per-barrel costs. Neither unit production costs nor the level of price supports necessary to pay for these projects bear any simple relationship to the production costs expected in full-scale plants using the improved and proven technology. Second, the whole point of the synfuels program as now defined by the SFC Board, is to gain experience *before* oil prices increase to the levels at which synfuels pay for themselves. If this nation waits until prices increase enough to make pioneer plants pay for themselves, billions of dollars will be wasted while the industry searches for the best technologies, corrects mistakes made in many plants simultaneously, and delays investment until the uncertainties are reduced. The nation should invest in synfuels now, not because the pioneer plants will pay for themselves now or in the future, but to provide insurance against the possibility of future higher prices.

Secretary Herrington says, "The development of a commercial synthetic fuels industry at a pace envisioned by Congress in 1980 would require huge expenditures of federal tax dollars that would not be offset by economic benefits." He is exactly right, but not in touch with present realities. Precisely because of those concerns, the SFC Board in its updated Business Plan and new Comprehensive Strategy Report to Congress, explicity rejected the 1980 congressional goals and objectives, stating instead that it would support a few plants that would lay the base for the likely future expansion of the industry.

"Advanced technology now under research and development by industry and the Department of Energy," the Secretary asserts, "will ultimately surpass these plants' existing technologies." There are no miracle technologies on the horizon in this field. Surely the Secretary is aware that the SFC Board and its technical staff are aware of what technologies are out there. An SFC staff member, Eric Reichl, is a key advisor to the DOE research program. while improvements can be expected, most of these will be evolutionary developments from existing technologies and will not occur until and unless some pioneer plants are built. It is misleading at best for Secretary Herrington to hold out false hopes that some secret formula is about to emerge from the research labs to revolutionize the synthetic fuels industry.

Finally, Mr. Herrington says, "The SFC is about to lock up more than $1 billion in taxpayer-supported subsidies for two uneconomical . . . oil shale projects." The SFC has awarded a $500 million loan and price guarantee amendment for the Unocal project. Secretary Herrington fails to mention that it was DOE that approved the original $400 milion price guarantee which he now opposes as a "microcosm of what is wrong with the SFC."

To wait, as Secretary Herrington and some Members of Congress suggest, for a different oil market and different budget season, will only perpetuate the mistakes of the past and compound the perils of America's energy future.

Sincerely,

MICHAEL L. STRANG,
Member of Congress.

LEE HAMILTON CALLS FOR FUNDAMENTAL REFORMS IN THE PHILIPPINES

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. SOLARZ. Mr. Speaker, I would like to share with my colleagues a thoughtful and timely essay by Hon. LEE HAMILTON on the deteriorating situation in the Philippines.

In the article, published in the Christian Science Monitor on October 17, Mr. HAMILTON writes that the United States "must unambiguously support fundamental reforms" in the Philippines. He notes that the New People's Army [NPA], the Communist insurgents fighting the Government of the Philippines, now consists of 15,000 guerrillas. He points out that President Ferdinand Marcos is "the insurgency's greatest asset" and that "the NPA can be stopped and democracy restored in the Philippines only if major political, economic, and military reforms take place."

Once again, Mr. HAMILTON has made a lucid and insightful contribution to an important foreign policy issue. I very much hope that this essay by one of the most respected Members of the Congress will be read widely not only in our own country, but in the Philippines as well.

The article follows:

IT'S TIME FOR SOME TOUGH THINKING ABOUT THE PHILIPPINES

(By Lee H. Hamilton)

Once a promising democracy and supporter of United States interests in the Pacific, the Philippines now threatens to slide from authoritarianism and corruption into a radical revolutionary society that is inimical to the U.S. position in Asia. This island nation of 58 million people, barely the size of Nevada, confronts serious problems: a discredited and authoritarian government under Ferdinand Marcos, which has seriously mismanaged the economy and alienated much of the population; a democratic opposition that is badly fragmented and ineffectual; and a well-organized and rapidly growing communist insurgency.

An anti-American regime in the Philippines would threaten important American interests in the Pacific. A U.S. colony until 1946, the Philippines is one of our oldest allies in Asia. U.S. military facilities at Subic Bay Naval Base and Clark Air Base are essential for defending sea lanes and supporting U.S. forces in Asia, the Western Pacific, and the Middle east. Alternate bases would be expensive to develop and less effective. U.S. presence at these bases is a key factor in regional stability. We also have important economic interests in the Philippines. U.S. private investments exceed $2 billion, more than 50 percent of total foreign investment there. The country is an important market for U.S. goods, inlcuding food grains and machinery. U.S. and U.S.-supported financial institutions hold a majority to the $26 billion Philippine debt.

The communist insurgency is the most serious threat to U.S. interests in the Pacific. The insensitive Marcos government is that insurgency's greatest asset. Fifteen thousand communist guerrillas now operate freely in one-third of the country, and the political base of the movement is even more widespread. U.S. observers say that the Communist New People's Army could take over the country by the end of the decade.

The NPA can be stopped and democracy restored in the Philippines only if major political, economic, and military reforms take place. As the country moves toward presidential elections in 1987 and another round of base negotiations, the U.S. must either exert pressure on President Marcos sufficient to ensure significant reform or dissociate our government from his. While we must be sensitive to meddling in Filipino affairs, our historic relationship does not permit us merely to observe developments. Many Filipinos not only admire American values, but look to the U.S. to protect their interests. They are disturbed by U.S. financial support for Marcos's regime and our tolerance of its corruption and authoritarianism.

The Philippines receives more than $250 million a year in direct U.S. economic and military aid. Most of this aid is part of a five-year pact that gives the U.S. access to military facilities in the country. In addition, the U.S. provides Export-Import Bank loans and substantial Commodity Credit Corporation credits to finance agricultural commodities. The U.S. also supports more than $500 million in aid the Philippines receives annually from international organizations. This aid should be conditioned on economic, military, and political reform.

The U.S. must help shore up electoral and democratic institutions. We have publicly urged political liberalization and have expanded contacts with some opposition groups. Several initial reforms have been taken by Marcos, some of them grudgingly. Parliamentary elections in 1984 showed two trends: growing disaffection with the Marcos regime and support for democratic processes, rather than radical strategies, to resolve problems. Perhaps most discouraging, however, has been the ability of opposition leaders to set aside regional and personal differences and organize around a single leader who could seriously challenge Marcos.

The U.S. must also urge military reform and a just resolution of the trial for the 1983 assassination of opposition leader Benigno Aquino. Recently, a program to rebuild the armed forces was developed to combat the communist insurgency through better operations, morale, and discipline and stronger public support. These reforms will test the nation's ability to deal with its growing insurgency. They are in jeopardy pending the outcome of the Aquino assassination trials. An initial report concluded that a military conspiracy was behind Aquino's death, implicating the armed forces chief of staff, Gen. Fabian Ver, who was placed on leave. If General Ver is acquitted and returned to power, most observers expect a return to the repression that had given the military a bad reputation under his leadership.

The financial crisis is serious: Real gross national product declined by 5.5 percent in 1984 and will, at best, achieve zero growth this year. Underemployment and unemployment, as well as the number of Filipinos living below the poverty line, is rising. "Crony" capitalism is rampant, with President Marcos bestowing economic favors on his friends. The country also has severe debt problems. Structural reforms are necessary, especially in the area of deregulating agriculture and trade.

The U.S. faces a real dilemma in the Philippines. For all his faults, Marcos has been a loyal friend and a strong anticommunist. Some observers recommend letting him handle things his own way. But he has been the dominant force in Philippine politics for 20 years and is not likely to bring about the reforms necessary to stabilize the country. His era is nearing its end, and U.S. policy must recognize the coming changes. The U.S. must unambiguously support fundamental reforms. Democratic opponents of Marcos must also recognize, however, that the fate of the country is in their hands.

IMMIGRATION AND DISCRIMINATION

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. GARCIA. Mr. Speaker, I am submitting for the RECORD testimony by Raul Yzaguirre, president of the National Council of La Raza, on the discriminatory impact of employer sanctions, now contained in the immigration bill pending before the House Judiciary Committee.

I think Mr. Yzaguirre offers keen insight as to why so many of us in the Hispanic community are fearful of employer sanctions. I hope my colleagues will take a minute to read his testimony.

STATEMENT ON DISCRIMINATION RELATED TO EMPLOYER SANCTIONS AS CONTAINED IN H.R. 3080

(By Raul Yzaguirre, President, National Council of La Raza)

Mr. Chairman, and members of the Subcommittee, on behalf of the National Council of La Raza I wish to submit the following statement on the discriminatory impact of employer sanctions legislation for the record. I do so in my capacity as President of the National Council, which is a private, nonprofit Hispanic organization dedicated to the improvement of the socio-economic status of all Hispanic people in the United States.

I. INTRODUCTION

The Immigration Control and Legalization Amendments Act of 1985 (H.R. 3080) relies on employer sanctions as its central measure to reduce and deter undocumented immigration. As in earlier debates, employer sanctions have raised concerns among Hispanic groups, who oppose them because they are inherently discriminatory (see attachment, National Council of La Raza Issue Brief, "Employer Sanctions and Employment Discrimination," August 1983).

In the past, arguments on the discrimination issue have centered on theoretical considerations, by attempting to predict the ways in which employers were likely to react to the provisions rather than discussing empirical, "real world" evidence of actual employer responses. A growing body of evidence directly links employer sanctions with increased employment discrimination. The National Council urges the Subcommittee and all members of Congress to closely examine this evidence in its consideration of employer sanctions and various systems of redress for those affected by sanctions-related discrimination.

II. THEORETICAL CONSIDERATIONS

A. Employer responses to sanctions

Experience in labor market and employment practices suggests that efforts to monitor and control the hiring process will bring about different types of reactions from different types of employers. It is reasonable to assume that many employers would comply with employer sanctions in completely nondiscriminatory ways. Others, however, are likely to act in ways that would have the effect of job discrimination. For example, those employers who would be inclined to discriminate anyway would be provided a legal pretext for such discrimination. If legislation passes, these employers will be given an affirmative defense against discrimination charges, since they could contend that they had not been satisfied that the applicant was authorized to work.

A second, larger group of employers may discriminate through good faith efforts to comply with sanctions statutes. Employer sanctions would create within applicant pools a subgroup of persons who, on the basis of physical characteristics, language, or other factors, appear to be "foreign" to employers. Some employers seeking to avoid sanctions, as well as those who want to avoid burdensome paperwork, may choose not to hire Hispanics or other "foreign-looking" applicants.

Given the complex, subjective nature of the hiring process, it is unclear how all employers will react to sanctions. However, because of the way the threat of substantial penalties is likely to affect the process—because it will be much easier to avoid hiring "risky" individuals—discrimination related to the employer responses outlined above would very likely occur in a considerable number of cases.

B. Uniform verification standards

Almost all of the major proponents of employer sanctions have consistently maintained that, in order to avoid discrimination, employers must be required to inspect and record the documents of all persons seeking work. This process—the inspection of work authorization documents for all new hires—is known as uniform verficiation. Proponents argue that uniform verification will eliminate the possibility of employers verifying the eligibility only of "foreign-looking" applicants, and thus prevent differential treatment of any applicants during the hiring process.

However, previous legislation has not fully incorporated all of the elements of the uniform verification process. First, under verification provisions of last year's Simpson-Mazzoli bill (S. 529/H.R. 1510), employers would have been required to verify eligibility only for all hires; uniform verification standards would not be required for all applicants, thus allowing employers to "screen out" applicants who appear "foreign."

Second, penalties for violations of uniform recordkeeping provisions were substantially lower than those related to the knowing hire of undocumented aliens. Thus, while the employer who violates uniform verification requirements by checking only "suspect" applicants' documents risks a small fine, he or she avoids much larger employer sanctions fines as well as increased administrative burden—i.e., incentives to "play it safe" outweigh incentives *not* to discriminate. Further, convictions and penalties for mere recordkeeping violations would be very unlikely if, as would often be the case with discriminating employers, no undocumented aliens were actually hired.

Theoretically, uniform verification might partially alleviate discrimination. In this respect, H.R. 3080 is better than its Senate counterpart (S. 1200). Neither bill, however, includes all of the key elements of a uniform verification system.

III. EVIDENCE OF EMPLOYMENT DISCRIMINATION RESULTING FROM EMPLOYER SANCTIONS

A growing body of evidence strongly suggests that, when faced with complicated hiring restrictions carrying heavy penalties, employers, especially small businesspersons, are confused about their actual liability. Daniel Leach, former Vice-Chair of the Equal Employment Opportunity Commission (EEOC), has pointed this out in reference to employer sanctions:

"The smaller employer is perhaps where some of the problems in Title VII remain most severe: those that lack the sophistication, don't understand the law, choose not to deal with the law. That's a problem for EEOC as it is. I'm sure it would be a problem and continue to be a problem with any legislation that's proposed in [the employer sanctions] area." [1]

History demonstrates that, due to their confusion and uncertainty, many employers over-react and take overly zealous measures to ensure compliance with immigration laws. For example:

After Project Jobs, a country-wide sweep operation conducted by the INS in 1982, Time magazine reported that employers involved in the over 300 raids were reluctant to rehire even those workers who proved their legal status to INS officers.[2]

Officials in the Chicago Mayor's Office of Employment and Training reported that in the fall of 1984, amid extensive press coverage of immigration legislation, the Office received a call from an employer who asked that they "not send Hispanics" because he believed employer sanctions had been adopted.[3]

Colleen Logan, a high-level official in the California Department of Industrial Relations, attested before the U.S. Commission on Civil Rights (USCCR) to the relation between this confusion and discrimination. The USCCR reported that:

"As she put it, I can't say that they did [understand what to screen for], because I really didn't understand it totally. She further testified that the response of some employers was to screen employees on the basis of the color of their skin or their speech accent." [4]

[4] U.S. Commission on Civil Rights, "The Tarnished Golden Door," 1983.

The criteria by which employers screen applicants can be very damaging to persons who fit immigrant stereotypes. When Texas Businessman J.E. Kastrop, who testified in 1984 before a Texas Congressional committee on an employer sanctions bill, was asked how he determined the immigration status of applicants, he replied:

"We check the records. We check them out. Gentleman, if you have a fellow come up to your office, and he can't speak English, and he is looking for a job, and he doesn't have many credit cards, and he lives with six other guys that are illegal aliens, you don't have to look twice to determine this guy shouldn't be in this country." [5]

Specific examples of this type of discrimination were reported during House consideration of the Simpson-Mazzoli bill last year, as employers began to prepare for the enactment of sanctions legislation. The effects of these employer reactions ranged from differential treatment to denial of employment based in skin color or accent. Some examples included:

Bernard Brown, Vice President of the Coalition of Apparel Industries, acknowledged that, to prepare for employer sanctions laws, the 600 employers he represented were instructed to ask applicants who were "Latinos or look[ed] like Latinos" for immigration documents.[6]

Similar employer responses were reported in Utah, where in one case 20–40 suspected individuals were summarily fired by a foreman.[7]

The director of a California manufacturing plant has confirmed that verification processes led directly to discrimination: "I hate to say this, but I'm sure there have been a lot of times that I've discriminated against Latinos. Sometimes you just don't have time to wait. . . . If I have four applicants for a job, I would naturally incline toward the one that's not Latino. . . . Most employers would rather play it safe. . . ." Because of these new screening processes, Hispanics dropped from 75 percent to 50 percent of the company's workforce.[8]

The Chairman of the Texas Governor's Task Force on Immigration stated in July 1985 that the Task force "heard from a number of individuals in Texas, including some employers, who stated that they would be more likely to discriminate against Hispanics if employer sanctions passed, in order to avoid any possibility that they would be in violation of the law.[9]

Employers in these examples did not act with intent to discriminate. They responded to the threat of penalties by "playing it safe"; in the process, Hispanic job applicants were put at a serious disadvantage, and in many cases were denied employment.

Arguments that imposition of employer sanctions will increase employment discrimination have moved from a theoretical to a factual base. It is already known that some employers will react to sanctions in discriminatory ways. The only question is one of the scope of this discrimination.

IV. POTENTIAL SCOPE OF DISCRIMINATION

The National Council does not argue that employer sanctions would lead all employers to discriminate against all Hispanic applicants. Many employers probably will not discriminate; others would discriminate absent the pretext which sanctions provide. But, as shown above, some will undoubtedly discriminate due to sanctions. How many Hispanics will be "at risk" of sanctions-induced employment discrimination?

Some sample, rough analysis of the Hispanic workforce in the United States provides some guidance in this respect. The total Hispanic workforce comprises just over six million persons. Given the current Hispanic unemployment rate of 10.4 percent, and assuming that only 25 percent of this group are looking for jobs on any given day, it can be estimated that over 150,000 Hispanic workers would come into contact with employer sanctions each day under H.R. 3080. According to some recent estimates, small firms hire up to 1.5 million full- and part-time workers weekly—roughly 750,000 in states with large Hispanic populations. Thus, as many as 150,000 Hispanic jobseekers potentially will be affected by employer sanctions each week, as they compete for 750,000 availabe small business jobs.

Proponents of employer sanctions have argued that "90 percent of all employers" will comply with recordkeeping and verification requirements. Assuming for the sake of argument that this estimate is accurate, applying the 90% compliance rate of small employers produces significant figures: some 15,000 Hispanic workers would be competing for 75,000 jobs offered by employers who are most likely to react to sanctions in a discriminatory fashion and who may be violating uniform verification standards. Small businesspersons' demonstrated tendency to "play it safe" while hiring would, under this scenario, jeopardize as many as 15,000 unemployed Hispanic applicants every week.

V. ANTIDISCRIMINATION PROTECTIONS

Convinced that any employer sanctions statute would inevitably lead to an increase in job discrimination, the National Council strongly supports measures which provide redress for those whose civil rights are violated under new enforcement programs. Legislation recently passed in the Senate has no such system of redress. Here, again, H.R. 3080 represents a substantial improvement over S. 1200. Yet protections provided in H.R. 3080 stop far short of those overwhelmingly adopted by House members last year.

The National Council urges that last year's Frank Amendment, as passed by the House, replace H.R. 3080's current system. Limitation of coverage in H.R. 3080 to "intending citizens" could create a subclass of individuals who, under the legislation, would be legally present in this country and authorized to work but would not have an equal right to employment. In assessing the need for restoration of key original Frank amendment protections, we ask that the Subcommittee consider the following points.

Lawfully resident aliens are entitled to work. A basic tenet of U.S. immigration policy, upheld continually by the Supreme Court, is that aliens legally admitted into this country have a right to seek and keep employment. Documented evidence shows that employer sanctions will threaten this right.

The number of aliens "at risk" left uncovered by H.R. 3080 is likely to be large. There are some eight million noncitizens in the country who, if they do not apply for citizenship within months of the bill's enactment, could be legally discriminated against by employers wishing to avoid hire of aliens. Rates of application for citizenship among those immigrant groups potentially hardest hit by sanctions-related discrimination (eg., Hispanics) are traditionally very low.

Current law does not effectively protect against alienage discrimination. Several different studies and reports have found that Title VII of the Civil Rights Act of 1964 and Sec. 1981 of the Civil Rights Act of 1866 will not provide adequate protection to those who chose to remain noncitizens, those who work for small employers, and those who are seasonally employed.[10]

To the extent that sanctions legislation is enacted, the National Council believes that an effective redress system is essential. For the reasons briefly outlined above, we feel that protections provided in H.R. 3080 would be ineffective.

VI. CONCLUSION

The National Council of La Raza opposes employer sanctions, because they would have little effect on the flow of undocumented immigration while seriously jeopardizing many thousands of Hispanics and other "foreign-looking" job applicants. Mounting evidence of sanctions-related discrimination strongly suggests that Congress should explore less onerous, potentially more effective enforcement options, and that any sanctions legislation must contain—at a minimum—those protections provided in the Frank amendment.

[10] See, for example, Congressional Research Service memorandum to House Judiciary Committee Staff, on alienage discrimination, September 1985.

WORLD FOOD DAY

HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. MOLINARI. Mr. Speaker, last week, we observed October 16 as the fifth celebration of World Food Day and the 40th anniversary of the founding of the Food and Agriculture Organization [FAO].

Two years ago I had the honor of serving as the congressional advisor to the U.S. delegation to the 22d session of the Conference of the FAO, which was held in Rome in November of 1983. We can be proud of our former colleague and Ambassador to the FAO, Millicent Fenwick, for the very real concern she has regarding the critical issues facing the FAO. I am thankful for having had the opportunity to learn of the workings of the FAO firsthand and to meet with delegates from over 150 countries who shared recent developments in their own countries as they strive to provide adequate food supplies for their citizens.

Without a doubt, the overriding and most urgent topic discussed at that conference 2 years ago was the drought and famine in Africa. This was before the American public and most Members of Congress were as acutely aware of the tragedy as we are today. But the FAO had been diligently working to address this crisis for many months, monitoring food shortages in spe-

cific countries and providing assistance throughout the continent. The conference and testimonies of the various African delegates enabled me to see the African issue in a new light, and I returned from Rome committed to do all that I could to effectively address the problem.

Since that time, the FAO has continued in its mission of raising nutritional levels and living standards around the world. The World Food Program, one of four departments within the FAO, serves as the primary multilateral agency for food aid and is active in refugee resettlement programs. The FAO is working to in.prove the production and distribution of food and agricultural products through it's monitoring services and the scientific and technical research it conducts and shares with developing nations striving to increase their agricultural production. Various field projects, such as better irrigation methods, soil management, and vaccination programs, provide needed assistance throughout the world.

America's commitment to the FAO and other efforts aimed at alleviating world hunger must remain strong. The current drought and resulting famine being experienced by millions of Africans is unique because of its widespread and prolonged nature, but this type of suffering goes on day after day throughout the world. World Food Day serves to heighten our awareness of world hunger and, although the problem often appears to be overwhelming, I am convinced that by working together we can gain much ground toward the eventual total elimination of world hunger.

REAGAN ADMINISTRATION RELIANCE ON UNILATERALISM IN FOREIGN AFFAIRS

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. KASTENMEIER. Mr. Speaker, I would like to call to the attention of my colleagues an article in the October 23, 1985, edition of the New York Times by Richard Barnet who succinctly states why the Reagan administration's increasing reliance on a go-it-alone policy in the conduct of foreign affairs is wrong.

The article follows:

AMERICA GOES IT ALONE

(By Richard J. Barnet)

WASHINGTON—"We did this all by our little selves," said President Reagan as he announced proudly that United States Navy fighters had forced an Egyptian plane to land in Italy without prior consultation with either country. In the Administration's view, the widespread American applause for this use of military force against an ally and major aid recipient plainly outweighed the cost in injured relationships with Italy and Egypt. Indeed, the action was a classic example of the Administration's unilateral approach to world affairs.

No Administration in the postwar period has celebrated unilateralism as this one has. In national security, economic policy and diplomacy, Washington prefers to advance American interests through its own initiatives and power rather than the mechanisms of international cooperation.

Upon taking office, the Administration withdrew from the Law of the Sea Treaty. It has consistently denounced the United Nations and refused to be bound by judgments of the World Court. It has pursued economic recovery through deficit spending, high interest rates and an overvalued dollar, thus sucking up needed capital from Europe and the third world without regard to the devastating effects of these policies on other countries.

In Soviet-American relations, the United States has signaled its intention to dash rather than build a relationship based on mutual interest. In Washington's view, our Soviet adversary is to be managed by steadily increasing the threat we pose to it. Indeed, the Administration appears to deny that we have any interest in common with "the evil empire." The approach to negotiation has been grudging and the proposals so far safely non-negotiable. The Administration has, for example, cut off negotiations on the nearly completed Comprehensive Test Ban Treaty: Washington evidently prefers to rely instead on our own technological edge and superior economic power.

The Administration would rather wage a "covert" war against Nicaragua than support Latin American efforts to negotiate the conflict. In Afghanistan, the Administration supports the cause of the "freedom-fighters" resisting the Soviet Army and barely gives lip service to the efforts of our European allies and others to settle the conflict through negotiation.

Perhaps the most dramatic symbol of unilateralism is the Strategic Defense Initiative. With this imaginary technological shield of our own making, we are meant to prevent the nation's destruction by relying on our machines—rather than Moscow's self-interest—to prevent war.

Unfortunately, this reliance on unilateralism comes at the wrong historical moment: "Rambo" nationalism has no place in a world of nuclear weapons and more than 160 countries. Even the most powerful country has lost considerable control over its own economy. America has never been so dependent on world trade, and more than a trillion dollars of unregulated Eurodollars are beyond the reach of the United States Treasury. We risk a trade war reminiscent of the 1930's. Meanwhile, the world debt crisis continues unabated, threatening the collapse of the banking system. None of these problems can be solved by the United States acting alone or laying down the law to other nations.

In the field of national security, the United States remains totally vulnerable, despite the myth of the nuclear Maginot Line in the sky. The pursuit of security through building ever more weapons has failed, as ever more weapons are in turn aimed at us, increasing the risks of war through miscalculation.

The United States is a strong nation, considerably stronger economically and militarily than any other country, including the Soviet Union. But its power to create a world environment in which Americans can be secure and prosperous is limited by the strange new world in which we live. New forms of international cooperation are badly needed; existing international institutions must be improved or replaced. No nation has as much to lose as this one by international anarchy.

The national interest of the United States cannot be served by outmoded nationalism, however good the rhetoric may make us feel. We can no longer secure our most vital interests by acting alone.

THE 596TH DAY OF HOSTAGE CRISIS IN LEBANON

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. O'BRIEN. Mr. Speaker, today is the 596th day Americans have been held hostage in Lebanon.

William Buckley, a U.S. Foreign Service officer, was kidnapped on the streets of Beirut on March 16, 1984, 596 days ago today.

Today marks the 289th day Father Lawrence Jenco, the head of Catholic Relief Service in Beirut, has been held hostage.

Terry Anderson, the Beirut bureau chief of the Associated Press, was taken hostage in Lebanon 221 days ago.

The director of the American University hospital, Beirut, David Jacobsen, was kidnapped 147 days ago.

Thomas Sutherland, the dean of the American University agriculture school, was taken hostage 136 days ago.

Today also marks the 324th day since the disappearance of Peter Kilburn, the American University librarian.

Mr. Speaker, next Sunday, the American hostage crisis in Lebanon will be 600 days long. Let's keep our eye on the ball. The objective of our concern for the hostages is their swift and safe release. Nothing less.

CONTAIN THE FUTURES FUTURE

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. DINGELL. Mr. Speaker, I would like to take this opportunity to share with my colleagues in the House an insightful New York Times editorial, urging the Commodity Futures Trading Commission and the Congress to fill a regulatory gap that is costing our constituents millions of dollars. The focus of these remarks is the sharp practices of the unregulated leveraged contract merchants who have managed to escape the antifraud, trading, and customer protection rules applicable to other sellers of derivative instruments. It is estimated that hundreds of millions of dollars in customer funds are put at risk each year in leverage trading and approximately 11 percent of all customer reparation claims filed with the CFTC since 1980 have concerned four firms marketing leverage. Representatives DAN GLICKMAN and THOMAS DASCHLE have introduced legislation, H.R. 3434, to extend the moritoria on new entrants into the leverage industry, and to require all leverage contracts to be traded on futures ex-

changes, putting them on a regulatory par with standardized futures contracts. The gentleman from Kansas and the gentleman from South Dakota are to be commended for their intelligent response to this problem and I urge the other Members of the House Agriculture Committee to give this bill timely and favorable consideration. The Oversight and Investigations Subcommittee, which I chair, will be looking at this and a number of other troublesome issues next year in connection with the reauthorization of the Commodity Futures Trading Commission, pursuant to our jurisdiction under rules X and XI of the rules of the House.

[From the New York Times, Sept. 18, 1985]

CONTAIN THE FUTURES FUTURE

Thousands of unsophisticated investors have been conned in recent years by smooth-talking salesmen bearing promises of easy money in precious metals and currencies: profits in gold and silver, guaranteed . . . Make millions with pennies in yen and marks. Ordinary brokers face regulatory discipline for such tricks. But through some fancy political footwork, a small group of securities sellers known as leveraged contract merchants have evaded effective oversight.

It's up to the Commodity Futures Trading Commission and Congress to fill the regulatory gap before large brokerage houses decide that they, too, want a piece of the leveraged contract action.

A futures contract is a bet on the future price of a commodity. Assume, say, that you sell your aunt 150,000 pounds of orange juice for delivery next March at $1.25 a pound. If the price then is $1.30 a pound, she wins the bet, gaining 5 cents a pound, or $7,500. No juice needs to change hands to settle the bet; you simply pay her in cash.

But if the price falls below $1.25, she would lose the bet. And because futures speculators need invest only a few thousand dollars to enter into a contract for hundreds of thousands worth of a commodity, a small price change can mean wipe-out.

The Government sanctions such gambling to give companies a chance to hedge against business risks. Orange growers, for example, might sell orange juice futures to speculators today so as to lock in the value of the crop they will harvest next month. To minimize fraud and keep markets liquid, futures trading is legally confined to organized exchanges, dealing in everything from soy meal to gasoline. The Government oversees the process, but the exchanges police day-to-day activities.

Nonetheless, a few companies hustle futures contracts outside the exchanges by relabeling the products as "leveraged commodity contracts." Whereas futures exchanges act as intermediaries between a buyer and seller, leveraged commodity merchants say they sell a different product because they take one side of the transaction. Their commissions are extremely high and settlement prices are often set in ways that stack the odds against the investor. When hundreds of investors complained, the Securities and Exchange Commission and state regulators moved to put the leveraged contract merchants out of business. But they lobbied for special treatment, and Congress foolishly complied.

In 1978, it directed the Commodity Futures Trading Commission to create trading rules for off-exchange leveraged contracts. The commission subsequently set fraud rules and forbade any companies beyond the original four to enter the business. But the commission is ill equipped to enforce trading rules. Complaints have piled up.

Congressional support for the leverage merchants has faded under the glare of publicity. Nevertheless, the Trading Commission is about to grant licenses to two of them. That raises a big fear: once formally licensed, a leverage dealer may be purchased by a big brokerage house, which will then lobby Congress for the permanent right to keep selling contracts off the exchanges. If one big broker should win permission, the others would want it too.

The first order of business, then, is for the commission to suspend its licensing proceedings. Then it will be up to Congress to bar off-exchange trading in futures contracts, no matter what they are called.

VOLUNTARY IGNORANCE

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. SHUMWAY. Mr. Chairman, as we look toward the November summit meeting between President Reagan and Soviet General Secretary Gorbachev, I believe that the plight of Afghanistan should not be pushed to the back of our minds, to the bottom of the agenda. For 6 years, the Soviet battle to subjugate that sovereign nation has raged and the stories of Soviet brutality against the Afghan people proliferate. Nevertheless, seldom is attention focused on the Afghan freedom fighters' struggle to regain independence; while we can read about human rights abuses in South Africa or Central America on a daily basis, rarely do we see the startling statistics of Soviet terror in Afghanistan in print.

"Voluntary Ignorance" is the label applied by Jean-Francois Revel to the apparent international indifference toward Afghanistan. In an excellent analysis that recently appeared in the Washington Times, Revel probes "our Afghan blind spot," decrying the lack of continuing international opprobrium against the Soviet Union for its actions. In order to help keep alive our memory of the ongoing struggle in Afghanistan, I am submitting this valuable article for the RECORD.

VOLUNTARY IGNORANCE—OUR AFGHAN BLIND SPOT

The occupation of Afghanistan by the Red Army, which has been going on for almost six years now, continues to provoke in the Western democracies a reaction that Montaigne calls "voluntary ignorance."

Information on Afghanistan is scarce, to be sure, because of Soviet censorship. The Communist powers enjoy an unwritten but tacitly accepted privilege, a privilege practically legalized by international consent, to shape and to ration information that concerns them.

By closing Afghan territory to TV teams and non-Communist reporters, by imprisoning journalists, and even doctors who have entered the country clandestinely, the Soviets have kept the Afghan horror story from being told by the mass media.

Thus they have prevented the vast wave of worldwide opprobrium that would engulf a democracy guilty of far lesser crimes but accessible to news coverage by nature of its politics and principles.

But the blindness of certain Western elites does not result in the main from the practical difficulties of finding out what is going on. There is sufficient information available to anyone who wants to think seriously about the situation of the Afghan people. If the Free World discards this information or relegates it to the margins of its awareness, that is because it fears it will have to start questioning certain soothing interpretations of Soviet behavior and be forced to face the gravity of the crimes committed against the Afghan people.

The first reason for our resistance to listening to news about Afghanistan has to do with our desire to interpret the invasion of Afghanistan as an accident of Soviet foreign policy. Reread what all our oracles have written about it in the last six years. It was a mistake . . . a marginal act . . . unrepresentative of the fundamental thinking of the Soviet leaders. The Soviets acted without premeditation; they were "caught up in a situation"; they fell "into a trap."

The Western powers should, consequently, help them to get out of it, "to save face." How? By not bullying them, by not reawakening their well-known "sense of insecurity."

This analysis, made by most of the statesmen in power in the West during the invasion of 1979, remains the attitude of a great number of commentators today. It entails certain practical prescriptions:

We must abstain from arming the Afghan resistance, for fear of provoking the Soviets. Only the fear of foreign intervention, they tell us, will delay the spontaneous departure of the Red Army. In view of the insignificance of our military aid to the Afghan resistance, one wonders how much further this would have to be reduced to "reassure" the Soviets, and how long it will take for their supposed desire to evacuate the country to be demonstrated.

The explanation that the Soviet seizure of Afghanistan is a result of unhappy chance is rooted in a more general theory. According to many politicans and students of politics, the Soviet Union does not nourish long-term foreign policy objectives, at least not aggressive objectives. They admit, to be sure, that the U.S.S.R. has an overall vision, but they believe it to be strictly defensive. The notion that it has an expansionist design, an imperialistic outlook both ideological and strategic, a program patiently pursued, long planned, and unfailingly prepared for setbacks, could only emanate—in their view—from the *idee fixe* dating from the Cold War.

Unhappily, there are few cases where even a summary knowledge of history so completely pulverizes that theory as Afghanistan.

From the start of the revolution in 1917, the new Soviet power moved to eliminate British influence from Central Asia. A Soviet-Afghan treaty of friendship was signed Sept. 13, 1920, a prelude to a long series of treaties destined to tighten the Soviet's ties with Kabul. After World War II, the Soviet Union capitalized on the void left by Britain's influence, and above all the new situation that resulted from the creation of Pakistan to tie Kabul's foreign policy to her own.

Alas, the United States understood nothing of what the Soviet Union was up to. In December 1954, John Foster Dulles refused

military aid to Afghanistan and threw that country into Moscow's arms.

Sardar Mohammed Daud, prime minister from 1953 to 1963 and president from 1973 to 1978, permitted the Soviet Union to take over the task of equipping and training the Afghan army. In 1955, Nikita Khrushchev and Nicolai Bulganin despite their concerns in Europe and at home that year, made one of their first foreign trips to Kabul and accorded Afghanistan a grant of $100 million, the biggest grant given by Moscow to any country beyond the Iron Curtain. Such a demarche is incompatible with the thesis that Moscow never had any long-term plans for Afghanistan.

Here, too, the Western experts and commentators who date the Sovietization of Afghanistan from the invasion of Dec. 27, 1979, prove at best, that they are professionally incompetent. The protectorate had been in the works for decades.

The second reason the West resists information about Afghanistan is the Soviet violations of human rights in that country. These violations are so widespread that our governments are scared even to raise the question, knowing very well that Moscow will, in its usual humiliating manner, refuse even to discuss it. That is why the press and other media greeted so tepidly the February 1985 United Nations report on the condition of human rights in Afghanistan by Felix Ermacora, Special Rapporteur—a report whose very existence is practically miraculous and which deserves a salute in that ground alone, but which was quickly relegated to obscurity.

The repression takes two forms the torture and execution of opponents and resistance fighters, and massacre and deportations of the civilian population. In Le Grand Jeu Afghan (Politique Internationale, Spring 1985), for example, Michael Barry reports that between April 27, 1978 (the date of the pro-Soviet coup d'etat), and January 1980, 27,000 people were executed in the Pol Charki concentration camp, six miles east of Kabul.

"This is not an estimate," writes Mr. Barry. "This is the simple addition of the names of the victims posted by the regime in public places to discourage the families from crowding around the gates of the prisons with packages of clothing and food."

A major portion of the educated elite, the author adds, perished in this carnage: diplomats, doctors, professor, engineers, non-Communist officials, spiritual leaders. While estimating the number of those shot at "only" 12,000, the U.N. report corroborates the basic story.

Must one conclude that the Soviet Union is invulnerable and can—as South Africa, or Chile, cannot—violate human rights with impunity, shielded by the discreet complicity of an international opinion that knows it is powerless?

Perhaps not. What the discreet people find a bit upsetting are the anti-Communist guerrillas: in Angola, in Nicaragua, and above all in Afghanistan. For the first time, the United States Congress, in July 1985, openly recognized the importance of this phenomenon and voted official aid—$15 million to the Afghan resistance.

PRIME MINISTER PERES' U.N. SPEECH

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues an important speech Prime Minister Peres gave October 21, 1985, before the United Nations General Assembly on behalf of the Government of Israel.

This speech is significant because it seeks to advance the peace process. It represents important moves by Israel to seek a mutually satisfactory basis for starting negotiations with Jordan or a Jordanian-Palestinian team. In the speech, the Prime Minister holds out the possibility of an international or United Nations framework for peace talks and also, while omitting any reference to the Palestine Liberation Organization [PLO], calls for peace talks between Israel and an Arab delegation including Jordanians and Palestinians "that represents peace, not terror." This raises the possibility of moving toward talks with individual Palestinians on the sole condition that they are willing to enter a peace process in a peaceful environment.

I commend Prime Minister Peres for his speech. It represents the kind of effort needed to advance the peace process. I hope all parties will respond to it positively.

Prime Minister Peres' speech follows:

[From the New York Times, Oct. 22, 1985]

EXCERPTS FROM PERES'S SPEECH PROPOSING TALKS

(United Nations, N.Y., Oct. 21—Following are excerpts from a speech today by Prime Minister Shimon Peres of Israel, as issued by the Israeli Mission)

Terrorism is bent on injuring the peace process, but we have an equal determination: it will not stop progress toward peace.

We reject the absurd claim that resisting terrorism—rather than terrorism itself—undermines efforts for peace.

Mr. President, nobody brought more tragedy on the Palestinians than P.L.O. terrorism. Our enemy is not a people, a race, a religion, or a community. Our enemy is belligerency, hatred, and death. We know that there is a Palestinian problem. We recognize the need to solve it honorably. We are convinced that there is no solution but through diplomatic means. From this rostrum, I call upon the Palestinian people to put an end to rejectionism and belligerency. Let us talk. Come forth and recognize the reality of the State of Israel—our wish to live in peace and our need for security. Let us face each other as free men and women, across the negotiating table.

Let us argue, but not fight. Let us arm ourselves with reason. Let us not reason with arms.

Ever since the beginning of the dispute between us, we have urged our Palestinian neighbors to reach an accommodation.

For all these years, our hand remained outstretched in vain, and the reply we heard was the echo of our own voices.

VISIT BY SADAT

When President Sadat came to Jerusalem, the course of history for all of us was changed. He found Israel willing, open and as courageous as he was in the pursuit of peace. The world looked on in wonder as a conflict which had seemed insoluble for more than 30 years, turned soluble in less than one.

Between the 48 million Egyptians and 4 million Israelis there is today peace. Peace with Egypt was to accomplish several objectives:

Sinai was returned to Egypt.

A solution to the Palestinian problem, in all its aspects, was to be reached. It was agreed that full autonomy to the residents of the territories could be a promising step in that direction.

Peace between Egypt and Israel—never intended to be an isolated episode—was to become the cornerstone of a comprehensive peace strategy in our region.

Peace between us was to be filled with constructive content.

This treaty survived tests none of us foresaw. Its full implementation is a challenge and a hope.

We turn to our Egyptian friends with the invitation to breathe life into our relations and to raise our peoples' spirits. Let us not allow gloom and doom to overshadow our worthiest accomplishment. Let us make our peace a success, a source of encouragement to others.

RELATIONS WITH JORDAN

The most complex issue—yet the most promising—involves our neighbor to the east: the Hashemite Kingdom of Jordon. An issue confined not only to borders, it reaches across peoples and states. Its settlement should also comprise the resolution of the Palestinian issue.

Middle East archives are filled with negotiating plans, but its diplomacy is short of negotiating partners. Thus, this is the hour for decisions and statesmanship.

I invite this organization to depart from the tired and timid norn and to fulfill its destiny as enshrined in its walls, but ushering the parties to the conflict into a new diplomatic initiative.

Let all parties to the dispute facilitate a new phase in Arab-Israeli peace by renouncing the use of violence.

This new initiative should be based on the following principles:

1. The objective of these negoiations is to reach peace treaties between Israel and the Arab states, as well as to resolve the Palestinian issue.

2. Neither party may impose preconditions.

3. Negotiations are to be based on United Nations Security Council Resolutions 242 and 338 and on willingness to entertain suggestions proposed by other participants.

4. Negotiations are to be conducted directly, between states.

5. If deemed necessary, these negotiations may be initiated with the support of an international forum, as agreed upon by the negotiating states.

6. This gathering can take place before the end of this year, in Jordan, Israel or any location, as mutually agreed upon. We will be pleased to attend an opening meeting in Amman.

7. Negotiations between Israel and Jordan are to be conducted between an Israeli delegation on the one hand and Jordanian—or a Jordanian-Palestinian—delegation on the

other, both comprising delegates that represent peace, not terror.

POSSIBLE BLUEPRINT

Aware of the nature of this undertaking, I propose the following as a possible blueprint for implementation:

Negotiations may produce intermediate as well as permanent arrangements. They may deal with the demarcation of boundaries as well as the resolution of the Palestinian problem. The Camp David Accords provide a possible basis for the attainment of these objectives.

The permanent members of the Security Council may be invited to support the initiation of these negotiations. It is our position that those who confine their diplomatic relations to one side of the conflict, exclude themselves from such a role.

This forum, while not being a substitute for direct negotiations, can offer support for them. Indeed, nothing should undermine the direct nature of these negotiations.

To expedite this process, the agenda, procedure and international support for negotiations can be discussed and agreed upon at a meeting of small working teams to be convened within thirty days.

Mr. President, distinguished delegates, let us put this process into motion. Let us shield this flickering hope from threatening winds. Let us not consign this moment of hope to the fate of missed opportunities.

Let us look our younger generation in the eye and vow to do all that is humanly possible so that never again will a young boy die in a war we failed to prevent.

The sons of Abraham have become quarrelsome, but remain family nonetheless.

I hereby proclaim: The state of war between Israel and Jordan should be terminated immediately. Israel declares this readily in the hope that King Hussein is willing to reciprocate this step.

BRUNSWICK, MD, RAILROAD YMCA BUILDING

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. BYRON. Mr. Speaker, I would like to take this opportunity to insert in the CONGRESSIONAL RECORD the article "Up From the Ashes" by Mr. Richard D.L. Fulton. This article is about the rebirth of the Brunswick, MD, Railroad YMCA in my district. The 70-year-old Brunswick, MD, Railroad YMCA building, originally called the Brunswick Baltimore and Ohio Railroad YMCA, was destroyed by fire on November 8, 1980. Through the cooperative efforts of the Chessie System Railroad, the YMCA of the U.S.A., and the city of Brunswick, the long awaited ground-breaking ceremony for the new Brunswick Railroad YMCA building took place on May 24, 1984, and the new building is scheduled to be completed by July 1, 1986. With this new building, the Brunswick YMCA will be continuing its 94-year-old tradition of serving the transportation industry and the community. Thank you.

UP FROM THE ASHES—THE REBIRTH OF THE BRUNSWICK, MARYLAND RAILROAD YMCA

(Richard D.L. Fulton)

When the 70-year-old Brunswick, Maryland Railroad YMCA building was gutted by fire on November 8, 1980, the community lost more than a stop-over point for railroad crews. The town lost what had become "an old friend," for the Railroad YMCA facilities had also long served as a community center for the local citizenry as well.

Although there had been some discussions prior to the fateful fire concerning building a new YMCA facility in Brunswick to replace the old 1907 building, the fate of the building was sealed about 9:30 p.m. on November 8, 1980, when a central fire dispatching employee received a call stating that there was a building fire (at the Y) and that all of the light had gone out.

Brunswick railroad YMCA Executive Director Glenn R. Moler was at home when the fire broke out. He soon received a call from employee Wanda Porter who told him, "Please come, the place is on fire." Moler arrived at the building and went around to the various rooms to make sure that all of the employees and railroad crews were out of the building.

As the fire intensified, over 13 fire companies responded to either help combat the flames or cover for other units that had left their stations to assist. In addition to the utilization of two of the town's fire hydrants, water was also drafted from the Potomac river and brought to the scene of the fire in tankers.

Apparently, however, much more water was needed, given the advanced stages of the fire as equipment arrived, then could be brought to bear on the blazing structure. Current Brunswick Mayor Richard G. Campbell was then the chief of the Brunswick fire department. At that time he told the press, "By the time the fire was discovered it had almost surely reached the top floor and started spreading through the flooring."

After the fire was brought under control early the following morning, investigations revealed that the fire had been started by old electrical wiring. It was determined that once the fire had started it would have been difficult to control because of the old type of construction employed in the building, which included the lack of fire stops in the walls.

Railroad employees scheduled to stay at the Brunswick YMCA during and following the fire were housed in other facilities in Frederick, Harpers Ferry and Charles Town. The fire also put 30 to 40 Brunswick residents employed by the Railroad YMCA out of work.

The five years that elapsed after the old building was gutted was filled with often apprehensive moments for community residents, railroad workers, and YMCA officials as all awaited to see if, when, and where a new YMCA facility would be established. Meetings by officials to pave the way for a new Y were described as being sometimes unnerving, sometimes exciting. However, progress was being made and Brunswick was to have its new Railroad YMCA.

"An exciting day for the community of Brunswick." That's what Brunswick Mayor Campbell called it as more than 50 YMCA, railroad, and government officials gathered on May 24, 1985, for the long awaited ground-breaking ceremony for the new Brunswick Railroad YMCA.

The new YMCA building, to be located at 620 Souder Road in Brunswick, was made possible by the cooperative efforts of the Chessie System Railroads, the YMCA of the USA, and the City of Brunswick, who issued $3.7 million in bonds to provide financing for the new facility. The bonds were purchased by the Maryland National Bank of Baltimore.

Chessie System Railroad's Transportation Vice-president Ronald W. Drucker "dug into" the Brunswick soil with the ceremonial "golden" shovel just before noon on May 24, marking the official beginning of the $3.7 million project to replace the old, gutted building formerly located on East Potomac Street.

Drucker was also one of the key speakers at the ground-breaking ceremony, which included Transportation YMCA of the USA President Harry McCarty, Mayor Campell, and Maryland House of Delegates member George Littrell.

Glenn Moler, who had been serving as the director of the Brunswick Railroad YMCA when it was destroyed by fire, presided over the ceremony. Moler is presently serving as the temporary director of the Clifton Forge, Virginia, YMCA, and will be returning as the Brunswick YMCA director when the new building is completed.

Moler was cited by Littrell as being "the one man who stayed with it" and did not give up when the often hampered progress toward a new Y seemed to stall. "Glenn Moler," Littrell said, "fought the battle of the Y," and won. Unlike most battles, however, there were no 'sides,' as such, in this one, and everybody shared in the victory.

The new 30 thousand square-foot Railroad YMCA building will include a one-story general purpose unit which will house the offices, meeting rooms, and the fitness, recreational, and eating facilities, and a two-story residence unit consisting of 60 modern, private rooms designed for privacy, noise reduction, and reduced energy consumption.

Transportation YMCA of the USA President Harry McCarty described the facilities overall as "up to date," utilizing modern technology and planning in producing accommodations which maximize privacy and efficiency. The building will also house lockers for the safe-keeping of personal effects, as well as a chapel for meditation.

The target date for the completion of the new Brunswick Railroad YMCA is on, or before, July 1, 1986. The new facility will be operated as a branch of the King of Prussia, Pennsylvania-based Transportation YMCA of the USA. The building and grounds will be owned by the YMCA of the USA.

It is unlikely that the new facility will erase completely the many memories associated with the old Railroad YMCA building, originally called the Brunswick Baltimore and Ohio Railroad YMCA, which had to be demolished after the November 1980 fire.

The old three-story building was originally constructed in 1907. The facility housed railroad crew personnel on the top two floors, with the balance of the space in the building devoted to a restaurant, lounge area, game room, chapel, and meeting rooms and offices. Two bowling lanes were also maintained in the basement.

Other services provided for in the old building from time to time included a complete laundry service, a barber shop, and pool tables. A thoroughly provisioned stock room was also located in the basement where the restaurant and facility supplies were housed.

In 1926, the Brunswick YMCA assumed the management and sponsorship of the Brunswick Baseball Team, then a member

of the Frederick County Baseball League. The YMCA also developed the Brunswick Community League that year consisting of six teams, one from each of the railroad departments, and one representing the City of Brunswick. The league team of 1929 produced such astonishing results that a "bountiful dinner of Maryland fried chicken with all the accessories" was given in honor of the team at the end of the season.

An athletic field on New York Hill, in Brunswick, was developed by the Brunswick YMCA during 1928 and 1929 at the cost of about $15 thousand. The field was named "The E.W. Scheer Stadium" in honor of the General Manager of the Baltimore and Ohio's Eastern Lines, whose active support and cooperation made the field's development possible. The stadium was sold in 1966.

The old Brunswick YMCA experienced its first fire in 1934 on Christmas Eve, when a fire erupted in the building's dining room. Although the fire was contained in that area, the eating facilities were knocked-out of service until the following June. During the interim before the food services could be put back into service, the Baltimore and Ohio Railroad had a dining car sent to Brunswick for the use of the railroad crews until they could again use the YMCA facility.

Prior to the actual construction of the YMCA building itself in 1907, railroad crews were given lodging in various homes around the community which were rented for that purpose by the YMCA. The Brunswick YMCA itself was founded in 1891.

Thanks to Brunswick YMCA Executive Director Glenn Moler, and to many others, the Brunswick YMCA will be continuing its 94-year-old traditon of serving the transportation industry and the community, both of whom have so lovingly supported it over the decades (now, nearly a century) past.

LESSONS OF GRENADA WEEK

HON. HERBERT H. BATEMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. BATEMAN. Mr. Speaker, as the second anniversary of the liberation of Grenada approaches, we must be reminded of the continuing treat of Soviet imperialism. The capture of 35,000 lbs. of revealing documents is the first time a Communist bureaucacy has ever been captured intact, and it clearly demonstrates that Grenada was rapidly becoming a major Soviet-aligned military fortress complete with Soviet military personnel. From these documents I quote Marshall Nikolai Ogarkov, then the U.S.S.R.'s top military strategist, "Over two Decades ago there was only Cuba in Latin America. Today there are Nicaragua, Grenada, and a serious battle is going on in El Salvador." Mr. Speaker, can there be any doubt concerning Soviet intentions in the Southern Hemisphere?

From these documents we have also learned that the Soviets were going to use Grenada as an airbase for their own military jets, as a port for their Navy, as a center for world terrorism and revolution in Latin America, and as a base of operations against the United States in the event of war with the free world. I think we can all agree that Soviet intentions in Latin America should be viewed most soberly.

Mr. Speaker, another one of the many "lessons of Grenada" is that, contrary to the "Brezhnev doctrine" which holds that once a nation falls to communism it never returns to the free world, communism can be reversed successfully. Grenada is a clear example of the failure of the Breshnev doctrine if the people of the free world are willing to aid those who yearn to breath free in their own country.

The action taken by the United States and the East Caribbean States is both a lesson and an inspiration to anti-Communist resistance movements everywhere. It was a psychological boost to freedom fighters because our action showed that communism is not indestructable. As the "Brezhnev Doctrine" was shattered, new hope was created in the hearts of freedom fighters in Nicaragua, Afghanistan, Angola, Mozambique, Vietnam, Cambodia, and Ethiopia. These hopes which the liberation of Grenada have unleashed, should not be ignored and left to die on the vine. The United States must assert its role as the leader of the free world to aid those who wish to join the ranks of the free.

Mr. Speaker, our forefathers obviously knew the importance of resistance to tyranny. As Thomas Jefferson said over 200 years ago, "the God who gave us life, gave us liberty at the same time." We in the United States must never cease to help those who strive for their rights to life and liberty. The most important lesson of Grenada was the one of hope and a new found determination in the United States to aid those who long for freedom yet toil under the yoke of Soviet communism. It is a lesson the whole world should take note of. The decisive action taken by President Reagan to liberate Grenada and set them on a path of self determination will go down in history as a milestone in the worldwide struggle for freedom against communism.

Mr. Speaker, this is only the beginning of what there is to be learned from our Grenada experiences. It is important that all citizens take time out during "Grenada Week" beginning October 21 to reflect on the many lessons of Grenada. Not the least of which is that eternal vigilence is the price of liberty.

YUGOSLAVIA—HAVEN FOR INTERNATIONAL TERRORISTS

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. LANTOS. Mr. Speaker, our distinguished colleague from New Jersey, Congressman JIM COURTER, has written a thoughtful and perceptive article that was published in today's Wall Street Journal. That fine piece focuses on the outrageous actions of the Yugoslav Government in permitting Abu Abbas to leave that country, despite our Government's request for his extradition for masterminding the Palestinian piracy aboard the *Achille Lauro*.

Congressman COURTER details the appalling record of the Yugoslav Government in dealing with international terrorism for well over a decade now. The facts are well presented, and that record is there for all to see. We should draw the appropriate conclusions.

[From the Wall Street Journal, Oct. 23, 1985]

WHY ABBAS CHOSE YUGOSLAVIA

(By Jim Courter)

Only one day separated Prime Minister Bettino Craxi's insistence that Italy, not the U.S., must be allowed to prosecute the Achille Lauro hijackers from the moment Italy freed the suspected mastermind of the crime. The day after U.S. jets intercepted the Egyptian airliner on which he was a passenger, Mohammed Abbas Zaida, or Abul Abbas, believed by the State Department to be "one of the most notorious Palestinian terrorists . . . involved in savage attacks on civilians," flew to Belgrade—and freedom—on a Yugoslav airliner. Italian authorities handled the boarding at Rome's Leonardo da Vinci Airport and even arranged disguises for Mr. Abbas and Mani Ali Hassan, a senior aide of Yasser Arafat. In flight, Mr. Abbas remarked mildly to another passenger that he would be in the Yugoslav capital "for two or three days . . . for a brief rest."

His confidence was not misplaced. For Mr. Abbas, the ordeal was over. Associated Press reporters on the ground in Belgrade say the two Palestinians were allowed to bypass customs, were greeted by other officials of the Palestine Liberation Organization, and were then driven from the airport in a limousine bearing the license plate of the PLO Embassy. Meanwhile, the American officials who had waged a short, spirited battle to gain Italian extradition of Mr. Abbas to the U.S. began preparing new warrants to present to the Yugoslav government.

But it will be some time before Mr. Abbas sees the insides of any courtroom. As a member of the PLO executive council and chief of the subgroup named the Palestine Liberation Front, he will more likely be feted in than extradited from the countries of his choosing. Yugoslavia is among the worst offenders. During the past decade innumerable terrorist, Palestinian and pro-Palestinian, have rested, traveled through or undergone guerrilla training there. They come because the Yugoslav government approves of them. Urgent extradition requests by oher countries, particularly West Germany, are turned aside. Indeed, one must perhaps go back to 1975 to find the Yugoslavs moving decisively and publicly against international terrorists, and in that instance the three Germans they had seized (on Interpol warrants) were neo-Nazis.

The dignified reception that Belgrade permitted Mr. Abbas is strikingly reminiscent of that once accorded the infamous "Carlos." On Sept. 6, 1976, this Moscow-trained European commander of Palestinian and other terrorists touched down in Belgrade on a flight from Algiers. He had five companions, two of them Germans; they apparently intended to participate in an international terrorist summit that Belgrade was then hosting, according to later reports. Though West German police were waiting for him at the airport, and Yugoslav authorities were already in possession of

papers from Bonn requesting his seizure and extradition, Yugoslav agents guided Carlos to an airport VIP lounge and then into the city. Four days later he was allowed to depart on a Yugoslav airliner for Damascus and Baghdad.

A similar incident occurred in 1978 when four of West Germany's most wanted Red Army Faction members were picked up in Zagreb, but then released, despite Bonn's requests for extradition. Libya, Algeria and Iraq had all expressed willingness to receive them. Little wonder that West German counterintelligence later complained that it gets next to no cooperation from the authorities in Belgrade.

Yugoslav ties with the PLO are nothing new. In 1973, Marshal Tito and Soviet Premier Aleksei Kosygin ended a week of meetings with a communique that declared their "solidarity with the just struggles of the Arab peoples with Israel." In 1978 the Yugoslavs were reported to have built several training camps for Palestinians near their Bulgarian border. By the following year, if not well before, PLO arsenals in the Middle East included a variety of Yugoslav-made weaponry. Yugoslavia also accepted PLO guerrillas evacuated from Lebanon in late 1983.

Mr. Arafat's close deputy, a notorious chief of the Palestinians' European terrorist operations named Salah Khalaf (Abu Iyad), was received by the Yugoslav minister of defense in February 1981. PLO representatives have held many more meetings with top officials of the Yugoslav government and armed services both in Belgrade and in Lebanon.

There is distressingly little one can say to those astonished by the Italian release of Mr. Abbas before time allowed a full investigation of his alleged role in the murder of Leon Klinghoffer. The scandal recalls the Greek release of an accomplice to the recent TWA 847 hijacking, the French release of a Black September leader named Abu Daoud in 1977, and the still incomprehensible American participation in the 1982 boat lift that saved so many terrorists, including Mr. Arafat and his Eastern bloc aides, from the Israeli army in southern Lebanon.

But there is something to be said about the destination Mr. Abbas chose when allowed to leave Italy. Quiet, "nonaligned" Yugoslavia has encouraged, armed and directly assisted PLO terrorists for many years, and has done that as a matter of declared state policy.

Mr. Abbas seems to understand that. So should we.

THE 75TH ANNIVERSARY OF ESPIRITO SANTO SCHOOL

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. FRANK. Mr. Speaker, this Sunday, October 27, I will have the very great privilege of participating in the commemoration of the 75th anniversary of the Espirito Santo School. This school was founded on September 19, 1910, by Father Joao de-Valles for 200 students in grades 1 to 5. It was the first parochial school designed for Portuguese Americans in the United States, and it was for 40 years the only such school.

Since its founding it has been staffed by the Franciscan Missionaries of Mary as well as by lay teachers. In 1925 kindergarten was added and Miss Mary Cabral, who became the kindergarten teacher there, remained in that post for the next 53 years. In 1963, under the leadership of Father Joao Resendes, a new school was built with pledges and donations from the parishioners. The school's enrollment has remained stable and is now at 300 students. It has a large number of distinguished graduates, among whom I am pleased to say is one of my important staff members, Michael Vieira.

I am delighted to have this chance to salute those who began this school in 1910, and who have kept it in being as a vibrant educational and cultural force in Fall River for 75 years. Keeping alive the various cultural heritages that have contributed to this country is an important element in maintaining the fabric of American society. The people of Espirito Santo parish deserve a great deal of credit for their willingness to maintain this very important and worthwhile educational institution. I congratulate them on their good works and I look forward to participating with them on Sunday in what is both a celebration and a renewed dedication to keeping this important educational activity alive and well.

Mr. Speaker, I think the staff members of this important institution ought to be recognized for the good work they do and I ask that their names be printed here.

The present staff is:

Principal—Sister Mildred Morrissey; Kindergarten—Miss Christine Mello; 1st Grade—Miss Debra Polselli; 2nd Grade—Mr. Neil Manso; 3rd Grade—Miss Karlene Kenyon; 4th Grade—Mrs. Barbara Toni; 5th Grade—Miss Martha Ward; 6th Grade—Sister Lia Oliveria (teaching at the school for 45 years); 7th Grade—Sister Ruth Tamulisi; 8th Grade—Sister Simone Decelles (teaching at the school for 35 years); Secretary—Mrs. Judith Lussier; Custodian—Mr. Raymond Machado.

PRESERVE THE STATE AND LOCAL TAX DEDUCTION

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. SCHUETTE. Mr. Speaker, as the Ways and Means Committee considers tax reform in the coming weeks I would like to address the one tax reform issue that has been the most controversial in my home State of Michigan: the deductibility of State and local taxes.

My opposition to the elimination of these deductions results from the higher taxes Michigan residents would have to pay and the principle that is involved.

The single most important factor contributing to higher taxable income for middle-income Michigan taxpayers would be the loss of the deduction for State and local taxes. Even though most Michigan taxpayers would face lower marginal tax rates under the administration's proposal, the loss of deductibility would result in higher net taxes.

A typical Michigan family that owns a home, earns $28,000 a year and itemizes deductions, would see its tax bill increase by $1,150 in additional Federal taxes. This net increase in taxes would fall most heavily on the middle class, which is the economic backbone of our country and already heavily burdened with taxation.

Proponents of eliminating the deduction for State and local taxes have argued that the deduction primarily benefits high-income taxpayers. But in my home State of Michigan that simply isn't true. According to IRS tax data, 40 percent of all the itemized State and local taxes were deducted by Michigan taxpayers with adjusted gross incomes below $30,000 a year. Nearly 80 percent of these deductions were claimed by households with less than $50,000 in adjusted gross income a year.

The loss of this deduction would hurt my State, which is only now starting to recover from the recession of several years ago.

I also oppose the elimination of this deduction because it contradicts one of our basic principles in this society: That there shall be no double taxation. The principle involved here is that it is profoundly unfair to tax income that has been used to pay taxes.

Mr. Speaker, as autumn progresses, the congressional agenda gets more and more hectic. It is difficult to predict what the tax-writing House Ways and Means Committee will be able to accomplish. They are marking up an alternative reform plan and the committee is divided on this issue. No matter what happens in committee, I am committed to fighting the elimination of the State and local tax deductions on the House floor.

A TRIBUTE TO KENNETH BROWN BILLUPS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. CLAY. Mr. Speaker, an outstanding American, a gifted artist, and one of my renowned constituents, Kenneth Brown Billups, passed away on October 10, 1985.

As an offering to posterity, this Nation can memorialize the contributions of this outstanding citizen in perpetuity by insertion of his beautifully written and sensitive obituary in the CONGRESSIONAL RECORD. Kenneth Billups was a personal friend who worked tirelessly on every conceivable musical project in the community. He gained national recognition through his musical compositions, choral arrangement, and choral direction.

A great deal of his time was also spent working with youth programs and with civic projects as an administrator. Kenneth Billups was a multifaceted, very gifted, hardworking committed citizen. A truly outstanding constituent, I proudly submit

the following documentation of his many contributions.

KENNETH BROWN BILLUPS

Kenneth Brown Billups, a native of St. Louis, Missouri, was born April 15, 1918. He was the second son of the late Reverend and Mrs. Louis Billups.

Education for Kenneth began in the St. Louis Public Schools, and he graduated from Sumner High School. His college training began at Lincoln University in Jefferson City where he played varsity basketball and earned a Bachelor's degree in biology.

Northern University is where he earned the Master of Music degree; further graduate work was done at Washington University in St. Louis.

Noteworthy, and a tribute to Kenneth's musical expertise, is the fact for several summers he was a visting professor of voice, composition, and choral technique at Northwestern University, Lincoln University, and Texas Southern University in Houston, Texas.

Early, during his childhood, he was made aware of religious training. Reared in a Christian home, he joined Antioch Baptist Church at an early age and was baptized by the late Dr. William L. Perry. Kenneth went through every department of the Sunday School from Cradle Roll to Adult.

Throughout his life, Kenneth loved music. He sang in the choirs at Antioch. He formed quartets and other small groups with his boyhood friends, and they sang and played wherever they found an available piano.

His work in the musical world included his service as Minister of Music and director of the Chancel Choir at Antioch for over 40 years, and as choral director and music teacher at Sumner High School before becoming Superintendent of Music for the St. Louis Public School System.

Born to the union of Kenneth and his wife, Florence White Billups, were four children—Kathleen, Karla, Karyl, and Kenneth, Jr.

Included among Kenneth's lifetime accomplishments was the recognition and many awards received from various groups and organizations locally and throughout the United States. They included recognition from: the City of St. Louis, the National Urban League, Northwestern University, Kappa Alpha Psi Fraternity, the St. Louis American Newspaper, Frontiers of America, St. Louis Argus Newspaper, MECA, National Association of Negro Musicians, Sigma Gammo Rho Sorority, Missiouri Music Educators, National Guild of Community Music Schools, and the Antioch Baptist Church.

Lincoln University honored Kenneth in 1978 by conferring on him the Doctor of Humane Letters degree.

Launching forth with new ideas and unusual ventures as a trademark of Dr. Billups. He formed and directed the Legend Singers. He organized and produced the "God's Musical World"—A KTVI Channel 2 weekly musical program. He directed the "Wings Over Jordan" choir. He directed choral and cultural activities at the Jewish Community Center Association (JCCA) and the Page-Park YMCA. He served as host for KMOX's "Afro-Americans and Their Music", as well as guest choral director for the St. Louis Symphony Orchestra on more than 20 occasions.

Untiring were his efforts as he worked with such artists as Grace Bumbry; as he worked on the Mayor's Council on Youth; Missouri State Council of the Arts; as conductor for Scott Joplin's opera, "Treemonisha"; as co-chairman of the Bicentennial Planning Committee; as choral assistant at the St. Louis Municipal Opera for several seasons; as a member of the St. Louis Arts and Humanities Commission; as composer of the National Hymn of the Kappa Alpha Psi Fraternity; as a resource person for music written by and for black people; and as president of the St. Louis Music Association and the National Association of Negro Musicians.

Poetry was another great love of Dr. Billups. He often interspersed poetry readings with songs. He will be remembered for his many original musicals which he produced and directed, as well as for his original songs, his arrangements, and his recitations of poems.

Suddenly and swiftly, on Thursday evening, October 10, 1985, the fruitful, earthly life of Dr. Kenneth Brown Billups, Sr. came to an end. The family he leaves includes: wife, Florence Billups; three daughters, Kathleen Buie, Granada Hills, Calif.; Karla Philip, Brooklyn, New York; Karyl Boozer, Avondale, Maryland; one son, Kenneth Brown Billups, Jr., Inglewood, Calif.; brother, Wendell, St. Louis; two aunts, Esther K. Harris, St. Louis; and Mary Williams, Detroit Mich.; seven grandchildren; and a host of other relatives and friends.

EXCELLENCE IN EDUCATION

HON. PHILIP R. SHARP

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. SHARP. Mr. Speaker, it was a very nice surprise to open the newspaper this morning and see that the rest of the country is now finding out what we in Indiana have known for quite awhile. Writing from Columbus, nationally syndicated columnist David Broder devoted an entire article to praise that city's fine school system and in particular the work of East High science teacher Mrs. Carole R. Goshorn, who yesterday received a Presidential Award for Excellence in Science and Mathematics Teaching from President Reagan.

As Mr. Broder points out, Mrs. Goshorn is special; for it is she along with the Columbus educational system as a whole that represent the model of what American teachers and schools can and must aim for. Working closely with many parts of the local community, the Columbus school system has provided the environment for such stellar instructors like Mrs. Goshorn to foster in their students an excitement for learning and achieving in such a vital area of study as science.

There is now widespread agreement in the scientific community on two points: the United States is increasingly going to need well-trained scientists if it is to maintain a competitive economic as well as military position in the world, but at the same time our future scientists are being readied by teachers without the training or facilities to allow their students to reach their very bright potentials. It is so refreshing to see that the Nation is finally recognizing the long overlooked efforts of the many Carole Goshorns around America who have made many sacrifices in order to nurture the seed for a stronger and more secure future America.

I have submitted Mr. Broder's article for the RECORD so my colleagues might read of a success story we Hoosiers are quite proud of.

A SPECIAL (SCIENCE) TEACHER

(By David S. Broders)

COLUMBUS, IN.—Carole R. Goshorn is special—one of 104 high-school science and mathematics teachers who are in Washington this week to receive presidential awards for their excellence in the classroom.

Although she does not look it, the 34-year-old mother of two is one of the front-line fighters in America's battle for survival in the increasingly tough international economic competition. Study after study has shown the United States is doing a worse job on science and math education—the building blocks for tomorrow's techology and industry—than Germany, Japan and other competitor nations.

Despite recent moves in many states to require more and tougher science and math courses in high schools, close to one-third of those classes are taught by people with minimal or no qualifications in those subjects. And the proportion is growing.

Science and math majors can double their teaching salaries by moving into industry. Science-minded college undergraduates tend to shun teaching degrees. Colleges complain that high schools are sending them fewer students with good preparation for science, math and engineering courses. And industry says it cannot find the trained technical and scientific people it needs.

Two years ago, after a wave of reports highlighted these problems, the administration reversed course. After reducing to one-tenth the National Science Foundation programs for math and science education in his first two years, Reagan endorsed an expanded program of scholarships and training for teachers in those fields. The annual presidential awards for two top math and science teachers in each state are the public relations frosting on that cake.

They are also a measure of how far most communities in this nation have to go if they are to provide students with the education that results when a gifted teacher such as Carole Goshorn works in a well-equipped school in a community as supportive of education as Columbus, Ind.

Columbus is the international headquarters of Cummins Engine Company, whose management has made this city of 31,000 a showcase of distinguished architecture and a remarkably comfortable place to live. Along with Arvin Industries and other local firms, the Cummins people have spurred

the development of high-quality local schools, needed to attract top managers to central Indiana and to educate a skilled work force.

East High, where Goshorn teaches, was designed and built 13 years ago to accommodate and foster team teaching and highly individualized instruction. In the science wing, there are large lecture halls with sophisticated audiovisual equipment, where several classes can get basic instruction at one time. Individual classrooms are very small, holding not more than 20 pupils, so teachers can supervise problem-solving and answer questions on a one-on-one basis. A large, modern lab serves several courses, with a full-time lab attendant and at least one teacher on duty at all times. Between the lab and the classroom, a science library has desks for individual study.

The 1,600-student school draws from an industrial city and a farm county; it is not elitist, but its standards are tough. The other day, Goshorn, wearing a white lab coat with a button reading "Chemists Have Solutions" on her lapel, and her teaching partner, Jack Young, took perhaps 120 beginning chemistry students through a fast-paced workout on calculating molecular weights of compounds. Her analogies were down-home—"10 to the 23d power is about as many leaves as you'd find on all the trees in Bartholomew County"—but the equations flashed on the screen click-click-click. No one had time to daydream.

With a master's degree in biology from Indiana University, Goshorn could probably double her mid-$20,000s salary in industry. But she and her husband, an administrator at North High, have a commitment to education and welcome the chance to work in a community that has demonstrated its dedication to its schools. Despite its small size, Columbus has just hired a superintendent away from a swanky Minneapolis suburb by offering him the second-highest education salary in Indiana and a $100,000 "excellence in education" fund, raised from local business and available for projects he picks.

The recommendations for Goshorn's award, which brings a $5,000 federal grant to her school, noted not only her work on statewide science curriculum development but her skill as a student adviser, her role-model status for young women considering science or other professional careers and her enthusiasm for teaching.

"It's wonderful to work in a school and community like this," she said. It is wonderful to watch her in her superb public school. But you have to remember she stands out as special. America will have to clone her—and the commitment to education her school and community represent—many times over to meet the challenges ahead.

ELIMINATING STATE TAX DEDUCTIBILITY IS A BIG, BAD REVENUE RAISER

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. GARCIA. Mr. Speaker, I want to commend to my colleagues an article by the Institute for Research on the Economics of Taxation addressing the issue of eliminating State tax deductibility from the Tax Code.

As Mr. Egger, the author of the piece points out, this is the worst idea in the administration's tax reform plan. The policies for this action are indefensible and the administration relies on sheepish apologies, semantic tricks, and a poorly reasoned list of "winners and losers" in its unconvincing arguments.

Mr. Speaker and my colleagues, I urge you to read the following article. I am confident that once you have considered the illogic of eliminating State tax deductibility you will agree that it makes little political sense and cannot stand the light of economic analysis.

ELIMINATING STATE-TAX DEDUCTIBILITY IS A BIG, BAD REVENUE RAISER

(By John B. Egger, Economist)

One of the worst ideas in the Administration's tax-reform plan is the elimination of the deductibility of state and local taxes from federally taxable income. Unable to make a defensible case that the state taxes we pay should be in the federal tax base, the Administration falls back on sheepish apologies, semantic tricks, and a poorly-reasoned list of "winners and losers." Its case is unconvincing.

The apologies are familiar. "Well, it wouldn't hurt very many taxpayers," just the third who itemize. This argument could be better used to triple taxes on left-handed redheads. Bad tax policy isn't made good by harming a minority.

"Besides, we need the money." Something is very wrong with the Administration's case when this is its ultimate defense. It could with equal validity justify any absurd tax. Sound policy doesn't justify taxing a payment flow just because it's large.

Semantic tricks and biased language make life difficult for one's opponents. Deductibility is called "federal aid" that affords "unfair subsidies" and creates "interference," resulting in an "overproduction" and "underpricing" of state and local government services. But without the premise that deductibility is bad, this is like saying that I subsidize your driving by not stealing your Toyota, and interfere with your evening by not coming over to watch TV. Biased language can seduce the most careful analyst. Like most (not all) seductions, this one should be resisted firmly.

Calling state and local tax deductibility a "subsidy" is a sneaky misuse of the term. Subsidies are generally considered bad because they inefficiently reduce the price and increase the production of some specific good. Deductibility doesn't do this. It does transfer tax liability among taxpayers, but this transfer is not a subsidy.

Basing an equity argument on transfers among states, the Administration correctly notes that while deductibility requires that federal tax rates or other taxes be higher than otherwise, its benefits are proportional to the level of state taxes which can be deducted on individual income tax returns. Deductibility permits states which are "high-tax" by this measure to transfer tax liability to "low-tax" states. But this is a highly distorted way to rank states and to examine interstate transfers of taxes, as a study of states' per capital government spending would show. Alaska, Texas, and Wyoming—"low-tax" by the Administration's standard—raise substantial revenue from severance taxes which are largely paid by other states. By ignoring the other interstate transfers which deductibility helps to offset, the Administration presents a case which is simply not credible.

The Administration again tells only part of the story when it asserts that deductibility creates a "subsidy" for itemizers by non-itemizers. This "subsidy," actually a transfer, is an offset to the sizable reverse transfer which is created by the zero bracket amount (or "standard deduction"), used by the two-thirds of returns which don't itemize. The tax code recognizes that for equity or other reasons certain expenditures should be deductible, but non-itemizers use the zero bracket amount to shelter from tax income which is not used for deductible expenditures. For example, the zero bracket amount for a joint return in 1985 is $3,540. A taxpayer won't itemize if his itemizable expenditures fall short of this. A non-itemizer who files a joint return shields from tax not only, say, his $1,000 of itemizable expenditures but also another $2,540 of non-deductible expenditures. Itemizers, by contrast, earn their deductions, paying tax on every dollar of income not spent on deductible items.

The transfer of tax liability from non-itemizer to itemizer which this asymmetry creates is offset in part insofar as the itemizer may deduct state and local taxes paid. These taxes should be considered neither income nor expenditures, but their deductibility offsets the effect of the deductions for imaginary expenses granted to non-itemizers by the zero bracket amount.

None of this addresses whether taxes paid should be part of federally taxable income anyway. Income is the sum of one's consumption and the change in one's net worth. Some economists think taxes can be considered consumption expenditures, arguing that by choosing where we live we tacitly agree to pay for the local and state services which are provided.

But individuals have to buy a combination of location and taxes/services. While the package is freely chosen, it is not correct to infer that the choice necessarily demonstrates a preference for either part individually. Some people like being close to mountains or family, and tolerate the taxes and unwanted public services as the price. Others will live wherever public schools and libraries are good. The outside observer has no way to distinguish between these two types of citizen, so it is simple governmental selfserving to argue that they are all of the second type. Let's face it: taxes are forced exactions. They are not consumption and are not part of income. Neither state nor federal taxes should be part of the other's income-tax base.

Finally, it is perplexing to find this proposal advanced by an Administration which has apparently respected the federalist principle and considered the federal government a servant, not a master, of the states. It hardly seems the way to encourage states and localities to shoulder more of the public-services burden.

The elimination of deductibility makes little political sense and cannot stand the light of economic analysis. It is a bad idea through and through.

SWAPO AND THE UNITED NATIONS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. CRANE. Mr. Speaker, the United Nations General Assembly has convened once again in New York, and President Reagan is scheduled to speak there soon. But not long ago, several of the so-called "nonaligned" countries introduced a resolution to invite Yasser Arafat, leader of the PLO, and Sam Nujoma, self-appointed leader of the the Soviet-backed terrorists of the South West Africa People's Organization [SWAPO], to address the assembly. It took serious opposition from the U.S. Ambassador to the United Nations, Vernon Walters, to convince the United Nations that President Reagan would not address the assembly if these terrorist leaders were given the chance to peddle their poisonous doctrines before the United Nations. Only then was this wrongheaded resolution withdrawn.

This situation is only a symptom of the real problem at the United Nations. The Washington Post has described the United Nations as operating "much of the time by the mob rule of its third world majority in close alliance with the Soviet bloc." The United Nations enthusiastically supports such vicious terrorist groups as the PLO and SWAPO, designating each of them the "sole and authentic" representative of their people. But more than just moral support is given: these organizations are granted permanent status at the U.N. General Assembly, a designation which permits them to participate in United Nations proceedings as if they were sovereign countries. Furthermore, the U.N. finances offices in New York and around the world for their nefarious activities, and funnels untold amounts of money to them. This is particularly outrageous in the case of SWAPO, because the people of Namibia enjoy local self-government under the recently formed Namibian Government of National Unity by reason of their "commonwealth" relationship with South Africa.

Although Congress has enacted laws which reduce the U.S. taxpayer annual contribution of $1 billion to the United Nation by any sums the United Nation allocates for the support of SWAPO and PLO, the U.S. Department of State and its misguided bureaucrats continue to ignore political leaders within Namibia and the government they administer. Instead, they lend encouragement and support to those who believe that a SWAPO takeover is not only desirable, but inevitable. This one-sided policy must end.

Furthermore, the United States should withdraw from the United Nations until it returns to compliance with its own charter and ends its sponsorship of terrorist groups such as the PLO and SWAPO. The United States has important national security interests in seeing that SWAPO is not successful in Namibia, not the least of which is access to strategic minerals on which U.S. industry is 100 percent import dependent. The following article by Carl Shipley, in a recent edition of the Washington Inquirer, points up the importance of the United States providing at least as much financial aid to the pro-West internal leaders of Namibia as the United Nations provides to SWAPO. I highly recommend it to my colleagues here in the House.

The article follows:

[From the Washington Inquirer, Oct. 11, 1985]

WHAT'S AT STAKE IN NAMIBIA

(By Carl Shipley)

Reliable news reports tell us that the Kremlin's war for the world is heating up in southern Africa as well as in Afghanistan, Central America and Asia. Increased Soviet-sponsored activity apparently is a calculated Russian strategy to soften up President Reagan prior to the summit meeting. But Namibia's Kudu gas field and other minerals may be stimulating increased Soviet military activity on Namibia's northern border.

A few weeks ago the newly installed Namibian Transitional Government of National Unity (TGNU), established on June 17, 1985 when the Republic of South Africa transferred complete administrative authority for local self-government in South West Africa (Namibia) to Namibia's Multi-Party Conference of internal political leaders, announced that the new government would commence immediately to develop the Kudu oil field off Namibia's south west coast.

Recent tests and seismological studies indicate that this is probably the largest natural gas field on Earth. At the time the South African government gave Namibia the equivalent of commonwealth status, it announced that it had no claim to the Kudu gas field and that that resource belonged entirely to the people of Namibia. Namibian governmental leaders have estimated that it will cost approximately $30 million over several years to develop the field but that ultimately this natural resource alone will provide a great part of the revenue to support Namibian independence. This news has not been lost on the Soviets or their SWAPO surrogates.

When one considers that in addition to the Kudu gas field. Namibia has the largest uranium mine in the world, enormous reserves of other strategic minerals and is the gateway to ultimate Soviet political, economic and military domination of the access routes to such strategic minerals as manganese, chromium and platinum on which the U.S. is 100% import dependent, one can only wonder why U.S. State Department officials continue to turn a blind eye on the pro-West Namibian territorial government.

The U.S. Department of State continues to insist that Namibia can achieve independence only by compliance with U.N. Res. 435, which is widely viewed by Namibian political and governmental leaders as nothing more than an out-of-date blueprint for installing a SWAPO government in Windhoek. SWAPO, a Soviet-backed terrorist group based in southern Angola and engaged in a continuing terrorist campaign to seize control of Namibia, has rejected all efforts of Namibia's TGNU to join the government and participate in writing a new constitution to protect the rights of all ethnic and political groups in the territory, while at the same time providing a national government. U.N. Resolution 435 was concocted in 1978 by the then U.S. Ambassador to the U.N., Andrew Young, and his colleague, Donald McHenry, during the Carter Administration when U.S. interests in Africa were generally subordinated to those of Third World countries in the vain hope that we would encourage democratic governments in Africa and strengthen U.S. relations with newly independent countries in that region. Since that time most of those governments have adopted one-party Marxist states, and have joined in the anti-American hue and cry which is the central obsession of the Third World—Communist bloc today dominating the United Nations General Assembly.

Apartheid has been abolished in Namibia by the new government, and the TGNU is providing the people of Namibia with complete local self government for the first time in their history. One can only hope that U.S. officialdom will recognize that the TGNU in Namibia offers the U.S. and the West a viable alternative to a SWAPO takeover. All it needs is friendly recognition, and some of the same kind of economic support the U.S. is providing the one-party Marxist governments of Angola, Mozambique, Zimbabwe, Ethiopia and Zambia.

It must surely be clear to the most stubborn and self-deceived bureaucrats in the U.S. State Department that U.N. Resolution 435 is, for all practical purposes, as dead as a dodo. The people of Namibia plan to determine their own destiny, with or without the approval and help of the United States and its Western colleagues. Considering the importance of Namibia in maintaining the U.S. interest in preventing Soviet bi-section of the mineral and oil pipeline to the NATO countries around the Cape of Good Hope (25,000 ships per year), and U.S. industry's 100 percent import dependence on strategic minerals in southern Africa, the U.S. should encourage Namibia's TGNU and help it write a new constitution and achieve internally acceptable independence free from the threat of a SWAPO takeover or Soviet domination.

YULI EDELSHTEIN

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. VANDER JAGT. Mr. Speaker, I am honored to join with many distinguished colleagues in sending a series of letters to President Reagan about Soviet Jewish political prisoners. I want to commend Congressmen KEMP and LANTOS and the Congressional Spouses' Committee of 21 for their outstanding leadership in this effort that is designed to bring greater attention to the plight of the Soviet Prisoners of Conscience during the President's summit meeting. We are indeed hopeful that by underlining the suffering of these courageous people, we can help the President in his efforts by presenting a unified front on critical human rights issues in the Soviet Union.

Following is the text of the letter I have sent to President Reagan concerning the political prisoner, Yuli Edelshtein, whom my wife, Carol, adopted for the Congressional Spouses' Committee of 21:

The PRESIDENT,
The White House, Washington, DC.

DEAR MR. PRESIDENT: As you prepare for your upcoming meeting with Secretary General Gorbachev, I know that the issue of human rights remains foremost in your mind. As one who is dedicated to liberty and justice, I know that you will continue to stress the American peoples' outrage at human rights abuses in the Soviet Union and will bring greater attention to the plight of the political prisoners in that country, who long to know the simple dignity of self-determination—to be accorded the right to be free.

I would like to bring to your attention one such individual—Mr. Yuli Edelshtein, who with his wife has become very important to my wife, Carol, my daughter, Ginny, and myself. My wife has corresponded with Mr. and Mrs. Edelshtein on several occasions and as we have learned more about their suffering we have sadly gained a greater insight into the conditions in the Soviet Union for those who fight for truth and religious freedom. Yuli Edelshtein has been falsely accused of possessing drugs. Through a statement by his wife, Tatiana Edelshtein, we know that an officer in charge where he is being held declared that steps were being taken to "knock the religious delirium out of my husband." Mr. Edelshtein has been beaten continuously and deprived of sleep and rest. His personal belongings have been stolen, his prayerbook taken and he is constantly moved from one job to another. Mr. Edelshtein is an official member of the Moscow Jewish religious congregation and because of his religious beliefs has suffered beyond the tolerance of many human beings. How much longer can he and his fellow prisoners hold out? In a June 1985 statement, Mrs. Edelshtein asked that the physical and other persecution of her husband be stopped. Since that time word had been received that Yuli's treatment in his labor camp had reached beyond the bounds of human endurance. However, after repeated appeals from his wife and the West, the Union of Councils for Soviet Jews has reported that his conditions have improved somewhat and his wife has received several letters from him.

It is for this reason that we appeal to you, Mr. President, to bring to Secretary General Gorbachev's personal attention the plight of Yuli Edelshtein and those like him who are not allowed to speak for themselves in their own country. We have learned that world opinion can be very meaningful and the more attention given to cases like this one the better. I know that you agree we cannot protest human rights abuses too strongly or fail to seize any opportunity presented to try and effect desperately needed change.

In a letter my wife, Carol, wrote to Mr. and Mrs. Edelshtein in July, she stated, "While this new friendship is a privilege and honor for me, it is also painful because the blows delivered by the Soviet Union no longer fall on nameless, faceless individuals; they fall on a human being I have come to know as Yuli, and the pain of your beating, Yuli, has become my pain, too. I truly hope and pray that you both can draw strength from the knowledge that many people are very aware of your suffering and follow your fight for freedom with painful attention and prayers; you are not alone! We are trying to help."

With your continued assistance, Mr. President, the American people can continue to help, continue to let the Edelshteins know that they are not alone and together we can work for a day when our appeals are no longer needed, when we can all live in peace and freedom and when men and women like Mr. and Mrs. Yuli Edelshtein can taste the fruit of liberty.

With all good wishes,

GUY VANDER JAGT,
Member of Congress.

APPEAL FOR REFUSENIKS

HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. ATKINS. Mr. Speaker, in November, a historical event will take place as President Ronald Reagan will, for the first time, meet with Soviet General Secretary Mikhail S. Gorbachev in Geneva. While the emphasis of this summit will be talks on the bilateral reduction of nuclear weapons, I urge both leaders to discuss the issue of human rights in the Soviet Union. Thousands of Soviet Jews are subjected to harassment, intimidation, and often imprisonment in their attempts to emigrate from the Soviet Union.

One such individual is Leonid Volvovsky, a prominent Jewish refusenik, who is currently being tried for allegedly defaming the Soviet State. Mr. Volvovsky, who along with his wife and daughter applied for emigration to Israel in 1976, was arrested on June 26 for stating that there was anti-Semitism in the Soviet Union. As cochairman of the Congressional Coalition on Soviet Jewry, Representative DEAN A. GALLO and I sent a telegram to both the Acting Chairman of the Gorky Regional Court and Procurator General S.A. Yemelyanov to urge for the dismissal of the charges against Mr. Volvovsky.

Elie Wiesel, a prominent Jewish scholar, wrote an op-ed piece that appeared in the October 22 issue of the New York Times in the behalf of Mr. Volvovsky. I, at this time, place Mr. Wiesel's article into the RECORD:

[From the New York Times, Oct. 22, 1985]

APPEAL FOR REFUSENIKS

(By Elie Wiesel)

When Ronald Reagan meets Mikhail S. Gorbachev, I hope he will speak to him, among others, of an innocent man who is now in danger of being sentenced to hard labor in the Soviet Union. His name is Leonid Volvovsky, a 45-year-old mathematician; his trial opened Friday in Gorky. His "crime"; active involvement with the large "refusenik" community there. His friends are worried that the prosecution may use his case as a warning, handing down a severe condemnation.

Leonid is married to Ludmila; they have a 17-year-old daughter, Kira. Their troubles began in 1976 when they applied for an exit visa to Israel. In the eyes of officialdom, Leonid became an outcast. That remains the lot of all refuseniks. Overnight, they are cut off, isolated, marked for harassment, abandoned by colleagues and humiliated by institutions. Still, they lean on each other and help one another to safeguard their sanity and morale.

I have met many refuseniks in the Soviet Union. I admire them. They are, to paraphrase Jean-Paul Sartre's expression, among the freest people in the land. I admire their courage, their exuberant spirit, their unfathomable faith. When I asked them what to send them from home, they answered: "Books, send us books." These books were needed for students and teachers—for the unofficial educational network that now exists throughout the Soviet Union.

Leonid Volvovsky is one of its leading members. He learned Hebrew and English. Thus equipped, he established seminars for Hebrew, Jewish history, Jewish literature and philosophy and ethics. In 1976, he was vice-chairman of a committee that tried to convene a seminar on Jewish culture. This resulted in the first of his several arrests, followed by relentless harassment. Searches was conducted in his home, materials were confiscated, threats were issued. But Leonid Volvovsky persevered, and hundreds of refuseniks owe him their Jewish education. In 1979, his seminar attracted 700 students.

The K.G.B. responded in kind. Leonid Volvovsky "lost" his materials, his Hebrew books. His modest apartment was taken. The renowned scholar had to accept other jobs: elevator operator, photography salesman and garbage collector.

He was arrested on June 26, 1985, and charged under Article 190-1 of the criminal code of the Russian Soviet Socialist Republic. In other words, he is accused of slandering the Soviet Union.

Nonsense. Leonid Volvovsky and his refusenik friends have nothing to do with politics. All they want is to join their families in Israel so that they can lead a Jewish life in accordance with Jewish law. When they meet, they discuss the Prophets, the Talmudic legends and classical Jewish authors, not politics.

I have known the refuseniks, and I know they are more concerned with Jewish memory than with Soviet politics. This is what makes the Volvovsky trial such an injustice. A condemnation would be a scandal.

Let us hope President Reagan will find it important to discuss this case—and hundreds of others—when he meets Mr. Gorbachev. The refuseniks, like the dissidents, are our heroes. They place their hope on us, our our involvement.

They are so many. Ida Nudel, Vladimir Slepak, Anatoly Shcharansky, Dan Shapiro, Iosif Begun, Vladimir and Anna Lifshits and Yuri Edelshtein; The list could go on and on. Is Mr. Gorbachev capable of making a gesture? Will be make it? Should he do so, the refuseniks' hope in us may be justified, and our hope in him as well.

Let us hope that Mr. Reagan and Mr. Gorbachev take this unique opportunity to seriously discuss the human rights issue not solely for the sake of Leonid Volvovsky, but for every Soviet Jew wishing to emigrate from the Soviet Union.

LOUIS MORENO RETIRES AS POLICE CAPTAIN

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. LEWIS of California. Mr. Speaker, it is with great pride that I rise today to recognize a gentleman who, through his re-

markable career, has had a great impact on the citizens of Chino, CA, Capt. Louis Moreno.

For 28 years, Louis Moreno has served the city of Chino as a member of its police force, most importantly, as lieutenant in command of the detective bureau for burglary and organized crime, and at one point, served as temporary chief of police.

His record in law enforcement and crime prevention is most impressive, especially in the field of drug abuse prevention and rehabilitation. In the past, Captain Moreno has served as special consultant to State and Federal drug and organized crime strike forces along with drug rehabilitation. More recently, in 1984, he founded project HELP, a total community drug intervention and awareness program. Captain Moreno is presently serving the San Bernardino County Sheriff's Department as the head of their disaster preparedness unit along with being the county's leading adviser on drug abuse.

Being himself a native of Chino, Louis Moreno has a place in heart for the youth of the community. He cofounded one of California's most superior youth service organizations, the Chino Youth Services Program, and in the 1970's, was instrumental in the establishment of the Jericho Outreach for men and women. His latest community endeavor is serving as a member and acting president of the Chino School Board.

To elaborate on Moreno's involvements in local and State organizations would take considerable time for they cover a broad and diverse spectrum. I feel it is safe to say that Louis Moreno has extended his time and expertise far beyond that which is normally asked from a citizen, all for the benefit of his community.

Mr. Speaker, I am extremely proud of the accomplishments of Capt. Louis Moreno, and I want to join with the colleagues, family, and friends in saying thank you to him for having the courage and dedication to be one of Chino's finest. It is indeed a privilege to represent a community like Chino, a place that has been made better by the likes of Louis Moreno. I wish Louis all the best for a healthy and happy retirement.

STOP DEFICIT SPENDING—PASS GRAMM-RUDMAN-MACK

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. SCHUETTE. Mr. Speaker, House and Senate conferees are in the process of making a historic decision. They are debating whether or not the Gramm-Rudman-Mack deficit reduction proposal should become law.

As you know, the Gramm-Rudman-Mack measure would mandate spending cuts of $36 billion to $43 billion annually for each of the next 5 years. By 1991, we will have balanced the Federal budget. I commend my distinguished colleague, CONNIE MACK of Florida, for introducing this measure in the House and am pleased to be an original cosponsor of H.R. 3520.

I know that there is opposition to this measure. One must ask, Mr. Speaker, why anyone would oppose this simple and straightforward mechanism to get our country out of fiscal crisis. I think also that I can answer why. Everybody wants a balanced Federal budget and no one wants to see his or her favorite program cut.

Mr. Speaker, the future is now. We must demonstrate legislative discipline if we are going to break this deficit-spending habit. We must distinguish between behavior that we like and behavior that assures our survival.

Our children should not have to pay for the mistakes of their parents. There is no reason why, as responsible adults, we should always be passing appropriations bills that exceed the amount of revenue that is raised.

Mr. Speaker, everybody here has to balance his or her checkbook and now it's time to balance the checkbook of the United States. Let's support Gramm-Rudman-Mack and force ourselves to own up to our mistakes and make the hard choices.

NORTH DAKOTA HAS A WORKABLE CLEAR TITLE SYSTEM AT THE STATE LEVEL

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. DORGAN of North Dakota. Mr. Speaker, I would like to bring up an issue that I hope will be addressed in the House-Senate conference committee after the other body finishes its work on the farm bill. That is the issue of whether State solutions to the farm products clear title problem will be allowed to stand. I bring this up because my State of North Dakota has such a solution, and I would like to see it preserved, if possible.

The issue of clear title for agricultural products has been debated for years. On the one hand, lenders have said that the exception granted agricultural commodities under the Uniform Commercial Code was necessary because of the unique quality of much agricultural lending—that is, credit is extended on produce that is yet to be planted.

On the other hand, buyers of farm products have noted the difficulty of checking for security interests quickly, at the time of purchase. Buyers of cattle, for instance, are required to make payment to the seller within 24 hours.

The UCC exception means, however, that buyers of farm products who unsuspectingly purchase farm products which have liens on them, may be held liable for paying off those liens if a farmer or rancher does not use the proceeds of the sale to satisfy the claim of the lender. In other words, buyers may be held responsible for paying for the commodity twice—one to the farmer or rancher, and again to the lender.

In my State of North Dakota, lenders and purchasers of farm products worked together to develop a central notification system to deal with this problem. Lenders will notify the secretary of state of outstanding liens on farm products. The secretary of state will compile a list, formatted both alphabetically and by region of the State, based on these notices from lenders.

Buyers of farm products, in order to avoid the double jeopardy they are now subject to, will have to purchase this list and use it to verify whether or not they should make out a check jointly—to both the farmer and his lender—if there is an outstanding lien.

Each side has made sacrifices in setting up this system. Lenders will have to pay a fee to have notices of liens placed on the central list; purchasers of farm products will pay to obtain the list, which will be updated monthly. However, each side believes the system, which will go into effect on January 1, 1986, is workable and fair.

However, section 1314 of the House farm bill supersedes this system. Neither buyers of farm products nor lenders in my State are happy about this. They would prefer to keep the system they have so carefully worked out at the State level in place. In addition, the North Dakota Banking Commissioner has shared her concerns with me over the current language in the bill, saying it is her opinion that agricultural lending could be restricted.

The issue is scheduled to be heard by the Senate Banking Committee, to which it was referred from the Senate Agriculture Committee. I believe that the House should recognize that some modifications to this provision to satisfy concerns such as those of North Dakota, which already has a system it likes, may be included in the Senate version of the farm bill. I would like to urge my colleagues to keep in mind that some flexibility on this issue may be warranted.

VETERAN OF THE YEAR

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. KOLTER. Mr. Speaker, today I ask that we join in honoring Cameron M. "Smokey" Stover, who has been chosen by the Butler County, PA, War Veterans Committee as their "Veteran of the Year."

Mr. Stover is a man who has served his country well during peace and during time of conflict. As a veteran of the U.S. Army Medical Corps, Mr. Stover served overseas with the 10th Air Force in the Asiatic-Pacific theater. His tour of duty was from May 23, 1944, to November 5, 1945. While on tour, Mr. Stover received numerous decorations and commendations including the Distinguished Flying Cross, which was

presented to him by Gen. Hap Arnold in Kunming, China.

Following the conclusion of the Second World War, Mr. Stover returned to Butler, PA, and has been active in veterans' organizations. The American Legion posts in Butler and Lyndora and the Veterans of Foreign Wars post have received countless hours of service from Mr. Stover since his return home. For example, he has held various positions in local and regional offices of the VFW. Presently, Mr. Stover is serving as chairman of the Voice of Democracy Program sponsored each year by the VFW. Mr. Stover's work has not gone unnoticed at the national level. For the last 8 years, he has received the National-Aide-de-Camp Award for outstanding work in recruiting new members to the VFW.

Cameron Stover has also set an honorable example in serving his community by being a member of the Butler Quarterback Club, past treasurer of the Deshon Area Sewer Authority, and is a past member of the International Drum and Bugle Corp.

Having been employed by Armco Steel in Butler, PA, as a maintenance rigger for 31 years, Mr. Stover is now retired. He is an active member of Christ Community United Methodist Church and still resides in Butler with his wife Margaret.

I think it is proper that this body recognize Cameron Stover for his lifetime of service and achievement.

REAGAN'S ISOLATIONIST FOREIGN POLICY

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. CONYERS. Mr. Speaker, for some time I have been very concerned about the effects of Reagan administration foreign policies in terms of isolating us from our allies and world opinion. Dick Barnett, a senior fellow at the Institute of Policy Studies and distinguished author of the landmark book "Global Reach," has written a superb analysis of this dangerous trend which appeared on the op-ed page of today's New York Times.

The article follows:

[From the New York Times, Oct. 23, 1985]

AMERICA GOES IT ALONE

(By Richard J. Barnett)

WASHINGTON.—"We did this all by our little selves," said President Reagan as he announced proudly that United States Navy fighters had forced an Egyptian plane to land in Italy without prior consultation with either country. In the Administration's view, the widespread American applause for this use of military force against an ally and major aid recipient plainly outweighed the cost in injured relationships with Italy and Egypt. Indeed, the action was a classic example of the Administration's unilateral approach to world affairs.

No Administration in the postwar period has celebrated unilateralism as this one has. In national security, economic policy and diplomacy, Washington prefers to advance American interests through its own initiatives and power rather than the mechanisms of international cooperation.

Upon taking office, the Administration withdrew from the Law of the Sea Treaty. It has consistently denounced the United Nations and refused to be bound by judgments of the World Court. It has pursued economic recovery through deficit spending, high interest rates and an overvalued dollar, thus sucking up needed capital from Europe and the third world without regard to the devastating effects of these policies on other countries.

In Soviet-American relations, the United States has signaled its intention to dash rather than build a relationship based on mutual interest. In Washington's view, our Soviet adversary is to be managed by steadily increasing the threat we pose to it. Indeed, the Administration appears to deny that we have any interest in common with "the evil empire." The approach to negotiation has been grudging and the proposals so far safely non-negotiable. The Administration has, for example, cut off negotiations on the nearly completed Comprehensive Test Ban Treaty: Washington evidently prefers to rely instead on our own technological edge and superior economic power.

The Administration would rather wage a "covert" war against Nicaragua than support Latin American efforts to negotiate the conflict. In Afghanistan, the Administration supports the cause of the "freedom-fighters" resisting the Soviet Army and barely gives lip service to the efforts of our European allies and others to settle the conflict through negotiation.

Perhaps the most dramatic symbol of unilateralism is the Strategic Defense Initiative. With this imaginary technological shield of our own making, we are meant to prevent the nation's destruction by relying on our machines—rather than Moscow's self-interest—to prevent war.

Unfortunately, this reliance on unilateralism comes at the wrong historical moment: "Rambo" nationalism has no place in a world of nuclear weapons and more than 160 countries. Even the most powerful country has lost considerable control over its own economy. America has never been so dependent on world trade, and more than a trillion dollars of unregulated Eurodollars are beyond the reach of the United States Treasury. We risk a trade war reminiscent of the 1930's. Meanwhile, the world debt crisis continues unabated, threatening the collapse of the banking system. None of these problems can be solved by the United States acting alone or laying down the law to other nations.

In the field of national security, the United States remains totally vulnerable, despite the myth of the nuclear Maginot Line in the sky. The pursuit of security through building ever more weapons has failed, as ever more weapons are in turn aimed at us, increasing the risks of war through miscalculation.

The United States is a strong nation, considerably stronger economically and militarily than any other country, including the Soviet Union. But its power to create a world environment in which Americans can be secure and prosperous is limited by the strange new world in which we live. New forms of international cooperation are badly needed; existing international institutions must be improved or replaced. No nation has as much to lose as this one by international anarchy.

The national interest of the United States cannot be served by outmoded nationalism, however good the rhetoric may make us feel. We can no longer secure our most vital interests by acting alone.

EQUALIZATION OF DUTIES ON CANNED TUNA

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. YOUNG of Alaska. Mr. Speaker, today I have introduced legislation to equalize the duties on canned tuna. Currently the duty on canned tuna packed in oil is 35 percent, while the duty on canned tuna packed in water is only 6 percent with an allowable increase to 12½ percent after a predetermined quota is reached. My bill, which equalizes the duties at 24 percent, will ensure the future viability of the U.S. tuna fleet by enabling them to remain competitive in both the U.S. and world markets.

Imports of canned tuna products have substantially eroded the domestic market share and have depressed domestic prices to the point that three major U.S. processing facilities have closed. Imported tuna is expected to comprise up to 28 percent of the total U.S. tuna market in 1985. This equals a 179-percent growth in imports since 1981.

Due to the inequity that exists in duty rates, foreign tuna producers have concentrated on exporting tuna packed in water to the United States and have established market access to the extent that U.S. producers can no longer compete. At the same time, foreign countries have maintained barriers preventing the export of U.S. tuna products. For example, Thailand—a major tuna producer—has a duty rate of 75 percent on all canned tuna. The European Economic Community has a rate of 24 percent. Foreign nations are thereby successfully displacing the U.S. tuna industry in U.S. markets while denying it markets abroad.

By eliminating the tariff differential that currently exists, the U.S. tuna industry will be given the opportunity to compete on a more equal footing with foreign tuna producers. I am not seeking protectionism in this bill. I believe in free trade, but in order for free trade to work successfully, it must also be fair trade. I urge the support of my colleagues for this measure.

TOPSY-TURVY ECONOMICS

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. LELAND. Mr. Speaker, I would like to bring to the attention of my colleagues an article by Mr. Robert Samuelson that appeared in the October 23 edition of the Washington Post. The article clearly points out many of the economic misconceptions of the Gramm-Rudman balanced budget

proposal, specifically its effect on interest rates.

TOPSY-TURVY ECONOMICS

As usual, Congress is all mixed up. It is stampeding toward the Gramm-Rudman-Hollings budget proposal, which would require a balanced budget by 1991, and is forgetting tax reform. This is topsy-turvy economics. The enthusiasm for the budget plan is based on a mirage: the belief that cutting deficits will sharply lower interest rates. Almost no one in Congress understands that our tax system also causes unnecessarily high rates.

We are suffering economic amnesia. The jump of interest rates in the early 1980s was a response to runaway inflation. Because our tax system subsidizes borrowing, suppressing inflation required the Federal Reserve to push rates high enough to offset the subsidies. Otherwise, artificially low rates would have continued to promote inflationary borrowing. Unless the tax subsidies are reduced, any sharp drop in interest rates risks renewed inflation.

Much of the Gramm-Rudman-Hollings debate is a fraud. It focuses on whether budget deficits actually would be cut and, if so, whether Congress is ceding too much power to the president. These are interesting questions that ignore the central economic issue. Even if Gramm-Rudman-Hollings does what it promises, it may fail. The unstated premise is that lower deficits guarantee much lower interest rates. If not, why would anyone favor it?

The cause and cure of our high interest rates is perhaps the most important practical question in economics today. Farmers, debtor developing countries and U.S. manufacturers all have suffered the adverse side effects of rates that, after adjusting for inflation, are near historic records. And big budget deficits are everyone's explanation. In the popular wisdom, they've become the economic equivalent of original sin—the source of all evil.

By raising interest rates, they're said to increase the dollar's exchange rate, bloat the trade deficit, weaken the recovery and fan protectionism. Eliminate the deficits, and everything else (it's argued) will get better. It's a domino theory of economics, whose appeal lies in its sweeping simplicity. It does not, however, fit the evidence:

The biggest rises in interest rates occurred before deficits exploded. In 1981, three-month Treasury bills averaged 14 percent. Adjusted for inflation, the "real" rate was 4.5 percent. In the third quarter of 1985, Treasury bills averaged 7.1 percent, with a 3.7 percent "real" rate. In 1985, the budget deficit (as a proportion of gross national product) is twice as large as it was in 1981.

If deficits had made interest rates prohibitive, businesses and households would have been deterred from borrowing. Indeed, in 1981 and 1982, it was predicted that private borrowers would be "crowded out." Instead, private debt rose by $826 billion between the end of 1982 and 1984. The growth rate exceeded the growth of GNP. For many borrowers, tax write-offs neutralized high rates.

Consider a corporation with a 46 percent tax rate that borrows at 10 percent. Because it can deduct its interest expenses from taxable income, its aftertax interest rate is 5.4 percent. At 5 percent inflation, it's borrowing for almost nothing. The same logic applies to individuals. But someone without taxable income—and, therefore, no interest deduction—pays the full 10 percent. The "real" rate is 5 percent.

We have different classes of borrowers, based on their tax rates, and that fosters economic instability. If the Federal Reserve accommodates borrowers with low tax write-offs, it must keep interest rates just above inflation. But the result is accelerating inflation, because for many borrowers effective interest rates (after tax subsidies) are near or below inflation.

Going into debt becomes a simple way to grow richer; borrowing at 5 percent to buy something—a house, for example—whose value is rising 6 percent is hugely tempting. People and firms will borrow a lot, forcing the Fed to pump out inflationary amounts of credit. But offsetting the tax subsidies with higher rates crushes those borrowers who can't take large tax write-offs.

We have been riding this roller coaster for a decade, and the swings are too extreme. As economic conditions shift, so do political pressures for changes in interest rates. In turn, the changes in interest rates cause ripple effects throughout the economy. Exchange rates, inflation and the trade balance are affected. In the 1970s, we had low interest rates, rising inflation and a depreciating dollar. The 1980s' reversal has victimized farmers, debtor developing countries and U.S. manufacturers with high interest rates and a high exchange rate.

Is any of this a part of the Gramm-Rudman-Hollings debate? Hardly. The effect of taxes on interest rates (and, through them, on inflation and exchange rates) is a subject outside mainstream economics and politics. With a few exceptions, economists ignore it. Congress prefers it that way. If anything is more politically distasteful than deficit reduction, it's tax reform. But any serious assault on rates will have to tackle both.

Deficits do matter, though the dangers may lie mainly in the future. By intensifying the demand for credit, they put upward pressure on interest rates. This already may have increased long-term bond rates somewhat. But the Fed can offset these pressures temporarily by pumping out more money and credit—and it has. Low inflation has permitted easier money policies. The deficits' danger exists precisely because this accommodation cannot continue forever without rekindling inflation.

If deficits aren't reduced, our roller coaster ride may get rougher. But if taxes aren't changed, the roller coaster may continue even if deficits vanish. As a practical matter, interest deductibility won't be eliminated, because it's tied to home ownership. But even reducing top tax rates—by ending many tax preferences—would cut the value of the borrowing subsidy. And many other specialized borrowing subsidies could be cut.

Our obsession with deficits is not misplaced. It is simply incomplete, and therein lies the hazard. Congress is struggling with deficits as if they're the beginning and the end of our economic problem. They're not. Just because they're bad doesn't mean they're the source of all evil.

A TRIBUTE TO MR. KENNETH S. HOUSE AND MR. STEPHEN R. CONRAD

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. MRAZEK. Mr. Speaker, I would like to take this opportunity to pay tribute to the two outstanding educators on Long Island who represent the State of New York as recipients of the 1985 Presidential Awards for Excellence in Science and Mathematics.

Kenneth S. House, dedicated biology teacher at Huntington High School for 22 years, has been specially recognized with this award for his superior teaching for students of science. Stephen R. Conrad is an exemplary teacher of calculus at Roslyn High School who has been awarded for his unusual ability to teach students of mathematics. Both men serve as excellent models for their colleagues on Long Island, in the State of New York, and throughout the Nation. The National Science Foundation makes $5,000 grants on their behalf to each school to supplement other resources for improving their science and mathematics programs.

Mr. House has had a profound impact on the quality of science education on Long Island. Not only is he well respected, but he has involved himself beyond the classroom. He has published the Laboratory Education Science Program and has consulted to the college board. In addition, he assists the New York State Regents in writing test items.

Mr. House is extremely versatile within his own field of biology. At Huntington High School, he has devised the genetics and microbiology curriculum. He has taught such challenging and fascinating subjects from advanced placement biology to anthropology and marine ecology.

Mr. House also received two noteworthy awards in 1983. The Suffolk County Science Teachers Association awarded him the Science Teacher of the Year Award and he was chosen by the National Association of Biology Teachers for an Outstanding Biology Teacher Award from New York State.

Stephen R. Conrad, the recipient of the 1985 Presidential Award for Excellence in Mathematics Teaching, is also an unusually talented educator. He earned his bachelor's degree from Queens College and his master's from Yeshiva University and he taught in New York City until he moved to Roslyn High School in 1980, where he teaches calculus and related subjects.

At Roslyn High School, Mr. Conrad plays an integral role in a school-sponsored program known as Independent Research in Math. In fact, he proposes to help to strengthen this program by using part of the $5,000 grant to furnish the math department with a library for students engaged in independent research for math fairs or for the Westinghouse competition.

Mr. Conrad also participates in the grading of the Standardized College Entrance Exams. He encourages his students to succeed in math and in learning in general. "Teaching is not telling," he tells his students on the first day of school. "It's an attempt to help students make their own joy of discovery."

That both outstanding teachers were selected by the National Science Foundation from Long Island high schools makes me very proud. I wish these fine educators renewed success in the classroom and encourage them to continue to serve as role models for their colleagues, and as sources of inspiration for their students. Kenneth S. House and Stephen R. Conrad are an asset to the field of education.

CLARIFYING GOVERNMENTAL RESPONSIBILITY UNDER SUPERFUND

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. GUNDERSON. Mr. Speaker, shortly, we will be considering legislation on the House floor to reauthorize the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 [CERCLA], better known as Superfund.

Subsequent to the Energy and Commerce Committee approval of H.R. 2817 in July, I became aware of an anomaly in the law which might result in private interests being considered solely responsible for the cleanup expenses associated with the release of hazardous materials during the production of munitions or other ordinance parts using government equipment.

Presently, under Superfund, the Federal Government accepts responsibility and liability for the cost of cleaning up hazardous substances at Government-owned, Government operated [GOGO] and Government-owned, contractor operated [GOCO] facilities.

However, there is no similar Federal liability where Government equipment operated under Government supervision on privately owned land and in privately owned buildings results in the release of hazardous materials. Such a private/Federal split of ownership frequently exists in the production of munitions and other ordinance materials.

Clearly, this split of ownership ought not absolve the Federal Government of any responsibility and liability under Superfund. But, presently, it does.

As such, the legislation I am introducing today—and which I will ask the Rules Committee to make in order as amendment to H.R. 2817—would clarify the CERCLA definition of "owner or operator" to include the U.S. Government in cases where munitions or other ordinance parts are manufactured using equipment owned by the Department of Defense, or a subdivision, and a hazardous substance results from the manufacturing operations.

In this way, if a partnership between private industry and the Federal Government results in the creation of hazardous material, all of the partners—not just the private industry partner—will be responsible for its cleanup.

I urge my colleagues to review this issue carefully.

IT'S ABOUT TIME THAT THE UNITED STATES FIGHTS UNFAIR EC FARM SUBSIDIES

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. DORGAN of North Dakota. Mr. Speaker, I would like to express my support for President Reagan's action last week in challenging the fairness of the European Economic Community's export subsidies. It's about time that the United States lodged a formal complaint against this practice, which has been steadily undermining our share of the world wheat market. As Mr. Reagan noted, the EC has used these subsidies to double its share of the international wheat trade over the past 10 years.

The European Community's export subsidies are an integral part of its Common Agricultural Policy [CAP]. The other major components are high price supports and effective barriers against imports. Through CAP policies, the EC has become a surplus producer not only of wheat, but of barley, sugar, butter, powdered milk, cheese, beef, poultry, and eggs.

The EC, unlike the United States, does not operate production control programs. Nor does the Community store significant amounts of excess commodities. Instead, it uses export subsidies—known as restitution payments—to make up the difference between its high internal prices and lower world market prices.

The impact on U.S. wheat producers has been devastating. U.S. exports have declined in both value and volume since 1981. Although other factors have played a role, the EC's Common Agricultural Policy has contributed to the shrinking export situation, both by imposing high threshold prices on U.S. products coming into EC countries, and by unfairly diminishing the U.S. share of world markets.

There is no doubt in my mind that the EC has gone beyond the standard allowed under the General Agreement on Tariffs and Trade—that is, they have used subsidies to gain "more than an equitable share of world export trade." The U.S. Trade Representative's office estimates that the subsidies cost U.S. farmers more than $2 billion in potential sales over the past 4 years—this at a time when the farm economy is also buffeted by stubbornly high interest rates and the overvalued dollar, which in effect adds a 30 percent tax on every bushel of wheat we try to sell overseas.

For all these reasons, I'm glad to see that the President is finally taking a more aggressive stance on foreign trade. Our forecasted $150 million trade deficit, with its negative impact not only in our agriculture sector, but throughout the economy, demands attention. I just hope that the President's initiatives are not too little, too late.

CONGRESSIONAL SALUTE TO THE HONORABLE RICHARD J. FORTINO OF NEW JERSEY 1985 "MAN OF THE YEAR AWARD," THE MOTHER CABRINI SOCIETY OF PATERSON

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. ROE. Mr. Speaker, on Sunday, October 27, residents of the city of Paterson, my congressional district and State of New Jersey will join with members of the Mother Cabrini Society in testimony to an esteemed councilman, distinguished citizen and good friend, the Honorable Richard J. Fortino of New Jersey, whose standards of excellence throughout his lifetime have earned him the most highly coveted award of the Mother Cabrini Society of Paterson, NJ—"The Man of the Year." I know that you and our colleagues here in the Congress will want to join with me in extending our heartiest congratulations to Richard Fortino and share the great pride of his parents, Ben and Ethel Vacca Fortino; four brothers, Roger, Robert, Ronald and Raymond; and sister, Rosand, on this milestone of achievement in their family endeavors.

Mr. Speaker, Richard J. Fortino has been a staunch supporter and active participant in many civic and community improvement programs and we applaud the quality of his leadership endeavors in the vanguard of service to people's needs.

Richard was born in Paterson on January 25, 1951 and, we are proud to boast, has been a resident of the city for his entire life. He attended Paterson public schools Nos. 19 and 27, St. Mary's High School and Montclair State College. During his school years he was an outstanding athlete—both in basketball and football and received outstanding defensive player awards as a member of Paterson's Tri-County Football League.

His exemplary record of performance in academic and athletic endeavors has served to enhance his leadership qualities of self-reliance, character building, sportsmanship, fair play and eagerness to serve others. It was no accident—but based on his integrity, personal commitment and sincerity of purpose to help people—that he was elected to the governing body of the city of Paterson.

Since his election in 1984, he has served the people of the city of Paterson as a full-time councilman engrossed daily in responsible service to our people. He also owns the Westside Weightlifting Gym in the city. It is interesting to note that he was first elected to office as a Democratic county committeeman 8 years ago and has been

active and highly successful in the coordination of many political campaigns at the State and local levels.

The quality of leadership and sincerity of purpose that Richard Fortino has imparted to our people are mirrored in his many accomplishments and the warmth of his friendship that have earned him the confidence and support of all of us who have the good fortune to know him.

Among his accomplishments as a city of councilman which will be referred to at the Mother Cabrini Society's Testimonial Dinner in his honor, we point with pride to the ordinances and regulations he has promulgated and fostered requiring the abatement of lead paint from all city homes, protection against illegal conversions, the homeowner's capital improvement tax exemption increase to $10,000 and repeal of the tenant's automatic tax surcharge.

Richard is indeed a dedicated elected official representing the city of Paterson's second ward but his concerns and actions go far beyond his own second ward. He was the chief architect and sponsor of a program for city-wide street lighting in conjunction with a crime watch study that will be in effect by November 1985. His interest in the education or our young people are well known and recognized not only in Paterson but throughout the State and parents in the city of Paterson are especially praiseworthy of his success in offering a resolution to require a referendum in the city of Paterson's 1986 election to establish an elected school board. He was instrumental in reorganizing the board of recreation of the city of Paterson and his stand on issues such as asbestos are also well-known and respected. His action on asbestos in the public schools resulted in school closings to protect the children until the situation was corrected.

Mr. Speaker, when we reflect upon the contributions of our people to America's history and the quality of our way of life which have achieved preeminence of our representative democracy, second to none, among all nations throughout the world, I am pleased to seek this national recognition of a young man who is a credit to his family and our community. As we gather together on Sunday, October 27 in tribute to Richard's leadership endeavors and personal commitment dedicated to service to people, we do indeed salute the Mother Cabrini Society's Man of the Year—Hon. Richard J. Fortino of Paterson, NJ.

REV. DAVID CORY: AN ACTIVE CHURCH AND COMMUNITY LEADER

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. SOLARZ. Mr. Speaker, I would like to pay tribute to Rev. David Cory, who is celebrating his 25th anniversary as the pastor of the Homecrest Presbyterian Church.

At the age of 83, Reverend Cory is the oldest pastor in active service in New York City. As a church leader, a community activist, and a scholar, he leads a truly inspirational life.

Having graduated from Columbia College in 1926, Reverend Cory pursued his theological studies in Scotland at the New College in Edinborough. It was in Scotland that Reverend Cory began his efforts as a social worker and a champion of the working class people. After working in many of Scotland's slums, he developed a special understanding of the poor—an understanding that has been the catalyst for his life of service.

Upon his return from Scotland, Reverend Cory completed his doctorate in theology at Union Theological College and became the pastor of the Cuyler Presbyterian Church, where he served his congregation for 30 years. During this period, he also became active in politics. In 1931, he ran for Congress on the Socialist Party ticket and in 1938 he again sought elective office when he ran for Brooklyn Bourough president. Although Reverend Cory was unsuccessful in both races, his message of decency, compassion, and assistance for the poor and underprivileged won him the respect and admiration of all those who hear him.

In addition to his numerous responsibilities as pastor, Reverend Cory has devoted much of his time to the plight of the American Indian in post-World War II America. He authored a textbook, "Within Two Worlds," which deals with how the Indian could confront the realities of American urban life. In addition, he has mastered the Mohawk Indian dialect.

After his years of dedicated service to the Cuyler Church, Reverend Cory went on to become the executive secretary of the Council of Churches of Brooklyn, an interdenominational organization devoted to community service. Following his 5-year tenure at the council, he became pastor at the Homecrest Church in 1960.

Since his ordination over five decades ago, Reverend Cory has demonstrated a deep and longstanding commitment to the larger needs of the communities in which he has served. He has contributed innumerable hours and has shown tremendous energy, compassion, and insight in working with his congregation and with the residents of the larger Brooklyn community.

On the occasion of his 25th anniversary as the pastor of Homecrest Church, I want to congratulate him for his many years of service and wish him continued strength and success in all his future endeavors.

COMMEMORATING WORLD FOOD DAY

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 16, 1985

Mr. SCHEUER. Mr. Speaker, I would like to commend Mr. GILMAN for his foresight and leadership in putting together these special orders to recognize World Food Day. There is no simple solution to solving world hunger. What is working in Latin America or Asia may not be appropriate for Africa.

But it is clear that the United States and other developed nations must work together and go beyond the band-aid approach to the problem. We must think and act in the long term. As you may know, the Science and Technology Subcommittee on Natural Resources, Agriculture Research, and Environment—which I chair—is conducting a series of hearings this fall on long-term solutions to the hunger in Africa. In these hearings we are focusing on what science and technology can do to assist sub-Saharan Africa to feed itself.

These hearings, of course, do not purport to be a comprehensive examination of all the issues relating to the African situation. Mr. LELAND and Mrs. ROUKEMA, the leaders of the Select Committee on Hunger, and Mr. WOLPE and Mr. SILJANDER of the Foreign Affairs Subcommittee on Africa have addressed many of the other important issues pertaining to the African crisis. The Natural Resources Subcommittee's examination of the potential of the African environment for feeding its own people on a sustained basis will provide an important contribution to long-range solutions for this region.

The first hearing in the series was held together on September 19 and looked at the climatologic aspects of the drought in Africa. We examined the scientific basis for drought prediction and questioned the possibility that this unusually severe drought may represent a long-term change in climate. Just as climatic variation and the recurrence of drought set one type of limit on the development of this region, the tremendous population growth rate of the nations in sub-Saharan Africa also will determine the future course of development.

On October 17, our second hearing assessed the dimensions of the population problem facing this region and the prospects for future fertility decline. Experts predict that 20 years from now there will be a second Africa with twice as many people to support—to feed and to educate. Any development effort for this region must take into account the vast demands of future populations. In future hearings on October 23, 30, and 31, we will explore various approaches to increasing agricultural production.

African soils are unusually poor and past development practices have not conserved this fragile resource. As a result, in the last 50 years, 650,000 square kilometers of productive land in the South Sahara has become desert. What Africans need are programs providing education and access to low-resource technology, labor intensive technology—appropriate hand tools, simple machines, drought-resistant and blight-resistant crops. In order for this region to have hope for a future, soil and water must be conserved, food production increased, and, at the same time, population growth rate must be stabilized.

We must achieve a balance between food and people if Africa is going to attain food self-sufficiency.

SAVE STATE AND LOCAL GOVERNMENT

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. ECKART of Ohio. Mr. Speaker, much attention has been focused in recent months on several proposals to reform our current tax system. Recently, the House of Representatives' Ways and Means Committee started consideration of this important issue. Many of us agree on the need to simplify our current, complicated tax laws and eliminate the many inequities inherent in it, and President Reagan, too, has come forward with several proposals to alter the existing Tax Code.

Even though the President has eliminated some inequities in his proposals, he seems to have created new ones which are just as unfair as some of the current inequities. Perhaps the most significant of these is his proposal to abolish the Federal tax deduction allowed for the payment of State and local taxes. This deduction has been allowed since the Federal Tax Code was first enacted in 1913 so that our Government would not engage in double taxation.

Double taxation, in addition to being unjust, would have a horrendous effect on the economy of the northeast-midwest region of our Nation. These States, which account for 44 percent of the country's population, would have to pay 57 percent of the new Federal revenue generated by the elimination of this important deduction. In my State of Ohio alone, tax rates for the average taxpayer would increase $701.66 if this deduction were repealed.

I strongly support tax reform in the name of simplicity and fairness; however, I urge the retention of this important deduction to avoid tax inequality.

ELIE WIESEL'S APPEAL FOR REFUSENIKS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. KEMP. Mr. Speaker, President Reagan will soon travel to Geneva to meet with General Secretary Gorbachev. It is imperative that the United States' position is unified and clear. A firm human rights position should be a prerequisite to any other discussion.

The Helsinki Final Act is a clear statement of intent on the part of the 35 signatory nations. The violations on the part of the Soviet Union have been blatant and consistent. Compliance by the Soviet Union with existing agreements should be a prerequisite to entering into new ones. We must have a show of good faith from the Soviet Government that it will not continue its tradition of agreeing to noble goals on paper and violating these same goals in practice.

My good friend and distinguished historian, Elie Wiesel, made an eloquent appeal to President Reagan through an editorial in the New York Times yesterday. Elie Wiesel is the noted chronicler and symbol of the Nazi Holocaust who presided over the groundbreaking for the U.S. Holocaust Memorial Museum in Washington, DC last week.

Professor Wiesel raises the case of Leonid Volvovsky, the latest casualty of the Soviet Union's anti-Semitic war. Volvovsky risks being sentenced to hard labor for his personal commitment to Judaism.

Volvovsky is one more significant name added to a sadly growing list which includes Ida Nudel, Vladimir Feltsman, Vladmir Slepak, Anatoly Shcharansky, and so many others. The recitation of these names has become a tragic litany, a rollcall of people who are punished for their dreams.

Professor Wiesel writes:

When Ronald Reagan meets Mikhail S. Gorbachev, I hope he will speak to him, among others, of an innocent man who is now in danger of being sentenced to hard labor in the Soviet Union. His name is Leonid Volvovsky, a 45-year-old mathematician; his trial opened Friday in Gorky. His "crime": active involvement with the large "refusenik" community there. His friends are worried that the prosecution may use his case as a warning, handing down a severe condemnation.

Leonid is married to Ludmila; they have a 17-year-old daughter, Kira. Their troubles began in 1976 when they applied for an exit visa to Israel. In the eyes of officialdom, Leonid became an outcast. That remains the lot of all refuseniks. Overnight, they are cut off, isolated, marked for harassment, abandoned by colleagues and humiliated by institutions. Still, they lean on each other and help one another to safeguard their sanity and morale.

I have met many refuseniks in the Soviet Union. I admire them. They are, to paraphrase Jean-Paul Sartre's expression, among the freest people in the land. I admire their courage, their exuberant spirit, their unfathomable faith. When I asked them what to send them from home, they answered: "Books, send us books." These books were needed for students and teachers—for the unofficial educational network that now exists throughout the Soviet Union.

Leonid Volvovsky is one of its leading members. He learned Hebrew and English. Thus equipped, he established seminars for Hebrew, Jewish history, Jewish literature and philosophy and ethics. In 1976, he was vice-chairman of a committee that tried to convene a seminar on Jewish culture. This resulted in the first of his several arrests, followed by relentless harassment. Searches were conducted in his home, materials were confiscated, threats were issued. But Leonid Volvovsky persevered, and hundreds of refuseniks owe him their Jewish education. In 1979, his seminar attracted 700 students.

The K.G.B. responded in kind. Leonid Volvovsky "lost" his materials, his Hebrew books. His modest apartment was taken. The renowned scholar had to accept other jobs: elevator operator, photography salesman and garbage collector.

He was arrested on June 26, 1985, and charged under Article 190-1 of the criminal code of the Russian Soviet Socialist Republic. In other words, he is accused of slandering the Soviet Union.

Nonsense. Leonid Volvovsky and his refusenik friends have nothing to do with politics. All they want is to join their families in Israel so that they can lead a Jewish life in accordance with Jewish law. When they meet, they discuss the Prophets, the Talmudic legends and classical Jewish authors, not politics.

I have known the refuseniks, and I know they are more concerned with Jewish memory than with Soviet politics. This is what makes the Volvovsky trial such an injustice. A condemnation would be a scandal.

Let us hope President Reagan will find it important to discuss this case—and hundreds of others—when he meets Mr. Gorbachev. The refuseniks, like the dissidents, are our heroes. They place their hope on us, on our involvement.

They are so many. Ida Nudel, Vladimir Slepak, Anatoly Shcharansky, Dan Shapiro, Iosif Begun, Vladimir and Anna Lifshits and Yuri Edelshtein; The list could go on and on. Is Mr. Gorbachev capable of making a gesture? Will he make it? Should he do so, the refuseniks' hope in us may be justified, and our hope in him as well.

NORFOLK SOUTHERN SHOULD BOW OUT OF CONRAIL

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. EDGAR. Mr. Speaker, months of thorough review and deliberation it has become clear that the sale of Conrail to the Norfolk Southern Corp. would have a negative impact on the railroad industry operating in Conrail's territory, as well as on the jobs, riders, and services depending on the Government-owned rail and freight line. It is also evident that the Department of Transportation's fundamental reason for selling Conrail—that it could not survive on its own—is invalid. Conrail's net income of $500 million in 1984 will lead the railroad to its fifth consecutive year of profitability.

I am submitting this recent editorial from the Philadelphia Inquirer, which summarizes why Congress should move ahead on options to keep Conrail an independent railroad. I think my colleagues will find a public offering of stock like that proposed by Morgan Stanley & Co. a more preferable and attractive proposal not only for my State of Pennsyvlania, but for the entire Nation as well. I urge my colleagues to cosponsor H.R. 2873, which I introduced with Representatives ECKART and BLILEY to implement the Morgan Stanley plan. The editorial follows:

[From the Philadelphia Inquirer, Oct. 23, 1985]

CONRAIL SHOULDN'T BE SOLD TO NORFOLK SOUTHERN

It has become increasingly uncertain in recent weeks whether Congress will act this year on proposals for the sale of Conrail but

it now is abundantly clear that, one way or another, Transportation Secretary Elizabeth Hanford Dole's recommendation that it be sold to the Norfolk Southern Corp. should be rejected. That could be done by congressional action if necessary but more appropriately by Mrs. Dole's withdrawing her recommendation or Norfolk Southern's rescinding its purchase offer.

The Norfolk Southern proposal, embraced by Mrs. Dole in February, appeared shaky from the start. It has become a growing embarrassment with each passing month. Testimony at public hearings and authoritative analyses have demonstrated that selling Conrail to Norfolk Southern would be detrimental to the national interest and jeopardize competitive railroad-freight service in the Northeast and Midwest, where Conrail operates.

A particularly devastating blow was dealt last month by the Interstate Commerce Commission in a report to the House public works and transportation subcommittee chaired by Rep. James J. Florio (D., N.J.). The ICC concluded that acquisition of Conrail by Norfolk Southern would place in doubt the long-term viability of smaller railroads serving portions of the same territory.

The ICC's report gives added validity to earlier findings of the U.S. Railway Association (USRA), which monitors Conrail operations for Congress. It reported in July that regional railroads operating in Conrail's territory would lose substantial volumes of traffic if it were acquired by Norfolk Southern, raising questions about their ability to remain in business.

At the outset, the Justice Department ruled that a Norfolk Southern takeover would violate antitrust laws unless significant trackage was divested to smaller railroads. The subsequent ICC and USRA findings suggest that, even with divestiture, the outlook for small lines would be bleak and rail-freight customers in some areas could find themselves at the mercy of a Norfolk Southern monopoly.

Moreover, the basic rationale for selling Conrail to Norfolk Southern—namely, that Conrail could not stand alone—is no longer valid. Conrail, with net income of $500 million in 1984, is now well on its way to a fifth consecutive year of profitability. USRA has informed Congress that Conrail should remain profitable at least through the remainder of the 1980s.

There also are questions about the adequacy of Norfolk Southern's bid. It could become a government giveaway considering tax benefits that would accrue. But with a sale to Norfolk Southern demonstrated to be unwise because of other factors, there is no point in haggling over price.

The proper course for Congress now is to devote its attention to options that would preserve Conrail as an independent railroad. One way to do that would be through a public offering of stock. A consortium headed by Morgan Stanley & Co., a New York investment firm, has proposed to buy Conrail and offer most of all of the stock for sale to the public.

Congress has not yet fully explored Morgan Stanley's proposal and there are many questions to be answered. That should be the focus of congressional attention in weighing Conrail's future.

Norfolk Southern has become a distraction. It received a fair hearing on an offer that was scrutinized and found wanting. It should step aside and let Congress move on to other options.

THE DEFICIT REDUCTION PLAN

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, October 23, 1985, into the CONGRESSIONAL RECORD:

THE DEFICIT REDUCTION PLAN

Frustrated by huge, recurrent deficits, Congress is considering a dramatic new approach to balance the federal budget by 1991.

Balanced budget fever is not new in Congress, but the latest approach might have greater impact than before. The plan in its current form sets a maximum deficit of $180 billion in 1986, and reduces the allowable deficits by $36 billion each year, producing a balanced budget in 1991. The plan includes a powerful mechanism to force compliance with the limits: if Congress and the President fail to make the mandated reductions, automatic, across-the-board spending cuts would go into effect. Stronger enforcement procedures ensure that the budget targets are followed in detail during congressional consideration of budgetary legislation. Unlike the current budget system, in which targets can be waived by a resolution of the House or Senate, deficit targets in the new plan could be waived only by passage of legislation subject to a presidential veto.

Each year, the Office of Management and Budget (OMB) and the Congressional Budget Office would jointly estimate the deficit, the gross national product, and the amount by which the deficit could exceed the approved deficit cap. In case of disagreement, the two figures would be averaged. If the projected deficit exceeded the cap by more than 5% (7% in 1986), the President would be required to reduce spending to bring the deficit under the limit. Half the savings would come from reducing or eliminating automatic spending increases such as various cost of living adjustments (COLAs); the other half would come from equal, across-the-board cuts in outlays for most discretionary federal spending. Social Security, interest payments on the debt, and some relatively uncontrollable defense procurement expenses would be exempt from automatic cuts. Unless Congress proposed alternate cuts in spending and worked out an agreement with the President, the President's cuts would prevail. A declaration of war would negate the compliance requirement and a recession could postpone it.

In effect, the plan creates an annual budget crisis. If Congress does not reduce the deficit to the required level, spending cuts would be made automatically. The presumption of the plan is that the threat of automatic spending cuts, administered by the President, would scare Congress into meeting its own budget targets.

Although an innovative approach to our deficit problems, the plan raises several questions. One worry is that rigid targets could be economically counterproductive. Without good economic performance, it will be difficult, if not impossible, to meet the deficit caps. In these circumstances, Congress might be required to cut spending or raise taxes to meet the targets, which could worsen the downturn. Most policy makers recommend increased government spending during a downturn to stimulate the economy.

The plan is also unclear on crucial issues, such as its effect on defense spending and major programs for the poor. While the President could recommend tax increases to reduce the deficit, he is not required to do so. Action to reduce the deficit emphasizes spending cuts, but many areas of spending are excluded from the cuts. The exemption of Social Security, a large share of federal spending, places an extra burden on other federal programs. Expenditures under binding contracts and other prior commitments would be exempt from across-the-board cuts, as could about 40% of "uncontrollable" defense expenditures.

Spending cuts in remaining categories could disrupt vital government services. Sharp cuts in discretionary programs like education, health care, and defense would be particularly disruptive since they fall heavily on more easily controlled spending categories such as personnel and maintenance. Defense cuts, for example, would probably be made by reducing civilian and military personnel costs, maintenance and training operations, and purchases of spare parts and ammunition. Non-defense agencies such as law enforcement, courts, air traffic control, tax collection, public land management and VA hospitals would also suffer large personnel cuts. One sensitive point is that COLAs for veterans and the poor could be reduced or eliminated, while those for the elderly under Social Security would not, raising disturbing questions of equity.

The plan also raises constitutional questions. The plan's impact on the legislative-executive power balance in budget-making is unclear, but it could increase the President's budgetary powers. His determination that automatic spending cuts should take effect would be based on deficit projections prepared in part by OMB, which is an integral part of his office. In addition, although the plan apparently stipulates how spending would be cut if the deficit targets are exceeded, ambiguities in the bill's language raise questions about the extent of the President's new powers to reduce spending.

These problems show the difficulty of translating strong sentiment for deficit reduction into a manageable budget process. Undoubtedly, the plan would be a powerful tool to reduce the deficit. That is its most attractive feature. Despite serious efforts to reduce the deficit in recent years, no end to $200 billion annual deficits is in sight without drastic action. Members are now trying to determine how the plan would work and what effect it would have on the economy and government programs. I am concerned that the plan could require major cuts in the budget even if such cuts caused a recession, that it would require deep cuts in military spending, and that it would make tax increases more likely. I am also uneasy that the plan tips the balance of power over spending toward the President. Also, because some of its provisions can be waived, the plan will not necessarily force the President and Congress to make tough decisions they have avoided in the past. Nonetheless, the plan deserves careful consideration as an approach to our horrendous deficit problems. At the very least, the plan needs a lot more discussion and revision. Members must address the plan's problems and correct them before it becomes law.

DANIEL ORTEGA

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. DORNAN of California. Mr. Speaker, Commandante Ortega's appearance Tuesday on the "Phil Donahue Show" was, to put it mildly, disgusting.

However, even Phil Donahue's national bootlicking apology for U.S. funding of the Contras did not prevent Daniel Ortega from exposing himself as the petty little thug that he is.

That made it tough for Mr. Donahue, but he pressed on with his message to the Commandante which was basically, "Don't you know you are making things awfully tough for us fellow travelers here in the United States. I mean, Danny, first President Reagan was proven right in El Salvador and now you're helping prove him right in Nicaragua. What about the credibility of us liberals."

Alas, it is too late for the dyspeptic Donahue. This neutral-gender feminist has no credibility left and is now more irrelevant than ever.

Accordingly I would now like to resubmit for the historical record my floor statement of Tuesday on this subject along with an excellent analysis of the program by Don Kowet that appeared in the Washington Times on Wednesday, October 23:

Mr. DORNAN of California. Mr. Speaker, this morning "The Phil Donahue Show" on network television, and carried across the country in syndication reaching millions of people, hosted the Communist President of Nicaragua Daniel Ortega.

Now, you and I both know, Mr. Speaker, that Phil Donahue, Irish last name notwithstanding, is the No. 1 anti-Catholic bigot in the United States as far as widespread negative impact on our beloved church is concerned. Phil Donahue is to Catholicism what Lewis Farrakhan is to Judaism. If this Donahue were to attack Jews or blacks or any other ethnic or racial group the way he attacks the Catholic Church I love, he would be kicked off the air by any of the networks. But, Mr. Speaker, remember what Arthur Schlesinger has said for decades. Anti-Catholicism is the anti-Semitism of the pseudo-intellectual left.

So it was a peculiar thing to see Donahue, given his hatred of Catholicism, pressing Ortega about his persecution of a man I have called the most courageous clergyman in this hemisphere. Bishop Miguel Obando y Bravo. Donahue, of course, pressed the case weakly about Ortega trying to crush religion. He mostly verbally dusted off Ortega's shoes. Donahue did bring up the testimony of Alvaro Jose Baldizon, a man who defected from the highest levels of Tomas Borge's Ministry of the Interior. Baldizon has told ghastly stories of Communist murder and torture by the Sandinistas inside Nicaragua.

Baldizon, unfortunately, has met with only eight or nine Congressmen. He told me there are 10 times as many political prisoners as under the hated dictator Samoza. He said there is wholesale capital punishment, and that he couldn't take the unrelenting murder and torture.

This scene was bizarre, of Ortega reaching out to the American people on "The Donahue Show" and challenging our President to come down to Managua and speak to the Nicaraguan people on television as Ortega was doing, through a simultaneous translator.

Well, Mr. Ortego, I accept that offer as a supporter of the President's policies. I hope other Members will. I would like to go down to Managua and plead again for the brother and the wife of Mr. Baldizon. They have been imprisoned and abused because Baldizon, obviously, speaks the truth.

When Donahue brought up Baldizon's wife and imprisoned brother, Ortega looked as if he had been hit in the forehead with a ball peen hammer. Mrs. Ortega, who speaks perfect English, and the translator were also stunned and fished for an answer. Ortega said that if Baldizon's brother is in jail, if is because of offenses that the brother committed. Ortega, of course, denied that he holds 10,000 political prisoners. The shows was, all in all, Mr. Speaker, an inadvertent unmasking of a Communist dictator on a man's program who gags on the word "Communist." Phil Donahue is not alone in his aversion to using the proper description of a Communist as a Communist. We have more than a few members in this chamber with the same hangup.

By the way, I wonder, Mr. Speaker, if Donahue, a Notre Dame alumnus, has publicly condemned the kidnapping of President Duarte's daughter in El Salvador. Mr. Duarte is a fellow Notre Dame alumnus.

ORTEGA SAYS HIS "VICTORY" JUSTIFIES DENIAL OF RIGHTS

(By Don Kowet)

It was a dirty job, but someone had to do it.

Daniel Ortega, the president of Nicaragua, had the poor taste to time his suspension of all civil liberties at home shortly before he was due in New York to celebrate the 40th anniversary of the United Nations.

Liberals who had bestowed on the Sandinistas their blessings were bleeding.

New York Times columnist Tom Wicker wrote that Mr. Ortega's act was "a heavy burden to bear," calling the Sandinistas "their own worst enemy."

The Washington Post's Mary McGrory was about to award the Sandinista an "Oscar for bad timing." She wrote: "Whoever he was aiming at, Ortega, once again, seems to have shot himself."

Someone had to face the fallen idol on national television.

Phil Donahue, that incurable hemophiliac, rolled up his sleeves, tightened his tourniquets and braced himself for the bloodletting.

In a program last March, Mr. Donahue had flaunted his Sandinista sympathies, joining a nun and a congressman in their assault on Rep. Robert Dornan, California Republican, a defender of aid to the Nicaraguan resistance.

But yesterday morning, with President Ortega and his wife, Rosario Maria Murillo, seated beside him at the conference table, Phil seemed uncharacteristically subdued. Glum. A power-outage dimmed his usual high-energy performance. Phil was taking Mr. Ortega's indiscretion personally.

Mr. Ortega had foregone his famed battle fatigues for a solemn gray suit; his wife, the pretty Rosario, was wearing a blue dress with a puritanically high collar. The scenario was familiar to any parent who ever was called to school to see the principal because little Janey or Johnny had cut a class or tossed a spitball in science lab.

Phil was disappointed in his pupils and had to reprimand them. But he was not prepared to admit that they had fulfilled the dire promise of the White House probation officer who had predicted all along they'd end up in reform school.

It didn't take long before the audience realized that, as far as Phil was concerned, suspending all civil rights in Nicaragua was only a misdemeanor.

"How could you impose such radical measures on your own people at a time when you claim to be on the edge of victory?" Phil said. "You really have apparently scored, without meaning to, a tremendous public relations victory for the Reagan administration."

Phil was so upset.

Mr. Ortega replied that "when you're at the point of reaching a victory, but you have an opponent who has many resources, then you have to make a maximum effort to assure your victory, and thus bring nearer the possibilities for peace."

The answer made no sense at all. Suspending civil liberties, as most idiots know, is a sign of weakness, not of strength. But not this idiot. Phil had a list of questions, and kept on reading them.

"But . . . this is the worst kind of repression," said Phil. He was worried about the appearance of dictatorial arbitrariness. "This looks like the work—I'm not saying it is, Mr. President—it looks like the work of a fascist government."

The lovely Mrs. Ortega wanted to interrupt.

"May I?" she said.

"You may, of course you may," Phil gushed.

"We don't like these measures, we regret them. But what else can we do if we are at war?" asked the first lady, her voice dripping with pathos and wounded sincerity. There was, she said, "a manual by the CIA on how to assassinate our leaders."

Phil: "Yes, there was."

"We have to defend ourselves."

Phil: "Yes, you do."

After Mrs. Ortega's passionate plea, it was time for Phil to unload the first of his vaunted Value Judgments. Would he deliver an indictment of Sandista repression?

"I don't speak for all Americans," said Phil with a rare modesty, "but I do speak for a considerable number when I say that . . . millions were embarrassed by that [CIA] manual. And millions today," Phil added emphatically, "are upset at this administration for the private war that they accuse it of engaging in against your country."

Having rendered this public apology on our behalf, Phil returned to the root of his irritation: Mr. Ortega's clumsiness at public relations.

"You have 60,000 armed people in Nicaragua," Phil roared. "It looks like you're afraid of your own people!"

Phil was bothered. It wasn't that Mr. Ortega had confiscated a church newspaper, but that he had done it when the world was watching.

"You've snatched defeat from the jaws of victory! You've got the whole Catholic Church angry with you . . . . You cannot confiscate a church newspaper and expect the world to give you a standing ovation," he said. "It's a political newspaper," replied Mrs. Ortega.

"So what," said Phil, assuming the role of media consultant. "Let them speak. Your revolution," he said, "is popular."

This might have been a relief to the president and his first lady. Others might wrongly conclude from Mr. Ortega's suspension of civil liberties that he feared that his fully armed populace might be discontented enough to start pointing their pistols in his direction. But Phil had taken his own poll, and found that Mr. Ortega had the full support of the people!

A photo flashed on the screen showing Mr. Ortega in his role of doting father, surrounded by his seven sons.

"Seven boys!" cried Phil. "Wow! Your daughter has the sympathy of most of the women in this audience."

The audience laughed. Now the Ortegas were just mom 'n' pop.

Phil was nearing the end of the show. A caller complained that he had been apologizing "for America to a Communist dictator." "Well," said Phil scathingly, "aren't you a little ashamed that we gotta privately fund [the resistance]? What a terrible thing for a powerful nation, a democratic nation, to do."

In a rush of commercials—nobody gets interrupted by commercials in Nicaragua, the Ortegas bragged—the program was over.

It had been a dirty job, but someone had to do it.

1985 CONTRIBUTIONS TO U.N. FUND FOR DRUG ABUSE CONTROL

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. GILMAN. Mr. Speaker, I recently received correspondence from Dr. Giuseppe di Gennaro, Executive Director of the U.N. Fund for Drug Abuse Control [UNFDAC], discussing the forthcoming U.N. Pledging Conference for Development Activities, which will be held in New York on November 14–15, 1985, and detailing cash contributions and pledges for 1984 and 1985—as of August 31, 1985.

The good news is that 39 members of the United Nations contributed $11,947,943, which I believe is a record contribution to UNFDAC and which has already been broken for 1985—as of August 31—in the amount of $15,629,353. These cash contributions and pledges reverse a downward trend that occurred in 1983 in which only 28 nations reportedly contributed slightly more than $3.7 million to UNFDAC.

The bad news is that worldwide efforts to provide cash contributions to the U.N. Drug Fund are still shouldered by only a handful of nations with many nations making meager symbolic contributions and three-fourths of the 159 members of the U.N. community not even contributing a single penny to the global effort to combat narcotics trafficking and drug abuse. As of August 31, 1985, only 41 nations, or 25 percent, of the 159 member nations of the United Nations contributed $15.6 million to UNFDAC.

Although the contributions for 1984 and 1985 represent recordbreaking commitments by nations of the U.N. system, the international community must not become complacent by this record, for in reality the $12 million and the $15 million contributed to the U.N. Drug Fund for 1984 and 1985 to conduct a global "war" against narcotics trafficking and drug abuse is a pittance compared to the hundreds of billions of untaxed dollars that the narcotics-terrorists reap from their illicit drug activities. If nations of the international community are truly serious about waging a global "war" against the narcotics-terrorists, then the entire family of nations must contribute to this effort and many nations should try to increase their contributions to the fund.

Drug trafficking and drug abuse have reached epidemic proportions throughout the world. The political, economic, and social institutions of all nations are being corrupted by the narcotics-terrorists and the health of citizens throughout the world are being jeopardized by the deadly menace of drug abuse. Drug-producing nations have now become drug-consuming nations and drug-consuming nations, including the United States, have become drug-producing nations.

Given the enormous magnitude of the illicit production, trafficking, and consumption of narcotics, I hope that more nations will participate at the forthcoming U.N. Pledging Conference for Development Activities and that the 159 nations comprising the U.N. system will contribute to the U.N. Drug Fund. To wage an effective "war" against the narcotics-terrorists requires a worldwide commitment from the international community in the form of additional funds, equipment, personnel, expertise, and other resources. Now is the time for a concerted global program of action, not mere rhetoric.

As Dr. di Gennaro stated in his letter to the international community requesting governments to contribute to the U.N. Development Conference:

The level of funding received so far is inadequate in the face of the current dimensions of the problem—with the enormous institutional, economic, social and human costs associated with it—and is totally disproportionate to the proceeds derived from the illicit drug trade. Although it would never be possible to confront the prevailing situation with resources equal to those at the disposal of drug traffickers, the international community should react to the unprecedented challenge posed world-wide by the spread of drug abuse and trafficking by taking advantage of the acquired momentum of the multilateral approach. The gravity of the evil to which societies are prey and the magnitude of the financial empires of the crime syndicates can be effectively opposed only if countries are prepared to mobilize comparable determination and commensurate resources, in a renewed spirit of solidarity.

Mr. Speaker, in an effort to share with my colleagues information concerning contributions to UNFDAC for 1984 and 1985, I am requesting that at this point in the RECORD the insertion of the following documents: the complete text of Dr. Gennaro's letter to me, dated October 7, 1985, his letter to members of the United Nations, dated October 3, 1985, the status of contributions pledged or paid for 1984 as of December 31, 1984, and the status of contributions pledged or paid for 1985 as of August 31, 1985.

UNITED NATIONS,
Vienna, Austria, October 7, 1985.

Hon. BENJAMIN A. GILMAN,
U.S. House of Representatives, Select Committee on Narcotics Abuse and Control, Washington, DC.

DEAR CONGRESSMAN GILMAN: I have received from the Office of the Secretary-General a copy of your letter to him of 19 June 1985, along with his response of 24 July 1985.

Allow me to express our appreciation to you for your firm statement of support to UNFDAC. For many years we have known that we had a strong ally in you, as a leader fully cognizant of the unique role of UNFDAC in the global fight against drug abuse.

I was pleased to note your emphasis on the need for broader support to UNFDAC. You will note in the attached letter, which has gone to all Member States of the United Nations, that we have pointed to the fact that only a "handful" of Governments provide the bulk of the financing of UNFDAC.

While I join you in deploring this situation, I am indeed pleased to notice a major improvement in both volume and breadth of support. For example, since 1 January 1984 contributions to UNFDAC have nearly equalled those made during the entire thirteen years of the Fund's previous existence. We are thus able to increase substantially our programme. The budget proposed for 1986 is in fact 34% higher than that for 1984. This has been accomplished without significant increase in UNFDAC's own operating budget.

As for the diversity of the funding, the group of "major" donors is slowly increasing. For example, support from Italy, for programmes in South America and Pakistan, is now on the order of that of your own Government, while Norway continues to be a pillar of support to our South East Asia programmes. The Federal Republic of Germany has recently decided to provide a special purpose contribution for UNFDAC's work in South America. We are also encouraged by much greater financial support from the United Kingdom to the UNFDAC projects in Pakistan through an initial pledge of US $1.2 million, with strong indications of further pledges. The Government of Saudi Arabia has pledged a similar amount to UNFDAC for Pakistan. Indications have been received of major increases in contributions from Canada, Japan, Sweden and Switzerland as well. I enclose a list of pledges made during the entire year 1984, and those made to 31 August this year.

Despite this improvement, I agree with you entirely that a number of Governments are conspicuously absent from the list of major donors. We are making a concerted effort to ensure their participation, and I retain my optimism that we will succeed.

Your faithful support and that of the select Committee are highly appreciated, and I am confident that we can count on you now and in the future.

I take this opportunity to extend to you my warmest personal greetings and best wishes.

Yours Sincerely,

GIUSEPPE DI GENNARO,
Executive Director,
U.N. Fund for Drug Abuse Control.

UNITED NATIONS,
Vienna, Austria, October 3, 1985.

SIR: I have the honour to refer to the forthcoming United Nations Pledging Conference for Development Activities, to be held in New York on 14 and 15 November 1985, during which Governments will have the opportunity to pledge their financial contributions to the United Nations Fund for Drug Abuse Control (UNFDAC).

In the past two years, UNFDCA has witnessed a major expansion of its activities. The total pledges made for UNFDAC in 1984 up to and including the first quarter of 1985, which amounted to $US 64.5 million, almost equal the contributions received during its entire 13-years existence prior to that time. This new financial dimension has permitted UNFDAC to programme its operations for 1985 at a level of $US 18.7 million, representing an increase of almost 300 percent over the average annual expenses in the past.

Guided by the experience gained since its creation, UNFDAC is chanelling international assistance funds towards the support of comprehensive programmes and projects intended to meet the most urgent needs. For that purpose, UNFDAC has prompted the formulation of a number of masterplans, as a basis for the development of viable projects, with clear goals articulated prior to implementation. This approach encourages collaboration between donor and recipient Governments and harmonizes drug control activities. At present, the Fund's resources are allocated to assist approximately 25 developing countries, through a total of 70 integrated rural development programmes and sectoral projects in the fields of law enforcement, preventive education, treatment and rehabilitation.

Breakthroughs in international efforts to curb the illicit supply of drugs are now in the offing. Technical co-operation based on a rural development approach has proven to be effective, when combined with the individual Government's determination to take concurrent legal measures. Programmes of this nature are well under way in both Asia and Latin America and include activities as diverse as crop substitution and diversification, road-building, rural health, electrification, agro-industry, credit and marketing facilities and community development, for the implementation of which far more resources than those currently available are necessary.

Also, much more remains to be done in order to stem the phenomenon of drug abuse, which has become even more serious, especially among young people. Rates of addiction in some developing countries are as high as in the worst-hit industrialized countries. With the many other dilemmas that they face, the developing countries are the most poorly equipped of all to cope with the problem. Through its projects in preventive education, treatment and rehabilitation, UNFDAC offers an opportunity for action which might otherwise not exist.

Despite the high degree of confidence of Member States in UNFDAC and the progress achieved in proving the effectiveness of the multilateral approach to drug abuse control through development assistance, there are still many countries which are providing only symbolic contributions or, indeed, no contributions at all. Consequently, the financial burden continues to be shared by a handful of Governments.

Furthermore, the level of funding received so far is inadequate in the face of the current dimensions of the problem—with the enormous institutional, economic, social and human costs associated with it—and is totally disproportionate to the proceeds derived from the illicit drug trade. Although it would never be possible to confront the prevailing situation with resources equal to those at the disposal of drug traffickers, the international community should react to the unprecedented challenge posed worldwide by the spread of drug abuse and trafficking by taking advantage of the acquired momentum of the multilateral approach. The gravity of the evil to which societies are prey and the magnitude of the financial empires of the crime syndicates can be effectively opposed only if countries are prepared to mobilize comparable determination and commensurate resources, in a renewed spirit of solidarity.

Both the donors to UNFDAC and the countries in which UNFDAC undertakes projects share a common concern: to protect society from the threat posed by illicit drugs, which undermine social and economic development for both the rich and the poor countries and which must be countered simultaneously on all fronts.

It is for these reasons that we are appealing to your Government to review and reinforce its commitment, by following the example of those States which have so generously and substantially increased their contributions to the Fund.

It is our hope that, with the additional support of your Government, the level of resources to be made available to UNFDAC will increase still further at the forthcoming Pledging Conference, thus strengthening our operational capacity to combat drug abuse.

Accept, Sir, the assurances of my highest consideration.

GIUSEPPE DI GENNARO,
Executive Director,
U.N. Fund for Drug Abuse Control.

U.N. FUND FOR DRUG ABUSE CONTROL

[Status of contributions pledged or paid for 1985 as at August 31, 1985]

	Country	Currency of pledge	Amount	Amount in U.S. dollars or U.S. dollars equivalent
1.	Australia	Australian dollars..	150,000	122,535

A TRIBUTE TO DR. ANTHONY TERCYAK

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mrs. JOHNSON. Mr. Speaker, today I would like to join the members of the Polish American Business and Professional Association in honoring the outstanding work of Dr. Anthony Tercyak. A music educator since 1959, Dr. Tercyak has devoted over 25 years of his life to teaching music to our youth. After teaching in Waterville, ME, and Darien, CT, Dr. Tercyak is currently the director of the Talented and Gifted Program for music at New Britain High School.

Dr. Tercyak is well known throughout New England as a very talented guest conductor and an outstanding example for the young people he instructs. A Polish folklore scholar, Dr. Tercyak has incorporated his love of Polish folklore with his extensive background in music. The young people of New Britain are benefiting not only from his extensive musical background, they are learning very important cultural lessons as well.

Devoted to the entire community, Dr. Tercyak is a corporator of the New Britain Boys' Club, the charter past president of the Holy Cross Parish Council, a member of the Knights of Columbus, and a member of Connecticut Music Educators.

Mr. Speaker, I am sure you will agree with the distinguished members of the Polish American Business and Professional Association and indeed all Americans that Dr. Tercyak is certainly a fine example of a selfless, devoted citizen dedicated to the youth of today and the leaders of tomorrow. I applaud his efforts and hope that others will follow his example for the good of all our country.

CONGRESSMAN GEORGE MILLER SALUTES JACK HORTON OF RICHMOND

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. MILLER of California. Mr. Speaker, Jack Horton has been devoted to the business of the residential development of Richmond, CA, for 34 years, starting each day with, "Good morning. It's a beautiful day in Richmond." On October 24, 1985, an era of Richmond history will come to a close. "Mr. Richmond," as Jack Horton, executive vice president of the Richmond Chamber of Commerce, has come to be known, will retire.

Jack has long been known as Richmond's biggest fan. He was raised and educated here and has been employed here since 1923. He remembers the past glory days and holds strong convictions for the good times ahead for the city. He sees Richmond as a "diamond with many facets" and has been in the forefront of polishing that diamond in his relentless pursuit of bringing business and industry to the city.

He leaves Richmond at a time when his hard work is beginning to pay off. The billion dollar development along Richmond's waterfront, overlooking San Francisco, Oakland, and the Marin County hills, is underway with new condominiums, new marinas and open space for the public. Moving up Highway 80, you see the Hilltop development, with its shopping center, new office buildings, growing residential community, and plans for a new highrise hotel. All these are part of the dream Jack has for Richmond.

The city of Richmond will surely miss his smile and good humor. I wish Jack and his wife, Josephine, a long, happy and healthy retirement. It is my hope that Jack will remain active in civic affairs to see that his dream for Richmond is fulfilled.

Jack, on behalf of myself and the residents of Richmond, which is my own hometown, we salute you. Thank you for all you have done.

NATIONAL LUPUS AWARENESS WEEK

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. O'NEILL. Mr. Speaker, it is with deep concern that I rise today in recognition of National Lupus Awareness Week, which is being observed from October 20 through 26.

Systemic Lupus Erythematosus is a chronic inflammatory disease of autoimmune nature that can affect various parts of the body, especially the skin, joints, blood, kidneys, and central nervous system. Over 500,000 Americans suffer from lupus and it is estimated that 50,000 new victims are discovered each year. It can attack men, women, and children alike, however, it is most common among women of childbearing ages.

The purpose of Lupus Awareness Week is to draw the attention of all Americans to this chronic and life-threatening disease. Lack of knowledge and fear only perpetuate misunderstandings about lupus. It is not contagious and with proper diagnosis and medical care patients can lead normal and active lives. Yet, it is only with continued education and substantial research that advances in treatment and an eventual cure are possible.

It pleases me to note that many of the strides that have been made to increase public awareness and fundraising for lupus are the result of the establishment of the Lupus Foundation of American, by Henrietta Aladjem of Massachusetts. In addition to bringing lupus to national attention, the foundation provides support groups for lupus victims and their families through its 100 nationwide chapters.

As Lupus Awareness Week draws to a close, let the fight for greater education and research continue throughout the entire year. With the cooperation of government, private groups, and individual citizens, the day will soon come when lupus is a curable disease.

TIME OF REMEMBRANCE

HON. DAN MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. MICA. Mr. Speaker, I am pleased—and saddened at the necessity—to announce that today, October 23, has been proclaimed a Time of Remembrance for victims of terrorism. This day marks the second anniversary of the terrorist attack on the multinational peacekeeping mission in Beirut, Lebanon. This is a day to honor those who have died on the front lines of terrorism, a day to remember those who have been victimized by this international pestilence.

We, of course, are all cognizant of the immediate importance of this day. Leon Klinghoffer, so recently a victim of a terrorist act, remains uppermost in our minds. Terrorism is nothing less than undeclared warfare; Leon Klinghoffer was a soldier whose life was taken in the undeclared war between barbarians and civilized peoples everywhere.

The sad fact is, terrorism is on the rise: Diplomats, businessmen, tourists, unknowing bystanders, all are increasingly the targets of international terrorists who are nothing more than self-glorified hoodlums.

Terrorism will wane only when all nations undertake an unyielding policy of cooperation, of bringing terrorists to justice when possible and swiftly retaliating when appropriate. This day will serve to heighten our attention to terrorism and its victims, and hopefully to help bring about its demise. Therefore, I am proud to have been the sponsor of this resolution, and I look forward to the day when such resolutions will no longer be necessary.

A TRIBUTE TO THE HONORABLE ROBERT MUIR, JR.

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. COURTER. Mr. Speaker, I would like to join the members of the Morris County Bar Association in paying tribute to one of my States finest jurists, Judge Robert Muir, Jr., of Mendham.

The citizens of Morris County have been extremely fortunate to have a man of Judge Muir's caliber and dedication to serve them.

A native son of New Jersey, Judge Muir earned his bachelor of arts degree from Wesleyan University, CT, in 1954. Upon graduation, he saw active service, from 1954 through 1956, as an officer in the U.S.

Naval Reserve. With an inherent love and respect for the law, Judge Muir received a juris doctorate degree from New York University Law School in 1959. He was admitted to the practice of law in New Jersey in 1960. From 1960 to 1971, he was engaged in the private practice of law, concentrating in the field of municipal law. During that time, he represented Denville Township, Florham Park Borough, Madison Borough, Mendham Borough and several municipal planning boards.

Judge Muir's expertise and commitment to the field of law were recognized by Gov. William Cahill in June 1971, when he was appointed to the Morris County Court. Shortly after, in March 1973, Judge Muir was appointed to the superior court bench. He was assigned to the chancery division, general equity, of the Superior Court of New Jersey, for the Morris-Sussex-Warren Counties Vicinage, sitting at the court house in Morristown. He then briefly served on the bench in Union County and transferred back to Morris County in January 1974. In September 1976, he was appointed assignment judge of the vicinage by Chief Justice Hughes. The recent designation, by State Supreme Court Chief Justice, Robert N. Wilentz, of Judge Muir to the Superior Court Appellate Division, acknowledges his vast experience and compassionate approach.

Judge Muir resides with his wife, Harriet, and their three children in Mendham. They are active members of the First Presbyterian Church in Mendham, where Judge Muir is an elder.

Mr. Speaker, I join the members of the Morris County Bar Association in paying tribute to this outstanding public servant.

JOHN E. DOWLING

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. DioGUARDI. Mr. Speaker, I am proud to have the opportunity to mention the accomplishments of John E. Dowling, chairman of the board of and chief executive officer of Westchester Financial Services Corp. and the Westchester Federal Savings Bank.

Jack will be retiring at the end of this year. In his time at the helm of WFSB, he turned the institution from a small thrift bank to a billion dollar diversified financial services corporation.

Under Jack's leadership, WFSB introduced many modern services. He was the first banker to offer a money market account, the first to make a condominium loan in New York, and perhaps most importantly, the first to make a student loan.

A prime mover in professional and community service organizations, Jack heads the Westchester County League of Savings Associations and has served as chairman of the board of directors of the New York League of Savings Institutions, as New York's Governor on the National Council of Savings Institutions, as a legislative committeeman of the U.S. League of Savings Institutions and as a trustee of the New York State Bankers Retirement System

In the city of New Rochelle, he is a founder, director, and vice president of the New Rochelle Development Council and chairman of its membership committee. He has also served as president of the Downtown Association, Housing Authority commissioner, Chamber of Commerce director, Rotary Club president, and a Community Chest director for 15 years. He has also been a treasurer of the Westchester County United Fund and president of the Beechwoods Cemetery Association for 7 years and as a trustee for 21.

Jack's interest in our youth is evident by his active role as trustee of the New Rochelle Boys Club, YWCA director, treasurer, and executive committee member of Junior Achievement of Westchester and member of the executive committee of the advisory committee of the New York State Higher Education Assistance Corp. He is a founder and trustee of the Police-Youth Fishing Program for which he has raised funds for the past 16 years and has been a member of the executive board of the Hutchinson River Council of the Boy Scouts of America.

Along with his wife and two other families, Jack founded the Orthodox Presbyterian Church in New Rochelle. He served in World War II in the Pacific Theater as a master sergeant with the Marines and graduated magna cum laude with a B.S. in banking and finance from New York University.

Jack's service to my neighbors in my hometown of New Rochelle is worthy of the admiration of every Member of this body. I thank you Mr. Speaker, for the opportunity to make this statement to the American people.

TITLE X OF THE OMNIBUS BUDGET RECONCILIATION ACT OF 1985

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. MONTGOMERY. Mr. Speaker, earlier today we began debate on H.R. 3500, the Omnibus Budget Reconciliation Act of 1985. Title X of the bill relates to the Committee on Veterans' Affairs.

The eligibility reform provisions contained in title X have been strongly endorsed by the national service organizations and there follows as series of letters from the organizations who have expressed their support of the action taken by the Committee on Veterans' Affairs.

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Washington, DC, September 24, 1985.

Hon. G.V. MONTGOMERY,
U.S. House of Representatives,
Washington, DC.

DEAR MR. MONTGOMERY: The Veterans Administration is presently turning away 25 thousand veterans a month in need of health care and dumping them on the faltering Medicare and impoverished Medicaid systems. The Administration plans to callously exacerbate this shameful situation by imposing a stringent $15,000 annual family income means test for veterans seeking care for nonservice-connected disabilities regardless of age.

A realistic and compassionate alternative to the above insensitive approach has been introduced by the Honorable G.V. (Sonny) Montgomery and the Honorable John Paul Hammerschmidt, passed by the Veterans' Affairs Committee and ordered reported. This honorable resolution of an escalating problem would establish thresholds of $25,000 for a veteran with one dependent and $19,000 for a veteran alone. Veterans exceeding either threshold could, where VA beds are available, receive needed care by making a copayment equal to that under Medicare, estimated at $476 for inpatient care in fiscal year 1986.

The Veterans of Foreign Wars has historically opposed charging war veterans for health care, but being realistic and responsible in resolving a problem due to worsen before it improves, we support the Veterans' Affairs Committee's alternative. On behalf of our two million members and all veterans, I urge you to adopt the Montgomery/Hammerschmidt alternative which will continue to provide health care with dignity for our war veterans in need.

Sincerely yours,

JOHN S. STAUM,
National Commander-in-Chief.

DISABLED AMERICAN VETERANS,
Washington, DC, October 9, 1985.

Hon. G.V. (SONNY) Montgomery,
U.S. House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR CONGRESSMAN MONTGOMERY: The Veterans Administration will finally be given authority to guarantee health care services to our nation's most deserving and needy veterans should the Congress approve legislation recently reported by the House Veterans Affairs Committee—The Veterans' Compensation and Health Care Amendments of 1985 (H.R. 1538).

Earlier this year, the Disabled American Veterans urged the Veterans Affairs Committee to clearly define the scope and direction of VA health care for our nation's veterans. By reporting H.R. 1538, the House Veterans Affairs Committee has responded with a measure that both complies with the reconciliation savings mandated by the First Concurrent Budget Resolution and assures that the health care needs of the nation's service-connected and impoverished veterans are protected.

As reported, H.R. 1538 clearly defines and statutorily mandates the VA to provide health care to specific categories of veterans—service-connected disabled veterans, former prisoners-of-war, veterans exposed to herbicides or ionizing radiation, Spanish American War and World War I veterans, non-service-connected veterans receiving pension, as well as those sick and indigent veterans who are unable to pay for the cost of health care.

This legislation further provides health care, when space and resources are available, for veterans who have private medical insurance, by allowing the VA to collect from private insurance companies. Also, veterans whose incomes are above the generous "means test" limit ($25,000 for a veteran with one dependent and $19,000 for a single veteran) would only be required to pay (during any given 12 month period) a modest "co-payment" which would not exceed the amount of the inpatient deductible of the Medicare Program (approximately $476.00 in FY 1986)—a feature designed to assist those veterans who suffer from catastrophic illnesses.

On behalf of the more than one and a quarter million members of the Disabled American Veterans and its Ladies Auxiliary, I strongly urge you to actively support this fiscally responsible legislation—thus allowing the VA to continue to provide needed health care to our nation's most deserving veterans.

May we count on your support for H.R. 1538? We look forward to your reply.

Sincerly yours,

ALBERT H. LINDEN, JR.,
National Commander.

AMVETS,
Lanham, MD, September 25, 1985.

Hon. G.V. (SONNY) MONTGOMERY,
U.S. House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR MR. MONTGOMERY: On March 20, 1985, in the presentation of our legislative program to a joint session of the Senate and House Veterans' Affairs Committees, AMVETS severely critized the Administration's proposal to impose on all non-service connected veterans, including those aged 65 and older, what we described as "a pauper's test in order to receive medical care from the VA".

The agreement worked out in the Senate/House Budget Conference this past August requires a $300 million cut of VA funds requested by the Administration in February. One of the ways of effecting the cut would be imposition of the "means test", cutting off non-service connected care for veterans with incomes of $15,000 or higher. On September 11, 1985 the House Veterans Affairs Committee favorably reported HR 1538, the Veteran's Compensation and Health Care Amendments of 1985. This measure, introduced by the Chairman of the Committee, G.V. (Sonny) Montgomery and Ranking Minority Member John Paul Hammerschmidt, in addition to raising compensation and DIC rates by 3.7%, would provide for non-service connected VA medical care to single veterans with annual income of $19,000 or less and veterans with one dependent with an income of $25,000 or less, increasing in $900.00 increments per additional dependent. Other non-service connected veterans who were not exposed to certain herbicides or ionizing radiation, are not former POW's World War I veterans or drawing pension would be entitled, as they now are, to space available VA medical care, but with the payment of an annual fee of approximately $476.00.

Considering the numerous and expensive subsidy programs included in the budget agreement which do not relate to veterans, and the steep annual increase of some of those programs, it is a shame that we are asked to cut corners on the VA budget which has not even kept pace with inflation and increasing demands. The Montgomery/Hammerschmidt proposal (HR 1538) does, however, represent about the most compassionate approach thus far advanced for making the cuts in the VA budget and yet preserving the effectiveness of the VA health care system. On behalf of the more than 200,000 members of AMVETS, I urge your support for the enactment of HR 1538.

Sincerely,

ROBERT A. MEDAIROS,
National Commander.

PARALYZED VETERANS OF AMERICA,
Washington, DC, October 15, 1985.

Hon. G.V. (SONNY) MONTGOMERY,
U.S. House of Representatives, Washington, DC.

DEAR REPRESENTATIVE MONTGOMERY: The Paralyzed Veterans of America would like to inform you that H.R. 1538, the Montgomery/Hammerschmidt health care proposal, has been incorporated into Title X of H.R. 3500, the Omnibus Budget Reconciliation Act of 1985. We also seek your favorable consideration and support for the provisions of Title X.

Your endorsement of Title X will acknowledge the fact that the Committee on Veterans' Affairs has met the cost-saving goals as mandated by S. Con. Res. 32, and that it has done so in such a manner that few, if any, veterans will be adversely affected. Secondly, and more importantly, Title X, if enacted, will remove the existing ambiguity of "who is eligible and who shall pay" for the health-care services currently provided by the Veterans Administration.

Title X provides a clear definition of a veteran's VA health-care eligibility. This eligibility criteria will serve all veterans well. It will ensure veterans that the existing VA health-care system will be available for their use, not only for today, but for the many unknown tomorrows which we all hope to enjoy.

As a congressionally chartered veterans' service organization, comprised almost equally of service-connected and nonservice-connected, catastrophically disabled veterans, PVA can personally attest to the need for the provisions contained within Title X. We can also attest to the dedication and concern with which Title X was crafted by its authors, the Honorable G.V. (Sonny) Montgomery and John Paul Hammerschmidt, Chairman and Ranking Minority Member of the House Committee on Veterans' Affairs, respectively. Their 34 years of congressional service to the needs of our Nation's veterans is testimony in itself of the value of Title X.

The question before you now is not "Do I support a means test for veterans?" The question is "What means test shall I support?" We encourage you to honor your colleagues, and the Nation's 28 million veterans, support Title X of H.R. 3500 when it comes up for consideration in the full House.

Sincerely yours,

RICHARD D. HOOVER,
National President.

BLINDED VETERANS ASSOCIATION,
Washington, DC, September 25, 1985.

Hon. G.V. MONTGOMERY,
Chairman, Committee on Veterans Affairs, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Blinded Veterans Association supports the Amendment to the Compensation Health Care Bill which was offered by Representative Hammerschmidt and you.

After having reviewed the individual aspects of the amendment, we feel that it not only facilitates the reduction of the budget authority and outlays but also addresses our concerns on veterans health care in a positive manner.

We are in agreement with the outlined categories of veterans that would be eligible for VA hospital care including the income levels you have designated.

We find your plan to be more equitable in content and simpler to administer than any other plan we have seen thus far, and wish to lend our support in seeing it implemented.

Sincerely,

ROBERT ROUTH, JR.,
National President and Chairman of the Board.

VETERANS OF WORLD WAR I
OF THE U.S.A., INC.,
Alexandria, VA, October 4, 1985.

Hon. G.V. MONTGOMERY,
Chairman, Committee on Veterans' Affairs, U.S. House of Representatives, Washington, DC.

DEAR CHAIRMAN MONTGOMERY: We are in receipt of the Montgomery-Hammerschmidt Amendment to the Compensation Health Care Bill. As the newly elected and installed National Commander of the Veterans of World War I of the U.S.A., Inc., and the official spokesman for the Organization, I wish to express the sincere appreciation of the membership for their inclusion in the outlined categories of verterans.

For so many years, the World War I veterans have been overlooked and left out completely from legislation regarding our veteran population.

The original plan of the Administration to impose a $15,000.00 annual family income means test for veterans seeking care for nonservcie-connected disabilities regardless of age, has been a concern to our unique membership. Under this Amendment, the World War I veterans, service-connected or not, would be *equally* entitled to V. A. Health care, regardless of income.

Many of the World War I veterans do not have insurance through an outside source and are solely dependent on the care through the Veterans Administration.

We are therefore, pleased to state the Veterans of World War I of the U.S.A., Inc., support this Amendment and appreciate being asked to contribute our thoughts in support of this Amendment.

Sincerely,

CHARLES C. WILSON,
National Commander.

VIETNAM VETERANS OF AMERICA, INC.,
Washington, DC, October 9, 1985.

Hon. G.V. ("SONNY") MONTGOMERY,
Chairman, Committee on Veterans Affairs, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I am writing to express the appreciation and respect of Vietnam Veterans of America for your courageous action in developing a means test for the VA's health care system. The proposal developed by you and your colleague, Congressman John Paul Hammerschmidt, is a significant step both in maintaining the integrity of the system itself, and in addressing the enormous demand which will be placed upon VA medical care in the closing years of this century.

As you know, VVA is vitally concerned with the future of all veterans benefits and health care, particularly in light of the huge

federal deficits faced by this nation, as well as an aging veteran population which is expected to double in the next decade. Both in our appearances before the Committee and in other forums, we have suggested that the veterans community needs to carefully examine the system of benefits and services developed over the past forty years, to determine what changes need to be made to sustain programs for veterans which not only address the legitimate needs of those who served their country, but are in the overall national interests as well. To neglect such an assessment, in our opinion, invites the intercession of those whose only consideration is budget trimming, and who care little for either the veteran or the programs and services established to care for his or her needs.

There is no better illustration of this than the Administration's draconian means test proposal. As evisioned by OMB, admittance to a VA facility would be denied unless the veteran and family were at a poverty levels income. As you rightly pointed out, this might force many veterans to spend down to poverty level, exhausting what little assets they may have spent a lifetime accumulating.

Clearly, we as veterans must put our own house in order. Your proposal is an excellant indication that we are ready to do so. We applaud your efforts and look forward to working with you on the tasks before us.

Sincerely,

ROBERT O. MULLER,
President.

JEWISH WAR VETERANS OF THE UNITED STATES OF AMERICA,
Washington, DC, October 17, 1985.

Hon. SONNY MONTGOMERY,
Chairman, House Committee on Veterans Affairs, Washington, DC.

DEAR REPRESENTATIVE MONTGOMERY: After reviewing, "The Veterans Compensation and Health Care Amendments Act of 1985," I am pleased to inform you that the Jewish War Veterans of The United States of America strongly supports passage of H.R. 1538.

I would like to take this opportunity to commend the Committee on Veterans' Affairs, and you as its Chairman, for developing legislation that clearly defines the categories of veterans that the VA must provide service for. In addition, you have been able to achieve the $300 million in unspecified costs savings for fiscal year 1986 mandated by the Budget Conference Committee and still provide a cost-of-living increase of 3.7% for veterans receiving compensation for service-connected disabilities.

While we still oppose a means test for treatment of non-service connected veterans, to receive care on a space available basis, we believe that the solution offered in H.R. 1538 is far more equitable than those offered by the Administration.

Again, on behalf of the Jewish War Veterans of the U.S.A., the nation's oldest active veterans organization, we commend you and your Committee.

Sincerely,

HARVEY S. FRIEDMAN,
National Commander.

CATHOLIC WAR VETERANS OF THE UNITED STATES OF AMERICA,
Washington, DC, October 17, 1985.

Hon. G.V. MONTGOMERY,
Chairman, House Veterans' Affairs Committee, Washington, DC.

DEAR CONGRESSMAN MONTGOMERY: The Catholic War Veterans of the United States of America, Inc., support the provisions of H.R. 1538—Veterans' Compensation and Health Care Amendments of 1985, as approved by the House Veterans' Affairs Committee.

Sincerely,

WALTER DRAHAN,
National Commander.

MILITARY ORDER OF THE PURPLE HEART,
Springfield, VA, October 3, 1985.

Hon. G.V. (SONNY) MONTGOMERY,
Chairman, Committee on Veterans' Affairs, Washington, DC.

DEAR CONGRESSMAN MONTGOMERY: The enclosed letter to the Chairman of the Committee on the Budget pertaining to H.R. 1538 is for your information.

We want to thank you for your dedication and service not only to our combat-wounded veterans, but to all veterans.

We totally support you in your endeavors to provide for our veterans.

Yours in Patriotism,

RICHARD J. GALLANT,
National Service Director.

Enclosure.

MILITARY ORDER OF THE PURPLE HEART,
Springfield, VA, October 2, 1985.

Hon. WILLIAM H. GRAY,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Military Order of the Purple Heart urges you and the distinguished members of your committee to adopt the Montgomery/Hammerschmidt Amendment; H.R. 1538, Veterans Compensation and Health Care Amendments of 1985.

It is our opinion that H.R. 1538 provides the requisite cost savings as directed by your committee, without emasculating veterans' programs.

Mr. Chairman, we would be remiss if we did not state that we believe, veterans' programs overall are well managed, are a recognition of the sacrifices made by our veterans who answered our country's call to arms, and that they have and continue to provide many spin-off benefits to all of our citizens, such as the housing industry, medical field, and education.

As you know, it is possible to expostulate for hours on either side of any issue. We prefer to state to you and through you to the members of the Committee on the Budget, that one of the highest responsibilities of the members of the U.S. Congress is to provide for our combat-wounded disabled veterans, while at the same time being aware of the needs within the general veteran population and the essential desire to provide for their needs as well as the service connected disabled veteran.

Too often in times of emergencies, currently our Federal Budget Deficit, the actions taken are those that solve an immediate crisis, but not the root problem. Veterans' programs are not the root problem. There are many factors such as Domestic Economics, International Trade, Balance of Payments, Interest Rates, etc. We ask, therefore, that you and the distinguished members of your committee, with great deliberation, recognize that there has been a great amount of economizing on veterans' issues by the Committee on Veterans' Affairs, and that their proposal H.R. 1538 reflects their expertise. Further, their recommendation provides an equitable solution to the dilemma of finding cost-savings within the programs and the Federal Budget.

Mr. Chairman, there comes a time when dealing with the overall socio-economic realities of the Nation, priorities need to be established and maintained. Of all groups fitting that broad scenario, the honorably discharged service connected veteran has more than paid his dues to his country. In fact, all veterans have and should be a top priority in your committee. We have a saying here at the Purple Heart about our combat-wounded disabled veterans, "For our today . . . they gave their tomorrows." So, let all of us use our todays to provide for those essential needs as outlined in H.R. 1538.

Thank you, Mr. Chairman, for your consideration and favorable action to meet the needs of our veterans.

Yours for Patriotism,

RICHARD J. GALLANT,
National Service Director.

MARINE CORPS LEAGUE,
Arlington, VA, October 4, 1985.

Hon. G.V. (SONNY) MONTGOMERY,
U.S. House of Representatives, Washington, DC.

DEAR MR. MONTGOMERY: The purpose of this letter is to advise you that as National Director of Veterans Services, and on behalf of the National Commandant of the Marine Corps League, I am pleased to report that the League supports the Montgomery-Hammerschmidt Amendment relative to veterans health care and the reduced budget authority and outlays during the next three fiscal years.

Thank you for your continued strong interest in veterans and your support of them and their families.

Sincerely,

E. RANDALL,
National Director of Veterans Services.

FLEET RESERVE ASSOCIATION,
Washington, DC, October 4, 1985.

Hon. G.V. MONTGOMERY,
Chairman, Veterans' Affairs Committee, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: This letter is to inform you and the Veterans' Affairs Committee of the Fleet Reserve Association's enthusiastic and complete support of the Montgomery-Hammerschmidt amendment embodying the health care provisions of H.R. 1538. I have spent the past week informing our membership of the provisions, and they are delighted to see the language of the bill and fully concur with the amendment's use of the word "shall."

We have no qualms about the means test provision and accept your explanation of how the Veterans' Administration will administer the test; as explained by you, the administrative procedures are equitable and reasonable.

The initial payment of $476 for inpatient care for any non-service-connected veteran certainly is not an unwarranted charge. As you know, for 20 years, military retirees have been assured health care in civilian medical facilities on a cost-sharing basis (CHAMPUS); therefore, we find this provision very equitable.

The Fleet Reserve Association fully supports the principle of third-party reimbursement in the field of medical care. If a veteran feels that he is entitled to health care for a service-connected health problem at government expense, then surely he can find no fault with the philosophy of third-party reimbursement because he is surely entitled to the protection of the private health insurance coverage he has either through his personally paid premiums or by virtue of his employment if the coverage is a benefit of his employment.

It is for these reasons the 168,000 Shipmates of the Fleet Reserve Association heartily endorse the provisions of H.R. 1538 and commend you and Mr. Hammerschmidt for your innovative thinking and action in assuring the continuing care of America's veterans while realistically addressing the funding of such care in a practical manner.

With best wishes for your continuing service to the veterans of the United States, the U.S. Congress and our nation, I remain sincerely in

Loyalty, Protection and Service,
ROBERT W. NOLAN,
National Executive Secretary.

HELEN HAYES—THE THEATER'S FIRST LADY IS 85 YEARS YOUNG

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. GILMAN. Mr. Speaker, I wish to call to the attention of our colleagues the birthday celebrated this month by one of my favorite constituents, "Rockland's Rose," Miss Helen Hayes.

Helen Hayes has been celebrated as the "first lady of the American theater" before most of us in this Chamber were born. A native of Washington, DC, she made her acting debut in 1905 with the Columbia Players here in Washington. At age 9, she gave her first New York performance on November 22, 1909, and by 1920—after touring the country as "Pollyanna"—she was recognized as a Broadway star.

The roles of Helen Hayes made memorable on the stage are too numerous to list in their entirety. In "What Every Woman Knows" in 1926, in "Coquette" in 1927, in "Mary of Scotland" in 1933, and in her role as Queen Victoria in "Victoria Regina" in 969 performances, from 1935 until 1939, in each performance aging 80 years in 2½ Khours, Helen Hayes earned a reputation as a versatile actress that many aspiring young hopefuls studied with envy and awe. She also became acclaimed in motion pictures and on television, winning Oscars in 1932 and in 1971 and delivering many performances which remain memorable to generations of viewers.

Helen Hayes has never been content to rest on her career laurels. In 1979, she received the Catholic Interracial Council of New York "Hoey" Award for her efforts to end racial discrimination by theaters throughout the Nation. The fact that Miss Hayes led this fight in the 1940's—long before it was fashionable or politically acceptable to do so—adds further luster to this honor.

Helen Hayes is also recognized as a spokesperson for the elderly. She was quoted in the Washington Times a few years ago as saying:

It's hard for some people to say "the elderly" or "the old," but not for me, because I just know I am old and that's nice. I just think any ducking of the issue is depressing to me.

Helen Hayes is a well-known lobbyist and fundraiser for countless worthy organizations, including the Actors Fund of America Home in Englewood, NJ.

Undoubtedly, however, her favorite cause is the Helen Hayes Hospital in Haverstraw, NY. Thousands of patients lead happy lives today because of the efforts of Helen Hayes to raise funds over the years for this modern rehabilitation facility.

Miss Hayes has been a resident of Nyack, NY, for nearly 50 years. She moved to the beautiful Hudson River Valley with her late husband, the playright Charles MacArthur, soon after their marriage, and remains our good Rockland County neighbor until this day.

Earlier this month, all of Rockland County and the surrounding region joined in celebrating as Helen Hayes became 85 years young. In this tribute to Helen Hayes, President Reagan said:

. . . She is ever and always a lady, a lady of warmth and kindliness, as eternally feminine as she was when she captured the hearts of all who saw her on stage or screen . . . she was a superb actress . . . there was beauty and an inner light that was Helen Hayes herself shining through every role she played.

Mr. Speaker, I invite my colleagues to join with me in saluting Helen Hayes, a beautiful, talented actress, a dedicated humanitarian, and a great American.

THE 100TH ANNIVERSARY OF THE NEW ROCHELLE POLICE DEPARTMENT

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 23, 1985

Mr. DIOGUARDI. Mr. Speaker, I am honored to have the privilege to speak on behalf of the Police Association of New Rochelle on the occasion of the 100th anniversity of the city police department.

Throughout the years, those of us who are lucky enough to live in the Queen City on the Sound, have been proud of the efforts of the New Rochelle Police Department and their continuing work on behalf of our city.

I am also proud to make some brief comments about the two dinner honorees. Hon. Carl Vergari, our district attorney, and Hon. Rudolph Giuliani, our U.S. attorney for the southern district of New York.

Carl will be this year's recipient of the Life Achievement Award. His efforts on behalf of Westchester's taxpayers and law abiding citizens are countless in his nearly 20 years as our chief law enforcement official in Westchester.

Rudy will be this year's recipient of the Crimebuster of the Year Award. A tireless soldier in the battle against organized crime, he has done this thankless job with much hard work and tireless dedication.

I can think of no more appropriate occasion for these two fine men to be honored under the same roof. To Rudy, Carl, and the men and women of the New Rochelle Police Department, I salute you. Thank you, Mr. Speaker.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, October 24, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

OCTOBER 25

9:30 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold hearings on the impact of lead phasedown on farm vehicles and heavy duty engines.
SD-406

OCTOBER 28

9:30 a.m.
Finance
Health Subcommittee
To hold hearings on S. 1551, to provide for administrative appeals and judicial review under Part B of Medicare, and to review the beneficiary and provider appeals provisions under Parts A and B of the Medicare program.
SD-215

OCTOBER 29

9:30 a.m.
Commerce, Science, and Transportation
To hold oversight hearings on the implementation of the Motor Carrier Safety Act (P.L. 98-554).
SR-253

*Judiciary
Constitution Subcommittee
To resume hearings on S. 1580, to revise federally mandated attorneys' fees applicable to civil, criminal, and administrative proceedings involving the United States and civil proceedings involving State and local governments.
SD-538

Labor and Human Resources
Handicapped Subcommittee
To hold hearings on the Tenth Anniversary of the Education for All Handicapped Children Act (P.L. 94-142).
SD-430

Rules and Administration
Business meeting, to consider S. 581, to authorize construction of facilities for the Whipple Observatory in Arizona and to authorize repair and replacement of facilities at the Tropical Research Institute in Panama, S. 582, to authorize funds for museum programs of the Smithsonian Institution, S. 583, to authorize funds for construction of additional facilities for the Cooper-Hewitt Museum in New York, S. Res. 28, S. Res. 29, and S. Res. 81, measures to set forth regulations to implement television and radio coverage of Senate Chamber proceedings, and administrative business.
SR-301

10:00 a.m.
Armed Services
Defense Acquisition Policy Subcommittee
To resume oversight hearings to review the status and impact of certain legislative provisions to reform the defense acquisition process.
SD-628

Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S. 1107, to authorize the Society of the Third Infantry Division to erect a memorial in the District of Columbia or its environs, S. 1223, to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean War, S. 1379, to authorize the erection of a monument given to the American people as a gift of the Kingdom of Morocco, on public grounds in the District of Columbia, S.J. Res. 143, to authorize the Black Revolutionary War Patriots Foundation to establish a memorial in the District of Columbia at an appropriate site in Constitution Gardens, S.J. Res. 184, to authorize the Korean War Memorial, Inc. to erect a memorial in the District of Columbia, and S.J. Res. 156, to authorize a memorial to women who served in the armed forces to be erected in the District of Columbia.
SD-366

Governmental Affairs
Permanent Subcommittee on Investigations
To hold hearings on the Federal enforcement of the Bank Secrecy Act (title 31 of the U.S. Code).
SD-342

Judiciary
To hold hearings on S. 1335, Money Laundering and Related Crimes Act of 1985.
SD-226

2:00 p.m.
Appropriations
Foreign Operations Subcommittee
Business meeting, to mark up provisions of H.R. 3228, appropriating funds for fiscal year 1986 for foreign assistance and related programs.
S-126, Capitol

OCTOBER 30

9:30 a.m.
Environment and Public Works
To hold oversight hearings on the Department of Energy's high-level radioactive waste disposal program.
SD-406

Judiciary
Criminal Law Subcommittee
To hold hearings on S. 440, Computer Systems Protection Act of 1985, and other computer fraud related measures.
SD-226

Judiciary
Patents, Copyrights and Trademarks Subcommittee
To hold hearings on S. 1739, Home Audio Recording Act.
SD-562

Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

10:00
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the effects of domestic violence.
SD-628

Select on Indian Affairs
Business meeting, to mark up S. 1684, to declare that the U.S. holds certain Chilocco Indian School lands in trust for the Kaw, Otoe-Missouri, Ponca, and Tonkawa Indian Tribes of Oklahoma, S. 1728, to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to ninety-nine years, S. 1298, to coordinate and expand services for the prevention, identification, and treatment of alcohol and drug abuse among Indian youth, S. 1621, to revise the Indian Education Act Amendments of 1978, by defining the eligibility of children who attend the Bureau of Indian Affairs funded schools, and S. 1396, to settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation in Minnesota.

1:00 p.m.
Judiciary
Courts Subcommittee
Business meeting, to mark up S. 704, to establish an Intercircuit Panel of the United States Courts of Appeals to decide cases referred by the U.S. Supreme Court.
SD-226

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
SD-226

OCTOBER 31

9:30 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings on the financial condition of the farm credit system, and to discuss possible legislative remedies.
SR-328A

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on S. 240, to start daylight savings time on the first Sunday of March, and S. 1433, to start daylight savings time on the first Sunday of April and to end it on the first Sunday of November.
SR-253

Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-430

10:00 a.m.
Small Business
To hold oversight hearings on activities of the Small Business Administration's Office of Veterans Affairs.
SR-428A

2:00 p.m.
Appropriations
Business meeting, to mark up H.R. 3327, appropriating funds for fiscal year 1986 for military construction programs of the Department of Defense, and provisions of H.R. 3228, appropriating funds for fiscal year 1986 for foreign assistance and related programs.
SD-192

Joint Library
To hold a general business meeting.
H-328, Capitol

4:00 p.m.
Select on Intelligence
Closed briefing on U.S. intelligence monitoring capabilities.
SH-219

NOVEMBER 1

9:15 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Staggers Rail Act (P.L. 96-448).
SR-253

9:30 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on the financial condition of the farm credit system, and to discuss possible legislative remedies.
SR-328A

NOVEMBER 4

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To resume oversight hearings on the implementation of the Staggers Rail Act (P.L. 96-448).
SR-253

NOVEMBER 5

9:30 a.m.
Rules and Administration

Appropriations
Military Construction Subcommittee
Closed business meeting, to mark up H.R. 3327, appropriating funds for fiscal year 1986 for military construction programs of the Department of Defense.
SD-116

HOUSE OF REPRESENTATIVES—*Thursday, October 24, 1985*

The House met at 10 a.m. and was called to order by the Speaker pro tempore [Mr. WRIGHT].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
October 23, 1985.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Thursday, October 24, 1985.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

Rabbi Lynne Landsberg,, Temple House of Israel, Staunton, VA, and Beth El Congregation, Harrisonburg, VA, offered the following prayer:

Lord, this day, be with those whom we have chosen to lead us. We pray this morning for all men and women who hold positions of responsibility in our national life. Let Your blessing rest upon them. Allow them to listen to each other with open minds and hearts so that they may be responsive to Your will—that our Nation be to the world an example of justice and compassion.

Cause each of us to see clearly that the well-being of our Nation is in the hands of all its citizens. Deepen our love for our country and our desire to serve it. Teach us to uphold its good name by our own right conduct.

Lord, You are the Lord of all nations and parent to all creation. Help us to understand that freedom is a worldwide right that when guarded for only a select few is in itself defeated.

Imbue us, therefore, with zeal for the cause of liberty in our own land and in all lands so that all who live on this Earth may find freedom, prosperity, contentment, and peace—their heritage as children of God.

We rejoice in the variety of perspectives that constitutes this House of Representatives. We rejoice in the pluralism that defines our country. And on this, the 40th anniversary of the United Nations, we rejoice in the spectrum of cultures that colors the entire human family. For the joy of community, for the gift of diversity, and for the vision of harmony, we offer our grateful thanks.

"Baruch atah adonai elohenu melech haolam shehechehyanu, v'keeyihmanu, v'higiyanu, lazman hazeh." Blessed are You, O Lord, our God, who gives us life, sustains us, and has brought us in health to the tasks of this day. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

RABBI LYNNE LANDSBERG

(Mr. OLIN asked and was given permission to address the House for 1 minute.)

Mr. OLIN. Mr. Speaker, it is with great pleasure that I rise to introduce Members of the House to Rabbi Lynne Freyda Landsberg, who is our guest chaplain today.

Rabbi Landsberg was among the first 30 women ordained as rabbis in the United States. She came to the Shenandoah Valley of Virginia last year to serve a seven-county area. She is the valley's only rabbi and first woman in that position. Her congregations are Temple House of Israel in Staunton and Congregation Beth El in Harrisonburg.

She comes to our valley with an impressive educational background: bachelor of science in education from Boston University, master of theological study at Harvard Divinity School, and master of arts in Hebrew literature from Hebrew Union College, Jewish Institute of Religion.

While maintaining a heavy schedule in professional activities, both locally and nationally, she is also taking a very active part in the cultural life of our valley and we are proud that she has been honored by being selected to be here today.

PERMISSION TO MODIFY LATTA AMENDMENT TO H.R. 3500, OMNIBUS BUDGET RECONCILIATION ACT OF 1985

Mr. LATTA. Mr. Speaker, I ask unanimous consent to strike from my amendment which appears on page H8910 of the CONGRESSIONAL RECORD of October 17, 1985, the following, "Page 481, strike out line 1 and all that follows through line 6 on page 486." and insert in lieu thereof the following: "On page 482, line 11, strike out "1986" and insert "1988." "; "Strike out section 10025 and subtitle C of title X (page 537, line 17, through page 545, line 8)."; and all the conforming amendments to page 486 through 494.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

FREEDOM TO EXERCISE RELIGION IN PUBLIC PLACES

(Mr. ARMEY asked and was given permission to address the House for 1 minute.)

Mr. ARMEY. Mr. Speaker, Thomas Jefferson was in France when James Madison finally got the Virginia General Assembly to adopt a statute for religious freedom. Jefferson had written this statute 7 years earlier and said that getting it passed was "the severest contest in which I have ever been engaged."

This statute put in words the idea of separation of church and state. Today, this separation doctrine is being used to restrict religious freedom.

What better way to understand what Jefferson meant in the statute than to listen to his own words:

> That no man shall be compelled to frequent or support any religious worship, place, or ministry whatsoever, nor shall be enforced, restrained, molested, or burthened in his body or goods, nor shall otherwise suffer on account of his religious opinions of belief * * *.

Mr. Speaker, what Mr. Jefferson wanted for Americans was not freedom from religion, but freedom to pursue religion wherever their conscience led.

Many Americans feel compelled to exercise this freedom in public places. I seriously doubt Mr. Jefferson would object.

GIVE OUR YOUNG PEOPLE JOB OPPORTUNITIES

(Mr. COMBEST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COMBEST. Mr. Speaker, summer jobs play an extremely important role in the future of any young person. In addition to the monetary benefits received, summer employment demonstrates responsibility and ambition to prospective future employers.

Unfortunately, youth unemployment remains high, particularly for minorities. Some of these young people do not have the skills necessary to earn the minimum wage and are unable to secure jobs even during the

summer when youth employment is at a peak.

There is a proposal currently pending in the House that would help to alleviate this unemployment problem. H.R. 1811, the Youth Employment Opportunity Wage Act of 1985, would allow employers to hire youths at $2.50 per hour during the summer months. This legislation has built-in safeguards to prevent displacement of regular employees in favor of the subminimum wage earners.

I encourage my colleagues to join me in cosponsoring H.R. 1811 which is endorsed by the National Federation of Independent Business, the U.S. Chamber of Commerce, and other organizations. We must give our young people the opportunity to obtain the experience that will ultimately fortify our Nation's work force.

FARM CREDIT SYSTEM

(Mr. VALENTINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VALENTINE. Mr. Speaker, I think all of us here today realize the immensity of the crisis which America's farmers are currently facing, not only because of the depressed agricultural economy, but because of the farm credit crisis as well. Every day we see news stories about farmers across this great Nation being forced to leave their farms, family farms which may have been handed down from generation to generation, because they are unable to pay their mounting debts caused by rising interest rates and depressed commodity prices.

It is because of the pain I have seen in the faces of these farmers that I stand here today imploring this body to join me in supporting House Concurrent Resolution 190. The Farm Credit System is in urgent need of repair, and it is vital that the proposed National Commission on the Farm Credit System be approved without further delay.

This crisis will not go away overnight. It is only going to get worse unless direct and immediate action is taken by the President in conjunction with Congress. Because the proposed Commission would report its findings and recommendations to the President and Congress within 3 weeks of its creation, the Farm Credit System could soon be on a path toward recovery, ending the uncertainty and destabilization that has victimized the agricultural economy in recent years.

YOUTH OPPORTUNITY WAGE ACT

(Mr. SCHUETTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUETTE. Mr. Speaker, I rise today in support of the Youth Opportunity Wage Act, and would urge my colleagues and 69 other Members of the House who joined with me in sponsoring this piece of legislation to join in and be a sponsor of this important tool to reduce the high teenage unemployment that is gripping this Nation because we see teenagers, young people under 20, frozen out of the job market today. This legislation would permit and would have safeguards so we do not displace or discharge or transfer existing jobholders. By sponsoring this legislation and passing this legislation we would give young people an opportunity for a job. We would give young people an opportunity for career development and we would be giving young people hope for a better future.

So, Mr. Speaker, I urge my colleagues to join with me in sponsoring the Youth Opportunity Wage Act.

I thank the Speaker.

NUCLEAR TECHNOLOGY IN THE HANDS OF TERRORISTS

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. I thank the Speaker.
